radiate to Uberaba, Jaboti, Cabal, Jahu, Botucatu, Itapetinga (basin of Paraná) to Abaéte, Sabará, Ouro Preto (pass at 4468 ft. basin of the São Francisco). Railways have been commenced to the interior from Camocim, Fortaleza, Natal, Parahiba, Recife, Maceió, Bahia (above the falls of riv. São Francisco), Caravellas, Laguna, Porto Alegre (the latter in connection with the Plata railways). Many local railways are connected with these. In 1867 B. had only 373 m. of railways; in 1880, 2183 m.; in 1893, in operation, 6651 m.; in construction, 3815 m.; under survey, 5340 m.; projected, 9.071 m.; state lines, 1586 m. With the exception of the roads in Rio de Janeiro, São Paulo, and one between Ouro Preto, Goyaz, and Cuyabá (Matto Grosso) there are no regular highways in B. Telegraphic cables connect Pernambuco with Lisbon (through Cape Verde and Madeira), with St. Louis du Senegal by Fernando do Noronha, and with New York. Another, 3720 m. long, connects the different points along the coast from Belem to Montevideo. Cuyabà, in Matto Grosso, is already in telegraphic connection with Rio de Janeiro. In 1880 B. had 4305 m. of telegraphs; it had 9145 m. in 1893. They belong to English companies under government control. **Commerce.**—In 1808 the ports of B. were open to International trade. In 1852 the riv. Uruguay, in 1858 the riv. Paraguay, in 1867 the riv. Amazon, were open to all flags. In 1864–69 the exportation of cotton became important; from 1870 began the great exportation of coffee. For statistics, see **Appendix.** The countries with which the trade of B. is carried on are, in order of importance, United States, Great Britain, France, Germany, Italy, Portugal. The principal articles of exportation are: coffee (more than four-fifths of total), caoutchouc, goat-skins, sugar, cacao, Pará nuts, cotton, tobacco, mate, medicinal plants, hides, building, cabinet, and dyeing woods, gold, diamonds. Great Britain sends principally manufactured cotton wool, iron, coals, and machinery. Commerce has increased considerably with Italy and Germany since the great settlements in B. of natives of these countries. The metric system of **weights and measures** is compulsory (since 1874); but ancient measures are still in use (*Arroba* = 32.38 lbs.; *Quintal* = 129.54; *Libra* = 1.012 lbs.; *Alqueire* = 1 imperial bushel; *Oitava* = 55.34 grains). **Money.**—Although the legal standard is gold, and the unit the *milreis*, of the value of 2*s.* 2⅛*d.* (10 milreis gold-piece = 8.9648 grammes, 916 fine; 2.000 silver piece = 25.5 gramme, 916 fine), the circulation is now entirely paper currency, with nickel and bronze coins. English sovereigns are legal tender. The three great stocks of the **population** are the White (Europeans), the African negroes, and the native Indians, very much mixed at the present time, called *Caboclos*, *Cafuzos*, or *Mestiços*, when of mixed Negro and Indian blood; *Pardos Mulattos*, of mixed White and Negro blood, and *Mamelucos* (formerly *Membyruca*), of mixed White and Indian blood. The negroes have gone more to the N. tropical climates. The Europeans now concentrate more in the S. temperate dists. (1872, Europeans, 4,000,000; Negroes, 2,000,000; Mestiços, 4,000,000; Indians, 1,000,000). The population has increased at a rapid rate; in 1585 (only including the so-called civilised Indians) was estimated at 57,000 (25,000 being Europeans); in 1776, 1,900,000; 1817, 3,800,000; 1872, 10,700,000; 1883, 12,600,000. In the last ten years the population has remained almost stationary in the N. and centre, but has doubled in the S. Three thousand **immigrants** arrived from 1808–54 annually to Brazil, 16,000 from 1855–85, 98,400 from 1886–92, and from 1871–92 nearly one million. Down to the beginning of the 19th century immigration was almost exclusively Portuguese. Until 1872, Portuguese immigrants formed two-thirds of the total. After 1873, Italians predominate; 100,000 arrived in 1892. There are now in all B. more than one million. In 1820 a Swiss colony was established in Rio de Janeiro (Nova Friburgo, an important town now). In 1824 the German colony of São Leopoldo (Rio Grande do Sul) with 8000 in 1827, now very important town in a dist. with more than 40,000. There are many other German colonies (some now mixed with Italians) in Santa Catharina (from 1824–51; Blumenau with 20,000 in 1889, Joinville, Dona Francisca, Nova Trento, São Pedro de Alcantara), Rio Grande do Sul (from 1849, Santa Cruz, important town in a dist. with more than 20,000; Nova Petropolis, Trez Forquilhas), São Paulo (Ribeirão Preto, Santo Amaro, and forty more colonies), Rio de Janeiro (Petropolis from 1846). From 1818–30, 6856 German immigrants, from 1838–84, 71,247. In 1889 only 230,000 Brazilians of German origin retained their language and original customs. Immigrants are now Italians, Portuguese, Spanish, German, and of all European nationalities. The Portuguese live principally in the towns, and are traders and industrial. A law permits (from Sept. 1892) Chinese and Japanese immigration. The *Companhia Metropolitana* made a contract with the government (1st Jan. 1893) for the introduction of one million European immigrants in ten years. There are large asylums (*Hospedarias*) in São Paulo (for 4000), Rio de Janeiro (Macahé), Minas Geraes (Juiz de Fóra), and Pernambuco for immigrants, with agencies for their employment. In the dry years *Cearenses* emigrated to the Amazon region and the S. Settlements from Ceará are numerous in the Amazons valley, at the mouth of the principal affluents (Tapajoz, Rio Negro). There is also a good deal of emigration from Minas and central Bahia to São Paulo. **Nosology.**—There are in B. all the diseases of tropical climates. Skin diseases are prevalent; leprosy (*Morphea*, *Pé de S. Thomé*), *Piau*, *Puru-puru*. The yellow fever is endemic (since 1850) in some parts (all the coast except Rio Grande do Sul), so is the *Beri-beri* (in the N.). **Political Institutions.**—B. forms a federation of twenty states (see table and special articles), and one federal dist. with the central govt. States are divided into *Comarcas*, *municípios* (892), *termos* and *freguesias* (parishes, 1886). For naval purposes B. is divided into five *Perfeituras:* two for the river administration (Amazonas, Matto Grosso), and three maritime (N., centre, and S.). The constitution is modelled on that of the United States of America. The deputies for the Federal Parliament are 205 (1 to 70,000 electors); the senators, 63 (3 for each state). All privileges or honorary titles have been abolished. The electorate is composed of all citizens above twenty-one years, knowing how to read and write, and having an independent occupation. Military service is compulsory (1875), but, in fact, is largely by voluntary engagement; 6 years of active service, 3 in the reserve; 15,000 to 20,000 in time of peace; 1,000,000 National Guards. The soldiers are mostly negroes. The war navy was, in 1893, 8 armour-clad battleships, 3 armour-clad cruisers, 3 wood cruisers, 17 gun-boats and 28 different smaller ones, with 250 guns, 700 officers, and 4000 men. Arsenals in Belem, Recife, Bahia, Rio de Janeiro, and Ladario (riv. Paraguay, Matto Grosso). The **capital** is at present Rio de Janeiro, but it is to be removed and established in a federal dist. 37,300 sq. m. in extent amongst the Pyrenean Mts., on the plateau where the Tocantins, São Francisco, and Paraná have their sources. **Instruction.**—In 1872, 23 men to 13 women in 100 could read; only 1 in 1000 negroes; in 1893 about one half of the adult population were still unable to read. In 1886 there were 6224 schools; in 1893, 8000. The principal scientific colleges are at Rio de Janeiro, Recife, Bahia, São Paulo, and Ouro Preto. The higher scientific instruction is under the control and is maintained by the central government. The language is Portuguese, with a different pronunciation and many archaisms and neologisms. French is the best-known foreign language. The first printing machine was introduced in 1744. There were 31 newspapers in 1828, 271 in 1876, and 550 in 1886. **History.**—In 1500 B. was seen by V. Pinzon in the N., and by Cabral in the centre. From 1532–35 it was divided by the Portuguese into hereditary captaincies, and at this period the sugar-cane was introduced. In 1549 the first capital was established in Bahia. War between the Portuguese and the French, in B., lasted from the 16th to the 18th century; with the Dutch during the first part of the latter. In 1680 the slavery of the Indians was prohibited. Negro slaves were, however, introduced from Africa, and this traffic was allowed to go on till 1830. From the 16th to the 18th century the settlers of São Paulo completed the general reconnoitring of the interior. Coffee was introduced in 1761. In 1762 Rio de Janeiro was made the capital of colonial B. During the 18th century the last captaincies were taken by the crown. In 1808 the King of Portugal arrived in B., which, in 1815, was erected into a kingdom united to Portugal, when John VI. returned in 1821. In 1822 Pedro I. was proclaimed Emperor of independent B., and a constitution was proclaimed in 1824. The traffic in African slaves was prohibited in 1830. In 1831 Pedro II. succeeded his father. In 1851–52 B. was at war with Argentina, from 1863–64 with Uruguay, from 1865–70 with Paraguay. Laws providing for the emancipation of the slaves were passed in 1871, 1885; and in 1888 slavery was finally abolished. In 1889 B. was proclaimed a republic (*Estados Unidos do B.*), the old provinces becoming federated states. [**J. B. R.**]

Brazil, city, U.S., Indiana, Clay co., 14 m. E. by N. Terre Haute. P. 5900.

Brecknockshire, or **Brecon** (supposed to be derived from Brychan, a native prince of the fifth century), co., Wales, in the S., between Radnorshire (from which it is separated for the most part by the R. Wye) on the N. and Glamorgan on the S. Surface very mountainous, the mountains or hills being divided into three groups by the valleys of the Usk and the Yrfon. S. of the Usk valley (which is partly traversed by the M. R., and in the SE. by the Brecon and Abergavenny Canal) are the Black Mts., including the Brecknock Beacons, the highest of which, Pen-y-Fan (2910 ft.), is the highest summit in S. Wales. S. of the Yrfon valley (which is traversed by the L. & NW. R.) is the elevated and very sparsely peopled tract called Mynydd Epynt. Old red sandstone rocks cover all the SE., Silurian and Cambrian the NW. The industries are almost entirely agricultural, principally cattle and sheep-rearing. Hereford is the chief breed of cattle. On the lower lands the chief breed of sheep is a cross between the Shropshire Down and the Ryelands. For statistics, see **Appendix,** pp. 7–9. The factories for coarse woollens and worsted hosiery, formerly numerous, are now almost extinct. There are iron-works at Beaufort and Clydach; lead-ore is found at Nant-y-Garw in the N. of the county, 8 m. from Rhayader; slate at Cwm Yrfon, 3 m. from Llanwyrtyd; and coal at Beaufort, Brynmawr, Swansea Valley, Gwys, Glyn Neath, Ystradgynlais, and Yniscedwyn. The county returns one member to Parliament. It is almost entirely in the diocese of St. David's. Welsh is spoken by a large proportion of the country people. P. parl. co. (1891) 54,600. See **Wales,** table.

Breck Road, stn., Eng., Lancashire, Bootle div., on the Alexandra Dock (Liverpool) branch of the L. & NW. R.

Brecon, Brecknock, or **Aber-Honddhu,** mun. bor. (first incorporated under Queen Mary), market-tn., and par. (till 1885 also a parl. bor.), Wales, cap. co. Brecon, on the Usk (which affords good salmon and trout fishing), at the influx of the Honddhu and Tarrell, 29 m. WSW. Hereford; has a high-class school called Christ College, founded by Henry VIII., rebuilt in 1862, and Congregational Memorial College. The neighbourhood abounds in lime, in which there is a considerable trade. Connected with Merthyr and Newport (Monmouthshire) by the **B. and Merthyr Rly.** Alt. 450 ft. Mun. bor. P. (1891) 5600.

Brecon and Abergavenny Canal, Eng. and Wales, belonging to the G. W. R., extending from Brecknock SE. by Crickhowell, Gilwern, and Govilon to Pontymoyle (near Pontypool), where it unites with the Monmouthshire Canal, nearly 34 m. long; admits vessels of 3 ft. 1 in. draught.

Brecon Road, stn., Eng., Monmouthshire, on the L. & NW. R., in the town of Abergavenny.

Brembo, riv., Italy, Lombardy, flows SSW. from the Bergamese Alps into the Adda a few miles N. Lodi.

Bremen, free Hanseatic town, situated upon the Weser, about 50 m. from its mouth. The terr. connected with it extends on both sides of the Weser, and consists of three parts—the town of B., Vegesack, and Bremerhaven. The whole area is about 74 sq. m. This terr. has rich pastures, and a very fine breed of cattle is reared. Agriculture is also of importance. The soil consists principally of marshland, which is, however, well drained. The town lies in a sandy plain on both sides of the Weser. It consists of the Altstadt (Old Town), with a beautiful park and suburbs, on the right, and the Neustadt (New Town), on the left bank of the river, both connected by the isl. of Werder and a number of bridges. B. owes its prosperity to the Weser, although at the present time large vessels can go up the river only as far as Bremerhaven, which lies 28 m. below B. But works have already been executed, and are projected in the near future, for the conversion of B. into a large and important seaport. The artificial deepening of the Weser from Bremerhaven to B. is nearly completed, which will enable the largest vessels to ascend the river at high tide. In 1894 vessels drawing 17 feet could reach B. under favourable circumstances, and in 1895 the work of deepening the Weser through the city will be commenced. B. is chiefly a commercial town, having trade connections with all parts of the world. But its industries are also of importance, especially those in connection with maritime commerce, as well as its tobacco industry. B. is first mentioned as a town during the 8th century. It entered the Hanseatic League in 1276, but was afterwards several times expelled from it. In 1810 it became French, but recovered its independence after the battle of Leipzig (1813). In 1871 it joined the German Empire. Mean rainfall (37 yrs.), 27.92 in. P. (1871) 82,800; (1890) state, 153,900; city, 125,700.

Bremen, tn., U.S., Indiana, Marshall co., 77 m. ESE. Chicago, (Ill.). P.<1500.

Bremen, Duchy of, old duchy of Ger., in the circle of Lower Saxony. It was first a bishopric, and then an archbishopric, afterwards secularised and ceded to Sweden in 1649. In 1789 it was ceded to Hanover by the treaty of Stockholm. Chief towns Verden and Stade. The town of Bremen was not comprised in it. It now forms part of the prov. of Hanover, and the bailiwick Stade, Prussia.

Chief buildings, cathedral of marble, the Broletto or old palace of the republic, and the Citadel, called the Falcone d'Italia. It has also a cemetery celebrated for its beauty. In a Roman edifice, excavated in 1822, a museum of antiquities has been deposited. It has a public library with a collection of rare MSS. Manufactures silk, linens, paper, leather, arms, steel of good quality, cutlery, iron-wares. Alt. 460–805 ft. Rainfall (1870–91), yr. 39 in. P. 34,000.

Brescou, volc. isl., off the S. ct. of France, 2½ m. from Agde, with fortified castle.

Breslau, vil., Canada, Ontario, co. Waterloo, 4 m. by rail E. Berlin. P. <1500.

Breslau (from Slav. **Wratislaw**), in point of population the second town of Prussia, and the third of the German Empire. Lat. 51° 6′ 56″ N., long. 17° 2′ 16.5″ E. Alt. 483 ft. above sea-level. It is the cap. of the Prussian prov. of Silesia, and is—and has been for centuries past—the commercial centre between the western and eastern countries of Central Europe. B. is situated at the confluence of the Oder and Ohlau, and its site is an excellent crossing place over the riv. Oder. It is noted for its trade in cereals and wool. Besides its great commercial importance, B. is also a manufacturing town, and not less than 44 per cent. of its inhabitants are occupied in various industries and manufactures, the most important of these being beet-sugar manufactories, cotton mills, foundries, and chemical works. It is now being converted into a first-class fortress to replace Glatz, which is to be dismantled. B. has a university. It is connected by railways with Berlin, Vienna, Prague, Dresden, Cracow, Warsaw, Hanover, and Stettin. Alt. 483 ft. Mean temp., yr. 46.7° F., Jan. 29.4°, July 65.8°. P. (1890) 335,200.

Breslau, vil., U.S., New York, Suffolk co., 33 m. E. by S. Brooklyn. P. <1500.

Brest, tn., France, dep. Finistère, on the W. ct., on the N. side of the Rade-de-B., 68 m. NW. Lorient, 32 m. NW. by N. Quimper; cap. arr. Lat. (of observatory) 48° 23′ 32″ N., long. 4° 29′ 25″ W. It is a fortified city and important naval port. Its bay or roadstead (*rade*) communicates with the North Sea by a strait called the 'Goulet,' defended by forts and batteries, and rendered difficult of access. Its inner harbour is secure, and could accommodate 60 ships of the line. The fortress is protected by batteries and a citadel built on a rock, and communicates by a canal with the port of Nantes. The city, built on the slopes of hills, is divided by the port into two parts, which communicate only by boats; that on the right is called Recouvrance. The upper and lower parts of the town are connected by steep streets, and in some places only by stairs. It has a medical school, naval school, school of hydrography, public library, and botanic garden. Its harbour is tidal, and has a depth of 24 ft. 8 in. at low water, 52 ft. at high water. There are nine government dry docks, available, when not required by the government, for merchant vessels; also a floating dock. The commerce of the port is considerable. B. is connected by two telegraph cables (the first laid in 1869) with St. Pierre and Miquelon (S. of Newfoundland), and with the mainland of North America (Boston). It was occupied by the English in 1372, 1378, and 1397; and was attacked, without success, by the Spaniards in 1597, and by the English in 1694. Mean temp., yr. 53.1° F., Jan. 43.5°, Aug. 64.6°; rainfall, 28.35 in. P. (1872) 66,300; (1891) 75,900.

Brest Litovsk (Polish *Brzese*), fortress and dist. tn., Russia, govt. and 131 m. Bridgnorth, par. and mun. bor., Eng., Salop, Ludlow div., 13 m. NW. by N. Kidderminster, on the Severn (*q.v.*), by which it is divided into two parts, the upper and lower town, and with a stn. on the G. W. R.; has large power-loom carpet factory, worsted spinning-mills, tannery, and malthouses. The public recreation grounds are the Grove and Castle Hill. The name is derived from the town being N. of a bridge once existing at Quatford, 2 m. lower down the river. Market-day, S. 3104 ac. P. 5900. B. St. Leonard, P.<3000; B. St. Mary Magdalen, P.<3000.

Bridgton, tn., U.S., Maine, Cumberland co., 34 m. NW. Portland. P.<3000.

Bridgtown, place, Eng., near Stafford, PMT.O.

Bridgwater, par., mun. bor., and seapt., Eng., Somerset, B. div., on both sides of the Parrett, about 7 m. from its mouth in the Bristol Channel, on the G. W. R. and the Somerset and Dorset Rly. The only place in the world where 'Bath-bricks' (so called after the first maker) are made—from a peculiar deposit of mud and sand mixed with diatoms on the banks of the Parrett. B. has water communication by means of a canal with Taunton, and carries on a foreign trade with the United States, West Indies, and Canada. The docks are accessible to vessels of 200 tons, but the entrance of the river is difficult, and the tide often washes into it with great violence. In Domesday Book B. is mentioned under the name of 'Brugie,' but having been granted to Walter de Douay it became 'Burg-Walter.' The first charter was granted by John in 1200. Admiral Blake was born here in 1599. P. (mun. bor.) 12,400; par. P. 13,300.

Bridgwater, parl. div., forming the middle part of Somerset. P. (1891) 48,200.

Brightlingsea (brīt'el-sī), par. and seapt.-tn., Eng., Essex, on the E. shore of the estuary of the Colne, div. and 7½ m. SE. Colchester, on the G. E. R., the par. forming a penin. between the Colne and B. Creek. B. is a member of the cinque port of Sandwich. PMT.O. P. <4000.

Brighton, port of entry, Canada, Ontario, Northumberland co., 64 m. W. by S. Kingston. P. <1500.

Brighton (formerly **Brighthelmstone**), parl., mun., and co. bor., and watering-place, Eng., co. Sussex, div. and 7½ m. WSW. Lewes, on the English Channel, 50½ m. by rail S. of London. The town, sheltered on the N. and NE. by the South Downs, extends (including Hove and Kemp Town) for 3 m. along the coast, fronted by a sea-wall, and occupying declivities on the E. and W., with a central valley. Consists almost wholly of new and elegant streets, squares, and terraces. Principal structures are the Royal Pavilion, built by George IV. when Prince of Wales, since 1850 the property of the town; the suspension chain-pier, extending 1136 ft. into the sea, and the W. pier (1100 ft.); theatre, concert hall, free library, museum, and picture gallery; Booth's museum (belonging to the corporation), containing an excellent collection of birds; assembly-rooms and baths, and a large marine aquarium. The open spaces, besides those of the central valley, include the Pavilion Grounds, Preston Park (72 ac.), and the Queen's Park (17 ac.). There are numerous boarding-schools, besides many day-schools. It is the seat of the Sussex Literary and Scientific Institution, founded in 1836. Has communication by steamers from Newhaven with Dieppe (France). B. was incorporated by royal charter in 1854. It sends two members to House of Commons. The parliamentary borough includes Hove (popularly known as W. Brighton), besides Preston, which was annexed to the municipal borough in 1873. Tn. P. (1801) 7300; (1851) 69,700; mun. (and now also co.) bor. P. (1871) 90,000; (1891) 115,900; parl. bor. P. 142,100; par. P. 102,700; eccles. par. (**B. with West Blatchington**) P. 37,900.

Brisbane, co., New South Wales, crossed by 32° S. and 151° E.

Brisbane, city, cap. and principal seapt. of Queensland, on the N. bk. of B. Riv., about 25 m. by water from its mouth in Moreton Bay, in 27° 28′ S., and 153° 2′ E. B. was first occupied as a penal settlement in 1825, and was named after Sir Thomas Brisbane, then governor of Australia. Since 1842, when it was opened to free settlers, its growth has been rapid. The city was incorporated in 1859. Seat of an Anglican bishop and a Roman Catholic archbishop; has several parks, including Queen's Park, part of the Botanic Gardens, and One Tree Hill, now Mount Coot-tha, a large area reserved for the public and now being improved. B. has been connected by rail since 1889 with Sydney, Melbourne, Adelaide (*q.v.*), and is the terminus of a railway which runs several hundred miles W. into the interior. The average depth alongside municipal wharves is 15–25 ft., and the rise and fall of tide about 7 ft. 9 in. Shortest passage in nautical miles to London, 11,820; passage by P. & O. route, 13,050 m.; by Orient route, 12,875 m.; by Torres Strait, 12,310 m. Mean temp., yr. 69.2° F., Jan. 78°, July 58.8°; rainfall (17 yrs.), 52.36 in. P. 22,800. P., excluding South B. (1871) 15,000; (1891) 25,900; within an area of 5 m. round 93,700. See **B., South.**

Brisbane, South, mun., Queensland, on S. side of B. Riv., a suburb of B., with which it was at one time connected by Victoria Bridge, a fine structure, which was, however, destroyed in Feb. 1893 by a flood, which caused immense damage elsewhere to the towns on both sides of the river.

Brisbane, short riv., Queensland. See **Brisbane,** city.

Brisons, The, two rocks, Eng., Cornwall, 60 and 70 ft. high, 1 m. off the coast, 4 m. N. Land's End.

Bristnall Fields, place, Eng., near Birmingham, P.O.

Bristol, city, parl., mun., and co. bor., and seapt., Eng., situated chiefly in Gloucestershire, and partly in Somersetshire, on the Avon, at the confluence of the Frome, and 8 m. SE. of its mouth in the Bristol Channel, 10½ m. WNW. Bath, 33½ m. SSW. Gloucester, and 118¼ m. W. London by the G. W. R. Since 1831 it has included Clifton, to the W. of the original city, within its mun. and parl. boundaries. Principal edifices, the cathedral (formerly the abbey church of St. Augustine, the most notable of the numerous religious houses which B. possessed in pre-Reformation times), the fine old church of St. Mary, Redcliffe, rebuilt, with the exception of the N. porch, which still remains, by Wm. Canynges and his grandson of the same name in the latter part of the 14th and the middle of the 15th century; St. Stephen's Church, a beautiful late Gothic edifice (1450–1490); a Roman Catholic cathedral (at Clifton); the Exchange, used as a corn-market; the B. Museum and Library, Victoria Rooms. B. has also a University College (founded 1876), to which the older medical school is now attached, a proprietary Baptist college, a college at Clifton, five grammar and collegiate schools, a fine arts academy, a school of music, a school of art, merchant venturers' technical school, a trade and mining school, a central free library, with branches. B. gives name to a coalfield which extends 16 m. SE. to Radstock in Somerset, and which is now of importance to its manufacturing industries. Its factories include iron-foundries, silk-mills, floorcloth works, sugar-refineries, soap and starch works, cocoa and chocolate works, corrugated iron works, stained paper works, tobacco works, tanneries and leather works, and boot and shoe factories; and there are shipbuilding yards and several industries subsidiary to shipbuilding. The shipping interest has, however, always been the most important at B., which, previous to the rise of Liverpool, was the principal seaport in the W. of England. The corporation has now jurisdiction over the whole of the Avon from 4 m. above the city to the sea, and along the B. Channel to Clevedon. The Avon at B., though narrow, is deep enough for large ships. In 1804–9 docks were formed by changing the course of the riv. Avon, and by placing locks at the extremity of the old channel. There are now two half-tide basins (the Bathurst and Cumberland), a floating harbour, 16 ft. deep on the sill at neap, 26 ft. deep at spring tides, and the Avonmouth dock, 28 ft. deep on the sill at neap tides; and the corporation laid a bill before Parliament in 1893, asking for powers to form a new dock at Avonmouth (including part of Dumball I.) large enough to accommodate at one time three of the largest Atlantic liners now afloat or on the stocks, and capable of being entered at high water of the lowest neap tides. B. has several dry docks, the largest (the Albion) 522 ft. long, 14–16 ft. deep on the sill at high water ordinary spring tides, and the new scheme provides for the construction of a graving-dock suitable for the largest vessels. The principal imports are grain, raw sugar, unmanufactured tobacco, leather, fruit, petroleum, wine; principal exports, iron and ironwares and copper. There is a considerable import of Canadian cattle. As to value of commerce and extent of shipping, see **Appendix,** p. 13. B. was the first port in Britain whence regular steam communication with the U.S. of N. America was established. The steamships *Great Western* and *Great Britain*, two of the pioneers of this trade, were built here. B. first appears in history on two coins of Ethelred II. (978–1016), which attest that they were struck at 'Bric,' a contraction of Brigstow ('bridge-place'), from which its present name is derived. Its castle, rebuilt by Robert, Earl of Gloucester (died 1147), was demolished in 1655. Its earliest known charter of incorporation was granted by Henry II. Among its most noted citizens are John and Sebastian Cabot, the discoverers of the Labrador coast (1497), Colston the philanthropist, the anniversary of whose birth (Nov. 2, O. S., 13, N. S., 1636) is annually celebrated by a number of B. societies. Birthplace of Chatterton and Southey. The diocese of B. was incorporated with that of Gloucester in 1836, but arrangements are being made for its re-establishment. For rate of increase of pop. since 1801, see **England,** table 2. Mun. bor. P. (1801) 63,600; (1851) 137,300; (1871) 182,522; (1891) 221,600; parl. bor., composed of four divs., N., S., E., and W., each returning one member, P. (1891) 286,200.

British Columbia, the Pacific prov. of Canada, bounded on the S. by the strait of Juan de Fuca and the U.S., on the E. by the Rocky Mts. and 120° W., on the N. by 60° N., between which and 55° N. the coast region belongs to Alaska, while S. of 55° N. all the islands, including the Queen Charlotte group, Vancouver, &c., belong to the prov.; area, four times that of Great Britain; cap. Victoria, on Vancouver I. The country, which has been described as a 'sea of mountains,' comprises three principal systems on the mainland—the Rocky Mts. on the E. frontier, having an average breadth of 60 m., crossed by 12 principal passes, of which the only one practicable, except for pack-horses, is the Kicking Horse or Hector Pass, traversed by the C. P. R.; the mountains W. of the Rockies, collectively known as the Gold Ranges, average width 80 m., principal, the Selkirks, with many summits of 10,000 ft., besides the Gold (or Columbia), Purcell, and Carriboo Mts.; the Coast Ranges, sometimes called the Cascade Range, though quite distinct from the mountains of that name in the U.S., average width 100 m., mean elevation 6000 to 7000 ft., with some peaks exceeding 9000 ft. The principal islands of the coast are formed by another parallel series of mountains, the highest summit of which in Vancouver I. is 7484 ft., while a considerable part of the interior exceeds 2000 ft. The coast is deeply indented by many-branched fiords, which afford good harbours and great facilities for intercommunication. A wide valley, at least 600 m. long, stretches W. of the Rockies to the head of the Peace R. Be-

tween the Gold and the Coast Ranges is the Interior Plateau, average breadth 100 m., mean elevation 3500 ft., declining from S. to N. and intersected by several rivers; the part S. of the 53rd parallel is much diversified with hill-ranges, wide rolling prairies, and forest-covered plateaux. Between the 53rd and 56th parallels is a great network of lakes and streams, the head-waters of several rivers. Chief rivers of the province:—Fraser, Skeena, Stickeen, and Nasse in the W., the Columbia in the S., the Liard in the N., and the Peace R. in the E.; other rivers are the Thompson and Okanagan, tributaries of the Fraser, and the Bella Coola and Dean or Salmon R. in the W. Most of the rivers form long narrow lakes in their course, as the Arrow, Okanagan, Shuswap, Salmon, Adams, Kamloops, and Kootenay Lakes. Vast primeval forests, in which the coniferæ predominate, cover a great part of the prov., many of the trees, especially on the W. slopes of the Coast Range, attaining a gigantic size; most noted is the 'Douglas Spruce,' which grows to 250 and 300 ft.; other trees are the 'yellow pine,' characteristic of the interior plateau, the yew, cedar, hemlock, &c. Agricultural land is limited in comparison with the area in the NW. Terrs., but there are extensive cultivable tracts, chiefly 'bench-lands,' or terraces of gravel and silt, deposited by water which at an earlier period flowed at the higher levels, and forming in some parts millions of acres of fertile land. The Okanagan and Spallumcheen valleys and the Kootenay (*q.v.*) dist. are amongst the most important arable tracts inland, but there are many others, as those about the Peace R.; on the coast is the rich delta of the Fraser, and there are fertile lands in the S. and E. of Vancouver I. The climate is healthy and more temperate than that of any other part of Canada; the warm 'chinook' winds from the SW. blow over the prov., southerly currents are drawn in through the longitudinal valleys, while the Rockies in their NW. trend shelter the country from NE. winds. In the interior, extremes of heat and cold, especially on the plateaux and towards the N., are much greater than on the coast. Wet and dry longitudinal belts alternate; the warm moisture-laden air from the Japan current, partly condensed by the cold air from the Arctic current, renders the coast very humid; the winds which reach the E. side of the Coast Range and the Interior Plateau consequently supply little moisture to these parts, but on the lofty summits of the Selkirks they are further condensed, giving rise to the extensive snow-fields and glaciers which characterise these mountains, while on the Rockies little moisture remains to be precipitated. The interior plateau can be rendered fit for cropping only by irrigation. Average rainfall at New Westminster, 58.4 in., at Nicola Lake (interior plateau 2100 ft.) 12 in., at Clinton (interior plateau, 2978 ft.) 8.75 in. [**New Westminster, Hope, Lillooet, Spence's Bridge, Esquimalt.**] Many parts both in Vancouver I. and on the mainland appear to be peculiarly well adapted for the cultivation of fruit, the canning and preserving of which is a growing industry. Fish abound both inland and off the coast, and large quantities of tinned salmon are exported. The greatest wealth of the country consists in its minerals, as yet imperfectly explored; of gold, B. C. still supplies nearly one-half the total produce of the Dominion, though the output has been decreasing for several years, owing to the partial exhaustion of the surface deposits. It is obtained chiefly in the Fraser Valley and at Baskerville in the Cariboo district; coal is mined extensively at Nanaimo, Wellington, and Comox in Vancouver I., where excellent semi-bituminous coal (the best on the Pacific seaboard) extends over a wide area, and varieties ranging from lignite to anthracite are known to exist at several places (lignite near New Westminster, and along the Thompson and Skeena rivers, bituminous coal near Kamloops, and semi-anthracite in the E. Kootenay district); iron is worked in Texada I., and magnetic iron ore occurs in the Queen Charlotte and other islands; exceedingly rich deposits of galena and silver-bearing copper have been discovered in the W. Kootenay dist., of which Nelson is now the mining capital. SW. of Nelson is the famous Toad Mt.; other centres are, Pilot Bay, Ainsworth, Hot Springs Camp, and the Slocan Lake dist. Platinum is mined in the Yale dist. (in the S. of the prov., E. of the Fraser). See **Canada, Dominion of,** table. [**E. J. H.**]

British Cumbo (or **Combo**), settlement, at mouth of Gambia, opposite Bathurst (*q.v.*).

British East Africa, a vast terr. in eastern equatorial Africa, situated between the German and Italian spheres of influence. It includes the coast from Wanga (4° 40′ S. lat.) to the mouth of the riv. Juba (0° 15′ S. lat.). In the interior the S. boundary line runs from Wanga to a point in 1° S. lat., on the eastern shore of the Victoria Nyanza (Mt. Kilimanjaro being German). The line is continued across Lake Victoria on the parallel mentioned till it cuts the 30th degree of E. long., along which it goes northward to Kordofan and Darfur, and turning W. it includes these countries. The N. boundary line follows the Juba R. from its mouth to the 6th degree of N. lat., thence it coincides with this parallel as far as the 35th degree of E. long., along which it runs northward until it reaches the Rahat R., a trib. of the Blue Nile. To these regions we have to add the isls. of Pemba, Lamu, Manda, and Patta. B. E. A. comprises the main portion of the highlands of eastern equatorial Africa, including the lofty mountains of Kenia, Elgon, and Ruwenzori, and the high plateaux E. and NE. of the Victoria Nyanza. Towards E. the country slopes down to the lowlands of the coast, and towards W. and NW. to the valley of the Upper Nile. The principal river is the Nile (*q.v.*), the upper course of which is entirely within the terr. of B. E. A.; it is navigable for small steamers as far as the Albert Nyanza. The rivers flowing into the Indian Ocean are smaller; but two of them, Tana and Juba, are nevertheless of importance, as their lower courses are navigable for light-draught vessels for several hundred miles inland. B. E. A. has many interesting lakes. It comprises the northern half of the Victoria Nyanza. Then follow the peculiar Rudolf and Stefanie Lakes, the remarkable Baringo, the picturesque Naivasha, and the western source-lakes of the Nile, the Albert and Albert Edward Nyanza. The inhabitants include numerous large and small Bantu (*q.v.*) tribes, the most important of which are the Waganda and Wanyoro; further, the warlike Masai and Galla (*q.v.*) tribes, of unknown origin, and totally different from the Bantu; moreover, a variety of Negro tribes, inhabiting the banks of the Nile (*q.v.*); and on the coast of the Indian Ocean the Waswahili, a mixed race. The natural resources of the country are many, and capable of great development. At present the following exports are of importance: cloves, gum-copal, ivory, indiarubber, sesame-seed, coco-nut, coir, copra, orchella, Indian corn, millet, rice, hides, and timber. The principal imports are Manchester goods, ironware, copper, brass, and iron wire, and various kinds of beads. The governing power is mainly vested in the Imperial British East Africa Company, Limited, on which a Royal Charter was conferred in Sept. 1888; but in April 1894 the British govt. determined to declare Uganda (*q.v.*), N. of the Victoria Nyanza, a separate Brit. protectorate, and to establish there a regular administration. The East Africa Company is very energetic in improving the state of the country, especially in the dists. near the coast; the natural resources are being developed, roads constructed, telegraph lines opened, and all efforts made to suppress slavery and the slave trade. A survey has been completed between the coast and the Victoria Nyanza with a view to the construction of a railway, the cost of which is estimated at £2,500,000. Custom-houses have been established at the principal ports. In consideration of the concessions made by the Sultan of Zanzibar to the Company, the latter pays him 80,000 dollars per annum. The principal place on the coast is Mombasa, situated about 150 m. N. of Zanzibar, the commercial centre of this part of the mainland. The surrounding country is very fertile—coco-nut, palms, coffee, tobacco, sugar-cane, wild indigo, and fibre plants grow freely, and the cultivation of grain is capable of unlimited extension. Next in importance follows Lamu; further N. other ports of importance are Wanga, Malindi, Mambrui, and Kismayu. The climate of the coast dists. is unhealthy to Europeans, but many parts of the plateaux in the interior are described as healthy and salubrious. Mombasa is connected by submarine cable with Zanzibar, and post-offices exist at Mombasa, Malindi, and Lamu. The steamers of the Brit. East Africa Company, and those of the Brit. India Steam Navigation Company, call at the principal ports. Area (including Kordofan and Darfur), over 1,000,000 sq. m. P. unknown. See **Zanzibar, Uganda, Nile, Kordofan, Darfur.** [**H. G. S.**]

British Empire, The. This is not an official name, but is the name usually given to the whole area under the British crown. The Queen of Great Britain and Ireland bears the title of Empress only in relation to her Indian dominion. In the popular sense the empire is made up of a large number of terrs., including large and small islands scattered over the globe, the relations of which to the crown and the central government, as shown in the notes to the following table, are very diverse. In all of those which have a separate government there is a governor (governor-general or viceroy) appointed by the crown. Those colonies in which the legislative body is wholly nominated are called crown colonies, while those in which they are partly nominated, partly elected, are sometimes said to have representative government. In those which have an elective legislative assembly (the name usually given to the lower house where the legislative body is divided into two chambers), or House of Commons (as it is called in Canada), the executive government is responsible to the local legislature, and such colonies are said to have responsible government. In these the main bond of connection with the mother country is the feeling of mutual goodwill arising from a common language and a common origin. In some of them the functions of the governor, important as they are, may be described as principally social, formal, or ceremonial. The colonies with responsible government are ten in number (the seven Australasian colonies, Canada, Newfoundland, and Cape Colony), and in all of them except Cape Colony the white population far outnumbers the original native population. In Cape Colony the proportion of whites is about one-fourth. At present (1893) Natal, in which the whites are even in less proportion than in Cape Colony, is also seeking to

have responsible government conferred on it. In all the other colonies the whites are greatly outnumbered by coloured races.

A number of islands and rocks throughout the world are British territory or under British protection, but are not included in any colony or separate protectorate. Many of these have not permanent inhabitants, but are, or have been, leased by the Lords Commissioners of the Treasury for guano collection, or for coco-nut planting. The rents are paid into the Exchequer. Among these are Sombrero (West Indies), Raine I., Bell Cay and Bramble Cay (near Brit. New Guinea), Sydney I., Caroline I., Flint I., Pilgrim, Ducie, Bauman, Roggewein, and Teinhoven, Coral. Dudosa, Starbuck, Little Scrub, Palmerston, Vostoc, and Willis's, Fanning, Penrhyn or Tongarewa, Johnston, Gardner, Nassau, Suwarrow I., and the Ellice Is., all in the Pacific Ocean. The Great and Little Basses and Minicoy, small islands, Indian Ocean, with lighthouses maintained by the Board of Trade. Tristan da Cunha in the S. Atlantic.

a. Legislative assembly and legislative council wholly elected. *b.* Elected legislative assembly (lower house), legislative council (upper house), partly elected, partly nominated, by the crown (none). *c.* Elected legislative assembly, legislative council wholly nominated, usually by the crown (governor). *d.* No legislative assembly, legislative council partly nominated by the crown (governor), partly elected. *e.* No legislative assembly, legislative council wholly nominated by the crown (governor or viceroy), or containing only nominated and *ex officio* members. *f.* No legislative council; legislative power delegated to the officer administering the government. *g.* Power of legislating by order in council reserved for the crown. *h.* No power reserved for the crown of legislating by order in council. *i.* Under the Secretary of State for India. *j.* Under the Admiralty. *k.* Under the Secretary of State for Foreign Affairs. *l.* Spheres of influence. *m.* Turkish, but under British administration. *n.* Two of the members of council in the Straits Settlements are nominated by the Chambers of Commerce of Singapore and Penang. Christmas I. (Indian Ocean) and Keeling Is. are under the governor of the Straits Settlements. *o.* In the same position as the islands mentioned in the last paragraph. *p.* Under the High Commissioner of the Western Pacific.

British Frontier, govt. stn., at the mouth of the Amakuru, in the extreme NW. of Brit. Guiana.

British Isles, The, form an immense archipelago of about 5500 islands and rocks, at a small distance from the W. shores of central Europe, from which it is separated by the North Sea, the Strait of Dover, and the English Channel. See **England, Scotland, Ireland, Wales,** and **United Kingdom.**

Brito, seapt., Central America, Nicaragua, on the Pacific ct.,

60 m. SSE. Managua, in 10° 20′ N., the western terminus of the Nicaragua Canal, now in progress.

Briton Ferry, seapt. tn. and par., Wales, Glamorganshire, Mid div., 2½ m. S. by W. Neath, on the G. W. R., with blast-furnaces and coal-mines; dock 18 ft. deep at ordinary neap, 25 ft. at ordinary spring tides. P. 5800.

Britstown, vil., Cape Colony, dist. Richmond, 130 m. NNE. Beaufort West. P. <1500.

Brittania, rly. stn., Canada, Ontario, 6 m. from Ottawa, on the C. P. R.

Brittany, the name given by the English to the old French prov. of **Bretagne** in the NW. of France, forming an extensive penin. between the English Channel and the Atlantic Ocean, now comprised in the deps. Finistère, Côte-du-Nord, Morbihan, and Loire-Inférieure. It was divided into Upper B. (Haute Bretagne), cap. Rennes, and Lower B. (Basse Bretagne), cap. Vannes. The people are known as Bretons, and the names of both people and prov. are due to the fact that numerous settlements were made here by British tribes, driven out of Britain by the Angles and Saxons in the 5th to the 7th centuries, and whose language, Breton or Armorican, closely allied to the Welsh, is spoken in the prov. to the present day W. of a line stretching from the mouth of the Vilaine to a point on the N. coast W. of St. Brieuc, and also on the coast between the mouth of the Vilaine and that of the Loire. The name Armorican is derived from an ancient name once applied to a large area in the W. of France, but which ultimately became confined to this penin.

Brittas, place, Ire., SE. co. Kilkenny, bar. Gowran, 13 m. SE. by S. Kilkenny, P.O.

Brittas Bay, Ire., on the E. ct. of co. Wicklow, in 52° 52′ N.

Brittle, Loch, an inlet, Scot., Inverness-shire, isl. of Skye, on the S. ct., in 6° 18′–20′ W.

Brittnau, vil., Switzd., cant. Aargau, 7 m. S. by E. Olten. P. <3000.

Britton, vil., U.S., S. Dakota, Marshall co., 155 m. NE. by E. Pierre. P. <1500.

Britway, par., Ire., co. Cork, bars. Barrymore and Kinnatalloon, 5 m. SE. Rathcormack, on R. Bride. P. <500.

Britwell Prior, par., Eng., Oxfordshire, Henley div., 13 m. N. by W. Reading, 2 m. SW. Watlington stn. P. <250.

Britwell Salome, par., ½ m. NE. B. Prior, P.O. P. <250.

Britz (bei Berlin), vil., Prussia, prov. Brandenburg, circle Teltow, dist. Rixdorf. P. 6000.

Brive, ancient *Briva Curretia*, tn., France, dep. Corrèze, 39 m. E. Périgueux, cap. arr.; situated in a rich valley amid varied scenery. Birthplace of Cardinal Dubois. The name of the town is derived from an old Celtic word meaning 'bridge.' P. 11,100.

Briviesca, tn., Spain, prov. and 20 m. NE. Burgos, on the Oca. P. <4000.

Brixen, tn., Austria, crownland Tirol, 21 m. NE. Bozen, in the valley of the Eisack, and on the Brenner Rly., a few miles S. of the point where the railway through the Pusterthal branches off to the E.; has mineral baths; once seat of a prince bishop, whose bishopric was secularised in 1803, and united to Tirol. Birthplace of Fallmerayer. Alt. 1175 ft. P. 5200.

Brixham, par., Eng., Devonshire, Torquay div., on S. side of Tor Bay, opposite Torquay, and on the G. W. R.; headquarters of the fisheries in the bay (chiefly trawling for flatfish, haddocks, whitings, &c.). Par. 5612 ac., P. 8000; tn. (**Lower B.,** part of par.) P. 6200.

Brixham with Churston Ferrers, eccles. par., Eng., Devonshire. P. <2500.

Brixlegg, Austria, Tirol. See **Rattenberg.**

Brixton, par. and vil., Eng., Devonshire, Totnes div., 5 m. E. by S. Plymouth, 1 m. from the estuary of the Yealme, PM.O. P. <750.

Brixton, or **Brighstone** (brai's'n), par., Eng., Hampshire, Isle of Wight div., 1 m. from SW. ct., 6 m. SW. Newport, 3 m. S. Calbourne stn., PMT.O. P. <750.

Brixton, suburb of London, Eng., Surrey, Lambeth bor. (see **Lambeth**), 3 m. S. by W. St. Paul's, London, on the L. C. & D. R. (**B. and S. Stockwell** stn.). Parl. div. P. 90,400.

Brixton Deverill, par., Eng., Wiltshire, Westbury div., 4 m. S. Warminster. P. <250.

Brixworth, par. and vil., Eng., Mid div. of Northamptonshire, 7 m. N. Northampton, on the L. & NW. R., with iron ores (brown hematite), PMT.O. P. <1500.

Brize Norton, par., Eng., Oxfordshire, Woodstock div., 11 m. WSW. Woodstock, 4½ m. W. by S. Witney, 2 m. NNW. Bampton stn., P.O. P. <750.

Brjenica, tn., Bulgaria, prov. Rahova, 25 m. W. Plevna. P. <3000.

Brjest, tn., Bulgaria, prov. Svištov, 16 m. W. by S. Nikopoli. P. <3000.

Bro, comm., Sweden, prov. Upsala, on the NE. side of Lake Mäler, 19 m. NW. Stockholm. P. <2000.

Broach, tn., Brit. India, Bombay dist., 32 m. N. by E. Surat, near the mouth of the Narbadá, one of the oldest seaports known in the commerce of India with the East or West. The mouth of the Narbadá has the advantage of possessing high banks out of the reach of flooding, and being contiguous to a highly productive region; but the port is difficult of access, a fact mentioned as far back as the first century A.D., and B. declined with the rise of Surat in the sixteenth century. P. 40,200. Hindus, 25,300; Moham. 11,400.

Broad Bay, inlet, Scot., E. ct. of Lewis, Ross-shire, 8 m. by 3½ m.

Broadbent, settlement, Canada, Ontario, Parry Sound dist., 68 m. NNE. Collingwood.

Broadbottom, vil., Eng., Cheshire, Hyde div., 7 m. NE. Stockport, with stn. (**Mottram and B.**) on the M. S. & L. R., PMT.O.

Broadbridge Heath, hamlet, Eng., Sussex, Horsham div., 1½ m. NW. by W. Horsham, P.O.

Broad Brook, vil., U.S., Connecticut, Hartford co., 12 m. NE. by N. Hartford. P. <1500.

Broad Bury, an upland tract, Eng., in the NW. of Devonshire, about 8 m. NE. Launceston, 6 m. W. Okehampton.

Broadcar, part of eccles. par., Eng., Norfolk. See **Shropham.**

Broad Chalke, par. and vil., Eng., Wiltshire, Wilton div., on the Chalk, 7½ m. WSW. Salisbury, 4 m. SSE. Dinton stn., PM.O.; 6966 ac. P. <750.

Broad Clist (or **Clyst**), par., Eng., Devonshire, Tiverton div., 5 m. NE. Exeter, 1½ m. N. of its stn. on the L. & SW. R., PMT.O.; 9326 ac. P. <2500.

Broad Clyst with Westwood, eccles. par., Eng., including B. C. hamlet. P. <2500.

Broad Cove, vil., Canada, Nova Scotia, co. and 6 m. SW. Digby, near St. Mary's Bay. P. <1500.

Broad Cove, or **Cherry Hill,** vil., Canada, Nova Scotia, co. and 20 m. SW. Lunenburg. P. <1500.

Broad Down, an upland tract, Eng., in the S. of the Honiton div. of Devonshire, about 15 m. E. Exeter, and 5 m. S. Honiton.

Broadfield, par., Eng., Hertfordshire, 2½ m. NW. Buntingford. P. <250. See **Cottered.**

Broadfield, stn., Eng., Lancashire, Heywood div., on the L. & Y. R., 3½ m. E. by S. Bury.

Broadford, tn., Ire., E. co. Clare, bar. Lower Tulla, 8 m. W. Killaloe, PMT.O. P. <250.

Broadford, place, Ire., NW. co. Kildare, bar. Carbury, 11½ m. SW. by S. Trim, P.O.

Broadford, tn., Ire., SW. co. Limerick, bar. Glenquin, 22 m. ESE. Listowel, P.O. P. <250.

Broadford, vil., Scot., isl. of Skye, on **B. Bay,** 15½ m. N. by E. Point of Sleat, PMT.O.

Broadford, post-tn., Victoria, Dalhousie co., 43 m. N. Melbourne. P. <1500.

Broad Green, vil., Eng., Lancashire, 4 m. E. Lime Street stn., Liverpool, on the L. & NW. R., PMT.O.

Broad Green, eccles. par., Eng., E. Surrey, Croydon par. P. 9300.

Broad Haven, bay, Ire., NW. ct. co. Mayo.

Broad Haven, the SE. corner of St. Bride Bay, Wales, Pembrokeshire.

Broad Haven, Stags of, islets, Ire., off N. ct. co. Mayo.

Broad Oak Cross, hamlet, Eng., Sussex, Rye div., 6½ m. W. Rye, P.O. (**Broadoak**).

Broad River, U.S., rises at the foot of the Blue Ridge in the W. of N. Carolina, enters S. Carolina and flows SSE., uniting with the Saluda at Columbia to form the Congaree.

Broads, The, is the flat district lying about the lower courses of the Yare, Bure, and Waveney, in Norfolk and Suffolk, chiefly in the former. The three rivers converge towards Yarmouth, where they flow into Breydon Water, a tidal lake 4½ m. by 1 m. The tide is felt, though feebly, 30 m. up the rivers. Scattered singly or in groups over the district are the 'broads,' large shallow lakes, connected with the rivers by channels or 'dykes.' The principal are navigable for boats drawing four feet of water and several for larger craft. Extensive reedy marshes stretch on all sides, many of them being below the level of the adjoining rivers, into which the waters are pumped by turbine wheels. Fish abound. Waterfowl are numerous, and some of the Broads are favourite nurseries. In the upper reaches the banks are wooded, and many picturesque spots are found. Several places of historic interest, as St. Benedict's Abbey and Burgh Castle. Most of the Broads are connected with the Bure. They include Wroxham, the 'Queen of the Broads,' Hoveton, &c. On the trib. Ant is Barton, connected with which is the Dilham Canal. Hickling, Heigham Sound, and Horsey Mere are connected with the Thurne, or Hundred Stream; also Whitelsea, Somerton, and Martham. On the Yare are Surlingham and Rockland; on the Waveney, Oulton, connected with L. Lothing, a part of Lowestoft harbour, by a lock which gives access to sea-going vessels. The New Cut, a canal 3 m. long, commences at Reedham and joins the Yare with the Wensum. The Muck Fleet dyke, navigable only for small boats, leads from the Bure to the Ormesby group. Fritton Decoy, without a connecting channel, lies within the bend of the Waveney. [**E. J. H.**]

Brooklyn, vil., U.S., Michigan, Jackson co., 62 m. W. by S. Detroit. P.<1500.

Brooklyn, city and seapt., U.S., New York, King's co., on Long I., opposite New York, with which it has been connected since May 1883 by an iron-wire suspension bridge (with tramway line) nearly a mile long and 135 ft. above the water. Though an independent municipality, it is to a large extent a residential suburb of New York, and being built on a site presenting considerable inequalities, has a picturesque appearance. Principal public buildings, the City Hall, of white marble, the State arsenal, extensive marine barracks, and the Marine Hospital; on the S. shore of Wallabout Bay is the U.S. navy yard, the principal naval station of the country. It has two parks, Washington Park and Prospect Park, the latter situated on an elevated ridge in the SW. part of the city. Greenwood cemetery is noted for its beauty. Numerous scientific and other institutions. It has 16 m. of water-front, and the warehouses lining its docks contain a greater value of goods than even those of New York. As to the harbour, see **New York.** B. ranks as the fourth American city in value of manufactures, having numerous flour-mills, sugar refineries, breweries, brass and copper works, &c. The first settlement (1636) was formed by a few Walloon colonists, and was called Breuckelen. P. (1800) 3298; (1850) 96,850; (1870) 396,099; (1880) 566,700; (1890) 806,343.

Bruges, Flemish **Brugge** ('bridge'), tn., Belgium, prov. W. Flanders, 13 m. E. Ostende, at the junction of the Ghent, Ostende, and Sluis canals, with dock 14 ft. deep; seat of a bishop; with manufactures of lace, embroidery, and soap. The tapestries of B. were formerly widely celebrated, and it was from this town that Colbert summoned artists to organise the Gobelin manufactures at Paris. Amongst all Belgium towns it has preserved the most mediæval aspect; its market is surmounted by a magnificent tower of the 15th century. In the church of Notre Dame (12th century) are the tombs of Charles the Bold and his daughter Mary of Burgundy. Formerly the cap. and residence of the Counts of Flanders. In the 13th century B. was one of the most flourishing commercial cities of Europe. It began to decline at the end of the 15th century, when the religious persecutions of Philip II. of Spain obliged many of its inhabitants to seek refuge in England. In 1430 Philip the Good here instituted the order of the Golden Fleece. B. is now (1894) about to be connected with Heyst by a ship-canal 26½ ft. deep. P. (1869) 47,621; (1890) 47,500.

Bruni Island, a long and irregular isl. in the SE. of Tasmania, between Storm Bay and d'Entrecasteaux Channel; divided by a narrow isthmus into N. and S. Bruni I., on the latter of which is a revolving light at the height of 335 ft. Mean rainfall (5 yrs.), 40.5 in.

Brunn, brunnen, bronn, burn, bourne, Teutonic, 'a well,' 'a small stream.'

Brünn (Morav. *Brno*), city, Austria, cap. of the crownland of Moravia, and of a circ. of same name, 70 m. N. by E. Vienna, 116 m. SE. by E. Prague, 40 m. SW. Olmütz, situated at the base of hills at the junction of the valleys of the Schwarzawa and Zwittawa, the latter of which offers an easy route (now followed by a railway) to the populous (N.) portion of Bohemia. Near it is the Spielberg, formerly the citadel, afterwards a state prison, now used as barracks. B. is the seat of the chief legal and military courts and authorities for Moravia and Austrian Silesia, of a bishop's see (cathedral dating from the fifteenth century), and a Protestant consistory, and has a museum with rich collections, botanic garden, and public library. It is the principal centre of the woollen manufacture of Austria, manufacturing industries (of varied kinds) being stimulated by the vicinity of the Rossitz coal-mines. It was occupied by the French in 1805 and 1809, and was the headquarters of Napoleon I. before the battle of Austerlitz. Alt. 761 ft. Mean temp., yr. 48.0° F., Jan. 28.6°, July 68.4°; rainfall (31 yrs.), 19.9 in. P. (1869) 73,800; (1890) 94,500.

Brunswark, hill, Scot. See **Birrenswark.**

Brunswick, Ger. **Braunschweig,** duchy, in the NW. of Ger., is composed of three large unconnected dists. lying on the banks of the Aller, Ocker, Leine, and Weser, and of six small enclaves, the total area being 1425 sq. m. The N. and central dists. have an undulating surface, with several hill ranges; the southern ones lie within the limits of the Harz Mts., and are intersected by wide valleys. The country gradually declines towards the N., and slopes to the Weser and Elbe. The highest points within the duchy are the Wormberg, 3240 ft., and the Achtermannshöhe, 3030 ft. The most important river is the Weser, which is navigable in these parts of its course, and which flows for about 20 m. past the western parts of B., and again past the more northern enclave of Thedinghausen, near Bremen. The chief trib. of the Weser is the Aller (with Leine, Ocker, and Fuse). The Ocker is of importance for trans-

porting timber. To the river system of the Elbe belong the Ohre and Bode. B. has a considerable number of small lakes, and an extensive morass, the Drömling. A canal connects the Ocker and the Bode. In the N. dists. the climate is mild, but in the mountainous parts more to the S. is raw and inclement. The soil in the northern parts of the duchy is very productive, except on the borders, where the great Lüneburg plain commences. More to the S. many of the mountainous parts of the country are stony and unproductive, but they are interspersed with fertile tracts of land, especially in the vicinity of the Weser and Leine. The most sterile part of B. is that of Ottenstein, near Holzminden. Agriculture is general in the lower parts of the duchy, but the highlands are too cold and stony for agriculture. Cattle-rearing is considerable. Timber is plentiful, and especially some parts of the Harz Mts. and of the dists. near the Weser are valuable in this respect. The most common trees are beech, fir, pine, and oak. The Harz Mts. yield valuable mineral products — coal, ores (especially iron ore), granite, lime, gypsum, marble, and porcelain clay. Textiles and household wooden utensils are the chief manufactures. The chief towns are the cap. of the duchy, Blankenburg, Wolfenbüttel, and Holzminden. The duchy is divided into six circles— B., Wolfenbüttel, Helmstedt, Gandersheim, Holzminden, and Blankenburg. During the early times of the Middle Ages B. was a part of the duchy of Saxony, which was, however, divided in 1180. Afterwards it became a separate duchy, and was subdivided in various ways in subsequent times. At the beginning of the present century B. formed a part of the kgd. of Westphalia, but became independent again in 1814. Since 1871 it has been a part of the German Empire. P. 404,000.

Brunswick, tn., cap. of the duchy of the same name. It is situated in a fertile plain on the Ocker. B. is principally a commercial town, exporting agricultural produce. In the Middle Ages it was a great centre of commerce. Mean temp., yr. 48° F. P. (1871) 57,900; (1890) 101,000.

Brunswick, tp., New South Wales, co. Rous, 402 m. N. Sydney, in 153° 30′ S., 28° 30′ E. P. <1500.

Brussa, or **Broussa** (the ancient *Prusa ad Olympum*), city, Asiatic Turkey, cap. vilayet Brusa, cap. sanjak, at the N. foot of Keshish Dagh (Mt. Olympus), 57 m. SSE. Constantinople, in a rich plain noted for centuries for the rearing of silkworms, as the town has been for the manufacture of silk. Seat of an Armenian and Greek archbishop. Meerschaum clay found near. Its numerous thermal springs, all more or less alkaline, known in ancient times by the name of *Pithya*, are situated on a spur of the mountain at the height of 1000 ft. The waters are used solely for bathing, and there are some excellently appointed bathing establishments, besides many inferior ones. The citadel is on a rock near the centre of the town. The trade with the interior is conducted by caravans. A railway connecting it with the port of Mudania on the Sea of Marmora is now (1893) being made fit for use after lying for years in an unfinished condition. *Brusa* was anciently the cap. of Bithynia, and after capture by Orkhan in 1356 it continued to be the cap. of Turkish sultans, until Amurath removed his seat of empire to Adrianople. The tombs of Orkhan and his successor Othman are in a neighbouring village. B. was nearly destroyed by an earthquake in 1855. Alt. (meteor. stn.) 1000 ft. Mean temp. (1½ yrs.), yr. 59.1° F., Jan. 39.2°, July 79.7°. P. (including in addition to Turks, who form the majority, many Armenians, Jews, and Greeks) estimated at 136,000.

Brussels, Flemish **Brussel,** French **Bruxelles** (oldest known form *Bruxella*, the origin of which is doubtful), a city of Central Europe, cap. of Belgium, and of the prov. of S. Brabant, on the Senne; connected by canal and the rivs. Ruppel and Scheldt with Antwerp, and thus capable of being reached by vessels drawing 10 feet. Lat. (of observatory) 50° 51′ 10.7″ N., long. 4° 22′ 11″ E. Consists of an upper or new town, containing the palace of the chambers, king's palace, &c., and the lower or old town in which is the Hôtel de Ville, a noble Gothic structure, with a spire of open stonework, 364 feet in height, surmounted by a statue of St. Michael. Of churches, the finest is the cathedral of St. Gudule, built in 1273, and celebrated for its painted glass, numerous statues, and finely carved pulpit; and among other important buildings are the church of Notre-Dame-de-la-Chapelle, and that of Notre-Dame-des-Victoires, the Broot-Huys, or Old Hôtel de Ville, and several gates of its ancient walls, which are removed, and the space converted into boulevards. The finest promenades are the Allée-Verte, along the canal from B. to the Scheldt, and the park, an extensive enclosure, near the royal palace, laid out with avenues of trees, and ornamented with statues. A colossal statue to Godefroi de Bouillon was inaugurated in 1848. B. has a free university founded in 1834, with faculties of law, medicine, sciences, and philosophy; a polytechnic school, an academy of painting, sculpture, and engraving, a royal school of music, a school for deaf-mutes and blind established in 1834, a large public library and the royal library, founded in 1837, and the library of the Bollandists; a gallery of paintings in the Palais des Beaux Arts, containing the best specimens of the Flemish school; museums of natural history and antiquities, a botanic garden, and a well-equipped commercial museum. Has also a variety of manufactures, the most noted specialty being that of lace. Carpets are not a specialty of B. (The manufacture of the so-called B. carpets was introduced into England from Tournai.) B. is an ancient city, believed to have been founded in the seventh century; was fortified in the eleventh century, and was the residence of the Dukes of Brabant, and afterwards of the Spanish and Austrian governors-general of the Netherlands; its fortifications were dismantled by Joseph II. It is the birthplace of the physicians Vesalius and Van Helmont, and of the two painters Champaigne. Mean temp., yr. 50.5° F., Jan. 36.9°, July 65.7°; rainfall (30 yrs.), 28.04 in. P. (1874) 187,000; with the eight adjacent comms. of Laeken, Schaerbeek, Louvain or St. Josse-ten-Noode, Ixelles, Hall or St. Gilles, Anderlecht, Ninove, and Molenbeek or Faubourg de Flandre, 365,000; (Dec. 31, 1890), city, 176,100; with suburbs, 471,800.

Brüsterort, cape and vil., Prussia, prov. E. Prussia, on the NW. shore of the Samland, 27 m. NW. Königsberg, large quantities of amber found on the coast both to the E. and S.; with lighthouse, visible 20 m. P. <2000.

Buckingham Canal, a salt-water canal, Brit. India, running parallel to the E. ct., and forming an important means of communication between Madras and the Godávari.

Buckinghamshire, or **Bucks,** co., Eng., stretching N. from the Thames, which forms its S. boundary, between Middlesex and Oxford, divided into the following parl. divs.:—

	Acres.	Pop. 1891.
N., or Buckingham	202,623	57,401
Mid, or Aylesbury	162,284	58,500
S., or Wycombe	110,510	66,884
Part of New Windsor parl. bor. . .	277	2,499
Total (anct. and administrative co.)	475,694	185,284

In the N., which belongs mainly to the upper oolites, the surface is undulating, and the higher parts are generally somewhat unproductive. Equally unproductive is the southern half, nearly all of which, except in the SE., where the lower eocene occurs, is covered by the chalk, the Chiltern Hills (*q.v.*) traversing this half from SW. to NE. Between these two areas lies the beautiful and fertile Vale of Aylesbury, which belongs mainly to the upper greensand, but the soil of which contains an admixture of rocks derived from the chalk and other adjoining formations. This district is noted for its dairy produce, and its sheep have long been valued for the weight and fineness of their wool. The Chilterns are well wooded, especially with beech, the name of which is believed by some to contain the root which gives its name to the county. For agriculture, see **Appendix,** pp. 7-9. The minerals are not important; fire-clay occurs at Slough, and stone and chalk are got at Gerrard's Cross, Napple Common Kiln, and Woodburn. The principal manufactures are lace, paper, wooden chairs, and other wares. The county is traversed by the L. & NW. R., G. W. R., and Grand Junction Canal. It forms an archdeaconry in the diocese of Oxford, and returns three members to Parliament, one for each of the divs. of Wycombe, Aylesbury, and Buckingham. It belonged to the ancient kingdom of Mercia. Hampden was born at the village which bears his name, Cowper lived at Olney, and Herschel had his great telescope at Slough. See **England,** table.

Budapest, the cap. of Hungary, formed in 1873 by the incorporation in one city of the two towns of **Buda** (Ger. **Ofen**) on the r. bk. of the Danube, 130 m. SE. by E. Vienna, and **Pest** on the l. bk., just above the place where the Danube, after traversing a dist. bordered by hills on both sides, divides into two arms, enclosing the large island of Csepel, and begins to traverse the Hungarian plains. The town on the r. bk. is the older of the two, dating back to Roman times, and occupies the first site convenient for fortification met with in ascending the Danube through these plains. On the right hills advance close to the river, in the Blocksberg or Gellerthegy, on the S. of the town, up to the river bank. This hill (715 ft.) is occupied by the citadel. The town itself is built partly on an isolated hill to the N., partly on level ground at the base of that hill, and partly on the slopes of other hills which slope westwards up to the Great Schwabenberg, or Mount Szechenyi (1545 ft.), which is partly ascended by a rack-railway, and the Johannesberg (1735 ft.). The suburb of Ó Buda (Old Buda, Ger. **Alt-ofen**) lies a little to the N., where the hills again recede somewhat from the river. At Buda the Danube is so narrowed as to be bridged with comparative ease. Till 1849 the only connection between the opposite banks was a bridge of boats, but in that year a handsome suspension bridge, 1245 ft. long, was opened, and now there are two passenger bridges, and a little below the town a railway bridge. The site of the town on the l. bk., which dates only from the 13th century, but is the larger and more rapidly expanding part of the whole city, belongs entirely to the Hungarian plains. Buda is the chief seat of administration, contains the royal palace (*Kiralya Palota*), a vast and splendid building erected by Maria Theresia in 1748, from which beautiful terraced gardens descend to the river, the chambers of the Hungarian diet, &c. Pest is the industrial and commercial part of the city, but here also are the university (transferred from Tyrnau to Buda in 1777, and to Pest in 1784), a fine gallery of paintings in the university buildings, a national museum founded in 1802 by Count Szechenyi, and containing a rich cabinet of medals and a gallery of antiquities, and a polytechnical institute, with an observatory (lat. 47° 29′ 35″ N., 19° 3′ 51″ E.). Among the institutions of the city, besides the university, are an academy of sciences founded in 1830, an academy of music, an institute of science and arts, the Kisfaludi society for the scientific literature of Hungary, the Matica Serbska society for Slavonic literature, &c. The principal industries of the town are those connected with the working up of the agricultural produce of Hungary. The most important are the flour-mills, producing the celebrated Hungarian flour. There are also tobacco-factories, sugar-refineries, tanneries, chemical works, and manufactures of machinery. B. is the chief station of the Danube Steam Navigation Co., which has shipbuilding yards here. Five hot springs well forth at the base of the Blocksberg, and there are other hot (sulphur) springs with a bath establishment in the Margaret I. (Ger. Margaretheninsel; Hung. Margit Sziget) in the Danube, nearly opposite Ó Buda. The springs at the base of the Blocksberg are supposed to have given rise to the name of the Roman military colony founded here and called *Aquincum* (supposed to be a corruption of *Aquæ quinque*). By some the names Buda and Ofen, both meaning 'oven,' are supposed to refer to the same thing. Others interpret them as referring to caves in the hills of Buda, and the same explanation is given of the name Pest (a corruption of Slavonic *pěć*, a cavern), which was originally applied to the same town as Buda. The town has suffered greatly on several occasions from terrible epidemics. B. was taken by Solyman the Magnificent in 1526, and retaken by Ferdinand I., King of Bohemia, in 1527; was again taken by Solyman in 1529, and occupied by the Turks till 1686. It suffered much during the Hungarian struggle for independence in 1848–9. Alt., Danube 340 ft.; meteorological stn. 502 ft. Mean temp., yr. 49.8° F.; Jan. 29.4, July 71.1°; rainfall (28 years), 20.75 in. P. of Buda (1780) 24,000; (1873) 54,600; of Pest (1813) 36,000; (1873) 200,000; of Budapest (1880) 360,000; (1890) 492,000 (about half Germans, one-third Magyars, one-sixth Jews).

Bueno, riv., Chile, issues from Lake Ranco, flows W., forms in its lower course the boundary between provs. Valdivia and Llanquihue, and enters the Pacific in 40° 20′ S. Length, 152 m.; area of basin, 6950 sq. m.; discharge, 17,700 cubic ft. per second.

Buenos Aires (or **Ayres**), the largest, most populous, and most flourishing of the provs. of the Argentine Republic. Extends from the mouth of the Rio Negro in 41° S. along the Atlantic Ocean to the estuary of the La Plata; cap. (since 1882) La Plata. The N. includes a portion of the eastern Pampas, and is flat, with lakes and swamps. The E. tracts are likewise for the most part flat, studded with salt lagoons, and in great part utterly barren. The S. part, however, at some distance from the coast (S. of Azul and Tandil), includes some low ranges,—Sierra de Tandil, Sierra Baya, and further S. Sierra Curumalan, and Sierra de la Ventana the last, about 50 miles N. of Bahia Blanca, being the highest (3475 feet). This dist. contains some of the most fertile tracts in the whole prov., well adapted for wheat, the cultivation of which is now rapidly spreading there. The principal crops of the prov. are maize, wheat, flax, and lucerne; but the chief agricultural industry is the rearing of live-stock (sheep, cattle, &c.). The vine thrives even at Bahia Blanca, but is not largely cultivated. No minerals of importance. The N. winds prevailing here have the disagreeable character of the sirocco of Italy; the SW. winds, or *pamperos,* are hurricanes accompanied with thunder. See **Argentine Republic,** table.

Buenos Aires (formerly spelt **Ayres**) ('good air'), the cap. of the Argentine Republic, is situated on the S. bank of the estuary of La Plata, about 150 m. from the sea, in 34° 36′ 21″ S., 58° 23′ 34″ W. It is regularly laid out, all its streets crossing each other at right angles (in accordance with the prescriptions of the *Leyes de Indias,* promulgated at the Escurial in the sixteenth century), and now mostly paved with granite. Works for thorough drainage of the city and supplying it with water are being carried out. Tramways traverse the streets in every direction, but the streets are so narrow that there is no room for a double line, and the cars constantly travel in one direction by one street, and return by a parallel street. Wider boulevards are now being made, cutting the old streets diagonally. Most of the houses are but one story in height, flat-roofed, and built around courtyards; but many of the newer houses and business premises are of three or four stories. The government offices occupy a fine building (*Palacio de Gobierno*) on one side of the principal square, the Plaza de la Victoria. The university occupies an extensive building, and has a valuable library. The principal manufactures that make use of imported material are the making of furniture, carts, and carriages, and of cigars and cigarettes. (See also **Argentine Republic.**) The navigation of the Plata (here 36 m. broad) is difficult; and the largest ships are still obliged to anchor in the roadstead about 10 m. off, to and from which merchandise has to be conveyed by lighters, and formerly smaller ocean-going vessels had to do the same. Great harbour works, including a series of docks parallel to the shore of the La Plata, with two entrances, a main channel on the N. and the Riachuelo Channel leading to the suburb of La Boca on the S., are now however in progress. These works constitute the Puerto Madero. In 1890 vessels drawing nearly 22 feet were able to reach the first of the new docks. Nearly half the entire tonnage entered and cleared at

the ports of the Argentine Republic is entered and cleared at this port. Shortest track to Liverpool, 6210 nautical m. The mortality among children in the town is very great. On the average of the 16 years 1872–1887, out of every 1000 deaths (including children still born), 158 were those of children under one year old (215.2 among those of Argentine birth), 470.4 were those of children under five years (633.1 among those of Argentine birth). B. A. was founded in 1535 by Don Pedro de Mendoza, but being destroyed by the Indians was abandoned, and was refounded in 1580 by Don Juan Garcia de Garay. In 1775 it was made the seat of a viceroyalty. Till 1882 it was cap. of the prov. of B. A., but in that year the town with the district round, in all 83 sq. m. in extent, was placed under the general government of the Republic. Mean temp. (21 yrs., 1856–76), yr. 63.0° F., Jan. 75.6°, July 50.0°; mean rainfall (17 yrs.), 34.1 in. P. (1863) 140,000; (1869) 177,800; (end of 1888) about 500,000; (1892) 554,700.

Bukhara, khanate of central Asia, between 37°–41° N., and 62°–72° E., having the Russian Turkistan provs. of Samarkand and Fergana in the N., Kashgaria and partly Kashmir in the E., Afghanistan in the S., the Russian Transcaspian Terr. in the SW., and Khiva in the W. It may be divided into three parts, very different from each other. The western part, where the capital is situated, is a lowland watered by the Zerafshan, the waters of which are diverted into countless irrigation canals in the dists. of Ziaeddin, Kermine, Bukhara, and Karakul. This fertile region touches the Karakum sands in the N., while eastwards it assumes the character of a prairie (Karnak-chul), which is covered in the summer with a rich grass vegetation. Its climate is very hot and dry. The cultivation of cotton, the vine, and the mulberry tree; the breeding of an excellent breed of Karakul sheep, as well as of horned cattle, horses, and camels; and an extensive trade in raw cotton, silk, sheepskins, hides, rice, fruit, felts, and carpets are the chief occupations of the population. The middle part of B. occupies the slopes of the Tian-shan Mountains, which are known under the names of Baba-tagh, Hazi-malek, and Kara-tau, which form plateaux nearly 4000 ft. high, intersected by fertile valleys. This region enjoys a cooler and damper climate, is very fertile in the valleys, and has a dense population engaged in agriculture and cattle-breeding. The mountain-rivers (Surkhan, Kafirnagan, Vaksh, or Surkhab, all r. bk. tribs. of the Amu), as well as many smaller streams, supply an abundance of water to the fields, while the slopes of the mountains are covered with gardens of pistachio and almond trees. Coal, salt, and naphtha are found in the mountains. The eastern part is an Alpine region, intersected by the ridges of Karateghin, Peter I's, and Darvaz, whose highest summits attain 25,000 ft. The inhabitants of Karateghin also carry on agriculture, and raise wheat, millet, barley, flax, and lucerne, and keep good breeds of horses. Those of the khanate of Darvaz (35,000) live almost entirely by the cultivation of the mulberry tree; they eat a flour obtained from its dried berries, and pay the taxes with the same. The climate is hot in the summer, and cold in the winter; the only means of communication are on horseback or on foot. The chief rivers of B. are the Amu, which waters the eastern part, and flows along its SW. frontier elsewhere, receiving many tribs. from the right; and the Zerafshan, whose waters are well utilised for irrigation; a new canal is now being dug across the Bek-pak-dala, or Famine Steppe, to bring the waters of the Syr-daria to the central parts of B. The population consists of Uzbegs (nearly one-half of the whole), Tajiks, chiefly in towns, and nearly 20,000 of Arabs, Persians, Jews, and Tsigans. Part of the Uzbegs, the Kirghizes, and the Arabs are nomads. Prevailing religion, Mussulman. For administrative purposes B. is divided into twenty-eight dists., of which eleven are under separate Beks—those of Hissar, Charjui, and Ziaeddin are the richest. The chief towns are **Bukhara, Karshi** (35,000 inhabitants), and **Charjui.** The trade of B. with Russia, Afghanistan, Kashgaria, and India is considerable. Raw cotton, silk, dried fruit, rice, indigo, sheepskins, furs, cotton cloth, carpets, shawls, and felt, woollen and silk goods are exported, while all sorts of manufactured goods are imported, partly for further export. B. is now crossed by the Russian Transcaspian Rly., which enters it at Charjui, and passes Bukhara and Kermine to Mir. Nearly 50,000 camels were used previously to the construction of this railway for the trade with Russia alone, which is estimated at £3,200,000 for imports, and £4,500,000 for exports. B. is in reality a vassal state to Russia. Area, about 92,000 sq. m. P. about 2,500,000.

Bukhara, cap. of the above, on one of the branches with which the Zerafshan ends in the lowlands before reaching the Amu, 155 m. by rail from Samarkand, and 736 m. from Uzunada, on the Caspian; 39° 47′ N., 64° 27′ E. It lies in a fertile country, well watered, and densely covered with villages. The city consists of a citadel, and the town, which is nearly 8 m. in circumference, is said to possess 360 mosques. P. estimated at 70,000. The Transcaspian Rly. passes within 8 m. from B., and round the rly. stn. a Russian town, **B. Russkaya,** or **New Bukhara,** is growing, on a terr. conceded by the Khan. P. 2000.

Bukhtarma, riv., W. Siberia, govt. Tomsk, Altai Region, r. bk. trib. of Irtysh, rises in Sailughem range, flows NW. 330 m. through **Lake B.,** and then through a very fertile well-peopled valley, and past the Zyryanovskiy silver-mine.

Bukit, Malay, 'a hill.'

Bukke, or **Bukn Fjord,** on the W. ct. of Norway, prov. Stavanger. Length about 35 m., breadth 15 m.; full of islands, one of which has the same name.

Bukkur, fortified isl., India, Sind, situated where the railway from the Punjab has since 1889 been carried across the Indus, between the towns of Rohri and Sukkur.

Bukoba, Ger. stn., central Africa, on the W. side of Lake Victoria Nyanza, in about 1° 21′ S.

Bukovina, in German spelling **Bukowina** ('beech-land'), crownland, Austria, more than half the size of Wales, S. of and similar in features to Galicia, drained by the Pruth and Sereth and their tribs. Inhabited mainly by Roumanians, in the N. by Ruthenians. Cap. Czernowitz. Area, 4036 sq. m. P. 647,000. See **Austria-Hungary,** table.

Bukumbi, stn., Ger. E. Africa, on Lake Victoria Nyanza, in 2° 42½′ S., 32° 22′ E.

Bulacan, tn., Philippine Is., Luzon, 17 m. NNW. Manila, cap. prov. B. P. 12,200.

Buladan, tn., Turkey in Asia, vilayet and 100 m. E. by S. Smyrna, sanjak and 21 m. NNW. Denizli. P. 9700 (Moham.).

Bulak, tn., Egypt, on r. bk. of the Nile, the river-port of Cairo (*q.v.*).

Bulalacao, seapt., Philippine Is., on a bay on the S. ct. of Mindoro, in 12° 20′ N., 121° 18′ E.

Bulama, the easternmost of the Bissagos Is., off the W. ct. of Africa. An attempt to found a British settlement here in 1792 failed through the frightful mortality among the settlers.

Bulandshahr, or **Baran,** tn., Brit. India, NW. Provs., cap. of dist. B., 40 m. ESE. Delhi, of great antiquity, coins of Alexander the Great being found in and around the town. Malarious fever prevails in the dist. during the rainy season. Alt. 741 ft. P. (1891) 16,900; Hindus, 8500; Moham. 8100.

Bulang, isl., Eastern Archipelago, to the S. of Singapore Strait, and just W. of 104° E.

Bulangan, riv., near the N. frontier of Dutch Borneo, flowing E. into the Strait of Macassar.

Bulari Pass. See **New Caledonia.**

Bulgaden, tnld., Ire., SE. co. Limerick, bar. Coshlea, 16½ m. S. by E. Limerick, P.O. P. <250.

Bulgaria, an autonomous principality of the Turkish empire, lies between the Danube and (Turkish) Roumelia, and the Black Sea and Servia, its extremities touching, in the E. 28° 37′ E. long., in the W. 23° 13′, in the N. 44° 12′ lat., and in the S. 41° 46′. In area, it is about two-fifths of Great Britain. Northern B. (B. proper) is separated from Southern B. (Eastern Roumelia) by the Balkan Mts. (*q.v.*). These two portions are made up as shown in the following table:—

Provinces.	Area in sq. m.	Pop. in Thousands, Jan. 1, 1883.	Pop. per sq. m.
Köstendil	1,807	163	90
Loveč	1,517	119	78
Lom Palanka (with Berkovica)	1,456	114	78
Pleven (Plevna)	958	92	96
Rahovo	1,070	87	80
Razgrad	1,170	122	104
Russe, or Rusčuk (Rustchuk)	1,595	154	97
Sevlijevo	745	94	126
Silistra	1,162	108	93
Sofia	2,174	182	84
Šumen (Shumla) with Eski Džumaje	1,695	176	104
Svištov (Shishtova)	1,151	91	80
Trn	927	76	82
Trnovo	1,811	205	113
Varna	3,019	207	69
Vraca	958	87	91
Vidin	1,174	116	99
Bulgaria proper (total)	24,389	2,193	90
Burgas	2,236	110	49
Haskovo without Kirdžali	1,351	123	90
Pazardžik	2,355	137	58
Plovdiv (Philippopolis) without Rubdžus	2,073	226	109
Sliven	2,510	161	64
Stara Zagora (Eski Zagra)	2,409	203	84
Eastern Roumelia (total)	12,934	961	74
Grand total	37,323	3,154	85

A plateau region of Tertiary (loess) deposits, resting on Jurassic and Cretaceous limestones and sandstones, descends by successive terraces from the Balkans to the Danube, and is seamed by the deeply-eroded channels of the tribs. of that river—the Tarok, Lom, Isker, Vid, Osma, Jantra. The Rhodope Mts., or Despoto Dagh (reaching to 7200 ft.), separate Bulgarian from Turkish Roumelia. Between that range and the Balkans stretches the plain that is watered by the Maritza and its affluents—the Tunja and Giopsa; on its northern side lies the Sredna Gora (5200 ft.), running parallel to the Balkans. The western part of South B. belongs to the valley of the Struma, being parted from the Maritsa basin by the Vitoša and Rila Mts. The rivers Kamčyk and Mandra Su flow E. into the Black Sea. The climate is characterised by hot, dry summers, short, dry winters, rainy springs and autumns, with abrupt changes, and a wide range of temperature (86° to −2° F. at Sofia); but it is healthy, except in the marshes along the rivers and the Black Sea. Temp., Jan. 27.5°, July 70°, yr. 50°; rainfall, 250 in. at Sofia, 270 at Rusčuk. Forest trees (oak, ash, lime, with some Coniferæ and beech) grow on the mountains. The plains are generally treeless, except for scrub (oak, sumach, thorn, elder), and orchards of plum, walnut, apples, pears, cherries. Bear, wild boar, red and roe deer, chamois, eagles, vultures, Falconidæ, and owls abound in the mountains; wild boar and wild fowl in the marshes; and wolves, partridges, hares, weasels, stoats, otter, badger, quail, woodcock, are plentiful everywhere. The squirrel, leech, and marmot also occur. Sturgeon are taken in the Danube, trout in all streams, and mackerel (to be dried) in the Black Sea near Burgas. The domestic animals are horses (small and hardy, for riding only), asses and mules, buffaloes and oxen, sheep, goats. Salt (10,000 to 15,000 tons) at Anchialos and Balčik, gypsum near Stara Zagora, and coal in the Struma valley, are the only minerals extracted, though iron and gold exist, as well as turf. There are many sulphur springs on the S. of the Balkans. The chief occupation is agriculture, engaging 70 per cent. of the population. Cereals (wheat, maize, barley, rye, oats) are the principal crops, and rank first among the exports (90 per cent. of total). Wine, about 80,000 gallons annually, is made everywhere, especially near the Black Sea. Roses are cultivated between the Balkans and Sredna Gora, especially round Kazanlik and Karlovo, and on the N. side of the Rhodope Mts., for attar of roses for export. About 12,000 Bulgarians go abroad every spring, returning in autumn to work as gardeners. Silkworms are bred in Philippopolis and Haskovo. Tobacco is carefully cultivated. There is little industry apart from domestic branches, of which the more notable produce native cloth, carpets, trimmings and ribbons, and hosiery; but there is some brewing and distilling (*slivovitsa* from plums), leather-work (at Šumen), furriery, corn-grinding, silk-spinning (Trnovo), copper-work (Stara Zagora), and pottery-making (Trn, Rusčuk, Silistria). The total value of the exports does not quite reach £3,000,000; grain, live stock, native cloth, butter and eggs, hides, and attar of roses being the heaviest items. These things are sent chiefly to Turkey, France, the United Kingdom, and Austria-Hungary. The imports average somewhat more than the exports; they consist principally of textiles, groceries, metals, wines and spirits, timber, paper, glass and pottery, oils, &c., and leather, and are mostly supplied by Austria-Hungary and the United Kingdom. The pop. embraces 74 per cent. Bulgarians, 19 per cent. Turks, less than 2 per cent. Greeks, 2 per cent. Gipsies, and .75 per cent. Spanish Jews. Since 1877 great numbers of Turks have left the country; their place in the plains is being taken by native Bulgarians from the mountains. The Bulgarians are descended from the ancient Finno-Ugric Bolgari, but have been for centuries thoroughly 'slavised.' The Orthodox Greek Church, with twelve eparchies or bishoprics, counts 77 per cent. of the people as its adherents, Islam reckons 21½ per cent., the rest are Jews, Roman Catholics, and Armenians. Great pains are being taken to foster education; but for a university training young men are sent abroad by the state. The main line of railway from Vienna to Constantinople passes through Sofia, the cap., and Philippopolis. There are nineteen towns, besides the two just named, whose pop. exceeds 10,000. Military service is compulsory, 16,000 recruits being drafted every year. B. has small flotilla on the Danube. The *okka*=3 lb., divided into 400 drams, each=16 krat, and each krat=32 corns, is the principal dry measure. Two ells (2½ ft. and 2½ ft.) are in use. The ell=8 rup, 1 rup=16 grech, 1 grech=32 fingers. The uvrat=618 sq. yds., divided into 4 lecha, is the unit of land measurement. Money is reckoned in francs and centimes. The annual budget balances at £3,500,000. B. pays an annual tribute to the Sultan. The executive head of the state is an hereditary prince, who is assisted by responsible ministers. The members of the legislative national assembly are elected directly by the people, one for every 10,000 inhabitants, and sit for three years. The Bolgari settled in the region between the Danube and Balkans towards the end of the 7th century. They adopted Christianity, and the language and customs of their Slovenian subjects, in the 9th century. Twice during the 9th–10th centuries, and again in the 12th, their rulers (tsars) extended their sway over the greater part of the Balkan Penin. Then, for close upon five hundred years, they were subject to the tyrannous rule of the Ottoman Turks; but were freed in 1878. Southern B. (East Roumelia) was incorporated in the Bulgarian state in 1885. See the voluminous monograph of Dr. C. Jireček, *Bulgarien*, Vienna, 1891, and J. Samuelson, *Bulgaria, Past and Present*, 1888 [**J. T. B.**].

Burguillos, tn., Spain, prov. and 38 m. SE. by S. Badajoz. P. 5000.

Burgundy, in French **Bourgogne,** an old duchy of France, between the Saône and the middle Loire, and corresponding to the modern deps. Saône-et-Loire, Côte d'Or, and parts of Yonne and Nièvre; cap. Dijon. On the dissolution of the empire of Charlemagne, two kingdoms of B. were formed in the basin of the Rhone, Cis-Juran B. with Vienne, and Trans-Juran B., with Avenche for its cap. In 933 the two were united to form the kingdom of Arles, which was annexed in 1032 to the German empire. The duchy was founded in 887 by Richard the Justicer, and attained the height of its power under its last duke, Charles the Bold, in the latter part of the 15th century. On his death in 1477, B. was attached to the crown of France. B. formed afterwards, along with Bresse (dep. Ain) one of the general-governments of France.

Burgundy Canal, France, connecting the basins of the Seine and Rhone, begins just below the confluence of the Yonne and Armançon (NNW. of Auxerre), ascends the valley of the Armançon, then descends in zig-zags that of the Ouche, passes Dijon, and joins the Saône at St. Jean-de-Losne; 152 m. long; 191 locks; the summit (1230 ft.) in a tunnel 2 m. long, near Pouilly-en-Auxois. Begun 1775, completed 1832.

Búrha, tn., Brit. India, Central Provs., cap. dist. Bálághát, 96 m. S. by E. Jabalpur. P. 5100; Hindus, 4200.

Burham, par. and vil., Eng., Kent, Medway div., on the Medway, 4½ m. SW. by S. Chatham, close to Snodland stn.; has extensive cement and lime works and brickfields. In the vicinity of village is a quarry, which once abounded in fossil remains. PM.O. P.<2000.

Burhan, tn., Brit. India, Punjab, dist. Ráwal Pindi, 57 m. E. by S. Pesháwar.

Burlus, Lake, a shallow lagoon, Egypt, in the N. of the delta of the Nile, stretching about 50 m. E. from the Rosetta mouth, bordered on the S. by swamps which are being reclaimed. See **Egypt.**

Burma, the country in the NW. of the Indo-Chinese Penin., now forming the two chief commissionerships of Lower and Upper B., under the government of Brit. India. The southern portion, which formed part of Brit. India before the 1st of January 1886, is known as **Lower B.,** the remainder, which was annexed by proclamation of the Governor-General on that date, is called **Upper B.** Lower B. was annexed partly in 1826, partly in 1852. The areas annexed in 1826 were the greater part of the present div. of Arakan, occupying the narrow strip between the Bay of Bengal and the mountains on the W. side of the basin of the Iráwadi (Irrawaddy), and the Tennaserim div., occupying the lower part of the valleys of the Salwín and Sittaung, and the narrow coast strip to the S., extending to the isthmus of Kra. The delta of

the Iráwadi and the lower part of the valley of that river above the delta, now forming the Pegu and Iráwadi divs., were annexed in 1852. In addition to the area under direct British administration, there are large tracts on the E. and N. (Shan States, &c., see below) regarded as within the British frontier. The place of this frontier on the side of Siam is now being settled by a commission. On the E. the limits of this terr., which extends to that claimed by France, are doubtful. In the NE. the terr. between Iráwadi and the Tapaing R. (which enters the Irawadi on the left at Bhamo) is claimed both by the British and the Chinese. The following table gives the names of the divs. and dists. of B. under direct British administration:—

Lower Burma.	Area in sq. m.	Pop. in Thousands. 1872.	1881.	1891.	Inc. '81-91.	Pop. per sq. m. 1891.

B. is traversed by several **mountain ranges,** trending mostly from N. to S., in the same general direction accordingly as that followed by the principal rivers. The principal mountain ranges are the Arakan-yoma Mts., between Arakan and the basin of the Iráwadi, the Pegu-yoma Mts., between the basins of the Iráwadi and the Sittaung, and the Paung-laung Mts., between those of the Sittaung and the Salwín. The Patkoi Mts., on the NW., on the Assam frontier, have a NE.-SW. trend. Of the **rivers** of B., the Iráwadi (Irrawaddy) is in every respect the most important, and as regards navigation it is by far the most important river of the entire penin. It traverses the entire length of the middle portion of the prov., and is regularly navigated by steamers of considerable size as high as Bhamo, in about lat. 24° N., a distance of about 900 m. At Bhamo the further progress of steamers is obstructed by rapids. The Kyendwin, or Chindwin, the chief trib. of the Iráwadi (right bank), is also navigated, but is ascended with no little difficulty on account of the strength of the current. The same hindrance is met with on the Sittaung, the navigation of which is likewise impeded by shifting sandbanks and the windings of the course, and is sometimes rendered dangerous by the violence of the bore. The Salwín is scarcely navigable at all, except for a few miles above its mouth. The **climate** of B. is very similar to that of Bengal, but is somewhat warmer, especially during the cool season, in consequence of the more southerly latitude. [**Mergui, Maulmain, Rangoon, Akyab, Taung-ngu, Mandalay, Thayet-myo.**] Irrigation is not required in Lower B., but in Upper B. irrigation systems existed at Kyauk-se, Minbu, and other places within a short radius of Mandalay, and these are now being restored and improved. As regards salubrity, the British troops in B. are said now to enjoy better health on the average than those in India proper, although at first the mortality among them was high. The excessive rainfall, heavy mists, and extraordinarily rapid growth of vegetation render hill-stations scarcely tenable during the rainy season in Lower B., but the station of Bernardmyo (6000 ft.) has been established to the E. of the Iráwadi in Upper B. In the delta of the Iráwadi and the other low plains of the prov., the **principal crop** is rice; and as the area covered by this crop is extensive in proportion to the population, there is a large surplus for export. Between 60 and 70 per cent. of the whole export of rice from British India comes from this one prov., which has indeed the largest rice export in the world. The prov. also ranks first for its export of teak, mostly from the mountains of Upper B., the Burmese rivers affording special facilities for floating and shipping the timber. Among other vegetable products are cutch and rubber. The **minerals** include petroleum, coal, gold and silver, jade, rubies, and amber. Petroleum has long been a commercial product of some importance both in Lower and Upper B., in Lower B. in the Akyab dist. (Borongo I.) and Kyauk-pyu dist. (Ramri I.), in Upper B. in the region round Yenaung-young, on the l. bk. of the Iráwadi, in about 20° 25′ N., this place of production being by far the most important of all. Three coal-fields are known in Upper B., that supplying the best coal and occupying the greatest area being in the valley of the Kyendwin (Chindwin), between about 23° and 24° N., but the difficult navigation of that river, together with the lack of other means of transport, has hitherto hindered the working of these deposits. Gold, jade, and rubies are all products of the northern parts of Upper B. The gold is scattered in fine grains and leaflets over northern valleys difficult of access. The Burmese jade, obtained chiefly from the Kakhyen country, in a dist. between the Kyendwin and Iráwadi valleys, about 96° E. and S. of 26° N., forms the chief supply of that mineral in the markets of China and Japan, where it is of great value, and the amber-mines (producing a dark, reddish-brown amber esteemed in China though not in Europe), lie almost due N. in 26° 20′. The ruby-mines of B. (at Mogok, a high valley to the E. of the Iráwadi, about halfway between Mandalay and Bhamo) furnish the only rubies of the finest colour to be found anywhere. Sapphires and other precious stones, copper, tin (at Maliwon in Mergui dist.), lead, iron, and other minerals also exist. There are two lines of railway in B., both metre-gauge. Both start from Rangoon, one proceeding to Prome on the Iráwadi, and the other first proceeding NE. to Pegu, then ascending the valley of the Sittaung, and then continuing farther N. to Mandalay, on the l. bk. of the Iráwadi. A farther extension of this railway northwards is now being made on the opposite side of the Iráwadi. The route for a proposed railway across the Patkoi Mts., to connect the railway system of B. with India proper, has been surveyed. There is a cart-road from Thabeitkyin on the Iráwadi, in 22° 50′ N., to Bernardmyo in the ruby-mines dist., with a branch to Mogok. **People.**—The Burmese proper make up about five-sevenths of the pop. of Lower B. In physical form they are more allied to the Mongolians of E. Asia than to the Hindus; figure short, robust, and fleshy, face lozenge-shaped, cheek-bones large and oblique, hair black, coarse and lank, and skin light brown and yellowish. Their language is monosyllabic, allied to the Chinese. The Burmese are gay, frank, and fond of amusements. Their religion is Buddhism. [**India,** table.] Education is in the hands of the priests, especially those of the monastic orders (*phúng-yis*), who are nearly all engaged in teaching. Reading and writing are very generally diffused. Next in number to the Burmese in Lower B. are the Karens, who are believed to have immigrated from China, and are now settled in large numbers in the delta of the Iráwadi and the interior of Tenasserim; and next in number to the Karens are the Talaings, as they are

called by the Burmese, Mon as they are called by themselves, the majority of whom belong to the dist. of Amherst. In Upper B., the principal non-Burmese races within the terr. under British administration are the Chins, Khyens or Khyins, inhabiting the hilly country between the Arakan-yoma Mts. and the Kyendwin, and to the W. of these the Lushais (*q.v.*). Both of these have for years been in the habit of raiding the villages in the adjoining valleys, which has been the cause of the despatch of several punitive expeditions since Upper B. came under British rule. Part of the northern Shan country is occupied by the Paloungs, a quiet retiring race, who collect and prepare the wild tea of those regions, which is eaten throughout B. in the form of pickled tea. Of the **feudatory tribes** the principal are the Shans, who inhabit a wide area extending E. to the French part of Indo-China, and stretching S. into Siam. They are subject to their own chiefs (*sawbwas* or *tsawbwas*), but one or two of these chieftaincies have been brought under direct British rule since the annexation of Upper B. A branch of the Shans known as the Khamtis occupy the territory in the extreme N. in the angle between Assam and the Chinese prov. of Yunnan. Among the feudatory tribes of B. may be mentioned also the Karens of Karen-ni (*q.v.*), a plateau from 3000 to 4000 feet in height, between the Paunglaung Mts. and the R. Salwín. To the N. of the terr. under direct British administration, in the wild mountainous country containing the headwaters of the Kyendwin and the Iráwadi, but to the S. of the Khamtis, dwell the northern Chins, known as the Kachins or Kakhyens, and in the Assam hills and the neighbourhood as Singphos, a courageous people, skilful in defending their mountain fastnesses, notable robbers, and much given to the levying of blackmail on some of the trade-routes to China. The **chief towns** of Lower B. are Rangoon, the cap., Maulmain, Akyab, Bassein, Prome, Pegu, Mergui, and Tavoy; of Upper B., Mandalay, the cap., Ava, and Pagan. Of the **history** of B., previous to its occupation by the British, the records are very scanty. In general, the country seems to have been so much disturbed by internal wars and foreign invasions as to leave little opportunity for orderly development, and to this cause is no doubt to be ascribed the scantiness of the population, which has left room for such rapid increase of the numbers of the inhabitants since the country became British. [**India,** table.] In Lower B. there were at least four old kingdoms, Arakan, Thah-tun, Martaban, and Pegu, all of which are said to have had an Indian origin, and without doubt derived from India their literature and religion. The most celebrated of these kingdoms is that of Pegu, which happened to be in the height of its prosperity when it was first visited by Europeans in the 16th century, when it embraced the valleys of the Iráwadi and Sittaung. Towards the close of that century its power waned in consequence of a war with the kings of Ava in Upper B., and after that date the kingdom of Arakan was the most powerful in Lower B. It was the aggressions of this latter kingdom that led to the first war with the British. The old Burmese empire in Upper B. was at the height of its power in the 11th to the 13th century, when Pagan was the cap. Afterwards this region was included in the kingdom of Pegu, and after the decline of that power remained, during the 17th, 18th, and 19th centuries down to 1886, subject to dynasties reigning at Ava (including Sagain), Amarapura, and Mandalay.

Buru (Dutch spelling, **Boeroe**), isl., E. Archipelago, one of the Amboina Is., between Celebes I. and New Guinea, 3° 14′ S., 126° E.; separated from Ceram on the E. by B. or Manipa Strait, 85 by 40 m.; mainly composed of sedimentary rocks, but with volcanic cone at W. end; contains Lake Wakolo (apparently a crater lake) near the middle, at height of 1900 ft.; produces cayaput (cajeput), oil, sago, &c.; inhabited by a Malay people in the N., mainly by Papuans in the S. Area nearly 2000 sq. m.

Buru-Göl, lake, Turkey in Europe, in the extreme S., communicating with the Karagach Liman, about 22 m. ENE. of the mouth of the Kara-Su.

Burujird, tn., Persia, prov. Irak Ajemi, 78 m. S. by E. Hamadan, on the plain of **B.** or **Silakhor,** an important trade-centre, having connections with Hamadan, Kirmanshah, Khuramabad, and Kum. Alt. 4375 ft. (Bell). P. 12,000 to 18,000.

Burunean, Punta, cape, Philippine Is., the S. point of Mindoro, in 12° 9′ N., 121° 14′ E.

Burwardsley, par., Eng., Cheshire, Eddisbury div., 9½ m. SE. Chester, 3 m. ESE. Tattenhall stn. P. <500.

Burwarton, par., Eng., Salop, Ludlow div., 14 m. WNW. Kidderminster, 7½ m. NW. Cleobury Mortimer stn., PM.O. P. <250.

Burwash, par. and vil., Eng., Sussex, Rye div., 11 m. SE. by S. Tunbridge Wells, 2½ m. SSE. Ticehurst stn., PMT.O.; par. 7452 ac. P. <2500.

Burwash Weald, eccles. par., Eng., Sussex, near Etchingham. P. <1000.

Burwell, par. and vil., Eng., Cambridge, div. and 4 m. NW. by W. Newmarket, on the G. E. R., producing phosphate of lime, PMT.O.; 7446 ac. P. <2000.

Burwell, par., Eng., Lincolnshire, div. and 5⅛ m. S. by E. Louth, 3 m. W. by S. Authorpe stn., P.O. P. <250. See **Muckton.**

Burwick, hamlet, Scot., Orkney Is., near the S. end of Ronaldshay I., P.O.

Burwood, municip., New South Wales, 7 m. W. Sydney, on the Great Southern Rly. P. <1500.

Burwood (late **Bally Shanassy**), post-vil., Victoria, co. Bourke, 8 m. E. Melbourne. P. <1500.

Bury, par., Eng., Huntingdonshire, Ramsey div., 8½ m. NNE. Huntingdon, 1 m. SW. Ramsey, P.O. P. <500.

Bury, parl., mun. (incorporated 1876), and co. bor., par., and tn., Eng., Lancashire, 5½ m. E. by N. Bolton, in the diocese of Manchester, on the L. & Y. R., and the Manchester, B., and Bolton Canal. Manufactures of woollen goods (since time of Edward III.), cotton-spinning and weaving, iron-foundries, bleach and dye works, paper-mills, &c. Market-day, S. Par. P. 41,000; parl. bor. P. 55,500; mun. and co. bor. P. 57,200.

Bury, par., Eng., Sussex, Horsham div., on the Arun, 3½ m. N. Arundel, 1½ m. NW. Amberley stn., P.O. P. <750.

Bury, New, eccles. par., Eng., Lancashire, near Bolton-le-Moors. P. 5600.

Buryas Bridge, P.O., Eng., Cornwall, 2 m. from Newlyn.

Buryates, or **Buryats.** See **Siberia,** people.

Bury Hill, a hill, Eng., Hampshire, Andover div., 12½ m. NW. Winchester, 2 m. SW. Andover; with ancient camp.

Bury Lane, hamlet, Eng., Lancashire, 11 m. W. Manchester, with a stn. (**Glazebury and B. L.**) on the L. & NW. R.

Bury St. Edmunds, parl. bor. (returning one member), mun. bor. (since the time of James I.), Eng., Suffolk, Stowmarket div., in the diocese of Ely, 13½ m. E. Newmarket, on the G. E. R. There are factories of agricultural implements, and many malting establishments. The principal buildings are the fine parish church of St. Mary, erected 1005 and rebuilt in 1421; the church of St. James, built by Abbot Anselm about 1125 (the main portions since rebuilt); the Norman Tower, built about 1090 by Abbot Baldwin; and the grammar school, founded by Edward VI. In Saxon times B. was a royal bor., called 'Beodric's Worthe,' and one of the chief towns of E. Anglia. Here the body of the murdered King Edmund was buried, and over his grave was built a large church with a wonderful cover of wood; the king himself was canonised, miracles were declared to be wrought at his tomb, and the place began to be called St. Edmundsbury. The scanty remains of the ancient Benedictine abbey, founded by Canute in honour of St. Edmund, are found in a well-kept botanical garden, to enter which one passes under the Abbey Gate, a magnificent decorated work dating from 1337. Market-days, W. and S. Mean rainfall (1866–80), 26 in. Parl. and mun. bor. P. (1891) 16,600.

Bury Street, place, Eng., near Manchester, PM.O.

Burythorpe, par. and vil., Eng., Yorkshire, E. Riding, Buckrose div., 15 m. NE. by E. York, 4½ m. S. Malton, 3 m. E. Kirkham Abbey stn., P.O. P. <250.

Burza, riv., in the SE. of Transylvania, Hungary, flows NE into the Aluta, to the N. of Kronstadt.

Burzu, tn., Persia. See **Sarvistan.**

Busa, W. Africa. See **Bussa.**

Bu Saada (Arabic, 'the happy'), tn., Algeria, on the r. bk. of the Dermel, 122 m. SSW. Bougie. P. 5400.

Busachi, comm., Sardinia, prov. Cagliari, 50 m. SSE. Sassari. P. <3000.

Busaco, a hamlet and convent of Portugal, prov. Beira, in the Serra-de-Busaco, 20 m. NNE. Coimbra. Here, on Sept. 27, 1810, the French were repulsed in an attack upon the troops under the Duke of Wellington.

Bu Said, cape, on the Bay of Tunis, 11 m. ENE. Tunis.

Busalla, tn., N. Italy, prov. and circle Genoa. P. <4000.

Busambra, Rocca, mt., Sicily, in the W., 18½ m. S. Palermo. Alt. 5295 ft.

Büsbach, vil., Ger., Rhine Prov., circle and dist. Aix-la-Chapelle; has coal-mines and important woollen manufactures. P. 5800.

Busbridge, eccles. par., Eng., Surrey, near Godalming. P. <1500.

Busby, vil., Scot., on the borders of Renfrewshire and Lanarkshire (S. div.), on White Cart Water, 5 m. S. Glasgow, on the C. R., with cotton-mill and printing-works, PMT.O. P. <2000.

Busby, Great, par., Eng., Yorkshire, N. Riding, in the S. of the Cleveland div., 10 m. S. Middlesbrough, 1 m. S. by W. Stokesley stn. P. <250.

Busby, Little, par., adjoining Great B. P. <250.

Busca, tn., Italy, Piedmont, prov. Cuneo, on R. Maira, 8 m. S. Saluzzo, with marble and alabaster quarries. P. 9000.

Buscemi, tn., Sicily, prov. Syracuse, circle Noto. P. <3000.

Buschow, vil., Ger., Prussia, prov. Brandenburg, 13 m. N. by E. Brandenburg. P. <2000.

Busch Sand, sandbank, Prussia, prov. Schleswig-Holstein, off the W. ct., in 54° 2′ N., 8° 37′ E.

Buschtĕhrad (formerly **Buckow**), tn., Austria, Bohemia, 11 m. WNW. Prague, with collieries. P. <4000.

Buscot, par., Eng., Berkshire, div. and 17 m. W. Abingdon, 2 m. S. by E. Lechlade stn., P.O. P. <500.

Bu Sellam, riv., Algeria, prov. Constantine, traverses very deep and savage defiles, and enters the Sahel or Bougie R., after a course of 137 m.

Busemprah, riv., W. Africa. See **Busum-pra.**

Busen, isl., on the ct. of Dithmarschen, govt. Schleswig.

Busento, trib. of the Crati, Italy, prov. Cosenza.

Busera, riv., central Africa, flows NW. into the Chuapa, which it enters a little to the S. of the equator, in about 18° 40′ E.; navigable to about 20° E.

Bu-Shater, site, 17½ m. NNW. Tunis, on a promontory overlooking the deltaic deposits of the Mejerda, with ruins of ancient *Utica.*

Bush, stn., Ire., co. Louth, 10 m. E. Dundalk, on the L. & NW. R.

Bushbury, par. and vil., Eng., Staffordshire, Kingswinford div., 2½ m. N. by E. Wolverhampton, a junction on the L. & NW. and M. Rlys., PM.O. Par. P. <2500; eccles. par. (**B. with Essington**) P. <4000.

Bushby, par., Eng., Leicestershire, Billesdon union. P. <250.

Bush End, part of eccles. par., Eng., Essex. See **Hatfield Broad Oak.**

Bushey, par. and vil., Eng., Hertfordshire, Watford div., 5½ m. N. by W. Harrow, on the L. & NW. R., PMT.O. P. 5700.

Bushey Heath, eccles. par., Eng., Hertfordshire, near Watford, 1½ m. S. Bushey, PMT.O. P. <2000.

Bushey Park, royal park, Eng., Middlesex, 14 m. SW. London, on the Thames, and with a stn. (**Teddington and B. P.**) on the L. & SW. R.

Bush Hill Park, stn., Eng., Middlesex, Enfield div., on the G. E. R., 9 m. N. St. Paul's, London, ½ m. SE. Enfield, PMT.O.

Bushire, properly **Abu-Shehr** (Arabic, 'Father of cities'), or **Bender, Bandar,** or **Bunder B.,** a seaport city of Persia, and its principal *entrepôt* on the Persian Gulf, terminus of the land-route from Shiraz [**Persia,** communications], at the N. extremity of a sandy penin., which is regularly converted into an island by the rise of the water in the gulf. The space between this penin. and the mainland forms the harbour, the bar of which can be

crossed by vessels drawing 13 ft. at low water, 19½ ft. (or occasionally 20–20½ ft. at high water). Larger vessels have to anchor about 4 m. off in water exposed to all winds from the NW. to the SE. Value of imports upwards of £1,000,000, mainly from the United Kingdom and British India (cottons, metals, sugar, &c.); principal exports, opium, grain, tobacco, cotton and silk, mostly for China, British India, and the United Kingdom. Good drinking water lacking. Climate sultry and unhealthy. Mean temp. (9 yrs., 1878–86), yr. 73.6° F., Jan. 57.5°, Aug. 88.8°; rainfall (8 yrs.), 14.50 in. Lat. 29° N., long. 50° 52′ E. P. 12–20,000.

Bushley, par., Eng., Worcestershire, Evesham div., on the r. bk. of the Severn, 2 m. NW. Tewkesbury, P.O. P. <500.

Bushmans Nek, a pass across the Quathlamba Mts., in the E. of Basuto-land, in 29° 52′ S.

Bushmen, in Dutch **Bosjesmans,** a S. African people closely allied to the Hottentots, called by themselves **Saan** or **Sagua,** by the Kaffirs **Abatua,** by the Bechuanas **Makautu**; confined to the Kalahari and Damaraland. They are of low stature; expert, daring, and untiring hunters, using both the gun and the bow and arrow (the arrows often poisoned); vindictive and treacherous. They have as a rule no settled habitations; those belonging to the mountains living in caves and clefts in the rocks, the sides of which they are fond of covering with coloured drawings; those of the plains living in holes in the ground, or sheltering themselves under bushes.

Bushmills, market-tn., Ire., NW. co. Antrim, bars. Lower Dunluce and Cary, 5 m. E. Portrush, 1½ m. S. of the Giant's Causeway; connected with both places by an electric railway. PMT.O. 42 ac. P. <1500.

Bushnell, city, U.S., Illinois, Donough co., 68 m. NW. Springfield. P. <3000.

Bushnell, vil., U.S., Nebraska, Cheyenne co., on Lodge Pole Creek, 162 m. W. by N. of the confluence of the N. and S. Platte. P. <1500.

Bush River, Ire., N. co. Antrim, bar. Cary, flows W. then N., and enters the sea to the W. of the Giant's Causeway.

Bush River, vil., U.S., Maryland, Harford co., 22 m. NE. by E. Baltimore. P. <1500.

Bushruieh, vil., Persia, prov. Khorassan, 160 m. S. Sebzewar, 37 m. NE. by E. Tabbas.

Bushwood, par., Eng., Warwickshire, Solihull Union. P. <250.

Bushy Park, Eng. See **Bushey Park.**

Busi, terr., Africa. See **Liberia.**

Busi, or **Bosi,** riv., Portuguese E. Africa, flows E. into the Indian Ocean, which it enters about 9 m. N. of Sofala, navigable to the confluence of the Lusiti in 33° 20′ E., about 120 m. from the mouth.

Busi, isl., in Adriatic Sea or ct. of Dalmatia, SW. of Lissa, S. of 43° N., just E. of 16° E., with a blue grotto like that of Capri.

Busigny, tn., France, on the borders of dep. Nord and Aisne, arr. and 15 m. SE. Cambrai. P. <3000.

Busk, comm., Austria, crownland Galicia, on R. Bug, 27 m. ENE. Lemberg. P. 6300.

Buskerud, a bailiwick of Norway, diocese of Christiania, occupying a portion of the watershed to the Skager-rak, between the dists. of Christiania and Bratsberg, drained by the Hallingdal and Lauven Elv.

Buskevik, harb., Sweden, W. ct., isl. Gotland, near Visby.

Buskö, isl., Gulf of Bothnia, on E. ct. Sweden, in 65° 1′ N.

Buslingthorpe, par. and hamlet, Eng., Lincolnshire, Louth div., 11 m. NE. Lincoln, 3 m. SW. by S. Market Rasen, 1½ m. N. Wickenby stn. P. <250. See **Faldingworth.**

Buslingthorpe (St. Michael), eccles. par., Eng., Yorkshire, in Leeds par. P. 8500.

Buso'ga, Brit. E. Africa. See **Usoga.**

Busot, comm., Spain, prov. and 10 m. NE. by N. Alicante, amidst picturesque scenery, with mineral springs (100° F.), and a well-appointed establishment for taking the waters. P. <2000.

Busra, Busreh, Basra, or **Bussorah,** tn., Turkey in Asia, cap. vilayet B., 2 or 3 m. up the Ashar or B. Creek, which joins the r. bk. of the Shat-el-Arab about 60 m. from its mouth, at the head of navigation for ocean-steamers of not more than 19 ft. draught (larger vessels being unable to cross the bar at the mouth of the river), the principal Turkish port of the Persian Gulf. Site malarious, though much improved in salubrity since date and wheat cultivation were substituted for rice. Another cause of the heavy mortality of the town is the fact that the B. Creek is at once the source of the drinking-water and the receptacle of all the drainage of the town, but there is a scheme for obtaining drinking-water from the main river above the town. Value of exports above £1,000,000; dates and wool more than one-half. The dates have long been celebrated. Marco Polo (13th century), who calls the place Bastra, speaks of them as the best in the world. Principal imports, silk, cotton, and woollen fabrics. P. 40,000, principally Arabs, the remainder Persians, Jews, and Christians. According to Cuinet, the total pop. is only 18,000, of whom 14,650 are Moham. (mainly Sunnite) and 1500 Armenians.

Bussa, or **Bussang,** tn., W. Sudan, cap. dist. B., on an isl. in the Niger, in about 10° 14′ N., 5° 20′ E. Near this Mungo Park the traveller was murdered. P. 10,000–18,000.

Butaritari, one of the Gilbert Is. (*q.v.*), Pacific Ocean.

Butchers Island, isl., Brit. India, in Bombay harbour.

Butcombe, par., Eng., Somerset, Wells div., 8 m. SW. by S. Bristol, P.O. P. <250.

Bute, isl., Scot., in the Firth of Clyde, forming with Arran, &c., the co. B., and separated from Argyllshire by a winding channel (the Kyles of B.), generally less than 1 m. across. It is in length 15½ m., and from 2 to 5 m. in breadth. Its N. part is composed of archæan and metamorphic rocks, and is mountainous and rugged; its centre and S. part are composed of old red sandstone, followed in the extreme S. by granite, and are undulating, with a fertile soil. In the centre are the small lakes Fad, Ascog, and Quein; and there is a vitrified fort at its S. end. Its climate [**Rothesay**] is moist, but the mildness and equability of its temperature have made it a resort of invalids. Area, 45,709 m. P. 11,700. See **Scotland,** table.

Bute, North, par., Scot., in N. of Bute I.; 14,756 ac. P. <1500.

Bute, Sound of, Scot., between the isls. of Bute and Arran.

Bute Docks, harb., Wales. See **Cardiff.**

Bute Inlet, a great fiord, Canada, Brit. Columbia, in 50° 30′ N. and 125° W. It receives the waters of the R. Hamathco, and has Valdez I. between its mouth and Vancouver. Noted for its magnificent scenery; rocky sides 4000–8000 ft. high.

Butera, tn., Sicily, prov. and 22 m. SSE. Caltanissetta. P. 6000.

Buteshire, co., Scot., composed of isls. of Bute, Arran, the Cumbraes, Holy Isle, Inchmarnock, and Pladda, in the Firth of Clyde. See **Scotland,** table.

Butha Buthe, a residency in the N. of Basuto-land, in about 28° 3′ S., 28° 13′ E.

Bu Thaleb, beautiful wooded mountain, Algeria, prov. and about 85 m. WSW. Constantine; the scene (1871) of a decisive action against the rebel tribes.

Buti, tn., Italy, Tuscany, 9½ m. E. Pisa. Its vicinity produces excellent olives. P. 5000.

Buxtehude, tn., Prussia, prov. Hanover, 15 m. W. by S. Hamburg. P.<4000.

Buxton (*Bucostenum*), market-tn. and watering-place, Eng., Derbyshire, 15 m. SE. Stockport, on the L. & NW. R., and M. R. It is situated amidst picturesque environs, near the head of the Wye valley, nearly 1000 ft. above the sea, and consists of an old and a new town. Its natural and hot baths of mineral waters have been celebrated for centuries. The Devonshire Hospital and Bath Charity is an important institution supported by voluntary contributions for the relief of poor persons from all parts. B. has public gardens of 24 ac., and a concert hall. The dist. is very healthy, the death-rate being as low as 10 per 1000. Coal-mines and large lime-works, alabaster, spar, and inlaid marble works. Adjacent to the town are Poole's Hole, a stalactite cavern, and Diamond Hill, where crystals of quartz are found. Many old castles and seats (Chatsworth, Haddon Hall, Old Hall, &c.) in the neighbourhood. Alt. 987 ft. Mean rainfall (1866–80), 57 in. P. (1801) 760; (1871) 3700; (1891) par. P.<5000; tn. P. 7500.

Buxton, par. and vil., Eng., Norfolk, N. div., on the Bure, 9 m. N. Norwich, with a stn. (**Buxton Lamas**) on the G. E. R., PMT.O. P.<750.

Cadiz, prov. (since 1833), in the southernmost part of Spain, between the Atlantic and the Mediterranean, forming the N. side of the Strait of Gibraltar, and a triangle between (*a.*) the sea, (*b.*) riv. Guadalquivir (prov. of Huelva), Sierras de Gibaldin-Algodonales, riv. Guadalete (prov. Seville), and (*c.*) Sierra de Libar-Ubrique, riv. Guadiaro (prov. Malaga). It is old *Tarshish* and *Tartessus.* Is covered with mountains branching from Ronda Chain (San Cristobal, 5629 ft.). Very well watered. In the W. extends the sherry wine district (Jerez, Rota, Puerto de Santa Maria, Chiclana, San Lucar). Fruits are famous (Tarifa oranges). At the SW. is Cape Trafalgar, off which Nelson conquered and died. English Gibraltar is at the SE. extreme of the prov. The Spanish possessions in Africa are dependencies of the prov. of C. Principal ports are San Lucar, Puerto de Santa Maria, Cadiz, Conil, Tarifa, Algeciras.

Cadiz, bay, formed by the Isla of León with the town of C. and its long isthmus, divided into two natural basins. The large and exterior one, exposed to the SW., has at its entrance Rota (N.), C. town (S., with dangerous rocks, Cuchinos, Puercas, Diamante). Riv. Guadalete flows into it near Puerto de Santa Maria (greatest width of the bay, 7 m.). The small inner basin is very well protected. It has at the entrance the Channel (Caño de) of Trocadero, and at the head (SE. of the city of C.) (*a.*) La Carráca, since 1790 one of the principal arsenals and naval colleges of Spain, on the islands between the bay and riv. Santi Petri, the sea arm (6 m. wide) separating Isla de León from the mainland; (*b.*) the observatory of San Fernando, the oldest in Spain (36° 27′ 45″ lat., 25° 9′ W. long.), on the Isla de León. Great production of salt in the marshes (*Salinas*).

Cadiz, tn., Spain, cap. prov. C., on the extremity of a long and narrow rocky and sandy peninsula (SE.-NW.) of the Isla de León (10–50 ft. alt.), one of the prettiest towns in the world (*la Copa de Plata,* 'the Silver Cup') in respect of its situation and buildings, and with a pleasant climate. No spring water; rain water kept in cisterns and brought from Puerto Real. Head of military government, maritime department, judicial district, bishopric. From Torre de Tavira (135 ft. alt.), view of all the Isla de León, the bay, and the most prominent points of the prov. Academy of fine arts, college of medicine (University of Seville), seminary. Industries: manufactured wools, cottons, linen, cabinet-making, gloves, hats, jewellery, tobacco. *Gaddir, Gadeira, Gades* was founded by the Phœnicians about 1100 B.C.; the *Julia Augusta Gaditana* of Cæsar and head of Tingitania; became Gothic in the 5th and Moorish in the 8th century. Taken by the Moors in 1262. C. had, with Seville, the monopoly of the trade with the W. Indies. Very good commercial position. Steamers between C. and Malaga (daily to Algeciras and Gibraltar in 8–10 hours), Lisbon, and the principal English, French, and American ports. Connected by rail with Madrid (450 m.), with Lisbon (through Merida), and the principal towns of the Peninsula. Shipping accommodation defective; 5–7 fathoms only at three-fourths of a mile from land. Min. temp. 41° F.; max. temp. 80° F.; mean rainfall, 22 in. P. (1877) 65,000; (1887) 62,500.

Cadiz, vil., U.S., Indiana, Henry co., 36 m. ENE. Indianapolis. P. <1500.

Cadiz, vil., U.S., Kentucky, Trigg co., 80 m. WNW. Nashville (Tenn.). P. <1500.

Cadiz, vil., U.S., Ohio, Harrison co., 22 m. NW. Wheeling (W. Va.), with coal-mines. P. <2000.

Cadiz, Bay of, an extensive inlet of the Atlantic, on the SW. ct. of Spain, prov. Cadiz, in 36° 30′ N., 6° 15′ W., bounded SW. by the peninsula of Cadiz, 5 m. in length, and divided into an outer and inner bay by the promontory and fort of Matagorda. Along its shores are some excellent harbours. In the islet La Carraca, on its E. side, are arsenals and shipbuilding yards, the most important in the kingdom.

Caegurwen, or **Caegurwain,** hamlet, Wales, Glamorganshire, 9 m. N. Neath, with coal.

Caen (*Cadomum*), city and seapt., France, cap. dep. Calvados, 122 m. WNW. Paris, and 9 m. from the English Channel, on l. bk. of the Orne. It has a university academy, schools of hydrography, medicine, and art, and a public library. The church of St. Étienne contains the tombs of William the Conqueror and his queen. Manufactures lace, oils, cottons, and woollens, and has shipbuilding yards. A maritime canal connects its port with the sea; and it has a basin with 17 ft. of water on the sill, and a tidal harbour 9.8 ft. deep at low, 14.1 ft. at high water. Exports to England butter, eggs, poultry, and fruits. The English took it in 1346, and again in 1417, when they held it till 1450. Previous to the revolution of 1790 it was the seat of a university, founded by Henry VI. of England. In the old university buildings are statues of Malherbe and Laplace. Birthplace of Auber. Temp., yr. 51.7° F., Jan. 39.9°, July 63.9°. P. (1872) 41,200; (1891) 45,200.

Cairntoul, one of the Cairngorm group of mts., Scot., Aberdeenshire, close to Inverness-shire, separated from Ben Macdhui (to the NE.) by Glen Dee. Alt. 4241 ft.

Cairnywellan Head, cape, Scot., Wigtownshire, on the SW. ct., in 54° 43′ N.

Cairo (kai'ro), an Italian corruption of *Masr-el-Kahirah,* 'the victorious' of the Arabs, the cap. city of Egypt, residence of the viceroy, and seat of government, near the r. bk. of the Nile, 5 m. from the origin of its delta. Lat. 30° 2′ 4″ N., long. 31° 15′ 36″ E. The city proper is built on the slope of one of the lowest ridges of the Jebel Mokattam, and is surrounded, N. and E., by old walls, and the highest part of the ridge is occupied by a citadel commanded by forts on the Mokattam, and containing the palace of the viceroy, the arsenal, mint, public offices, and the magnificent new mosque of Mehemet Ali. The city is separated from its suburbs Bulak and Masr-el-Atiqa by a series of gardens and plantations, chief of which is the Ezbekiah. Bulak, the port of C., is connected with it by a railway 1 m. in length; it was built in 1313 on land deposited by the river. At Bulak is the celebrated museum of antiquities, an unequalled collection of Egyptian remains of unique historical interest. C. is divided into several distinct quarters, as the Coptic, Jews', and Frank quarters, which were formerly separated by gates. The new quarter, called Ismailiyeh, the residence of Europeans and wealthy natives, has many of the houses in the Italian style, with large gardens attached. The remarkable edifices of C. comprise many of the finest remains of Arabian architecture, all dating from the time of the ancient sultans of Egypt. Among these, besides mosques, chapels, and Coptic churches, are several of the ancient gates, an aqueduct for conveying water from the Nile to the citadel, the works of the citadel, and the palace and well of Joseph. At Old C. are the seven towers, still called the 'Granary of Joseph,' and serving their ancient purpose. In the isl. of Rhoda is the celebrated Nilometer [**Nile**]. On the S., outside the walls, are the tombs of the Mamelukes, and on the NE. the obelisk of Heliopolis. There are also a public library containing a splendid collection of illuminated copies of the Koran, one of which, in Old Kufic, is ascribed to the 7th century; a magnetic observatory, and the Mohammedan college of El Ahzar (originally a mosque), the principal university of the Mohammedan world, attended by 10,000 to 12,000 students from all parts of the East. The sanitary condition is very bad, death-rate more than 46 per 1000 per annum. In 1892 an international sanitary commission recommended a scheme for conveying all the drainage by gravitation to one point, whence it might be pumped and distributed for irrigation. The suburb of Masr-el-Atiqa, or Old C. (first called *Fostat,* 'tent-town'), was the site of the original C., founded about 642 by the sultan Amru, the town on the present site, a little to the N. of Old C., not having been founded till about 970; its citadel was built by Saladin in 1176, and it was the capital of the sultans of Egypt till the time of the Turkish conquest in 1517; since that time it has been the residence of the pashas, governors of the province. It was taken by the French in 1798, and held by them for 3½ years. Mean temp. (14 yrs., 1868–81), yr. 71.2° F., Jan. 54.2°, July 85°; rainfall (5 yrs.), 1.34 in. P. (1871) 354,000; (1882) 375,000 (21,650 foreigners).

Cairo, tn., Italy, Liguria, prov. Genoa, 12 m. NW. by W. Savona. P. <4000.

Cairo (ke'ro), city, U.S., Illinois, Pulaski co., on a low point of land at the junctions of the Mississippi and Ohio Rivs. (across which latter there is now a rly. bridge), 125 m. SSE. St. Louis (Mo.). In 1858 almost entirely destroyed by a flood, from which it is now protected by 4 m. of levees. This liability to inundation, together with the swampy character of the site, nullified the other advantages of the situation, and thus hindered the growth of a great town here. Alt. 377 ft. Mean temp., yr. 57.8° F., Jan. 34.4°, July 79.2°; rainfall (13 yrs.), 46.74 in. P. (1870) 6,300; (1880) 9000; (1890) 10,300.

Cairo, vil., U.S., Ohio, Allen co., 65 m. SSW. Toledo. P. <1500.

Caithness, the most northerly co. of Scot., having W. the co. Sutherland, E. the North Sea, and N. the Pentland Firth. Surface hilly in the W., in the S. even mountainous (Morven, 2313 ft.; Scaraben, 2054 ft.), elsewhere flat or undulating. The hilly tract in the W. and SW. is composed of archæan rocks, the remainder of the county belongs to the Old Red Sandstone, which is spread out in horizontal beds of sandstone over the level plains, above which is tile clay surmounted in places by a deep fertile loam. Fossil fish and traces of vegetable remains are abundant in the shale and sandstone. About one-third of the surface is occupied by bogs or peat moors, one tract of considerable extent in the NE. being so swampy that it cannot be traversed by cattle. Three-fourths of the surface is altogether unprofitable. See **Appendix,** pp. 10–12. With the exception of the sandstone slabs exported under the name of C. flags for paving, there are no minerals of great economic importance. Next to agriculture the fishery, especially the herring fishery, is the principal branch of trade, two of the 26 Scotch fishery dists., Wick and Lybster, being entirely confined to this co. The only rly. is the H. R., which enters the W. of the co. from the head of Strath Halladale, and has termini at Wick and Thurso, the two principal towns, the former being the cap. Wick is the only head port, but there are considerable harbours also at Thurso, Castletown, and Lybster. In the middle ages this part of Scotland was held by the kings of Norway; most of its inhabitants are of Scandinavian or Gothic descent, and use the English to the exclusion of the Gaelic language. Caithness returns one member to House of Commons. Area, 438,878 ac. P. 37,177. See **Scotland,** table.

Calabozo, tn., S. America, Venezuela, Miranda, 120 m. SSW. Carácas. Founded in 1730. Alt. 330 ft. P. 5600.

Calabrie, div. (*compartimento territoriale*), in the S. of Italy, consisting of the penin. between the Gulf of Taranto and the Tyrrhenian Sea. The name is a plural form referring to the old names of the provs. into which it is divided, namely, Calabria Citeriore, now Cosenza, and Calabria Ulteriore (Prima and Seconda, now Reggio and Catanzaro). The div. is traversed throughout by the Apennines, which occupy nearly the whole surface, and rise in the peak of Montalto in the S. to 6420 ft., in the Botte Donato to 6330 ft., the latter belonging to an elevated area of considerable extent to the E. of the valley of the Crati, which opens in the Gulf of Taranto and forms an important feature in the N. of the div. The div. produces abundances of wheat, olive oil, and southern fruits, especially figs, and in recent years the area under the vine has been rapidly increasing. The principal mineral products are sulphur in prov. Catanzaro and rock-salt in prov. Cosenza. Anciently this penin. was inhabited by the *Bruttii,* and its E. side formed part of *Magna Græcia.* A considerable number of the inhabitants are of Greek descent. See **Italy,** table.

Calabritto, tn., S. Italy, prov. Avellino, on the Sele, 25 m. E. by N. Salerno. P.<4000.

Calacala, baths, Bolivia, near Cochabamba.

Calacelte, tn., Spain, prov. and 75 m. NE. Teruel. P.<3000.

Calacoto, tn., Bolivia, dep. and 60 m. SW. La Paz, at the confluence of the Mauri with the Desaguadero, and on route of projected railway La Paz to Tacna and Arica. Alt. 12,560 ft.

Calafatŭ, Roumania. See **Kalafat.**

Calafquen Lake, S. Chile, prov. Valdivia.

Calahorra (Arabic *Kalat-harrat,* 'stone castle'), tn., Spain, prov. and 25 m. ESE. Logroño, near the r. bk. of the Ébro, the ancient *Calagurris Nasica.* Bishopric, with very ancient cathedral. Birthplace of Quintilian. P. 8800.

Calais, settlement, Canada, New Brunswick, Charlotte co., on R. St. Croix, 60 m. W. by S. St. John.

Calais, seapt. tn., France, dep. Pas de C., arr. Boulogne, on the NW. ct., 24 m. W. by S. Dunkirk, connected by canal with the Aa and the network of inland waterways in the neighbourhood. Lighthouse, visible 20 m. The town and harbour are defended by castles and forts, and by means of sluices the whole adjacent country may be laid under water. It is the seat of a tribunal and a chamber of commerce, and since 1885 it includes the formerly separate industrial comm. of St. Pierrelès-Calais, now known as Calais-Sud, where large manufactures of tulle and machine-made lace, &c., are carried on. The port has been made accessible for vessels of the largest size, the principal dock, the Carnot dock, 30 ac. in extent, having a depth on sill of 25.1 ft. at ordinary neap, 29.2 ft. at spring tides. There is a dry dock 508 ft. long, 26½ ft. deep on sill at ordinary springs. C. is an entrepôt for colonial produce, Bordeaux wines, brandy, and cured fish; but its chief importance is owing to its being the French port nearest to England, to which country it exports eggs and other rural produce. There are facilities for the discharge of petroleum at the rate of 230 tons an hour. C. has constant communication by steamers with Dover and London. The first permanently successful submarine telegraph cable was laid between Dover and C. in 1851. This city had a prominent place in all the wars between England and France. It was taken in 1347 by the English under Edward III., who built a palace here which still survives, though reconstructed in the 15th and 16th centuries. The French, under the Duke of Guise, retook it in the reign of Mary, 1558. Birthplace of the aeronaut Tissandier. P. (1881) 12,900; (1886) 58,900; (1891) 56,900.

Calais (kal'is), city, U.S., Maine, Washington co., on the r. bk. of and at the head of tide water on the R. St. Croix, 77 m. ENE. Bangor, opposite St. Stephen, New Brunswick, 30 m. from the sea. Manufactures and trade in lumber. P. (1880) 3500; (1890) 7300.

Calais, tn., U.S., Vermont, Washington co., 8 m. N. Montpelier. P.<1500.

Calama, tn., S. America, Chile, prov. Antofagasta, 180 m. SSE. Iquique, on the railway to the Bolivian silver-mines of Huanchaca. The town stands on a little oasis watered by canals derived from the R. Loa. Copper-mines in the dist. Alt. 7421 ft. (R.R.). P.<2000.

Calamandrana, comm., Italy, Piedmont, prov. Alessandria, dist. Acqui. P.<3000.

Calcots, stn., Scot., Elginshire, on the G. N. of S. R., 2½ m. ENE. Elgin.

Calcutta, the cap. of Brit. India, the seat of the Presidency of Bengal, the chief seaport and commercial cap. of India. Lat. 22° 34′ 2″ N., long. 88° 23′ 59″ E. It is built on the left or E. bank of the Húglí, about 80 m. from the coast, and connected by a floating bridge with Howrah on the r. bk. It comprises the municipality or 'Town of C.,' lying between the Húglí and the site of the Maráthá Ditch, Fort William, the Port of C., and several suburbs, which, prior to 1889, existed as a separate municipality. The post-office stands on the site of the original fort, and is the centre of the commercial portion of C., all government offices, banks, the principal merchants, both European and native, being in close proximity. To the S. is the *maidan,* or great park, adorned with many statues and monuments, and on which stands Fort William, commenced by Clive in 1757, and finished in 1773. To the E. of the *maidan* is the European residential quarter, containing many palatial residences. The native city surrounds the N., E., and S., and consists principally of narrow streets, in which the magnificent palaces of princes and rajahs, the residences of wealthy merchants, are side by side with the mat huts of the poorer classes. The town is lighted with gas, and the new road and bridge by electricity, and contains about thirty miles of tramway. Principal edifices—the government house, the high court, the town hall, the mint (a reduced copy of the Temple of Minerva at Athens), the cathedral, St. John's (with many interesting tombs, including that of Job Charnock), the mosque of Prince Ghulam Muhammed, the Indian and the Economic museums, the former containing a fine archæological collection, besides many Christian churches (Protestant, Roman Catholic, Armenian, and Greek), and two Jewish synagogues. The Royal Botanic Gardens are at Sibpur, a suburb of Howrah, where also is an engineering college. There are, besides, four government colleges, and several others, some of which are state-aided. The sanitary condition has been greatly improved by a complete system of underground drainage, with outlet in the Salt Lake, and the present city bears but a slight resemblance to the Calcutta as described in old books of travel, or as it existed a quarter of a century ago. The water supply system, dating from 1865, provides daily over eight million gallons of filtered water, obtained from the Húglí at Paltá. The principal manufactures of this centre of population (jute, cotton, iron, &c.) are carried on in Howrah (*q.v.*) and in the N. and S. suburbs. Commercially C. has an admirable situation. It is the lowest of several seaports succeeding one another on the Húglí, and the only one of all now accessible to sea-going ships. It has excellent anchorage. The port extends 10 m. along the river, and can always be reached by vessels drawing 26 ft. The chief drawback consists in the shifting sand-banks in the river [**Húglí**]. There are both wet and dry docks; the principal wet docks are the Kidderpur, consisting of a basin (9½ ac.) and an inner dock (33 ac.); depth at mean low water 23 ft., mean rise of tide 9 ft. There are several dry docks, of which the Kidderpur is the largest, depth 25 ft. at high water of ordinary spring tides; the Upper and Lower Union Docks belong to the British India Navigation Company. C. has communications by water in three directions: eastward by various channels and rivers leading through the Sundarbans to the Brahmaputra; northwards by the Húglí and the Nadiyá rivers to the Ganges, which can generally be reached, even in the dry season, by the broad boats, drawing from 2 to 3 ft. water, in use in this region; and westward by the Midnapur Canal. By rail it is directly connected with Khulná in the middle of the delta, with Goálánda, the starting-point of the steamer traffic on the Brahmaputra (with the aid of a ferry across the Ganges), with Darjíling in the Himálayas almost due N., and finally with two seaports in the S., Diamond Harbour, about the head of the estuary of the Húglí, and Port Canning, at the head of that of the Matla. As those seaports, however, have never attained the importance expected of them, the traffic on these last railways is small. The railways to the NW. of India and to Bombay start from Howrah. The importance of C. is of comparatively recent date. Its history may be said to begin with the year 1686, when Job Charnock established a factory of the East India Company at one of three villages now included in the city, which takes its name from another of the three, Kalikata, that is, the shrine of the goddess Kálí. Ten years later Fort William, the largest fortress in India, was built at the southern end of the present city. But it was nearly eighty years after that before it became the capital of Bengal, and a little later of Brit. India. In 1772 the administration of Bengal was transferred by Warren Hastings from the hands of the Mohammedan officials to the East India Company, and at the same time the treasury of the prov. was deposited at C. In the following year pre-eminence was given to the Council of Bengal over those of Bombay and Madras, and thus C. became the general seat of government for the country; it had already become the commercial capital. The imports (exclusive of treasure, about £2,000,000) now exceed £25,000,000; and the exports (jute,

indigo, rice, wheat, oil-seeds, &c.), £35,000,000. The trade of C. is about 36½ per cent. of the total for India. Mean temp., yr. 78° F., Jan. 65°, May 85°; mean rainfall, yr. 65.6 in., May–Oct. 59.7 in., June–Sept. 48.7 in. P., including suburbs, and in 1891 embracing a more extended area than in 1881, but not including Howrah, (1881) 742,000; (1891) 840,000; city proper, 682,000; Hindus, 445,000; Moham. 203,000; Christians, 29,000.

California, bor., U.S., Pennsylvania, Washington co., on Monongahela R., 30 m. S. by E. Pittsburg. Coal extensively mined and shipped. P.<1500.

California, one of the U.S., bordering the Pacific, with a coast line of about 1000 m., and an area about 1⅔ that of Great Britain; bounded on the S. by Mexican terr. (Lower California). Chief towns, San Francisco, the capital, Los Angeles, Oakland, Sacramento, San Jose, San Diego, Stockton, Fresno. The state is traversed longitudinally by the Sierra Nevada (*q.v.*) and the Coast Ranges, which unite N. and S., enclosing between them the Great Valley, with a total length of about 600 m., of which the area under 100 ft. is about 190 m. long, with a breadth about the parallel of San Francisco of about 50 m., and the area under 500 ft. is about 410 m., with a breadth of 50 to 70 m. The N. section is drained by the Sacramento, and the S. by the San Joaquin (*q.v.*), both navigable. The Coast Ranges comprise a complex assemblage of chains which, under different names, extend for about 400 m., breadth 40 to 70 m.; mean elevation, 2000 to 4500 ft.; the W. slopes are thickly forested, but the E. are almost treeless. In the S. is a third system of mountains, stretching SE. from the preceding to San Bernardino Peak (11,600 ft.), where it attains its greatest development, and thence S. to Lower California. The SE. of the state is mainly an arid plateau and sand desert, largely irreclaimable, diversified with alkali lakes and flats and mud volcanoes; some parts are below the level of the sea. This region includes the Colorado Desert (*q.v.*), the Mohave Desert, Owens Lake, Death Valley, &c. The Northern section of the state is in the W. mountainous (Siskiyou, Salmon, and Scott Ranges), and covered with vast forests (coniferæ, oaks, &c.), while the NE. consists of barren volcanic plains. The principal lakes are Tulare, in the S. of the Great Valley; Tahoe, Mono, Eagle, and Honey in the Sierra; and Clear Lake in the Coast Range. As regards **geological** structure, the backbone of the Sierra consists of Archæan rocks, broken through at various points by volcanic rocks (which also cover large areas in the NE.), and flanked on the W. by Jurassic formations. The Coast Ranges consist chiefly of Cretaceous metamorphic rocks, while Quaternary and Tertiary deposits occupy the Great Valley. In the S., Archæan rocks predominate. C. has several times been visited by earthquakes, the most destructive in recent times being those of 1868 and 1892. The principal cultivable land is in the Great Valley, but there are tracts of great fertility in the S. (valleys of Los Angeles, San Bernardino, and San Diego), particularly well-adapted to fruit culture. The **climate** is mild and equable, corresponding to that of the Mediterranean region. The mean rainfall of the NW. coast to about 38°, and the N. mountain region, generally exceeds 40 in. [**Mendocino, Colfax, Cisco, Delta**]; S. of **San Francisco** to about 34°, it is from 15 to 20 in. [**Monterey, Santa Barbara, Los Angeles, San Bernardino**]; still farther S. less than 10 in. [**San Diego**]. Throughout the Great Valley the rainfall, everywhere scanty in summer, decreases from above 20 in. in the N. to less than 10 in. over a large area in the S. [**Napa, Sacramento, Stockton, Merced, Fresno, Visalia**]. The SE. desert is practically rainless [**Kecler, Yuma**]. Irrigation is consequently indispensable to agriculture throughout a great part of the state. In the San Joaquin it is necessary for some and desirable for all crops, while in the S. it is absolutely essential. The **agricultural products** include cereals (chiefly wheat and barley), and root-crops; but it is as a fruit-growing country that C. is pre-eminent: grapes, oranges, peaches, and

prunes are produced in immense quantities. The grape country, 600 m. long and 100 m. wide, comprises three dists.—the Coast, the Sierra foot-hills and the Sacramento Valley, and the southern dist. Fresno is specially noted for its raisins, which, first produced in 1875, amounted in 1890 to nearly 15,000,000 boxes (20 lbs. each), about one-half of which was supplied by Fresno co. alone. Wine production is on an extensive scale. C. is rich in **minerals**; gold, in the production of which it ranks first amongst the states, is mined chiefly along the Sierra foothills, the Coast Range, and in Los Angeles co.; silver, near the Mohave R.; quicksilver, at New Almaden, and in Lake and Napa cos.; coal, at Mount Diablo; tin, in San Bernardino co.; nickel, in Monterey; petroleum, in Santa Paula and Santa Clara districts; copper, lead, and iron are abundant; granite, marble, and limestone occur in considerable quantities; a valuable deposit of cement rock has recently been discovered in South C. Valuable medicinal springs are found in various parts. Railways passing N., E., and S. from the Great Valley, afford direct communication with all parts of the U.S., except Alaska. Area, 158,360 sq. m. P. 1,208,130. See **United States,** table; and also *Report of the Chief Signal Officer of the Army in Response to the House [of Representatives]. Resolution . . . relating to Irrigation and Water Storage in the Arid Regions,* Washington, 1891.

California, Lower, a penin. of the W. ct. of N. America, extending between 23° and 32° 30′ N. Length, 750 m.; average width, 100 m. The penin. forms a terr. of the republic of Mexico (*q.v.*). The mountain chain which forms the penin. is a continuation of the coast range of Upper California, and its highest point is reached in the extreme S. of the penin., in the Sierra de San Lazaro, 6000 ft.

California, Gulf of, or **Sea of Cortez,** or **Vermillion Sea,** an arm of the Pacific Ocean, separating the penin. of California on the W. from Sonora and Sinaloa (Mexico) on the E. Length, 700 m.; breadth, 40–100 m. Its W. coasts are abrupt, and offer few places of shelter; E. ct. low. The tide is little felt, and in many respects it resembles the Adriatic. It contains numerous islands, and at its N. extremity it receives the rivers Colorado and Gila. The villages Loreto, La Paz, and Guaymas are on its shores. It is noted for its pearl fishery.

Calig, or **Calix,** tn., Spain, prov. and 38 m. NE. Castellon-de-la-Plana. P. <4000.

Calimere Point, cape, Brit. India, on the N. side of Palk Strait, in the SE. angle of Tanjore dist., in 10° 18′ N., 79° 52′ E. C. Pagoda stands 5½ m. NNW. of the S. extremity of the point, about 1 m. from the shore.

Callandoon, settlement, Queensland, Carnarvon co., 190 m. WSW. Brisbane.

Callanish, dist. and vil., Scot., Ross-shire, on Lewis I., on E. ct. of Loch Roag, 16 m. W. Stornoway; has one of the most perfect 'Druidical' circles in Britain. PT.O. P. <500.

Callantsoog, comm., Holland. See **Calandsorg.**

Callao, the principal seapt., Peru, dep. Lima, cap. C. prov., on the W. ct., 10 m. W. Lima, in about 12° 5′ S. The castle here is the key of Lima; and its roadstead is the best on the coast, and there is now a dock with a depth of 24 ft. of water over the sill in ordinary spring, and of 21 ft. at ordinary neap tides. At present the port of C. is chiefly important as the place at which the cap. is supplied with foreign commodities, most of the vessels leaving C. in ballast. Among the exports are guano, silver ore, and sugar, also salt (obtained from large mines to the N.). As to railway communication, see **Peru.** In 1746 Callao was destroyed by an earthquake, when 3000 persons perished. Mean temp. (1857–70), yr. 66.4° F., Jan. 70.9°, July 60.8°. P. (1890) 35,500.

Callao, El, gold-mines, Venezuela. See **Nueva Providencia.**

Calvados, maritime dep., in the NW. of France, formed of parts of Upper and Lower Normandy, divided into the six arrs. of Bayeux, Caen, Falaise, Lisieux, Pont-l'Evêque, and Vire. Cap. **Caen.** The coast is but slightly indented, bordered by cliffs, and difficult of access, on account of the numerous rocks. The dep. slopes from S. to N., and in the N. and E. presents fertile plains, separated by wide shallow valleys, all with a calcareous soil, and of great fertility. These regions are the Pays d'Auge, the Campagne de Caen, and Bessin, in the order from E. to W.; the SW. being occupied by the hilly and still well-wooded dist. of Bocage, with a soil of granite, slate, and red sandstone, and with the culminating points of the dep.; Guilberville, alt. 1190 ft. The Seine estuary washes the NE. portion of C., and the remainder of the dep. is drained by coast streams, the chief of which are the Touques, Vire, and Orne. The climate in general is cold and damp, but healthy. [**Caen, Ste. Honorine-du-Fay.**] The speciality of the dep. is its pastures, natural and artificial. The former cover one-fourth of its area. Cereals are grown in excess of the consumption; the dep. is noted also for its vegetables and cider. The rivers and coasts are rich in fish. Minerals unimportant. Principal ports, Caen, Trouville, and Honfleur. The manufactures include the laces of Bayeux, the embroidered tulles of Caen, the flannels and swan-skins of Lisieux, the canvas of the Bocage, and the porcelain of Bayeux. Area, 2198 sq. m. P. 428,900. See **France,** table.

Cambodia, or **Cambogia,** French protectorate in Indo-China, the ancient kingdom of the Khmers, formerly of much greater extent, now included between 10° and 13° N., and 103° and 106° 30′ E. long. It comprises fifty-six native provs., grouped into five appanages for the ministers of the crown, but under French administration divided into the following eight provs., subdivided into thirty-two arrs.: Kompong-Thom, in the N.; Pursat, Kompong-Shnang, Kompong-Tiam, and Kratie in the middle, from W. to E.; Kampot, in the SW.; Pnom-Penh in the S.; and Banam in the SE.; each with cap. of same name. Cap. of kingdom, since 1866, Pnom-Penh, on the Mekong. The country consists mainly of an alluvial plain formed by the Mekong, which traverses it from N. to S., periodically inundating and fertilising an extensive area, and which serves to some extent as a waterway [**Mekong**]. Near Pnom-Penh the river divides into an eastern and western branch, a third arm, the Tonle Sap, about 70 m. in length, runs NW. to the Great Lake, also known as the Tonle Sap. This lake forms the second great feature of C.; it serves as a vast reservoir for the surplus waters of the river, and consequently varies in size and depth, according to the season; the area in the dry season, being about equal to that of the Lake of Geneva, with a depth of 3–6 ft., while in the rainy season its area is three times, and its depth from six to ten times as great. During the season of high water, constant communication is maintained along the Mekong and the Great Lake between Saigon, Pnom-Penh, and Battambang across the NW. frontier. Beyond the great plain are several mountain ranges and detached groups and peaks. In the E. spurs, thickly forested, enter from Annam; in the N. are short ranges and isolated peaks, outliers of the Pnom Dangrik range, which, beyond the frontier, forms the N. limit of the plain, sending down several streams to the Mekong and the Tonle Sap; the Pnom-Dek, Svai, or Swai Mts. in this dist. are rich in iron ore. In the SW., between the Great Lake and the Gulf of Siam, the country is much diversified; altitudes up to nearly 5000 ft. The whole region is well forested; caoutchouc and cardamoms are abundant. Several small rivers (Kampot, Kompong-Son, and others) descend to the sea. Coasts low and sandy; principal indentation the Bay of Kompong-Son. Off the coast are several isls., one of which, Trei-ka, near Kampot, has been ceded to France. The main features of the **climate** are determined by the monsoons; the rainy season, lasting from June to November, and the dry season from December to May, with a short break in the former towards the end of July. A destructive whirlwind, the '*khial-kaduc*,' is not infrequent in November. The climate, on the whole, is healthier than that of Cochin-China; but some districts, notably the Cardamom region, are highly malarial. Fishing and agriculture are the chief employments of the people; the former is carried on mainly at the Great Lake during the season of low water, when some 20,000 or 30,000 persons are engaged in the fishing. Of **agricultural products,** rice is the most widely cultivated in the lowlands; sugar-cane in the drier regions; maize in Banam; pepper extensively in Kampot; indigo, cotton, the mulberry grow well in the Mekong valley; tobacco everywhere; coffee, cacao, and vanilla flourish. Cattle rearing is also an important industry. **Minerals** are as yet imperfectly explored, and want of communication hinders their development. Iron, found in the Pnom-Dek Mts., is wrought by the Kuïs, a barbarous tribe, into rude utensils; kaolin occurs near Kratie; limestone and saltpetre are found in Kampot. Manual arts are little practised by the Cambodians; bricks are manufactured by the Chinese; pottery in considerable quantities is made in the district of Kompong Shnang; mattings and mattresses ('Cambodians') are characteristic productions; silk-weaving is a widespread domestic industry. The total value of the **commerce** is under £1,000,000 annually. The exports, chiefly to China, comprise rice, salt-fish, tobacco, gum, wood, boats, cardamoms, bam-

bous. The principal imports include salt, refined sugar, wines, and spirits from France, porcelain, various European manufactures, opium, arms, and utensils, &c. The monetary unit is similar to that of Annam; very small native silver coins are also used; the unit of weight is the *tael* (*tomlong*), and for heavy merchandise the *picul* (*hap*), of which there are three varieties; the unit of length is the *coudée* (about 19.7 in.); and the unit of capacity the *thang* (about 8.8 gallons). The **people** belong to the Mongolo-Tibetan family, presenting, however, certain peculiarities; their language is without the variety of intonations which characterise the spoken language in the adjoining countries. The religious vocabulary is an altered form of the Pali, and different words are used in speaking to persons of different ranks. Besides the Cambodians proper, or Khmer, a considerable proportion of the population consists of Annamese and other Asiatics. The little known frontier tribes (Kuïs, Stiengs, and others) are more or less barbarous. **Government.**—The establishment of the protectorate in 1867 followed on the operations of France in the neighbouring countries. In 1884 a treaty was made by which the power of France was established on a firmer and wider basis, and in 1887, C., with the other states under French influence, were constituted French Indo-China, the whole being placed under a Governor-General at Saigon. There is a resident general at Pnom-Penh, with residents under him in the principal districts. The internal administration is still exercised by native officials, subject to French control. The principal towns, besides the caps. of provs., are Udong, the former cap., Pinyalu, and Sambor. Kampot is the only port. Area estimated at about 40,000 sq. m. P. about 1,500,000. See map of French Indo-China in *Geog. Jour.*, II. p. 288.

Cambodia, or **Camboja River.** See **Mekong.**

Cambois, eccles. dist., Eng., Northumberland, 6 m. E. Morpeth, included in the parl. bor. of Morpeth, 1½ m. ESE. North Seaton stn., PM.O. P. <4000.

Cambridge (ancient *Granta*), parl. and mun. bor. and market-tn., Eng., cap. co. Cambridge, and seat of one of the English universities, on r. bk. of the Cam, with stns. on the G. E., G. N., L. & NW., and M. Rlys., 57 m. NNE. London. Alt. 32 ft. Lat. of observatory 52° 12′ 51.6″ N., long. 0° 5′ 41″ E. Principal buildings connected with the town, St. Mary's, St. Benet's, the Round Church, Trinity, and other churches, a grammar school, and Addenbrooke Hospital. The public recreation ground, called Parker's Piece (21 ac.), and the College grounds, which are open freely to the public. The Corporation has adopted the Free Library Act. Notwithstanding railway competition, C. still carries on some river trade with King's Lynn in corn and coal. C. (independent of its university) sends one member to the House of Commons. The University of Cambridge, supposed to have been founded in the seventh century by Sigebert, King of East Anglia, contains seventeen colleges, as follows: St. Peter's College or Peterhouse, founded in 1284; Clare College, 1326; Pembroke College, 1347; Caius College, 1348; Trinity Hall, 1350; Corpus Christi College, 1352; King's College, 1441; Owen's College, 1448; St. Catherine College, 1473; Jesus College, 1496; Christ's College, 1505; St. John's College, 1511; Magdalen College, 1519; Trinity College, 1546; Emmanuel College, 1584; Sidney Sussex College, founded in 1594 on the site of a suppressed religious house granted by Henry VIII. to Trinity; and Downing College, 1800. Principal buildings connected with the university are the senate-house, the public schools, library, science museums and laboratories, university union (club debating society) buildings, observatory, Pitt press or university printing office, and Fitzwilliam museum. The most interesting edifices belonging to the colleges are the chapels of King's College, St. John's College, Jesus College, and the hall and library of Trinity College. The hostels, or unendowed colleges, are two: Selwyn College, 1882; and Ayerst's Hostel, 1884. There are also two colleges for women, Girton (3 m. from C.) and Newnham, the latter college including Old Hall, Sidgwick Hall, Clough Hall, and Pfeiffer Building, the students at which, after completing their course of study, receive, on passing the degree examinations, a certificate, but are not allowed to take degrees. The university sends two members to the House of Commons, who are chosen by the members of the senate. Relics prove C. to have existed in Roman times. It is first recorded as being burnt by the Danes in 871. After the Conquest, William the Conqueror built a castle here to overawe the Saxons under Hereward the Wake, who defied him and made the Isle of Ely a camp and temporary home. In the reign of Henry I. C. was incorporated. Market-days, W. and S. Mean temp., yr. 48.7° F., Jan. 37.5°, July 62.1°; mean rainfall, 23¼ in. Mun. bor. P. (1801) 10,100; (1851) 27,800; (1871) 30,100; (1891) 37,000; parl. bor. P. (1891) 44,300.

Cambridge Gulf, W. Australia, between Capes Dussejour and Domett, in 14° 45′ S., just E. of 128° E.; 20 m. wide at its entrance, and running 75 m. inland (southwards).

Cambridge Heath, stn., Eng., London, on the G. E. R., 2 m. NE. by E. St. Paul's.

Cambridgeshire, an inland co. in the E. of Eng., to the N. of Bedfordshire and Huntingdonshire, divided into the following parl. divs.:—

	Acres.	Pop. 1891.
N. or Wisbech	189,676	49,645
W. or Chesterton . . .	191,214	46,108
E. or Newmarket . . .	164,884	48,878
Parl. bor. of Cambridge . .	3,975	44,330
Total . . .	549,749 [1]	188,961 [1]

[1] The administrative county of Cambridge (from which part of the urban sanitary dist. of Newmarket is excluded) has an area of 549,565 acres, and a population of 185,822.

The Jurassic formation occurs in the NW. part of the county, while in the S. Cretaceous rocks occupy most of the area, and the chalk rises into bare downs where not covered by drift. The lower grounds are mostly either covered by gravel or form part of the great area of recent alluvium and peat, known as the Fens [**Bedford Level**], which has been converted by skilful drainage into good farm lands. Out of the Fens rises the Isle of Ely, which was formerly in flood-time often surrounded by water. The chief rivers are the Ouse, with its tribs., the Cam and Lark, and the Nen. The valley of the Cam is called 'The Dairies,' being entirely occupied by dairy farms, on which excellent stock is bred, while on others there is much fruit-growing. As to agriculture generally, see **Appendix,** pp. 7–9. Brewing and malting are the chief trades. The chief minerals of economic importance are the phosphatic nodules obtained

from the base of the chalk marl; lime and cement from the chalk; and the Jurassic and Cretaceous clays, from which bricks are made. Peat is largely cut for fuel. The railways are the G. E. R., L. & NW. R., G. N. R., and M. R. The principal towns are Cambridge, Ely, Newmarket, and Wisbech. There are abbeys at Thorney and Denny, and between the fens and woodland in the SE. there are ancient dykes or 'ditches,' such as the 'Devil's' Dyke, Fleam Dyke, and Balsham Ditch, the Bran Dyke, &c., running from NW. to SE. In ancient times C. was inhabited by the Iceni, a British tribe. Under the Romans the county was included in the prov. *Flavia Cæsariensis*. By the Saxons it was called Grantbridgeshire. Hereward the Wake held the Isle of Ely against William the Conqueror until 1074. The Isle of Ely is in some respects a distinct county, having its own *custos rotulorum*, commission of the peace, and police. See **England,** table.

Camonica, or **Valle Camonica,** valley, N. Italy, prov. Bergamo, formed by ramifications of the Rhætian Alps, and extending for 50 m. NNE. to SSW. along the Oglio to the Lake of Iseo. It is well cultivated, and has marble, slate, lead, copper, and iron.

Camowen, riv., Ire., in the middle of co. Tyrone, flows W. and NW. to the Strule, which it joins a little above Omagh.

Camp, place, Ire., co. Kerry, 11 m. from Tralee, P.O.

Camp, co., U.S., in the NE. of Texas, crossed in the N. by 33° N., and about the middle by 95° W.

Campagna di Roma, region of the prov. of Latium, Italy, extending along the W. coast from Cape Linaro, S. of Civita Vecchia, to Astura and the Pontine marshes, and inland to the Alban and Sabine hills, Rome being near its centre; through it runs the Appian Way. It is an undulating region, rising to 200 feet above the sea, and skirted on the Mediterranean by a strip of marsh land from 2 to 3 m. in breadth. At no time does the region appear to have been remarkably healthy, though in ancient times it was well cultivated; but in consequence of the devastations wrought by Goths, Langobards, and other invaders, still more in consequence of the neglect of cultivation during the Middle Ages, when internal wars drove the inhabitants of the country more and more to seek protection in towns, the region was allowed to relapse into a state of nature, and repeated inundations of the Tiber, whose mouth is choked by the wood and other vegetable matter which it carries down in times of flood, have ended in making it so unhealthy as to be absolutely uninhabitable for about four months in summer. There is little cultivation, though the soil is by no means infertile, and the region is mainly used for the pasturage of cattle and sheep. The few labourers who inhabit the region for eight months dwell for the most part in wretched huts or in caves hollowed out in the tuff, of which the ground is mostly composed. Attempts at amelioration are being made by the construction of embankments for the regulation of the Tiber, and the planting of eucalypti. See **Pontine Marshes,** and Sombart, *Die Römische Campagna*, Leipzig, 1888.

Campania, isl., Canada, Brit. Columbia, off the coast of Princess Royal I., crossed by 53° N.

Campania, territorial div. (*compartimento territoriale*) of Italy, somewhat larger than Yorkshire, comprising the provs. Caserta, Naples, Benevento, Avellino, and Salerno, with a coast-line on the Tyrrhenian Sea extending from about 40° to 41° 20′ N. Surface in great part mountainous, but including large and small plains and valleys of great fertility. Principal elevations [**Apennines**], the Montagna del Matese on the frontier of C. and Molise, the Alburno in the S., and still further S. Monte Cervati (6230 ft.) and the isolated cone of Vesuvius (4200 ft.), on the Bay of Naples. Principal lowlands, the great plain in the W., to which the div. originally owed its name, meaning 'plain,' stretching from the S. of the Bay of Naples northwards a few miles beyond Capua and the Volturno, and containing one of the densest agricultural populations in the world; the plain of the Sele, to the S. of the city of Salerno, in large part malarious, and comparatively sparsely peopled; and the Val di Diano, E. of Alburno, and the Monte Cervati bordering on the mountains of Basilicata. Chief rivers, the Volturno and Sele, already mentioned. Chief cereals, wheat and maize; beans, pease, and lentils largely cultivated; hemp extensively grown in the N. (Caserta); oranges and olives in the maritime provs. (Naples, Caserta, and Salerno); chestnuts in the S. provs.; wine in all parts. The area under the vine increased from about 253,000 ac. on the average of the five years 1870–74, to upwards of 460,000 ac. in 1890. Extensive works for the amelioration of the soil and climate (as regards salubrity) have been effected directly or indirectly by the State, or are in progress in the plain of Campania in the S. of prov. Caserta and the W. of Avellino, and to the N. of Vesuvius (prov. Naples), SE. of Vesuvius round Nocera and Sarno, and in the lower part of the basin of the Volturno (provs. Naples and Caserta). The only mineral product of importance is sulphur, which is produced in large quantity near the town of Avellino, in the communes of Tufo and Altavilla Irpina. A little petroleum is produced in prov. Caserta. Till 1860 C. formed part of the kingdom of Naples. Area, 6393 sq. m. P. (1881) 2,897,000. See **Italy,** table.

Campania, tn., Tasmania, Monmouth co., 17 m. NNE. Hobart. P. <1500.

Campaspe, riv., Australia, flows N. through co. Dalhousie and on W. frontier of co. Rodney, and joins the Murray at Echuca. It rises amid volcanic rocks, and for a considerable part of its lower course passes through settled agricultural dists., with open, grassy, and wooded plains. Length, 120 m.

Campaspe, tn., Victoria, co. Rodney, 132 m. N. Melbourne. P. <1500.

Campbell, cape, New Zealand, on the N. ct. of South I., in about 41° 43° S. Mean temp., yr. 57.5° F., Feb. 65°, July 49.4°.

Campbell, settlement, Cape Colony, Griqua-land West, dist. Herbert, 65 m. W. Kimberley.

Campbell, co., U.S., S. Dakota, on the N. frontier, crossed in the middle by 100° W.

Campbell, co., U.S., Georgia, between 33° and 34° N., and E. of 85° W.

Campbell, co., U.S., Kentucky, on the Ohio, W. of 84° W.

Campbell, co., U.S., Virginia, in the S., N. of 37° N., crossed by 79° W., bounded on the S. by the Staunton R.

Campbell, co., U.S., Tennessee, on the N. frontier, crossed in the E. by 84° W.

Campbellfield, vil., Victoria, co. Bourke, on the Merrimerri Creek, 10 m. N. Melbourne. P. <1500.

Campbellford, vil., Canada, Ontario, Northumberland co., on the R. Trent, 64 m. W. by N. Kingston. P. <3000.

Campbell Island, Canada, Brit. Columbia, crossed by 128° 15′ W., just N. of 52° N.; has a mission village containing the remnants of the Bella Bellas, an Indian tribe once notorious for its bloodthirstiness and treachery.

Campbell Island, S. Pacific, a dependency of New Zealand, 180 m. SE. of the Auckland Is., in 52° 33′ S., 169° 9′ E., is 36 m. in circumference, mountainous, and has several harbours. It is volcanic, and its flora is very interesting. In 1874 a French astronomical expedition observed the transit of Venus here. Alt. 1500 ft.

Campbeltown, parl. and royal burgh, par., and seapt., Scot., Argyllshire, 11 m. NE. Mull of Kintyre. There is a coal-mine in the vicinity, and numerous distilleries in the town, and the fisheries are important. The harbour has a depth of 22 ft. at high, and 13 ft. at low tide. Par. 44,220 ac., P. 10,300; parl. burgh P. 8200; royal burgh P. 5500.

Camp Crook, vil., U.S., S. Dakota, Harding co., 26 m. S. from the NW. corner of the state. P. <1500.

Campden, stn., Eng., Gloucestershire. See **Chipping C.**

Campden Hill, eccles. dist., Eng., London, Kensington. P. 8000.

Campeachy, in Spanish spelling **Campeche,** state, Mexico, occupying the SW. of the penin. of Yucatan; almost entirely flat; essentially agricultural, producing sugar-cane, rice, tobacco, and maize, besides some sisal hemp, cotton, and indigo. Timber is felled, and salt extracted.

Campeachy, seapt., Mexico, cap. of C. state, on the Gulf of Mexico, in 19° 50′ N., at the western extremity of a fertile plain, surrounded on three sides by hills. Its harbour is a poor one, being so shallow that vessels of 500 tons must lie nearly 3 m. from shore. The principal exports are dye-woods and cordage of sisal hemp; commerce has declined owing to the rising importance of Carmen. C. was founded in 1540 on the site of an immense series of catacombs constructed by the Mayas. P. 18,700.

Campeachy, Bay of, the SE. part of the Gulf of Mexico.

Campello, vil., U.S., Massachusetts, Plymouth co., 32 m. S. Boston by rail. P. <1500.

Canada, Dominion of. The terr. belonging to this dominion is situated to the N. of the United States, from which it is separated partly by the middle line of Lakes Superior, Huron, Erie, and Ontario, partly (W. of the Lake of the Woods) by the parallel of 49° N. E. of the great lakes the boundary is formed by the middle line of the St. Lawrence down to parallel of 45° N., then by that parallel to Hall's Stream, the most westerly of the headwaters of the Connecticut R., then by that stream to its head, afterwards by the water-parting of the St. Lawrence basin to about 46° N., and after that by arbitrary straight lines or rivers and lakes (St. John R., Grand Lake, St. Croix R.) as far as Passamaquoddy Bay on the Atlantic. The whole of the N. part of the continent except Alaska (*g.v.*), including the Arctic Is. W. of Greenland, is Canadian terr. The Dominion, formed in 1867 by the union of separate colonies, has a general government and parliament for the common affairs, but it has seven provs. with separate legislatures, empowered to deal with matters of local concern. These provs. are, in the order from E. to W., Nova Scotia, Prince Edward I., New Brunswick, Quebec, Ontario, Manitoba, and British Columbia. There is also a separate legislature for the provisional dists. of Saskatchewan, Assiniboia, Alberta, and Athabasca collectively. In addition to these there is a vast terr. on both sides of Hudson's Bay, not yet organised. The seat of the general government is Ottawa, in the prov. of Ontario.

Area in square miles and population in thousands and decimals of a thousand of the Provinces now forming the Dominion of Canada, with the rate of increase per cent. per annum between the successive censuses.

* Between International Boundary and 12th Base, as far E. as meridian of NW. angle of the Lake of the Woods.
† Decrease. ‡ Exclusive of the Canadian portion of the Great Lakes.

It is important to point out that the population of the Dominion is so far mainly collected in one comparatively small portion of the vast area above indicated. The region comprising the city and island of Montreal, the city of Quebec, the counties in the prov. of Quebec S. of the St. Lawrence and W. of the meridian of Quebec city, the area in the angle between the Madawaska, Ottawa, and St. Lawrence rivers, and in the penin. between Lake Huron, with Georgian Bay, and Lakes Erie and Ontario S. of the rivers Severn and Madawaska, has an area (about 47,000 sq. m.) a good deal less than that of England, but contained in 1891 a pop. of 2,795,000, or more than four-sevenths of the entire pop. of the dominion, equal to an average of rather less than 60 to the sq. m. Of this total 1,986,000 belonged to Ontario, or more than fifteen-sixteenths of the pop. of that prov., whose area is more than twice that of Great Britain. The **surface** W. of the Rocky Mts. is made up of mountains, valleys, and tablelands [**British Columbia**]. E. of those mountains the Canadian terr. is principally composed of plains and undulating lowlands. Tundras, similar to those of N. Russia and Siberia, cover large tracts in the N., descending in the E. to about 58° N. on the W. shore of Hudson's Bay. There next follows a region of vast forests, chiefly of pines and firs, a region that embraces the whole of the Dominion E. of Lake Winnipeg, except the tundra area and the limited portions cleared for agriculture. In the W. of the Dominion this region is succeeded to the S. by the prairies, which extend furthest N. on the gently sloping tablelands immediately to the E. of the Rocky Mts. The nearly treeless prairies here extend about 38° N. of the United States frontier, and the area with less than 20 per cent. of forest land reaches about 10° N. of that frontier, between the Rocky Mts. and Lake Athabasca. For the future development of the Canadian Dominion this prairie region is of the highest importance, for it contains vast areas ready for the plough, with soil of the richest description, and a climate admirably adapted for agriculture, though very different from that of England. The **geological structure** of the Dominion terr. is of peculiar importance with reference to the physical features. What is most striking under this head is the prevalence over enormous continuous areas of Archæan and other crystalline rocks, and wherever such rocks prevail, the earthy covering forms generally only a thin layer spread over a hard foundation over which multitudes of rivers flow with innumerable sharp twists, mostly forming frequent rapids and falls, and on which there lie crowds of lakes of all sizes and shapes, some connected in strings, some more or less isolated. Archæan rocks extend almost without interruption over the whole area from the lower St. Lawrence westwards to the shores of Lake Winnipeg. In the unorganised terr. of the NW., granite is known to prevail over large areas of the regions hitherto explored, and the surface features and hydrography in these two regions are similar. In the E. of the Dominion the Archæan are succeeded by Silurian rocks, with one or two patches of Cambrian, along a strip bordering the St. Lawrence from a little below Quebec, and occupying the whole area between the St. Lawrence and lower Ottawa. The same rocks are found over the area between Lake Ontario and Georgian Bay, with the northern part of Lake Huron, reaching nearly as far N. as the Madawaska R., and the SW. part of the lake penin. (between Lake Erie and Lake Huron) is occupied by rocks of Devonian age. W. of Lake Winnipeg, Silurian and Devonian strata succeed the Archæan rocks in strips parallel to that lake and Lakes Manitoba and Winnipegosis, both of which are almost wholly surrounded by the Devonian. Further W. there follows a vast area of Cretaceous deposits, the western limit of which is not as yet known. Beyond that Tertiary rocks are known here and there, and with regard to the mountainous area in the W., all that can be said is that the geology is as complicated as the physical features. Glacial deposits are spread over almost the entire surface of the Dominion, and here and there are also recent aqueous (lacustrine and other) deposits, such as those which form the fine, rich, and deep soil in the Red R. valley in Manitoba. The particulars in the table below will serve to illustrate the **climate** of the Dominion. The places are arranged roughly in the order from W. (left) to E. (right), but all the stations included in the table to the S. of 47° N. lie to the E. of Lake Huron, and accordingly of the meridians of York Factory and Nepigon. For the sake of comparison, two stations, Sitka (Alaska) and Nain (Labrador), outside of the Dominion, are introduced. The mean temperatures given are those of the hottest and coldest months, besides the mean of the year. The table may be advantageously compared with that in the article on Asia. Sitka and New Westminster, it may be mentioned, are the only stations W. of the Rocky Mts., and it will be noticed that at all the stations to the E. there is a wide range of temperature, with a slight reduction in that range at the E. ct. stns. and at York Factory, on Hudson's Bay.

As regards the distribution of population, the general result of climatic, physical, and geological conditions is summed up in the following words of Mr. Goldwin Smith, which may be accepted as true, with one qualification:—'The physical map [of Canada] displays four separate projections of the cultivable and habitable part of the continent into arctic waste. The four vary greatly in size, and one of them is very large. They are, beginning from the E., the maritime provs.—Nova Scotia, New Brunswick, and Prince Edward I.; Old C., comprising the present provs. of Quebec and Ontario; the newly-opened region of the NW., comprising the prov. of Manitoba and the dists. of Alberta, Athabasca, Assiniboia, and Saskatchewan, and Brit. Columbia. The habitable and cultivable parts of these blocks of terr. are not contiguous, but are divided from each other by great barriers of nature, wide and irreclaimable wildernesses or manifold chains of mountains. The maritime provs. are divided from Old C. by the wilderness of many hundred miles, through which the Inter-Colonial Rly. runs, hardly taking up a passenger or a bale of freight by the way. Old C. is divided from Manitoba and the NW. by the great fresh-water sea of Lake Superior, and a wide wilderness on either side of it. Manitoba and the NW. again are divided from Brit. Columbia by a triple range of mountains, the Rockies, the Selkirks, and the Golden or Coast Range' (*Canada and the Canadian Question*, London, 1891, pp. 1–2). The qualification that has to be made in this passage refers to the expression 'irreclaimable wildernesses,' which is somewhat too absolute. The term is in truth justified by facts with respect to a large part of each of the areas to which it is applied, but each of them nevertheless contains larger or smaller areas in which both soil and climate are favourable to settlement, though they do not present the advantages which in the meantime attract settlers to more favourably situated spots. In E. Quebec, in situations remote from the fogs of the Gulf of St. Lawrence, there are many such tracts bordering the lakes and rivers. In Ontario the inhabited area is now almost confined, as we have seen, to the Silurian and Devonian area in the S., but even in the Archæan area to the N. of Lake Huron and Lake Superior, there are sheltered valleys bordering rivers and lakes in the basin of the great lakes, and still more extensive cultivable tracts in the Hudson Bay basin. Finally in the valleys of Brit. Columbia irrigation may yet develop a population where none exists at present. But as things are now, settlements are principally made where there are the greatest facilities for transporting surplus agricultural produce to distant markets, or where such facilities can be most advantageously provided. Hence regions like Manitoba, where there are vast continuous areas of the richest soil ready for crops, where in the course of ten years the area under wheat increased from next to nothing to about two-fifths of that under the same crop in the British Is., are favoured by settlers to the neglect of those in which the cultivable tracts are more scattered, and the climate somewhat more severe. It may be expected that the settlement of these latter tracts will be long postponed, unless perchance the discovery of important economic minerals in their vicinity attracts agricultural settlers in the train of the miners. (See the articles on the separate provs.) In the eastern provs. and dists. the principal **products** are those of the forest and the sea, together with minerals in Nova Scotia, in the middle regions chiefly agricultural, in the W. (Brit. Columbia) there is considerable production under all these heads. Details will be found in the articles on the separate provs., and in the paragraphs below on mineral resources and external commerce, and here it will be enough to draw attention to two facts, that grapes, which ripen in the open air even in the southern parts of Quebec, are grown to a considerable extent in Ontario (principally in the dists. in the extreme SW., and those adjoining the Niagara R.), in vineyards which in winter are buried deep under snow, and that in Manitoba there was a steady and rapid increase in the wheat area in the ten years 1881–91, when in most parts of the world the area under wheat was fluctuating or declining. The **mineral resources** of the Dominion are very great. In the meantime, however, the mines and quarries in operation furnish products chiefly for home consumption. The minerals of most importance commercially at present, or likely to be so in the immediate future, are coal (in the three forms of lignite, bituminous coal, and anthracite), gold, silver, copper, iron, and apatite. The coalfields are enormous in extent, though as yet worked only where there are special facilities for commerce, as in the neighbourhood of seaports (in the N. of Nova Scotia, and in Vancouver I., Brit. Columbia), and at various points on or near the route of the Pacific Rly., a region in which it is very abundant. The British Columbia coal is important as the only good coal as yet worked on the Pacific coast. Gold is chiefly produced, like coal, in Nova Scotia and British Columbia, and both of these provs. likewise have the advantage of possessing iron ores in close proximity to coal. The silver deposits, situated about the W. end of the Canadian shores of Lake Superior, are likely to prove of great commercial value now that the Pacific Rly. has been laid through the dist. Apatite is found in great quantity in the W. of the prov. of Quebec and N. of Kingston, Ontario, and is a rapidly growing export. Important deposits of nickel and other ores have been found near Sudbury, the junction of the 'Soo line' with the main line of the C. P. R. The **manufacturing industries** were greatly stimulated by the adoption in 1879 of what is known as the national policy, under which a tariff was fixed giving protection to various industries under this head. To this cause may be largely ascribed the increase in the capital invested in these industries from about 33 to 71 millions sterling between 1881 and 1891. Of the total output of manufs. in 1891, 50.5 per cent. belonged to Ontario, 32.2 to Quebec, 6.4 to Nova Scotia, 5 to New Brunswick, and 5.9 to the others. The industries in which most capital is invested in C. are, naturally, those which consist in subjecting the raw material of the country to the simplest processes, preparatory to sending the products to a home or foreign market. Saw-milling stands first in the list, flour-milling second. In recent years, however, other industries have risen rapidly. The textile industries in the aggregate are now more important than flour-milling. Among these cotton ranks first (especially in Quebec, New Brunswick, and Ontario), woollens second (most largely carried on in Ontario). Foundries and machine shops and agricultural implement factories also rank very high, and among others of importance are those connected with leather, sugar-refining in Quebec and Nova Scotia, and in Brit. Columbia fish-canning. With regard to the **internal communications** of the Dominion it is noteworthy, in the first place, that the St. Lawrence R., and the great lakes, supplemented by a number of short canals (the longest is about 27 m.), form a system of internal navigation for sea-going vessels unparalleled in any other continent. All these canals except one belong to the Canadian Dominion. The one exception is the Sault St. Mary Canal, less than a mile in length, avoiding the rapids of the Sault St. Mary R. between Lakes Superior and Huron. The Canadian canals vary in minimum depth at present from 6½ to 11 ft., but they are now being enlarged so as to afford a minimum depth of 12 ft., provision being made at the same time for an addition of other 2 feet of depth at some future date. The Lachine Canal, which avoids the rapids of the St. Lawrence, immediately above Montreal, has already been deepened to 12 ft., but this is now being increased to 21 ft. When this increase in depth has been effected, vessels drawing nearly that amount of water will be able to visit all the ports of the great lakes, except those of Lake Ontario, and vessels drawing 14 ft. all the lake-ports without exception. By this series of waterways sea-going ships are carried up a distance of 2260 m. from the Straits of Belle Isle, in the N. of Newfoundland, to Port Arthur, the Lake Superior terminus of the Canadian Pacific Rly., and thus within about 1915 m. by rail of Vancouver, the seaport at the Pacific terminus of that railway. On the United States side they are carried up a distance of 2400 m. to Duluth, at the very head of Lake Superior, which is now within 1890 m. by rail of the nearest Pacific port. The importance of these details will be seen from the rapid development of the lake navigation, which is well illustrated by the increase in the traffic through the Sault St. Mary Canal. In 1855, the year of its opening, the total amount of registered tonnage that passed through it was little over 100,000 tons. In twenty years this amount had grown to upwards of 1,000,000 tons, and in 1890 to 9,000,000 tons. To this great navigation route there is only one drawback. It is closed by ice for a shorter or longer period every year. It is usually open from about the end of April or the beginning of May to near the end of November or even the first week of December. The route from the mouth of the St. Lawrence, round the N. of Newfoundland (by the straits of Belle Isle), is closed for a longer period than that by Cabot Strait, round the S. of Newfoundland, which adds about 160 m. to the distance to Liverpool. Besides this leading highway for ships the Canadian Dominion possesses other less important inland waterways. The R. Ottawa, a trib. on the l. bk. of the St. Lawrence, is continuously navigable, with the aid of a few canals, as far as the city of Ottawa; and from thence there is a navigable connection by the Rideau R. and Canal with Kingston on Lake Ontario. Above Lake Superior navigation can be continued with little interruption by Rainy Lake and R., Winnipeg Lake and R., and the N. Saskatchewan R. to near the base of the Rocky Mts.; steamers can ascend the last-mentioned river as high as Edmonton. The Assiniboine and Red Rivs., which both belong, like the Saskatchewan, to the basin of Lake Winnipeg, are likewise important navigable streams, but the Nelson, the outlet of Lake Winnipeg to Hudson's Bay, is too much obstructed by rapids to be of great service as a waterway. In the populous parts of the Dominion there is a tolerably complete network of **railways**, and since November 1885, when the Canadian Pacific Rly. was completed, there has been uninterrupted railway communication from ocean to ocean within Dominion terr. Of the other Canadian railways already completed two are of special importance. One is the Grand Trunk Rly., which connects

Montreal on the one side with the SW. of the peninsula, between Lakes Huron and Erie, there communicating with the shortest line in the United States to Chicago, the great lake-port at the head of Lake Michigan, and on the other side, after crossing the St. Lawrence by a bridge nearly 2 m. in length (including approaches), proceeds to the United States seaport of Portland (Maine). The other is the line which connects the Canadian Pacific Rly. with Minneapolis in the United States by way of Sault St. Mary, 'the Soo line;' and thus affords the shortest route from one of the most important wheat and timber regions of the United States, not only to the eastern seaports of Montreal and Quebec, but also to the NE. of the United States, including the port of New York. A railway from Sault St. Mary to Duluth, at the W. end of Lake Superior in Minnesota, was completed in 1888. A railway from the rapidly developing grain-growing province of Manitoba to a port in Hudson's Bay is now contemplated. The importance of this railway arises from the fact that it would form the shortest route for the products of the NW. to England, but its value depends in a great measure on the navigability of Hudson's Bay and Hudson's Strait. Timber makes up more than a fifth of the value of Canadian **exports**, and among others of importance are living animals, cheese, grain (barley and wheat), and dried fish. The timber, wheat, and cheese are mainly despatched to the United Kingdom, but most of the barley (principally from Ontario) to the United States, which also derive from C. enormous quantities of eggs, and larger quantities of peas, apples, and potatoes, greater numbers of sheep, cattle, and horses (principally from Ontario), than are imported into C. from the United States. In return, the United States supply C. for home consumption with large quantities of maize and maize (corn) meal, wheat, flour, pork, bacon and hams, beef, lard, tallow, and other agricultural produce. Iron manufactures of all kinds and woollen goods make up one-fifth of the value of the imports, and the other imports of considerable value include coal and coke, cottons and other manufactures, sugar, tea, and other colonial wares. Coal is mutually supplied, Ontario and Quebec receiving that commodity from the United States, and Nova Scotia and Brit. Columbia supplying to some extent the eastern and western coasts of the Union respectively. The great bulk of the foreign trade of C., both import and export, is carried on with the United Kingdom and the United States. The denominations of **money** in the currency of C. were declared by the Act 34 Vict. cap. 4, to be dollars, cents, and mills, there being 100 cents in a dollar, and 10 mills in a cent. By the same Act the British sovereign, as then coined, was declared to be legal tender for 4.86 dollars. Silver coins struck by order of Her Majesty for circulation in C. were declared to be legal tender to the amount of ten dollars, and copper coins, similarly struck, to the amount of twenty-five cents. The gold eagle of the United States was also declared to be legal tender for ten dollars, and multiples and halves of the same for proportionate sums. The coins in circulation in C. are silver fifty, twenty-five, twenty, ten, and five cent pieces, and bronze one cent pieces, all of which are struck in England. No twenty cent pieces have been coined for a considerable time, and they are gradually disappearing from circulation. C. has no gold coinage of its own; but British and American gold pieces pass current. The issue of specie is controlled by the Dominion Government. The **inhabitants** are mainly of British origin, and Protestant in religion; but French Roman Catholics make up about three-tenths of the population, chiefly in Quebec, where the first colonists were French. There are also large numbers of Irish Roman Catholics, so that the adherents of this section of the Christian Church amounted in 1891 to 43.17 per cent. of the entire population (as against 40.22 per cent. in 1871). The following table shows the proportion per cent. of the French-speaking inhabitants by provs. in 1871, 1881, and 1891:—

Provinces.	1871.	1881.	1891.
Quebec	78.5	78.9	80.4
Ontario	?	5.2	4.8
New Brunswick	15.9	17.7	19.2
Nova Scotia	8.6	9.3	6.7
Manitoba	?	15.0	7.3
Prince Edward I.	?	9.8	10.8
British Columbia	?	1.5	1.3
NW. Territories	?	10.1	2.3
Dominion	?	30.1	29.4

How far the population is still recruited by immigration is shown by the fact that the proportion of native-born increased from 85.8 per cent. in 1881 only to 86.5 per cent. in 1891. The proportion born in Scotland is comparatively very large. In 1891 it amounted to 2.3 per cent. as against 4.6 per cent. born in England and Wales, and 3.1 per cent. born in Ireland. There are about 120,000 Indians, most of whom are hunters, roaming over the forest regions of the North-West, and living by the sale of fur to the fur-trading companies. By the Imperial Act, 30 Vict. cap. 3, known as the British North America Act, 1867, **the Executive Government** is vested in the Queen, who governs through the person of a Governor-General, appointed by her for a term of five years. There is one Parliament for C., consisting of the Queen, represented by the Governor-General; an Upper House, styled the Senate, the members of which are appointed; and a Lower House, or House of Commons, the members of which are elected. Each senator is appointed for life by the Governor-General under the Great Seal of C., and must be a British subject, born or naturalised, over 30 years of age, and resident in the prov. for which he is appointed. The present number of senators is 80. In the House of Commons the prov. of Quebec has the fixed number of 65 members, and the other provs. are represented in such proportion, as ascertained at each decennial census, as the number 65 bears to the population of Quebec so ascertained. The members of the House of Commons are elected by the people for a term of five years, unless the House be sooner dissolved, and must be British subjects, but require no other qualification. They are paid an indemnity at the rate of 10 dollars per diem if the session is less than thirty days, and a maximum amount of 1000 dollars for any period over that time. The following are the main events in the **history** of the Dominion. In 1497 Sebastian Cabot, who sailed from Bristol, touched at some part of the coast of Labrador, but it is not known that he then visited any portion of what is now Dominion terr., but in 1517 he made his way into what was afterwards called Hudson's Bay, and accordingly may be regarded as the first European visitor. The first important explorations, as well as the first settlements, are, however, due to the French. Jacques Cartier made three visits to what are now the eastern provs. in 1534, 1535, and 1540. Samuel de Champlain made several visits and carried on a considerable amount of exploration in 1603 and subsequent years, and in 1608 founded the city of Quebec. During the next century and a half the St. Lawrence region formed a French colony under the name of Canada, but in 1670 the English Hudson's Bay Company was founded and began to trade with the Indians in the NW., and in 1749 Halifax, Nova Scotia, was founded, and a number of British emigrants brought out and settled in that prov. under a British governor. In 1759 Quebec was taken by General Wolfe, who thereby secured the possession of Canada for the British, though the formal cession was not made by the French till the close of the Seven Years' War in 1763 (by the treaty of Paris). The boundary between Canada and the United States (afterwards settled by the Ashburton treaty in 1842), was first defined by another treaty of Paris (Sept. 3, 1783), on the conclusion of the American war of independence. In 1791 the two provs. of Upper Canada (now Ontario), and Lower Canada (now Quebec), were formed. At its formation in 1867 the Dominion included only these two provs., Nova Scotia and New Brunswick. Manitoba was admitted in 1870, and in the same year the North-West Terrs. were added to the Dominion. Brit. Columbia was admitted in 1871, Prince Edward I. in 1873.

Cana of Galilee, place named in N. T. See **Kefr Kenna.**

Cañar, prov., Ecuador, mainly composed of an Andine basin crossed by 2½° S.; cap. Azogues.

Cánara, North and **South,** dists., India. See **Kánara.**

Canard, vil., Canada, Nova Scotia, King's co., at the mouth of Canard R., 54 m. NW. Halifax. P. <1500.

Canaro, vil., N. Italy, Venetia, prov. Rovigo, dist. Occhiobello. P. <4000.

Can'arsie, vil., U.S., New York, King's co., about 6 m. SE. Brooklyn; a famous summer resort. P. <3000.

Canary Islands (from *Ganar* or *Canar*, Berber name of African regions N. of the Senegal), an archipelago (27° to 30° lat., 14° to 18° long. W., about 2900 sq. m.) of seven islands and some small islets. The five larger stretch (for 344 m.) in a semicircular curve from NE. (Lanzarote, Fuertaventura, 665 sq. m.) by the S. (Gran Canaria, 531 sq. m.) to the NW. (Tenerife, 752 sq. m., Palma). Gomera lies almost between the last two. Hierro is the last to the SW. of the five islets; the Selvagem (the 'Wild') are mere rocks far off the N. of Tenerife and Gran Canaria. The others (Alegranza, Montaña Clara, Gracioza, I. del Rio) are N. of Lanzarote and (Lobos) N. of Fuertaventura. This one is 60 m. from Africa (Cape Jubi). The W. islands are abrupt mountains, with peaks above 4000 and 6000 ft. (peak of Teyde, an active volcano at Tenerife, 12,188 ft.). Numerous volcanic eruptions and earthquakes since the 14th century. Thermal waters in Gran Canaria (Terror). C. Is. are almost entirely volcanic. The E. islands have an African aspect and climate. The W. islands, very mountainous, are more temperate. C. Is. are in the region of permanent trade winds (NE. and NW.). These and the anti-trade winds, where lands are high enough, are the source of humidity and vegetation. The greatest condensations take place between 2000–6500 ft. E. and SE. winds (*Levante*) produce at times great droughts. The meeting of contrary winds cause great storms (tornados). Very temperate spring and summer. Part of this and autumn very hot. April–October, dry season. (Tenerife: mean temp., 70° F.; hottest month, August or October, 79°; coldest, Jan. 60°; max. 87°, min. 46°; 300 days without rain. C. Is. are considered a sanatorium. Up to about 1500 ft. the flora is African (*Tamarix*, *Euphorbiæ tabaibas*, fleshy plants, *Dracæna*). Higher up it is Mediterranean (*Laurus*, *Pinus*, *Juniperus*, *Spartocytisus*, *Retama*). On the highest regions (above 8000 or 9000 ft.) the recent volcanic soil prevents plants from growing. Many special animal forms (molluscs; birds, the canary). Four primitive races of men: Berberes, Guanchos, and the Palma and Hierro natives, much intermingled since the 15th century with Italians, Portuguese, Normans, Spaniards, Flemish, Irish, Africans. There is an emigration to the West Indies. The islands are supposed to be the *Beatorum* or *Fortunatæ* islands of the ancients. They were known to the Phœnicians. Visited by the Portuguese and Genoese in the beginning of 14th century. Conquered by Bethencourt (1402). Annexed to Spain (end of 15th century). Prov. of Spain. The C. Is. formerly produced very good sugar and wines (Malmsey, Vidueña). The present productions are oil, wheat, barley, resin, tobacco (since 1862), European and tropical fruits, silk, and cochineal (since 1825; in 1871 more than two tons, one-third of the total value of the exports). The ports are free. The best port is Palmas (Gran Canaria). Santa Cruz de Tenerife is the seat of government. P. 291,625; 102 per sq. m. See **Spain** and **Ferro.** [**J. E. R.**]

Canta, prov., Peru, dep. Lima.

Cantabrian Mountains, in the N. of Spain, form a prolongation of the Pyrenees, and extend from these mountains on the E. to Cape Finistère on the W., about 43° N. The chief divisions of the chain in the order from E. to W. are the Sierras d'Aralar (on the borders of provs. Guipuzcoa and Navarra), Salvada (W. of the Nervion valley), Peñas de Europa, at the junction of provs. Oviedo, Santander, and León (with the Peña Vieja, 8740 ft.), the mountains of Asturias, on the S. of the old prov. of Asturias (now Oviedo), and the Sierra de Picos, on the borders of the old provs. of León and Galicia. The principal passes are the Puerto de Idiazabal (2160 ft.), a little to the W. of which the railway from Pamplona descends to San Sebastian, the Reinosa on the water-parting between the head of the Besaya valley and the upper Ebro valley (the pass by which the railway from Valladolid descends to Santander), and the Puerto de Pajares, by which the railway from León descends to Oviedo and Gijon. The E. half of the chain is composed of Cretaceous rocks, the W. end of Siluro-Cambrian, and the middle of Devonian strata, overlaid on the N. (in prov. Oviedo) by the richest coalfield in Spain.

Cantagallo, Ger. col. and rly. stn., Brazil, prov. and 81 m. NE. Rio de Janeiro. Alt. 1360 ft. P. 4000.

Cantagallo, comm., Italy, prov. and dist. Florence. P. <5000.

Cantal, dep., France, on the Central Plateau, formed from the upper portion of the ancient Auvergne (*q.v.*). The dep., which is divided into four arrs., Aurillac (the cap.), Saint-Flour, Mauriac, and Murat, is partly bordered in the E. by the Margeride range, which is continued S. into Lozère, but the greater part of the surface is occupied by the remains of a huge volcano, whose base, 75 m. in diameter, rests on a foundation mainly of crystalline schists and granites, above which are patches of Carboniferous and Tertiary deposits; culminating peaks, the Plomb de C. (6095 ft.) in the S., and the Puy Mary (5850 ft.) to the NW. Down the sides of this volcano streams traversing deep gorges radiate in all directions. Two of these valleys, the Cère (trib. Dordogne) and the Alagnon (trib. Allier), which nearly meet immediately to the north of the Plomb de C., are traversed by the main road across the dep. (on the route from Clermont to Aurillac), and now also by a railway, which passes through a tunnel in the flank of the mountain. The climate in the mountains is very cold. Autumn, on the whole, is the most agreeable season of the year. The natural agricultural regions are three, the most elevated including the high mountains, which for four or five months are covered with snow, but for the remainder of the year offer excellent pastures for numerous flocks. Next, at an altitude of from 3300 to 2600 ft., are the most fertile dists. Lower still is the ring of crystalline rocks with a thin and barren soil. The growth of cereals is inadequate to the consumption of the dep., only one-fourth of the surface being capable of cultivation. Cattle-breeding gives excellent results. Isolated deposits of coal are met with in the NW., and near Mauriac. Marble is quarried. Manufactures insignificant. See **France,** table.

Cantalupo, comm., Italy, Abruzzi e Molise, prov. Campobasso, 58 m. W. Foggia. The French here gained a victory over the Neapolitans in 1798. An earthquake in which many lives were lost occurred here in 1805. P. <3000.

Cantenac, vil., France, dep. Gironde, arr. and 10 m. N. Bordeaux, with a port on l. bk. of the Gironde. Exports wine, of which that of Gorse is in repute. P. <2000.

Canterbury, vil., Canada, New Brunswick, York co., 40 m. W. by S. Fredericton. P. <1500.

Canterbury (the *Durovernum* of the Romans, the *Cantwarabyrig* of the Saxons, called in ecclesiastical Latin *Cantuaria*), city, mun. and parl. bor. (returning one member), Eng., and the metropolitan see, co. Kent, on the Stour, in the middle of a wide hollow at the junction of the Chalk of the N. Downs with the London tertiaries, in ancient times situated at a ford on the river where roads from the present Richborough, Dover, and Lymne converged, and whence the great NW. road, afterwards called Watling Street, started, 55 m. ESE. of London, and 62 m. by the L. C. & D. R. It is also on the Ashford and Margate branch of the SE. R. Its cathedral, begun by Lanfranc in the 12th century and completed in the two following centuries, stands on the site of the first Christian church built in Saxon England. It is in the form of a double cross, with a central and two western towers, and presents a union of almost every style of Christian architecture. The choir is large, and the pavement of the chapel of the Holy Trinity is worn into hollows by the knees of the pilgrims who here worshipped at the shrine of St. Thomas Becket; and here are monuments of Henry IV. and his queen, the Black Prince, and many prelates. A chapter-house and a library are attached to the cathedral, under which is a crypt, used as a French Protestant church since the reign of Elizabeth, when a company of Huguenot clothiers and silk-weavers settled here. The parish churches (14) are mostly ancient, but possess little interest. The grammar-school was founded by Henry VIII. Monasteries and nunneries formerly abounded, as well as hospitals, almshouses, and other charitable institutions, amongst the latter of which there have come down to the present time the hospital of St. John, founded by Lanfranc, 1086, and now supporting a prior and eighteen brethren appointed by the archbishop; Cogan's hospital for clergymen's widows; King's Bridge, established by St. Thomas Becket for poor priests, now used as almshouses; a blue-coat school, founded by Queen Elizabeth, now merged in the Simon Langton schools. The St. Augustine's missionary college, a recent foundation, occupies the site of the old abbey in which the saint was buried, and of which the N. gate still remains. The former silk manufactures are replaced by industry in damask linen and worsted; there are large malting and brewing establishments. The archbishopric was founded in 597. The archbishop is 'primate of all England,' metropolitan, and first peer of the realm next to the royal family. He crowns the sovereign in Westminster Abbey, and his ecclesiastical province includes all England and Wales, except the six northern counties, Cheshire, part of Flint, and the Isle of Man. Area of ecclesiastical prov., 44,146 sq. m. The diocese comprises the whole of Kent except Rochester, and the part W. and NW. of that city, and the pars. of Croydon and Addington in Surrey. Area 1428 sq. m. The archbishop's seats are Lambeth Palace and Addington Park. Amongst other privileges he has that of conferring degrees in divinity, law, and medicine. Main drainage works were carried out by the corporation in 1867. The sewage is precipitated in tanks, and the effluent water employed in irrigation. Market-days, M. and S. P. mun. (and now also co.) bor. (1851) 18,400; (1871) 21,000; (1891) 23,100; parl. bor. P. (1891) 22,700.

Canterbury, one of the provs. of New Zealand, occupying the central portion of South I., from the Hurunui R. in the N. to the Waitaki in the S., E. of the water-parting line of the Southern Alps; the co. of Westland, on the opposite slope, having been separated in 1870. The prov. is level on the E., where are the famous **Canterbury Plains,** affording rich sheep pasture, occupy an extent of 4000 sq. m., or nearly one-third of the whole area. Chief towns, Christchurch, Lyttelton, and Timaru. See **New Zealand.**

Canterbury, SW. suburb of Sydney, New South Wales.

Canton, Chinese **Sheng-cheng,** the 'city of perfection,' or **Kwang-chau-fu** (the name Canton is a corruption by the Portuguese, the earliest European visitors, of the name of the prov.), city and seapt., China, cap. prov. Kwangtung, on l. bk. of the Canton R. (*q.v.*), about 70 m. from its mouth, in the China Sea. Lat. 23° 6′ 9″ N., long. 113° 15′ E. It has an admirable situation for commerce, both by land and sea, the Si-kiang (*q.v.*), or West R., affording a navigable channel westwards, the Pe-kiang (*q.v.*) opening up communication northwards with the provs. of Hunan and Kiangsu, and the Tung-kiang (East R.) eastwards. Opposite the town the Canton R. is deep enough for vessels of 800 or 1000 tons burden. There the river divides into two arms, enclosing the island of Honam, at the E. end of which stands Whampoa, 12 m. below C. This is the limit of navigation for the largest ocean steamers. The N. arm, or Front Reach, is navigable only by shallow-draught river steamers, but the S. arm, or Back Reach, or Blenheim Passage, can be navigated by ocean steamers of considerable size. The latter, however, was closed by barriers at the time of the war with France in 1884, and was only reopened on the 6th of July 1891. With its suburbs, C. occupies the N. bank of the river, extending inland nearly to a row of heights commanding it on the N. and NE., but between which and the city is a broken ravine; to the S. is an alluvial plain, formed by the delta of the river. The city is enclosed by a wall of brick, on a foundation of red sandstone, 6 or 7 m. in circumference, 25 ft. high, and entered by twelve gates; and it is unequally divided by another wall, with four gates, into the old and new town, in the former of which are the residences of most of the high officers, and the arsenal. The European quarter is in the Shamien suburb, about three-quarters of a mile up the river. Here a triangular piece of ground is separated from the mainland by a wide canal, faced with masonry, crossed by three stone bridges, having a strong stone bulwark along the river's bank for upwards of half a mile, where trees have been planted and a promenade formed. A large part of the population resides on the water. The river is crowded with vessels and rafts of all kinds, on many of which large numbers of poultry are reared. Manufactures various and extensive, and the shops are filled with articles of Chinese workmanship. Great numbers of individuals work in wood, stone, iron, and brass. C. is well supplied with water from reservoirs and springs. Until 1842, all the legitimate foreign trade of China was conducted at C. Since then the opening of the northern ports has seriously checked the trade of this southern emporium, especially those on the Yangtse R., whence the greater part of the teas are exported which were formerly shipped at C. C. still ranks, however, next after Shanghai in the total value of its trade by sea (upwards of £9,000,000 annually, including native imports). The total value of its exports is £4–5,000,000 annually, the principal articles being silk and silk goods (together more than half the value), tea, matting, fire-crackers, and glass bangles. About four-fifths of the shipping frequenting the port is British. In 1841, 1847, and 1856 the C. forts were taken by the British; and from 1858 to 1862 the town itself was occupied by an Anglo-French military force as security for the payment of a war indemnity. Mean temp. (4 yrs., 1829–31, 1876), yr. 70.3° F., Jan. 54.6°, July 82.3°. P. estimated at 1,600,000.

Canton, city, U.S., S. Dakota, Lincoln co., 50 m. NE. by E. Yankton. P.<1500.

Canton River, Chinese **Chu-kiang** ('pearl river'), one of the arms of a delta as intricate as that of the Ganges and Brahmaputra, namely, the delta of the Si-kiang, in the prov. of Kwangtung, China, leaves the main stream a little below the place where it receives the Pe-kiang, or North R., and flows first E. then S. At about 50 m. below Canton it is called the **Boca** (or **Bocca**) **Tigris,** or Tiger's Mouth, between the island of Taikoktau (Tycocktow) on the W., and those of Anunghoi and Chuenpi on the E., and there suddenly increases from 1 m. to 4 m., and, still lower, to 5–9 m. in width, forming a large estuary, termed the 'Outer Waters,' on the E. side of the island of Macao. The entrance to the Boca Tigris is defended by ports known to British sailors as the Bogue forts, taken by the British in 1841 and 1856.

[1] Including the population of British Kaffraria (annexed in 1866) on the 31st of December 1864.
[2] Census, 1875. [3] Census, 1877. [4] Census, 1879.

Coast and Surface.—The Atlantic coasts are low and sandy, whilst those of the Indian Ocean are rocky and steep. The coast-line is indented by many small bays, the most important to navigation being Table Bay, False Bay (with Simon's Bay), Mossel Bay, Algoa Bay, Port Alfred, and the mouth of the Buffalo R. The country rises in a series of terraces towards the interior. The first of these runs parallel to the S. coast, and is separated from the highlands in the interior by the Lange, Outeniqua, and Langkloof Mts. (Brookbosh, 5000 ft.). Between these mountains and the ranges further N. stretches a plateau with isolated hills and mountains, reaching altitudes of more than 5000 feet. Then follow (in 33½° S. lat.) the ranges of the Witte-, Kleene-, and Groote-Zwartebergen, Baviaanskloof, Kouga, and Little Winterhoek, the general direction of which is also parallel to the S. coast. Their average altitude is from 4000 to 5000 ft. (Seven Weeks Poort, 7630 ft.), and their southern slopes are steep, whilst towards the N. they merge into the second plateau, the **Great Karroo,** a large plain extending from W. to E., between 32° and 33° S. lat., with an average altitude of 4000 ft. in the western, and of 2800 ft. in the eastern parts. The Karroo is divided into a number of dists., separated from each other by table mountains, which rise isolated or in ranges above the plain. During a greater part of the year the soil of the Great Karroo, consisting chiefly of red, ferruginous clay, is hard and perfectly dry; but when the rains set in it is covered for three months in the year with rich pastures and a luxuriant vegetation. The highest points of this plateau are the Eland Mts. (4890 ft.) and the Great Table Mt. (4720 ft.). The water-parting between the Indian and Atlantic Oceans runs across the central parts of the Karroo. The northern boundary of this great plain is formed by a third series of mountain ranges, viz., the Roggeveld, Nieuweveld, Winter, and Koudveld Mts. (5000–5900 ft.), stretching from W. to E. in 32° S. lat. They form a further system of table mountains, sloping less steep to the S. than the preceding ranges, and very gently to the N., where the large Nieuweveld plateau extends (4600–5200 ft. above sea-level). The latter is traversed by a number of mountain ranges, or isolated mountains, of which the Slang, Karree, Pram Mts., the Hartzogs, and Jagtpun Rand are the principal. The Nieuweveld plateau gradually slopes down to the plains of Great Bushmanland and to the valley of the Orange R. The western parts of C. C. also rise in various terraces towards the interior. Near Cape Town the mountains approach the coast, the Table Mt. and the Lion's Head reaching altitudes of 3550 and 2180 ft. respectively. But generally the coast dists. are low, and the first western ranges are met with some distance inland. These are the Drakenstein, Piquet, and Olifant Mts., with an average altitude of 3300 ft. (Great Winterhoek, 6840 ft.), which are followed northward by the Western Karree Mts. To the E. of the deep Olifant valley rise the mountains of the second terraces, the Cedar Mts. (Sneeuwkop, 6335 ft.), succeeded by the Bokkeveld and Western Lange Mts. Between the last-named ranges and the Western Karree Mts. extends the plain of the Barren Karroo. Further N. rise the Kamies Mts. (Welcome Mt., 5130 ft.) and the Coppermines Mts. (Riet Mt., 4500 ft). More to the E. are the Great Doorn Mt. (5000 ft.) and the Rood Mts., belonging to the third terrace, which forms the western boundary of the above-described Nieuweveld plateau; and of its northern continuations E. of the Koudveld Mts., between 24° and 25° E. long., rises a high group, the Snow Mts. (Compass Mt., 8000 ft.), from which two important ranges diverge, viz., the chain including the Buffelshoek, Zwagershoek, Tandtjes, and Elands Mts. (Great Winterhoek, 7810 ft.), running in a SE. direction, and reaching the Indian Ocean near the mouth of the Great Kei R.; and, secondly, the high and picturesque range of the Drakenbergen, extending to the N.E. The principal divisions of this range within Cape terr. are the Zuurbergen, Stormbergen, and Kwathlamba Mts. (Mont aux Sources, 11,150 ft., the highest mountain of sub-tropical S. Africa; Champagne Castle, 10,360 ft.; Giant's Peak, 9640 ft.). **Hydrography.**—The Orange is the most important and one of the few perennial rivers of this part of Africa. It rises in the western slopes of the Kwathlamba Mts., and flows to the Atlantic in many windings; it is not navigable on account of cataracts and rapids. Its principal trib. within Cape terr. is the periodic Hartebeest R., which drains the plains of Great Bushmanland during the rainy season. Of other rivers must be mentioned the Buffalo and Olifant on the W. coast; the Breede, Gouritz, Gamtoos, and Zondag (or Sunday) Rivs. or the S. coast; and on the E. coast which, owing to the more copious rainfall, is watered by numerous small coast rivers—the Great Fish R. and the Great Kei. C. C. has no lakes, but only a number of small ponds or vleys, some of which are, however, of great importance in connection with artificial irrigation (see afterwards). **Geology.**—Many parts of C. C. consists of Archæic and Palæozoic rocks. Granite, gneiss, and crystalline schists cover the western dists. from the Orange to the Olifant R. These rocks are overlaid in the SW., S., and E. by the so-called 'Cape formation,' which belongs to the age prior to the Carboniferous period. It is succeeded by widely extending fresh-water deposits, without any trace of maritime influence. They are called 'Karroo formation,' and Schenck is of opinion that these rocks belong to the time between the Carboniferous and Triassic periods. The Cape and the Karroo formations consist principally of sandstones (which constitute many of the characteristic S. African 'table-mountains'), clays, clay-slates, and limestones. Besides these formations, numerous old volcanic rocks are to be met. With the exception of the coast dists. and the banks of the rivers, more recent formations are entirely absent, and this is direct evidence that these parts of S. Africa belong to the oldest land masses of the globe, and have not been covered by the sea since the Palæozoic age. The **climate** of C. C. is subtropical; the distribution and quantity of the rainfall are of the utmost importance. In these respects the eastern and western terr. differ greatly: the latter have winter-rains, whilst in the eastern dists. summer-rains are frequent; and the quantity of the rainfall gradually decreases from E. to W. For instance, the coast regions near the Knysna Harbour, and between the Great Kei R. and the St. Lucia Bay, have copious rainfall, whilst the western coast dists. N. of the St. Helena Bay are almost rainless. According to Dove, not less than eight climatic divisions exist within the comparatively small terr. of C. C. which correspond to the distribution and quantity of the rains. Snow is nothing unusual in the high mountain regions of the interior, *e.g.*, in the Draken, Storm, Snow, and Nieuweveld Mts.; occasionally snow has also been observed near the S. coast. The particulars in the following table will serve to illustrate these peculiar climatic differences. The places are arranged in the order from N. to S. For the sake of comparison, a number of places (printed in *italics*) outside the colony are introduced:—

Places between 17° and 20° E. long.:—

	Rehoboth.	Springbok-fontein.	Clan-william.	Cape Town (Royal Observatory).
Altitude . . .	4550 ft.	3200 ft.	245 ft.	40 ft.
Mean temp. Jan. or Feb. .	77.5° F.	69.5° F.	74.6° F.	69.9° F.
Mean temp. July or Aug. .	51.0°	49.6°	51.6°	55.1°
Mean temp. Year . .	67.0°	60.5°	63.7°	62.3°
Rainfall . . .	4.1 in.	7.64 in.	9.30 in.	25.46 in.

Places between 20° and 23° E. long.:—

	Carnarvon.	Fraserburg.	Prince Albert.	Mossel Bay.
Altitude . . .	4650 ft.	3900 ft.	2120 ft.	105 ft.
Mean temp. Jan. or Feb. .	..	71.9° F.	72.0° F.	70.7° F.
Mean temp. July or Aug. .	..	39.5°	46.0°	57.2°
Mean temp. Year . .	..	55.3°	61.0°	63.6°
Rainfall . . .	8.89 in.	7.13 in.	7.7 in.	17.39 in.

Places between 23° and 26° E. long.:—

	Kimberley.	Hopetown.	Richmond.	Graaff-Reinet.	Uitenhage.
Altitude . . .	4042 ft.	3600 ft.	4700 ft.	2500 ft.	200 ft.
Mean temp. Jan. or Feb. .	78.8° F.	..	..	74.0° F.	..
Mean temp. July or Aug. .	51.8°	..	..	52.3°	..
Mean temp. Year . .	66.4°	..	..	64.0°	..
Rainfall . . .	17.9 in.	10.9 in.	12.88 in.	15.03 in.	15.86 in.

Places between 26° and 29° E. long. :—

		Kroonstad.	*Bloemfontein.*	Aliwal North.	Cathcart.	East London.
Altitude		4500 ft.	4518 ft.	4330 ft.	3900 ft.	20 ft.
Mean temp.	Jan. or Feb.	..	73.5° F.	72.8° F.	..	70.5° F.
	July or Aug.	..	46.6°	43.5°	..	58.4°
	Year	..	61.6°	59.8°	..	64.9°
Rainfall		25.4 in.	22.4 in.	25.19 in.	30.3 in.	26.15 in.

Places E. of 29° E. long. :—

		Pietermaritzburg.	*Durban.*
Altitude		2093 ft.	150 ft.
Mean temp.	Jan. or Feb.	71.8° F.	75.1° F.
	July or Aug.	55.7°	63.1°
	Year	64.9°	69.4°
Rainfall		29.3 in.	40.8 in.

The **flora** of C. C. is very interesting and peculiar. It varies greatly owing to the above-explained climatic differences. The families of the Ericeae and Proteaceae prevail. The so-called Karroo flora occupies the largest area, and is characterised by many species of Acacia, Euphorbia, Aloe, Mesembryanthemum, and by a great number of bulbous plants. Similar to the tropical flora of the countries more to the N., and characterised by palm-trees (*Phœnix reclinata*), is the vegetation of the SE. dists. (from Natal to the Algoa Bay). A third region is that of the southern coast dist. (between Port Elizabeth and Mossel Bay), where dense forests exist, in which olive-cypress, Leucodendron, Protea, and Oreodaphne trees prevail. A fourth region, totally different from the former, is that of the SW. (from Mossel Bay to the W. Olifant R.), where bushes, heaths, and numerous evergreen plants form the principal features. The **fauna** has greatly changed in the course of the present century. Many wild animals, like the rhinoceros and the giraffe, have disappeared altogether; the lion and the elephant are but rarely met with in the eastern terrs. The zebra still exists in the mountains, and the hippopotamus is found in the Orange and in some of the coast rivers. The buffalo is still met with in some of the southern forests. Various kinds of antelopes, as well as jackals, hyenas, and monkeys, are found in many parts of the colony, but no longer in such great numbers as formerly. The ostrich was on the point of becoming extinct when its successful domestication was commenced a short time ago. Serpents (many of them poisonous) and locusts are pests, which have by no means diminished under the influence of European civilisation. The **mineral production** of C. C. is of the utmost importance. The diamond fields of West Griqualand (*q.v.*) have to be mentioned first, diamonds forming the most valuable export of the colony. Since 1867, when the first diamond was accidentally discovered, more than £60,000,000 worth of diamonds have been exported. The present annual export amounts to about £4,000,000. One of the largest towns of the colony, Kimberley owes its sudden rise exclusively to its diamond mines; other mining localities of great importance are Dutoitspan and Bultfontein. Next in importance are copper ores, which occur in large quantities in the gneiss formation of Little Namaqualand. The Ookiep mines, near Springbokfontein, are the principal. Coal is found in the eastern divisions of Albert and Wodehouse; and since railways have been constructed in the neighbourhood, the output of the mines is constantly increasing. The principal mines are those of Cyphergat, Fairview, Molteno, and Indwe, their total yield being at present about 30,000 tons per annum. Of other minerals, manganese ore occurs at Dutoitskloof (30 m. from Cape Town), lead ore on the Orange R., and iron ores and zincblende are met with in various parts of the colony. Together with the mineral production, **pastoral pursuits** form the principal source of wealth of the colony. Sheep-breeding ranks first, the total number of sheep being at present more than 16 millions. The excellent wool of the Cape sheep is, next to diamonds, the most valuable export article of C. C., amounting to £2,000,000 per annum. In recent years ostrich farming has been practised with great success, there being at present more than 150,000 ostriches in the colony. Other branches of importance are goat and horse-breeding, as well as cattle-rearing, the last-named showing great development since the introduction of artificial **irrigation,** which has made rapid strides during the last decade. The most important irrigation work is that of Van Wyk's vley, in the dist. of Carnarvon, where a dam of 330 ft. length has been built, the result being an artificial lake of 19 sq. m. surface, and 10–12 ft. depth. By means of this enormous reservoir a large area of the surrounding country has been converted into fertile land. Other important irrigation works have been constructed in the dists. of Calvinia and Beaufort West. The principal **agricultural products** are wheat, oats, barley, Kafir corn, rye, potatoes, and tobacco. Wine is produced at Constantia, Paarl, Stellenbosch, and various other places, and is exported in considerable quantities. At the present time there are hardly any **manufacturing industries** in the colony. A number of distilleries, breweries, factories of woollen cloths, leather goods, waggons, &c., are all that is worth mentioning in this respect.

The colony has 2430 m. of **railways.** The principal line is that crossing the country from SW. to NE., and connecting Cape Town with Beaufort West, Kimberley, and Vryburg. Two other lines of great commercial importance start from Port Elizabeth, the first running to Middelburg and Colesberg, and the second to Graaff Reinet. A fourth line connects the port of East London with Aliwal North, on the Orange R. In connection with the railways, the post and telegraph system of the colony has likewise greatly developed in recent years. The telegraph lines exceed 5000 m. The **commerce** of C. C. is very considerable, especially with the United Kingdom. Of course the opening of the Suez Canal for some time affected the commerce of the colony, but the recent enormous development of the social and commercial intercourse between Europe and S. Africa has given a great and permanent impulse to the commerce, and the latter is at present in a very flourishing state. The principal exports are diamonds, wool, ostrich feathers, hides and skins, Angora hair, copper ore, and wine. The chief imports are textile fabrics, cereals, flour, alcoholic beverages, building materials, and fancy articles. For statistics, see **Appendix,** pp. 4–5. There is cable connection with England, Zanzibar, and Aden, and regular steam communication with England (Union Steamship Co. and Castle Mail Packet Co.), East Africa, Madagascar, and Mauritius. The **government** consists of a governor, a ministry of 6, a legislative council of 22, and a house of assembly of 72 members. The governor is appointed by the mother country, but in all other respects the colony has a complete system of local self-government. Among the **population** the native races (Kafirs, Bechuanas, Fingos, Hottentots, &c.) are far more numerous than the Europeans. Among the latter, those of British and Dutch descent prevail. In 1891 the only census dists. with more than 50 per cent. white pop. were in order: Piquetberg (56.23), Port Elizabeth, Sutherland, Riversdale, Ladismith, Knysna, Robertson, Prince Albert, Fraserburg. Cape Dist. had 49.9. The lowest white percentage was in Elliotdale, 0.16. **Religion.**—The large majority of the civilised and semicivilised inhabitants are Protestants, but there are also a number of Catholics, Mohammedans, and Jews. More than one-half of the whole population are, however, pagans. **Education,** although not compulsory, is making rapid strides. The colony has many good schools, and even a university (which is affiliated to Oxford, and is an examining body only) at Cape Town. **Principal towns.**—Cape Town, Kimberley, Port Elizabeth, Graham's Town, Beaconsfield, Paarl, and East London. **Historical notes.**—The colony was founded by the Dutch in 1652. It was occupied by British troops in 1796, but given up again to the Netherlands in the Peace of Amiens (1803). In 1806 it came permanently into the possession of the English. Since that time the colony has steadily developed, in spite of considerable difficulties with the natives (six 'Kafir wars' from 1811 to 1879) and with the Dutch Boers. See **Griqualand West, Kaffraria.** [**H. G. S.**]

Capestrano, comm., Italy, Abruzzi e Molise, prov. Aquila, 21 m. WSW. Chieti. Alt. 1630 ft. P. <4000.

Cape Town, cap. of Cape Colony, situated on the N. side of the small penin., in the SW. of the colony, between Table Bay, a small bay looking to the N., and the flat-topped Table Mt., flanked on the SW. and SE. respectively by the Lion's Head and the Devil's Peak. It has two cathedrals, several Mohammedan mosques, the S. African College, an excellent public library and museum (the gift of Sir George Grey, a former governor), an observatory (33° 56′ 3″ S., 18° 28′ 42″ E.), a castle (an antique fort more than 200 years old, but now useless for defence), &c. Modern defensive works have been constructed, including a chain of forts, some armed with heavy ordnance, along the shores of Table Bay. A breakwater 3640 ft. long affords shelter to shipping in the bay, and there are wet docks with accommodation for large steamers, a dry dock, and a government patent slip, the last with 1000 tons lifting power. An outer harbour, which will have a minimum depth of 27 ft., is under construction. Mean temp., yr. 62.3° F., Jan. 69.9°, July 55.1°; mean rainfall at observatory (42 yrs.), 24.8 in. P. (1865) 28,500; (1881) 33,200; (1891) 51,250.

Cape Traverse, cape and vil., Canada, Prince Edward I., in Northumberland Strait, 33 m. W. by S. Charlottetown. P. <1500.

Cape Verde Islands (Ilhas de Cabo Verde), an archipelago (14°–18° N., 21°–24° W.), about 300 m. W. of the African coast (Cape Verde), forming three groups: (1.) NW. to SE., Santo Antão (246 sq. m.), São Vicente, Santa Luzia, São Nicolau (islets Branco and Razo, between the two last); (2.) NE., Sal, Boa Vista; (3.) Maio, Santiago (396 sq. m.), Fogo, Brava (some islets, Grande, Bombo, between the two last). The two first groups are called the Windward Is., the third the Leeward Is. The more mountainous are Santo Antão' (Pão de Assucar, about 8000 ft.), Brava, Fogo (active volcano, 8800 ft.—last great eruption, 1680), Santiago (Pico de Santo Antonio, 7380 ft.). They are essentially volcanic, but sedimentary rocks occur. Iron is very abundant in the S. islands. The **climate** is tropical. Cold trade winds from NE. (October to May), sometimes changed to NW. by the African continent, or very hot from Africa (the *Léste*). Dry season, December to July; rainy, August to September. Highlands not being extensive, the trade winds do not cause rain, and the islands are subject to great drought. Storms from W. (tornados). Mean temp. 74° F.; maximum, 91½° (September); minimum, 58° (December). Extreme daily variation, 30° F. Rather unhealthy. Best climate at São Vicente, Fogo, Brava, Santo Antão. The endemic **flora** seems to come from Canary Is. (shrubby Labiatæ and *Synantheræ*, from 1600 ft. to 4800 ft). The flora up to 1600 ft. was derived from Senegambia. No indigenous tree. Land **fauna** very poor. Some birds are special to Cape Verde Is. (puffins), or very numerous (*Alcedo*, guinea-fowl). Atlantic steamers coal at São Vicente, receive water from Santo Antão, and cattle from Santo Antão and São Nicolau. Principal **exports**: *Jatropha Curcas* (50 per cent. of the whole), salt, coral, *Rocella*, skins, coffee, sugar, brandy, palm oil, Indian corn, beans, fruits (oranges, grapes), peanuts, cacao, cotton (yellow), tobacco. There are now good plantations of *Cinchonæ* (2950 to 4000 ft.). Some islets are covered with guano. In the **population,** Africans predominate. In the dry years, emigration to Brazil and British Guiana. Language, a very corrupt Portuguese (*Creolo*). Discovered by the Portuguese in 1460. Form a colonial government of Portugal, with capital in Santiago (Villa da Praia). P. (1844) 60,000; (1879) 100,000. **[J. B. R.]**

Capeville, settlement, Queensland, Dalrymple co., 130 m. SW. Townsville.

Caprara, Punta, cape, Italy, in the extreme N. of Asinara I., in 41° 6′ N., with lighthouse, visible 21 m.

Caprera, Isola di ('goat island'), small isl., Italy, off the NE. ct. of Sardinia, in 41° 10′–14′ N. Length, N. to S., 5 m.

Caprese, vil., central Italy, prov. and 13 m. NE. Arezzo. Birthplace of Michael Angelo, 1475. P. <3000.

Capri, the ancient *Capreæ* ('island of goats'), isl., Italy, dist. Castellamare, at the S. entrance of the bay, and 20 m. S. city of Naples. Length, 4½ m.; breadth, 3 m. It is mountainous, coast composed of limestone cliffs, steep and inaccessible except at two places, one forming the port of Capri, a small fortified town on its S. side, with a cathedral. The island was a favourite residence of the Roman emperors Augustus and Tiberius, the substructures of whose palace (destroyed after the death of Tiberius by order of the Senate) can still be seen at the E. point. The island is also noted for its 'blue grotto' (*grotta azzurra*), a cavern entered from the sea, so called on account of the beautiful blue seen reflected from all parts. Alt. 1525 ft. P. <5000.

Capriano, vil., Italy, Lombardy, prov. and 10 m. WNW. Bergamo. P. <2000.

Carcarañal, Rio, riv., Argentine Republic, flows E. from the Sierra de Cordoba, and enters the Parana N. of Rosario.

Carcassonne, the ancient *Carcaso*, tn., France, cap. dep. Aude, composed of two parts, the old town strongly situated on a rock commanding the R. Aude and the Canal du Midi, 55 m. SE. Toulouse, the new town below; both surrounded by old walls, those of the old town restored in modern days by Viollet-Leduc. The old town contains the castle and the old cathedral (11th and 14th centuries); the new town, the new cathedral, town hall, hospitals, theatre, barracks, covered markets, and Church of St. Vincent. It is a bishop's see (since the 6th century). It is well supplied with water, and has important manufactures of cloth, hosiery, &c. Near C. is the fine aqueduct by which the Canal du Midi crosses the R. Fresquel. C. has been of importance since the time of Cæsar; the hereditary Counts of C. date from 836. The town suffered in the wars against the Albigenses (1209). Alt. 340 ft. Mean temp., yr. 56.4° F., Jan. 41.7°, July 72.5°. P. 28,200.

Carclaze, range of downs, Eng., Cornwall, 2 m. N. St. Austell, with ancient tin-mine. Alt. 665 ft.

Cardiff ('fort on the Taff'), parl., mun., and co. bor., and seapt. of S. Wales, cap. co. Glamorgan, on the Taff, 1 m. from its mouth, in the estuary of the Severn, in the diocese of Llandaff. C. is the seat of the University College of S. Wales and Monmouthshire. It has a public library, and excellent museum, particularly rich in geological specimens, and its growth, which has been very rapid since the sixties, has been chiefly due to the increase in the export of the excellent steam-

coal obtained from this field. The export of coal coastwise increased between 1865 and 1891 from 899,000 to 1,299,000 tons, that to foreign countries from 1,451,000 to 10,115,000 tons (including coke and patent fuel). As to total amount of shipping, see **Appendix,** p. 13. C. also exports large quantities of iron and tin-plate, carries on iron shipbuilding, and has large iron and steel works and various factories. The port has 5 docks and basins, Bute docks (E. and W.), Roath Dock and Basin, these two with a depth of 35 ft. at ordinary springtides. and the Glamorganshire Canal basin, in addition to a floating dock with 4500 tons lifting power, and numerous dry docks. C. joins with Cowbridge and Llantrissant (forming the Cardiff dist. of bors.) in sending one member to House of Commons. C. is ancient and can be traced to the first century; with remains of a Roman fort. The castle, dating from 1110, now belongs to the Marquis of Bute, who has the title of Baron C. It has a stn. on the S. Wales line of G. W. R., and is connected by the Taff Vale and Rhymney railways with the S. Wales coal and mineral dists. Market-days, W. and S. Mun. (and now also co.) bor. P. (1851) 18,400; (1871) 56,900; (1891) 128,900; C. dist. of parl. bors. P. 132,200.

Cardigan, mun. bor., seapt. tn., and par., S. Wales, cap. co., on the Teifi, 5 m. from its entrance into St. George's Channel, in the archdeaconry of C., and the diocese of St. David's. As to shipping, see **Appendix,** p. 13. Market-day, S. Par. P. <3000; mun. bor. P. <3500.

Cardigan, vil., New South Wales, Grenville co., in 37° 35′ S., 143° 42′ E., 79 m. NW. Melbourne.

Cardigan Bay, Canada, on the E. of Prince Edward I., in 46° 9′–12′ N.

Cardigan Bay, the large bay on the W. of Wales between Braich-y-Pwll, Carnarvonshire, and Strumble Headlands, Pembroke.

Cardigan Headland, Wales, N. point of Pembrokeshire.

Cardigan Isle, Wales, at the mouth of Cardigan Bay, N. side. 40 ac.

Cardiganshire, co., S. Wales, having W. Cardigan Bay, between the mouth of the Dovey and that of the Teifi (or Deifi). Surface wholly composed of Cambrian and Silurian rocks; level on the coast; mountainous in the interior, but interspersed with fertile valleys. Plinlimmon, 2460 ft. in height, is in its NE. part. The chief rivers are the Teifi, which forms the chief part of the S. boundary, Rheidol, Ystwith, Aeron or Ayron, and Towy, the last dividing this co. from Brecon. The principal towns are either on the coast or in the valley of the Teifi—on the coast, Aberystwith and Aberayron, in the valley of the Teifi, Tregaron, Lampeter, and Cardigan. A branch of the Cambrian Rly. keeps near the coast to Aberystwith, and from that town the Manchester and Milford Rly. first ascends the valley of the Ystwith, then descends that of the Teifi into Carmarthenshire, where it joins the G. W. R., which sends a branch into the S. of Cardiganshire as far as Adpar. Principal industry is the rearing of live stock [**Appendix,** pp. 7–9]. Copper ore is mined at Glandovey, zinc ore at Devil's Bridge, Penrhyncoch, Talybont, and one or two other places, and lead ore at Goginan, Ystradmeurig, Talybont, Penrhyncoch, &c., and slates are quarried at Cwmere and Glandovey. Gloves and flannels are manufactured. C. belongs to the diocese of St. David's. It returns one member to Parliament. The county contains no parl. bor. Area, 440,630 ac. P. 62,630. The administrative county includes the part of the urban sanitary dist. of Cardigan, in the ancient county of Pembroke. Area, 443,071 ac. P. 63,467. See **Wales,** table.

Cardinal, stn., Canada, Ontario, 9 m. from Prescott, on the Grand Trunk Rly.

Carinola, tn., Italy, prov. Caserta, dist. and 20 m. E. Gaeta; neighbourhood produces excellent wine. P. 8000.

Carinthia, Ger. **Kärnthen** (name derived from the *Carni*, a Celtic tribe), Austrian crownland, occupying both sides of the valley of the upper Drave, which is the principal river of C., and traverses it from W. to E. C. is an Alpine country; the mountain ranges N. of the Drave belong to the Central Zone of the Eastern Alps [**Alps,** SUBDIVISIONS, **III. A. 1.**], and those S. of this river to the limestone Alps [**Alps,** SUBDIVISIONS, **III. C. 2–3**). C. is occupied by a number of interesting lakes (Wörther-, Millstätter-, Ossiacher-, Weissen-See). In the N. and NW. parts the climate is bleak, but the E. and SE. dists. are milder. A large proportion of the surface of C. is covered with pastures and forests, and there is but little arable land. But the principal wealth of C. is derived from the large yields of lead and iron ores, and from the industries in connection therewith. The chief lead dists. are those of Bleiberg, Raibl, and Bleiburg, whilst iron ores (excellent siderite and limonite deposits) are found in the dists. of Hüttenberg, Friesach, and Wolfsberg. The principal industrial seats in addition to the mining localities just mentioned are Prävali, Buchscheiden, Lippitzbach, and Ferlach, where steel of excellent quality, rails, machinery, firearms, lead articles, &c., are manufactured. Other manufactures of importance are textiles, leather goods, cement, and wood-pulp. Timber is floated down the Drave. Klagenfurt, the cap. of C., and Villach are the commercial centres of the country, both towns being connected by direct railway lines with Vienna, Innsbruck, Venice, and Verona. The population of C. consists chiefly of Germans, but there is a considerable number of Slavs in the SE. dists. Most of the inhabitants are Roman Catholics. Area, 3988 sq. m. P. (1890) 361,000. See **Austria-Hungary,** table. [**H. G. S.**]

Caripe, tn. and valley, S. America, Venezuela, Bermudez, 40 m. SE. Cumana. The valley is noted for a cavern frequented by a species of night-hawk (*Caprimulgus*). P. 5000.

Carlisle, the bay on which Bridgetown, Barbados, stands.

Carlisle (corrupted from the ancient British name *Caer-Luel*, of which the Roman name *Luguvallum* is believed by Egli to be a translation), an ancient city, parl. bor. (one member), and mun bor., Eng., cap. of Cumberland, Eskdale div., at the confluence of the Caldew and Petterill with the Eden, 17½ m. NNW. Penrith. The L. & NW., Midland, NE., Caledonian, N. B., G. & SW., Newcastle & C., Maryport & C., and the C., Silloth, & Port C. railways all unite here. Cotton-spinning, introduced here before the end of last century, has lost much of its importance in recent years. Formerly shipping was carried on by a canal to the Solway, but now Silloth serves as the port. C. has many interesting remains of former times. Traces of the Roman wall (that of Hadrian) can still be seen near. Parts of the old city walls still survive. The castle, founded in 1092, has been restored, and is now used as barracks. The cathedral, built between 1092 and 1419, has suffered four times by fire, most severely in 1292. Of its Norman nave only a fragment remains, which until a few years ago was cut off from the choir, the great glory of which is the large and beautiful E. window. C. has also an old grammar school, in connection with which handsome new buildings have been erected, and among other recent structures

a large market and a free library and technical school may be named. The governing charter of the borough was given by Charles I., in whose favour the city declared and suffered severely during the succeeding civil war. In 1745 it surrendered to Prince Charles, but was retaken by the Duke of Cumberland, when he put to death, as traitors, the officers of the garrison. The see, founded by Henry I., comprises the counties of Cumberland and Westmorland, and the detached parts of Lancashire N. of Morecambe Bay. Market-days, W. and S. Alt. 114 ft. Mean temp. (1861–80), yr. 47.8° F., Jan. 37.8°, July 59.5°; rainfall (1866–80), 30.1 in. Mun. bor. P. (1851) 26,300; (1871) 31,000; (1891) 39,200; parl. bor. P. (1891) 38,100; pars. P. 42,900.

Carlow, a SE. co. of Ire., Leinster, to the W. of Wicklow and Wexford, W. of Kilkenny, divided into the following baronies:—

Baronies.	Acres.	P. 1891.
Carlow	31,364	9,095
Forth	39,507	4,934
Idrone, E.	48,153	8,779
Idrone, W.	23,067	3,667
Rathvilly	44,804	8,485
St. Mullins, Lower	26,615	4,822
St. Mullins, Upper	7,785	1,154
Total	221,295	40,936

It is traversed from N. to S. by the rivers Barrow (navigable throughout the co.) in the W., and the Slaney in the E., the Barrow forming the boundary in the S. half, and the surface between these rivers is generally level or rolling, with much alluvial soil in the middle, the value of which has been greatly increased by drainage operations carried out by the Board of Works. In the E., where the county borders on Wicklow and Wexford, it is hilly, rising in the SE. in Mt. Leinster to 2600 ft., and in the NW. to the W. of the Barrow there is another hilly and well wooded but less elevated tract belonging to the unproductive Carboniferous system. The remainder of the county is chiefly composed of granite rock. There are no minerals of great economic importance. For agriculture, see **Appendix,** pp. 10–12. The county returns one member to Parliament. The population has steadily decreased since 1851. See **Ireland,** table.

Carmarthenshire, maritime co., S. Wales, belonging to the bishopric of St. Davids, between Pembrokeshire on the W. and Brecon and Glamorgan cos. in the E., divided into the parl. divs. named below:—

	Area.	P. 1891.
Eastern	259,174	49,003
Western	321,325	46,956
Carmarthen dist. of bors. . .	7,317	34,607
Total . . .	587,816[1]	130,566

[1] The administrative county of C. is coextensive with the ancient county.

Surface mainly hilly or undulating. The only important river is the Towy, which enters the county in the NE., and flows SW. into Carmarthen Bay. Minor rivers are the Tav or Avon Tav, Gynin, Gwendraeth-fach and Gwendraeth-fawr, and the Loughor or Lwchwr. The NW. of the county is composed of Cambrian rocks, which are succeeded by narrow belts of Devonian and Lower Carboniferous, and finally by the coal-measures which occupy all the SE. of the county from a line running from Kidwelly to Llandebie (Llandybie). In this part of the county coal-mines occur at Llanelly, Kidwelly, Pembrey, Pontardulais, Burry Port, Llandebie, and several other places. Gold ore is mined at Caio, and lead at Llandovery and Talley. See **Wales,** minerals. As to agriculture, see **Appendix,** pp. 7–9. At Llanelly there are blast-furnaces, besides copper, silver, lead, and tin works. Principal towns, Llanelly, Penbrey, Kidwelly, and Laugharne on the coast, Llandovery, Llandilo, Newcastle-in-Emlyn, and Carmarthen (the cap.) in the valley of the Towy. The railways mostly belong to the G. W. system, but the line running N. from Carmarthen up the valley of the Gwili (trib. Towy) unites in the N. with the Manchester and Milford Rly. The towns of Carmarthen and Llanelly form the Carmarthen dist. of bors., which also returns one member. See **Wales,** table.

Carmaux, comm. and tn., France, dep. Tarn, arr. and 8 m. N. Albi, on l. bk. of the Ceron; coal-mines in its vicinity. P. 8100.

Carmeirs, picturesque valley, Eng., Cornwall, descending SE. to St. Blazey from Hensbarrow Beacon.

Carmel ('the Park' or 'Fruitful Field'), mt. range, Palestine, which branches off from the N. ends of the mountains of Samaria, runs NW. between the plains of Phœnicia and Sharon, and forms a bold promontory on the Mediterranean overlooking the Bay of Haifa. Length, 18 m., greatest breadth, 5 m., highest point, 1750 ft. Its sides and dells are covered with the evergreen oak, the prickly pear and copsewood, and its scenery is among the finest in Palestine, and amidst the forests are seen the remains of former villages. It abounds in hares, partridges, quails, woodcocks, and the jackal; the wolf and wild boar are met with. Carmel is sacred as the scene of Elijah's sacrifice (1 Kings xviii.). The **Convent of C.,** seated high on the W. declivity of the ridge overlooking the sea, consists of a large square block of buildings, surmounted by a cupola, and comfortable accommodation is offered to travellers by the Carmelite monks.

Carnarvon Bay, large bay, Wales, between Carnarvonshire and the SW. of Anglesey. Breadth of entrance between Holyhead and Braich-y-Pwll, 35 m. It communicates with the Irish Sea by Menai Strait. Light-vessel, visible 11 m., in 53° 5′ 40″ N., 4° 44′ 30″ W.

Carnarvonshire, co., N. Wales, having W. Carnarvon Bay and N. the Menai Strait and Beaumaris Bay, S. Cardigan Bay and Merioneth, and E. Denbighshire, divided into the parl. divs. named below:—

	Area.	P. 1891.
S. or Eifion	188,299	42,816
N. or Arfon	163,268	45,816
Carnarvon dist. of bors. . .	9,530	29,572
Total . . .	361,097[1]	118,204[1]

[1] The administrative county (which excludes parts of Colwyn Bay and Colwyn urban sanitary dist., administrative county of Denbigh) has an area of 360,138 ac., and a population of 117,233.

C. is in the diocese of Bangor, with the exception of the detached part of the county on the N. coast, called Creuddyn, surrounded by Denbighshire. Surface altogether mountainous, and intersected by some of the loftiest ranges in Britain [**Snowdon, Moel Siabod, Moel Hebog, Carnedd Llewelyn, Carnedd Dafydd**], all in the part adjoining Merionethshire. Principal river the Conway, chiefly forming the E. boundary. Silurian rocks occupy by far the greater part of the county, but there are Archæan rocks in the SW., and in two narrow strips parallel to the Menai Strait in one place bordering the strait, and succeeded on the N. by a narrow strip of Lower Carboniferous. Lead and zinc ores are mined at Pantgwyn and some adjacent places, as well as (in smaller quantity) at Llanrwst, a little manganese near Pwllheli and Bethesda, and iron pyrites at Trefriw, hones at Llyn Ogwen, yellow ochre at Bethesda, and granite is quarried for setts at Penmaenmawr and Llithfaen; but the principal mineral product is slate, which is produced more largely in this county than in any other county in the kingdom, the principal places of production being Bethesda, Llanberis, Rhostryfan, and Nantlle. The L. & NW. R. traverses the northern part of the county, and then runs S. from Carnarvon to Afonwen on the S. coast, where it joins the Cambrian Rly., which runs along the S. coast to Pwllheli. Principal towns, Carnarvon, Bangor (a city), Pwllheli, Conway, Portmadoc, Criccieth, and Nevin. See also **Carnarvon,** town, and **Wales,** table, and as to agriculture, **Appendix,** pp. 7–9.

Carniola, Ger. **Krain** (name derived from the Slav *Krajina*= boundary), duchy and Austrian crownland, occupying the terr. between the Austrian Coast Prov. and the upper Save. It is a mountainous country, the mountains belonging partly to the Alps (**Alps,** SUBDIVISIONS, **III. C. 3–4**), and partly to the Karst (*q.v.*). The principal rivers are the Save and its tribs., the Gurk and Kulpa; the valleys of the Idrizza (trib. Isonzo), and Zeier (trib. Save) separate the Alpine ranges from the Karst. The principal lakes are the picturesque mountain lakes of Wurzen, Wochein, and Veldes, and the famous periodic lake of Zirknitz, which disappears in the dry season. A similar lake formerly occupied the now fertile plain of Laibach. The climate varies greatly in different parts of the country. In the Gurk and Kulpa dists. it is so mild that the vine grows well; the Alpine regions are cold, but salubrious; and the Karst region bleak. Forests and pastures are numerous in C., and timber is plentiful; only a small proportion of the surface consists of arable land. Valuable minerals rank first among the natural resources of C. The supply of quicksilver from the mines of Idria seems inexhaustible. Iron ores occur at Eisnern, Feistritz, and Jauerburg; lead is found at Lake Littai; and zinc at Sava, Jauerburg, and Sagor. The industries of C. are but little developed. There are ironworks at Jauerburg, Sava, Neumarktl, and Wochein; textiles are manufactured at Lake Laibach, and leather goods at Neumarktl. The commerce of C. is considerable, quicksilver, iron and ironware, and timber being the chief exports. Laibach, the cap. of the country, has direct railway connections with Graz, Vienna, Trieste, and Venice. The population consists almost exclusively of Slavs; a number of Germans live in the dist. of Gottschee, at Laibach, and some other places. Almost all the inhabitants are Roman Catholics. Area, 3844 sq. m. P. (1890) 499,000. See **Austria-Hungary,** table. [**H. G. S.**]

Carolina, La, tn., Spain, Andalusia, prov. and 36 m. NNE. Jaën. P. 8500.

Carolina, North and **South,** two of the thirteen original states of the U.S., with an area rather less than that of Great Britain, the relative size of North C. and South C. being about 5 : 3; bounded on the N. by Virginia, W. by Tennessee, S. by Georgia, E. by the Atlantic, with a coast-line of about 590 m. The coasts are fringed in the N. by sand-dunes, and in the S. by larger islands (noted for long staple cotton), the former enclosing a belt of sounds varying in width from about 2 to 30 m., the principal being the Pamlico, Albemarle, and Currituck sounds. The surface, low along the coasts, rises inland by a series of belts to the Appalachian system (*q.v.*), which forms the W. frontier. The shore belt, width about 50 m., is low and swampy (Great Dismal, Alligator Swamps, &c.), beyond this is the middle region, hilly, well-watered, and with wide valleys; succeeded by the Piedmont plateau, 60 to 75 m. in width, and traversed by spurs from the mountains; a sandy, pine-covered belt, 30 to 80 m. in width, stretches NE. and SW. through the states from Virginia to South C., and from Cheraw to Augusta (Ga.). Many rivers, navigable throughout a great part of their course, flow SE., the principal in order from N. to S. being Chowan, Roanoke, Tar and Pamlico, Neuse, C. Fear, Great Pedee, Santee, Edisto, Congaree, and Savannah. The climate of the lowlands is sub-tropical, humid, and malarial; in the middle region, warm, equable, and healthful; in the mountainous region, cooler, and subject to greater extremes. The rainfall is greatest on the coasts and in the mountains; least in the middle zone. [North C.—**C. Hatteras, C. Lookout, Kitty Hawk, Smithville, Wilmington, Asheville**; South C.—**Charleston.**] Severe earthquakes have occurred in recent times, the most destructive being that of 1886. The geological structure is simple, the formations being arranged, for the most part, in zones parallel to the mountain axis and the coast. Archæan rocks predominate in the W., and Tertiary in the E. Agriculture is the leading industry in both states; chief products—cotton, rice (in the production of which South C. takes the lead), maize, tobacco, chiefly in the N. Tea has recently been successfully grown at Summerville. Immense quantities of oysters are produced in North C., and of shrimps in South C. The **minerals** include gold, mined chiefly near Salisbury (North C.), and in Lancaster co. (South C.); iron is widely distributed; emery is obtained in Macon co. (North C.); large deposits of coal occur in the Deep River basin; kaolin, of the finest quality, near Aiken (South C.); marble, granite, and mica abound, besides various other minerals, including the phosphate rock, which in South C. is of pre-eminent importance. The phosphate deposits extend along and parallel to the coast from the neighbourhood of Port Royal to the NE. of Charleston, a length of about 70 m., with a breadth of about 30 m.; phosphate rock also occurs in North C., between South C. and the Neuse. First commercially worked in South C. in 1867, the annual output has risen to 500,000 tons, one-third of which is used in the state in the manufacture of fertilisers [**Charleston**]. South C. is also the chief cotton manufacturing state of the S. Chief towns, North C.—Wilmington (the capital), Raleigh, Charlotte, Asheville; South C.—Charleston, the capital, Columbia. Originally peopled by Indians, now represented by a few Cherokees and Catawbas, it was first visited by Ponce de Leon in 1512. The earliest attempts at colonisation were made, though unsuccessfully, by Sir Walter Raleigh; subsequently, bands of colonists of various nationalities settled in the country. In 1663, the territory was granted by Charles II. to eight lords-proprietors, who established a very liberal government, which still further attracted settlers. In 1670, the philosopher, John Locke, drew up for the colony the Fundamental Constitutions, but the scheme met with great opposition; the Proprietary Government became obnoxious, and in 1729 C. was formally divided into N. and S., though practically the two parts had been under different governments since 1690. C. was named after one of the Kings Charles, but whether one of the English kings, or Charles IX. of France (by Huguenot settlers) seems uncertain. North C., area 48,580 sq. m., P. (1890) 1,618,000; South C., area 30,170 sq. m., P. 1,151,000. See **United States,** table.

Caroline, co., U.S., Maryland, on the E. frontier, crossed in the N. by 39° N.

Caroline, co., U.S., Virginia, in the E., crossed by 38° N., and W. of 77° W.

Caroline Island, one of the Marquesas group, South Pacific, lying N. of Eimeo, in 9° 57′ S., 150° 25′ W., a low-lying strip of land, covered with verdure, 5 m. in circumference.

Caroline Islands, a group of about 700 islands and islets, mainly coral, belonging to Spain, in the Pacific Ocean, between about 5° and 10° N., and 135° to 165° E. The great majority are uninhabited atolls, but there are forty-eight real islands, each surrounded by a group of islets. Five out of these forty-eight are of basalt, with coral at the base, the rest all coral. The principal are Yap, Ullea, Laucotrek, Ruk, Bonebey (Ponape), and Ualan. Climate temperate. Two rainy seasons, one in January, the other in August. People of Micronesian family, but with an admixture of Negritoes and Papuans, along with some Japanese and Chinese. The products include bread-fruit, coco-nut, oranges, cloves, and sugar-cane. The islands form two provs., dependent on the Philippines, a western, cap. Yap, and an eastern, cap. Ponape, on the island of Bonebey. The group was discovered by a Portuguese navigator in 1526, and was named in honour of Charles II. of Spain by the Spanish Admiral Lazeano in 1686. The claim of Spain to the group was recently disputed, but was upheld by the Pope as arbitrator in 1885. Total area about 270 sq. m. Estimated P. 22,000.

Caroling, post-stn., W. Australia, Howick co., 95 m. E. Perth. P. <1500.

Carpane, or **Carpanedo,** vil., N. Italy, prov. and 23 m. NNE. Vicenza, on the l. bk. of the Brenta. The French defeated the Austrians here in 1796. P. <2000.

Carpaneto, tn., N. Italy, prov. Piacenza, circle Fiorenzuola. P. 5000.

Carpas, mts., Cyprus. See **Karpas.**

Carpathians (name derived from the Slav word *Khrebet,* signifying mountain range), a mountain system of SE. Europe, surrounding Hungary and Transylvania from the NW. to the E. and S. in a large semicircle. The total length of the C. is more than 800 m., and their width varies between 7 and 230 m. They form the water-parting between the Baltic and the Black Sea, and slope steeply towards Galicia and Roumania, but gently towards the Hungarian plain. Geologically, the mountains W. of the Hernad R. consist of ancient crystalline rocks (granite, Archæan, gneiss, crystalline schists), which are overlaid by Triassic, Jurassic, Cretaceous, and Tertiary deposits. Further E., from the Hernad to the head-waters of the Tisza, Archæan rocks are entirely absent, and the mountains consist of Cretaceous and Tertiary rocks, mostly sandstone. E. of the Taraczko R. and in the mountains of Transylvania, Archæan rocks become again of great importance, and are overlaid in many localities by Mesozoic, Tertiary, and recent formations. Volcanic rocks also are very extensive, forming many of the mountains on the Hungarian side of the C., *e.g.*, the mountains of Schemnitz, Visegrad, the Matra group, the Eperies-Tokay range, the Vihoriat-Gutin Mts., and in Transylvania the Hargita. The C. form four great oro-

graphical divisions, viz., the western C., the central Groups, the eastern C., and the mountains of Transylvania. The **western C.** extend from the Danube to the Poprad R. They commence at Pressburg with the low range of the Little C. (2670 ft.), and are followed by the White Mts. (3350 ft.) and the western and eastern Beskid (or Bieskid) Mts., the last-named range connecting the western with the eastern C. (Babia Gora, 5650 ft.; Smrk, 4400 ft.). The **central Groups** comprise the High Tatra and the surrounding mountain ranges, which occupy the greater part of N. Hungary. The High Tatra, the highest and boldest mountain group of the C., occupies the terr. between the valleys of the Waag (Vág) and Arva and those of the Poprad and Dunajec. The total length of the High Tatra is 76 m., and its width 28 m. The Tatra Mts. consist chiefly of lofty granite masses which rise abruptly to altitudes of more than 8000 ft., forming a majestic mountain wall with steep ramparts and serrated crests. A characteristic feature of the High Tatra is the great number of small and picturesque mountain lakes which occupy the cup-shaped cavities in the granite, and which greatly increase the wild grandeur of the Tatra scenery. The highest summits are the peaks of Gerlachfalva, or Gerlsdorfspitze (8700 ft.), of Lomnitz (8640 ft.), Eisthal (8620 ft.), and Kesmark (8300 ft.). No glaciers exist in the C. South of the High Tatra range lies a widely extending mountain region intersected by the valleys of numerous rivers, all of which flow to the Danube and Theiss (Tisza). N. of the Arva rises the Little Tatra (5500 ft.), and S. of this river the Great Tatra (5850 ft.). Between the valleys of the Waag and Gran, and parallel to the High Tatra, stretches the Low Tatra (Djumbir, 6700 ft.; Kralowa Hola, 6400 ft). Then follow along the left banks of the Waag the Neutra (4400 ft.) and Galgoc (4350 ft.) Mts., and more to the E. the Ostrowsky and other mountain groups, called the Hungarian Ore Mts., on account of their richness in valuable ores. More to the SE. rise the Neograd Mts. (2850 ft.) and the picturesque group of the volcanic Matra Mts. (3300 ft.). The last offshoots of the central C. to the S. and E. are the densely wooded Bükk Mts. (3100 ft.) and the Eperies-Tokay Mts., celebrated for their wine production. From the valley of the Poprad to that of the Golden Bistritza extends the long and monotonous sandstone range of the **eastern C.** (Czerna Gora, 6600 ft.; Pop Ivan, 6300 ft.). The **Transylvanian Mts.** commence at the valley of the Golden Bistritza and turn westward at the point where the Buseo R. pierces the Transylvanian Alps. The latter extend to the Danube near Orsova. The eastern Transylvanian ranges commence with the high Rodna Mts. (Pietrosza, 7550 ft.; Kuhhorn, 7500 ft.). Then follow the Gyergyó (Pietroszul, 6900 ft.) and Bereczk (Lakocz, 5800 ft.) ranges; and further W., almost parallel to this eastern rampart, the Görgeny Mts. (Mezöhavas, 5730 ft.) and the grand Trachytic masses of the Hargita (5700 ft.). The southern rampart of Transylvania consists of high and bold ranges, with wild and grand mountain scenery. It commences with the Bodza Mts., which form the SE. corner of Transylvania (Csukas, 6400 ft.). Then come the picturesque Burza Mts. (Bucsecs, 8300 ft.; Königstein, 7350 ft.) and the steep Fogaras range, which contains the highest summit of the Transylvanian Alps, the Negoi (8340 ft.). Further W. extend the Cibin, Vulkan, and Hatszeg Mts. (Retyezat, 8200 ft.), and in the SW. corner the Banat Mts. The Transylvanian Mts. thus form a great natural stronghold, which has always been regarded as the eastern citadel of central Europe. A number of **passes** and **railways** lead across the C., the following being the most important: The Iablunka Pass (1970 ft.), connecting Hungary with Silesia by the Budapest-Breslau railway; the Cracow branch of the just-mentioned railway, crossing the mountains to the E. of the Iablunka Pass; the Kaschau-Tarnow line, passing through the Poprad Gorge (2630 ft.); the line from Tokay and Homonna to Sanok and Przemysl and the Latorcza railway from Munkácz to Lemberg, crossing the C. near the Vereczke Pass (2760 ft.). All these lead from Hungary to the countries N. and E. The principal connections between Transylvania and the countries to the S. are the railway from Kronstadt to Bukarest, through the Tömös Pass (3370 ft.); the line from Hermannstadt to Bukarest, through the narrow gorge of the Aluta, the famous Roteturm Pass (1115 ft.); and the railway connecting Temesvar with Craiova, across the Teregova Pass (1690 ft.). The C. are for the most part covered with forests (beeches, oaks, conifers) to heights of between 3–4000 ft.; higher up they present bare and steep rocks. Beasts of prey (bear, wolf, and lynx) are still met with in the Tatra, in the eastern C., and in the Transylvanian Mts. The population of the C. consists of Slavs, Magyars, Germans, and Roumanians. The principal occupations of the inhabitants are mining industries, agriculture, and cattle-rearing. The C. are richer in valuable minerals than any other mountain system of Europe, N Hungary, Galicia, the Bukowina, the Transylvanian Mts., and the Banat possessing an almost inexhaustible supply of silver, copper, lead, iron, salt, coal, petroleum, and various other minerals. For the principal mining localities, see **Hungary** and **Galicia.** [**H. G. S.**]

Carpenedolo, tn., N. Italy, prov. and 16 m. SE. Brescia. P. 5000.

Carpeneto, comm., Italy, Piedmont, prov. and 16 m. S. Alessandria. P. <2000.

Carpentaria, Gulf of, in the S. Pacific, indents deeply the N. coast of Australia, between Capes Arnhem and York, comprised between 11° and 17° 30′ S., 136° and 142° E. Average length and breadth about 350 m. each. Coasts low, but on the W. greatly indented; and it contains Groote, Wellesley, and many other islands. Its E. coast was discovered by the Dutch in 1606, this being the first authenticated discovery of this part of the Australian continent.

Carpentras, tn., France, dep. Vaucluse, 14 m. ESE. Orange, cap. of arr. It has a cathedral (1405–1519) and ancient ramparts. Under the Papacy C. was cap. of the county of Venaissin, and was regarded in Roman times as one of the most beautiful and rich cities of S. Gaul. P. 9800.

Carpentras, Canal de, branches off from the R. Durance, and suffices to irrigate 50,000 ac.

Carrick, par., Ire., co. Westmeath, bar. Fartullagh, 6 m. S. Mullingar. P. <250.

Carrick, par., Ire., co. and 2 m. N. Wexford, bar. West Shelmaliere, on R. Slaney; 3009 ac. P. <1500.

Carrick, P.O., Scot., Argyllshire, on the W. of Loch Goil, 6 m. from Lochgoilhead, takes its name from an old castle standing on a rocky peninsular platform formerly defended landwards by a deep moat, dating from the end of the 15th century, if not earlier, and used as a royal stronghold.

Carrick, tn., Tasmania, Westmoreland co., 9 m. SW. Launceston. P. <1500.

Carrickaboy, P.O., Ire., co. and 4 m. from Cavan.

Carrick-a-raide, or **Carrick-a-rede Island,** rocky islet, Ire., off the N. ct. of co. Antrim, in 6° 19′ W., joined to the mainland by a rope bridge 60 ft. long, at a height of 84 ft. Salmon are caught here in great numbers.

Carrickart, tnld., Ire., co. Donegal, bar. Kilmacrenan, 22 m. NW. by W. Londonderry, PMT.O. (**Carrigart**). P. <250.

Carrickaslane, electoral div., Ire., co. Monaghan, dist. Castleblaney.

Carrickatea, electoral div., Ire., Monaghan, dist. Ballybay.

Carrickbaggot, par., Ire., co. Louth, bar. Upper Dundalk, 7 m. N. Drogheda. P. <250.

Carrickbanagher, electoral div., Ire., Sligo, dist. Ballymote.

Carrickbeg, electoral div., Ire., Waterford, dist. Carrick on Suir.

Carrickboy, electoral div., Ire., co. Donegal, dist. Ballyshannon.

Carrickboy, P.O., Ire., SE. co. Longford, bar. Shrule, 8 m. SE. by S. Longford.

Carrickbyrne, electoral div., Ire., co. Wexford, dist. C., in New Ross union.

Carrickfergus, or **St. Nicholas,** mun. (and till 1885 also a parl.) bor., market-tn., seapt., and par., Ire., E. ct. co. Antrim, bar. C., 9 m. NNW. Belfast, on N. side of Belfast Lough, connected by rail with Belfast and Larne. Manufactures linen and cotton fabrics; has also flax-spinning mills, bleaching works, salt-mines (at Duncrue, discovered in 1852 in Triassic sandstone), and oyster fishery. C. was formerly a place of great strength; a considerable part of the walls remain, and the castle, built on a rock projecting into the sea, is still kept up as an arsenal and mounted with heavy guns. The harbour has a depth, at high water, ordinary springs, of 14 ft. at entrance, and 9–13 ft. alongside quays. Market-day, S. Par. 16,702 ac. Par. and civic tn. P. 8900.

Carrickfergus Junction, stn., Ire., co. Antrim, 3 m. SW. Carrickfergus, on the Belfast and Northern Counties Rly., P.O.

Carrickhugh, Ire., Londonderry. See **Carrichue.**

Carrickleck, electoral div., Ire., co. Meath, dist. Nobber.

Carrickmacosker, electoral div., Ire., co. Fermanagh, dist. Lisnaskea.

Carrickmacross, or **Magheross,** par. and tp., Ire., SE. co. Monaghan, bar. Farney, 13 m. W. by S. Dundalk, with which it is connected by rail on G. N. and Donegal Rly.; with free grammar-school, founded and endowed by Lord Weymouth in 1711. PMT.O. Market-days, W., Th., and S. Par. (**Magheross**) 16,708 ac., P. 5800; tp. P. <2000.

Carrickmahoy, islet, Ire., co. Galway, SE. Inishbofin I.

Carrickmalagh, small islet, Ire., off SW. ct. co. Mayo.

Carrickmines, P.O., Ire., SE. co. Dublin, bar. Rathdown, 4 m. NW. Bray, on the Dublin, Wicklow, and Wexford Rly.

Carrickmore, or **Termon Rock,** tn., Ire., co. Tyrone, bar. and 10 m. E. Omagh, 1½ m. from its stn. on the Portadown, Dungannon, and Omagh Rly., P.O. P. <250.

Carrick-on-Roe, P.O., Ire., co. Londonderry, 5 m. from Limavady.

Carrick on Shannon, market-tn., Ire., SE., on both banks of the Shannon, 3 m. SSW. Leitrim, partly in Leitrim bar., co. Leitrim (of which co. it is cap.), and partly in Boyle bar., co. Roscommon, on the Longford and Sligo Rly.; has military barracks. PMT.O. Market-day, Th. P. <1500.

Carrick on Suir, market-tn. and tp., Ire., in SE. co. Tipperary, bar. Iffa and Offa E., on the l. bk. of the Suir (which can be ascended to this point by vessels of 150 tons), 12 m. E. Clonmel, on the Waterford and Limerick Rly., but including Carrickbeg on the r. bk. in the co. of Waterford. There are quarries of good slate in the neighbourhood. Five acres of commonage have been converted into a 'People's Park.' PMT.O. Market-days, W. and S. Tn. P. 5600.

Carrick Road, roadstead, Eng., Cornwall, to the N. of Falmouth Harbour.

Carrickroe, P.O., Ire., co. Monaghan, 4 m. from Emyvale.

Cart, riv., Scot. See **Cart Water.**

Cartagena, seapt., Chile, Santiago, 35 m. S. Valparaiso. P.<2000.

Cartagena (the ancient *Carthago Nova*, or *New Carthage*, it having been a principal colony of the Carthaginians), city and seapt., and the chief naval arsenal of Spain, on a bay of the Mediterranean, prov. and 27 m. S. by E. Murcia. Lat. 37° 36′ 5″ N., long. 0° 56′ 36″ W. It occupies the declivity of a hill, and a small plain extending to the harbour, which is one of the best in the Mediterranean, protected from all winds by surrounding heights, and by an island on the S., which, as well as the city, is fortified. Its port communicates with the Segura R. by the Lorca canal. Silver-lead, zinc, and iron ores mined in the vicinity, and esparto grass are the chief exports; coal and coke are the only important imports. The mines of C. were originally wrought by the Carthaginians. C. was taken by Scipio, B.C. 210, at which period Livy states that it was one of the richest cities in the world. It was ruined by the Goths; and its modern importance dates only from the time of Philip II. Taken by insurgents, it was bombarded in Nov. 1873, and surrendered to the government troops in the following Jan. Mean temp., yr. 65.6° F., Jan. 52.9°, Aug. 80.3°. P. (1877) 75,900; (1887) 84,200.

Cartagena, a strongly fortified city and seapt., S. America, U.S. of Colombia, cap. of state of Bolivar, on a narrow island, now connected by bridges with the mainland, and forming a sandy peninsula in the Caribbean Sea, a little to the S. of the point where the coast begins to trend S., and form the Gulf of Darien. Its natural harbour, formed of a sheet of water about 15 sq. m. in extent, nearly landlocked by the penin., on which the town stands, and the islands of Tierra Bomba and Baru to the S., is the best on the N. coast of S. America, accessible to the largest ships, though only small vessels less than 5 ft. in draught can lie alongside the quays. Notwithstanding the excellence of its harbour, it was formerly at a disadvantage compared with Sabanilla, through being cut off from the Magdalena, but the connection with that river, through the Canal del Dique, which existed in the time of the Spaniards, but had been allowed to become choked, has now been reopened, so that C. has now regular steam communication with Honda, and the shipping of the port is rapidly increasing. C. is about to be connected (1893) by submarine cable with Colon and other Colombian ports, and is being connected by rail with Calamar on the Magdalena. It has a citadel, college, seminaries, and hospitals. C. was founded in 1533 by Pedro de Heredia, and named C. de las Indias on account of the resemblance of its harbour to that of C. in Spain. Under the Spaniards C. was the seat of a captain-general, and of one of the three tribunals in the Inquisition of S. America. P. 16,000.

Cartago, tn., Costa Rica, cap. prov. C., once cap. of county, 12 m. ESE. San José, on the railway to Limon, in a fine valley at the S. base of volcano of Irazu, founded 1553, in great part destroyed by earthquake in 1841. The hot springs of Aguacaliente lie to the SW. P. 8–10,000.

Cartago, tn., S. America, Colombia, Cauca, 100 m. S. by W. Medellin. Alt. 3210 ft. P. 7000.

Cártama, ancient tn., Spain, prov. and 21 m. W. Malaga, on the Guadalhorce. P. 5700.

Cascade, co., U.S., Montana, partly bounded on the S. by 47° N., and crossed by 111° and 112° W., traversed from NE. to SW. by the Missouri.

Cascade, vil., U.S., Iowa, co. and 23 m. SW. by W. Dubuque. P. <1500.

Cascade Locks, settlement, U.S., Oregon, Wasco co., on the l. bk. of Columbia R., 40 m. E. by N. Portland.

Cascade Point, cape, on the W. ct. of the South I. of New Zealand, in 43° 58′ S.

Cascade Range, the name applied to that portion of the mountains of the outer edge of the N. American plateau which rise in the states of Oregon and Washington, trending N. and S., or nearly N. and S., between the meridians of 120½° and 122° W., and directly continuing the line of the Sierra Nevada. The highest summits are in Washington—Mount St. Helens, Mount Adams, and Mount Rainier (14,440 ft.). The name is due to the fact that the cascades of the Columbia occur where that river pierces the range. The same name is also applied to a range in British Columbia running parallel to the coast between 50° and 52½° N., but separated from the more southerly range by the Fraser Valley.

Cascade River, settlement, Tasmania, co. Dorset, 50 m. NW. Launceston, on Cascade R. P. <1500.

Cascades, vil., U.S., Washington, Skamania co., 107 m. SSW. Olympia, on Columbia R. Named on account of the rapids which here obstruct the navigation of the river. P. <1500.

Casoria, tn., Italy, Campania, prov. and 5 m. NNE. Naples. P. 9000.

Caspe, comm., Spain, prov. Saragossa, on the r. bk. of the Ebro, 42 m. NW. Tortosa. P. 8400.

Caspian Sea (Russian **Kaspiyskoye More,** Persian **Darya-i-Khyzyr,** the ancient *Mare Caspium*, or *Hyrcanium*), an inland sea between Europe and Asia, 36° 40′–47° 20′ N., 46° 50′–55° 10′ E., enclosed on W., N., and E. by Russia, and S. by Persia. Length, N. to S., 270 m.; W. to E., from 150 to 270 m.; area, 169,383 sq. m.; alt. 85.5 ft. below the ocean. Shores low and flat, and in great part sandy, on N.; low but more fertile on the NW., where the Uch Penin. juts N. Further S. the slopes of the Daghestan highlands and the spurs of the Caucasus reach the coast, and protrude eastwards in the Aspheron Penin. The Mugañ Steppe spreads at the mouth of the Kur, whose delta forms the Saliany, or Kyzyl-agach Penin., and further on the steep slopes of the plateau of Armenia and Persia fringe the SW. and S. coasts. The Turkoman Steppes spread on the SE. ct. up to the Krasnovodsk (*q.v.*) and Darja Penins., where the Balkhan Mts., running SE., appear as a continuation of the Caucasus Range. A wide shallow bay, Karabogaz (*q.v.*), comes next, while the NE. ct. is occupied by the steep slopes of the Ust-urt. Receives Volga, Ural, and Emba in N.; Kuma, Terek, and Kur in W.; Sefid-rud, Gürgen, and Atrek in S. and SE. Depth only 10–12 fathoms in the N., greater in middle; the underground submarine ridge, which runs NW. to SE. from the Aspheron to the Darja Penin., divides the sea into two parts—the middle basin attaining a maximum depth of 421 fathoms, and the S. basin 516 fathoms. The W. ct. altogether has a steep slope. Volcanic activity, in the shape of mud volcanoes, occasionally rising over the water surface, is still continued in the submarine ridge, while the shores at Lenkoraň are often visited by earthquakes. Traces of former communication with Black Sea are seen in the Manych and Kuma depression (*q.v.*). The salinity of its water is very feeble in the N., and altogether smaller than in the Black Sea. The sea freezes in the N. Easterly winds prevail. Fishing and seal-hunting are carried on on a great scale, especially in N. A naval station for the Caspian flotilla (7 gunboats) is kept by Russia at Ashur-ade, on an island close to the Persian shore. The chief Russian ports are: Astrakhañ, Petrovsk, Derbent, Baku, and Lenkoraň, on W. ct.; Fort Krasnovodsk and Mikhailovsk, head of the Transcaspian Rly., on E. shore; Resht, on Persian terr. See **Caucasus, Volga, Transcaspian Territory.**

Castille, Old and **New,** in Spanish **Castilla la Vieda** and **Castilla la Nueva,** are natural and historical divs. of the Iberian Penin., but no longer administrative units, as the present military departments of the same names do not exactly correspond to either. As a natural region the two C.'s form the central plateau of the Iberian Penin. (2000 ft. in average alt.), with the high and central valleys of rivs. Duero (Douro), Tagus, Guadiana, and the mountain ranges between them; the Cantabrian in the extreme N., Gredos-Guadarrama-Moncayo between the Duero and Tagus (Old C.), Toledo, Cuenca-Molina between the Tagus and the Guadiana (New C.), and Sierra Morena, as the extreme S. escarpment of the whole plateau. Montes Idubedas (Oca to Cuenca) form the E. escarpment (Ebro valley). Rivers and mountains rise in a general NE.-SW. direction. Between the sierras immense plains, very thinly populated (*despoblados*), stretch like steppes, with a few trees, or merely covered with low thickets, where numerous sheep travel (*Merinos transhumantes*), yielding, under cultivation, great harvests of wheat and barley. The climate is one of extremes—summers very hot, winters very cold, great drought. As an historical div., Old C. (Valladolid, Palencia, Burgos) is the country covered with castles (*Castillos,* in Arabic *Ardo-l-Kalad,* 'land of the castles') as a barrier between the first Christian states (Asturias and León) on the N. mountains and the Mohammedan S. countries, on which it gradually encroached, extending as far as Santander, on the Bay of Biscay, the Rioja on the valley of riv. Ebro, and, after having passed the Guadarrama Mts. (New C.), to the borders of Andalucia (1212). Burgos was a county in the beginning of the 10th century, a kingdom in the beginning of the 11th. Toledo and New C. were occupied, and León and C. united as a kingdom from 1085-1230; C. with Aragon in 1504. The dialect of C. (*Castellano*) became the official language of Spain and her colonies. Madrid, in the middle of the two C.'s, and in the centre of the Iberian Penin., was made the capital of all Spain by Philip II. The C.'s were anciently inhabited by Celtiberian tribes. From 554-771 Toledo was the seat of the Visigothic monarchy. Old C. was divided (1833) into eight provs., named from their chief towns: Valladolid, Palencia, Burgos, Santander, Logroño (Rioja), Segovia, Soria, Avila. New C. was divided into five: Toledo, Madrid, Guadalajara, Cuenca, Ciudad Real (Mancha in part). There is a military captaincy of Old C., with seat at Valladolid, comprising Old C. prov., except Segovia; and one of New C., with seat at Madrid, comprising all New C., with prov. of Segovia. See **Spain,** table. [**J. B. R.**]

Catalina, tn. and port of entry, on C. Harbour, Newfoundland, 60 m. NNW. St. John's. P. <1500.

Catalonia, old princip. and prov. in the extreme NE. of Spain, in a triangle formed by the Mediterranean (E., SE., S., 230 m. of seaboard), the Pyrenees (N., France), and, more or less on the W. by the rivs. Cinca, Ebro, Segre, Noguera-Ribagorzana (W., Aragon; S., Valencia). Covered by mountains branching from the Pyrenees (heights from 6000 to more than 11,000 ft. alt.), in a general NE.-SW. direction parallel to the coast, and forming an acute angle with the main chain. One range from El Cadi (Urgel) to Monsant and La Llena forms a coast chain, and divides C. into characteristic zones: (*a.*) in the NE. rivs. (Fluvia, Ter, Llobregat-Cardoner) flow straight from the Pyrenees into the sea (modern provs. of Gerona and Barcelona); (*b.*) in the W. a plateau extends to the interior (*llanos* and *huertas* of Urgel, Lerida, Noguera), drained by the Segre-Noguera as an affluent of the Ebro (prov. of Lerida). The present prov. of Tarragona embraces the coast chain and the littoral with the mouth of the Ebro. The climate and flora of C. are mostly a continuation of those of Andalucia, Murcia, and Valencia. Among the evergreen oaks the cork-oak represents a great industry. Wines, some of them very alcoholic, are produced at Llansa, Selva, Ampurdan, Alella, Taia, Tiana, and Sitgés. Artificial irrigations are very well managed. Coral fishery exists along the coast. Iron, lead, copper, tin, zinc, coal (Ripoll, Abadesas, &c.), and rock-salt [**Cardona**]. But the great economic characteristic of C. is its active industry (manufactured cotton, wool, silk, and laces, &c.) and commerce. In the interior dists. C. was peopled by Celtiberian tribes; on the littoral, by Phœnician, Carthaginian, Greek colonies. C. was the first conquest of the Romans in Spain (*Hispania-Tarraconensis*). The Goths entered Spain by C. also (5th century, *Gothalania, Catalaunia*). During the 8th century C. becomes Mussulman. Reconquered till the 10th century (*Marca Hispanica*). Hereditary Estate in 1040; united to Aragon in 1137. Often revolted against Aragon and Spain. Republic for some time in the 15th century. The language is the Catalan, derived from the Limousine (Langue d'Oc) of old Provença, and still spoken in a part of S. France (Roussillon), prov. of Valencia, the Baleares, and some parts of Sardinia. C. forms one military captaincy, and is divided (1833) into four provs.: Gerona, Barcelona, Lerida, Tarragona. See **Barcelona, Pyrenees,** and **Spain,** table. [**J. B. E.**]

Cataluña, cape, Spain, N. ct. of Majorca.

Catamarca, prov., Argentine Republic, on W. frontier, between about 25½° and 28° S., and extending in the E. to 30° S.; in large part mountainous, traversed by branches of the Andes and the Sierra Aconquija; rivers formed by the melting of mountain snows, almost dry in winter, mainly used for irrigation, and where not fit for such use, terminating by evaporation or absorption in the soil, or emptying themselves into salt lagoons; mineral wealth great, but as yet little utilised through the lack of cheap fuel and means of transport. Principal mines Las Capillitas, in the NE., near the W. frontier of Tucuman, these mines containing gold, silver-lead, native copper, copper ore, iron ore, &c. See **Argentine Republic,** table.

Catamarca, tn. and stn., Argentine Republic, cap. prov. C., 116 m. S. by W. Tucuman; founded in 1683. Mean rainfall, yr. 11 in., April–Sept. 2 in. P. 7500.

Catanduanes, Isla de, one of the Philippine Is., E. of Luzon, just E. of 123° E., crossed in the N. by 14° N. Area, 644 sq. m.

Catanduanes Bató, comm., Philippines, prov. Albay, in the S. of Catanduanes I. P. 6700.

Catania, the ancient *Catana,* tn. and seapt., Sicily, cap. prov. C., on its E. ct., near the foot of Mount Etna, 33 m.

NNW. Syracuse. Often ruined by earthquakes and eruptions of Etna, but always rebuilt in a superior style. Its streets are paved with lava, of which material the public buildings are constructed, the latter being faced with magnesian limestone and enriched with marbles. Has a cathedral, rebuilt after the earthquake of 1693, and an observatory and university, and many Roman antiquities. Manufactures, silk fabrics and other textiles, and wares in lava and amber; besides which goods it exports corn, fruit, &c., manna, sulphur, cantharides, and snow from Mount Etna. Birthplace of Bellini. The **Gulf of C.** extends from La Trezza Bay, near Aci Reale, to Cape Santa Croce, near Agosta, 18 m. P. (1881) town and suburbs, but exclusive of remote parts of comm., 96,000; (estimated, 1891) 117,500.

Catanzaro, tn., Italy, Calabrie, cap. prov. C., 75 m. NE. by N. Reggio. See of a bishop. Many of its buildings were destroyed by the earthquake in 1783. Manufactures of silk, velvet, and woollen fabrics. P. 25,000.

Cat Arm, inlet, Newfoundland, in the W. of White Bay.

Catarmán, comm., Philippine Is., on the N. ct. of Samar I. P. 6800.

Catarroja, tn., Spain, prov. and 6 m. S. Valencia. P. 5500.

Catas Altas, tn., Brazil, prov. Minas Geraes, 30 m. N. Ouro Preto, formerly in a flourishing gold-mining dist. P. 3000.

Catasauqua, bor., U.S., Pennsylvania, Lehigh co., on Lehigh R., 31 m. NE. Reading. P. <4000.

Catastrophe, cape, S. Australia, the SE. extremity of Eyre's Penin., so named by Flinders in 1802, in consequence of a disaster that occurred here.

Catatumbo, principal riv., State of Zulia, Venezuela, flows E. into the Lake of Maracaibo.

Catawba, co., U.S., N. Carolina, S. of 36° N., crossed in the extreme E. by 81° W., bounded on the N. and E. by the Catawba R.

Catawba, or **Great C.,** riv., U.S., N. and S. Carolina, one of the headwaters of the Santee. Its valley is well suited to the vine, and gives name to a variety of grapes much esteemed in the U.S. The **Little C.** is a r. bk. trib.

Catawba Island, U.S., Ohio, Ottawa co., in the SW. of Lake Erie, in 82° 50′ W.

Catawbas, ancient tribe of N. American Indians, formerly living on the Atlantic coasts of Virginia and the Carolinas.

Catawissa, vil., U.S., Pennsylvania, Columbia co., on the N. branch of the Susquehanna, 54 m. NNE. Harrisburg. P. <2000.

Catbalogan, or **Cadvalonga,** tn., Philippine Is., on the W. ct. of Samar I., 11° 45′ N., 124° 53′ E. P. 6700.

Catcherside, par., Eng., Northumberland, Bellingham union. P. <250.

Catskill Creek, riv., U.S., New York, in the E., trib. of the Hudson, which it joins on the r. bk. at Catskill.

Catskill Mountains, ranges in the U.S., in the E. of New York State, N. of 42° N., composed of two divs., the N. or C. Proper, between the Catskill and Esopus Creeks, two streams flowing ESE. to the Hudson, this div. consisting of a plateau with border chains 10–15 m. apart; and the S. div., S. of the Esopus, less regular and with less clearly defined boundaries, except on the side of the Esopus valley, but containing the highest summit of the entire group, Slide Mt. (4205 ft.).

Catswater, riv., Eng., on the borders of Cambridge and Lincoln, connected by the N. Level Main Drain of the Bedford Level with the Nen.

Cattal, par., Eng., Yorkshire, W. Riding, Ripon div., on the Nidd, 6 m. E. by S. Knaresborough, 1½ m. S. of C. stn. on the NE. R. P. <250.

Cattan, tnld., Ire., co. Leitrim, bar. Mohill, Cloone par. P. <500.

Cattaraugus, settlement, U.S., New York, C. co., 38 m. S. Buffalo.

Cattaraugus Creek, riv., U.S., New York, in the SW., forms the boundary between C. co. and Erie co., flows W. into Lake Erie in the NE., affording extensive water-power.

Cattaro, Slavonic **Kotor,** fortified seapt., Austria, prov. Dalmatia, at the head or S. end of the deep rock-girt bay of C., to enter which ships must pass through three straits: the first, 1–1½ m. wide, called the 'Bocca Grande'; the second, about ½ m. wide, leading into another rock-girt bay (San Teodo); the other, the Canal Le Catene ('the chains'—so called because closed by the Venetians by means of a chain), less than ¼ m. wide, leading thence into the bays of Risano (to the N.) and C. (to the S.). The bays collectively are known as the Gulf of C., and their mouths as the Bocche (mouths) di C. It is enclosed on all sides by mountains and all the heights around

it are covered with fortifications. It was the cap. of a small republic, which placed itself under the dominion of Venice in 1420, remaining under Venetian government till 1797, when by treaty it became Austrian. After sundry changes during the Napoleonic wars, it was finally ceded to Austria in 1815. P. <4000.

Catwyck, group of small islands to the E. of Cochin China, in about 109° E., just N. of 10° N.

Cauca, riv., Colombia, rises in the mountain knot of the Andes called the Paramo de las Papas, in the S. of the republic, and flows N. between the E. and W. chains of the Andes, in the states of C. and Antioquia, finally emerges on plains in the state of Bolivar, where it divides into several arms, the chief of which enters the Magdalena in about 8° 55′ N. The C. begins to be navigable about 60 m. below its source, is a good navigable stream in the stretch between Popayan and Cali, but navigation is impeded by a fall between Cali and Antioquia, and by rapids just below Antioquia and just below Caceres. Total length, about 500 m.

Cauca, one of the United States of Colombia, stretching from the Gulf of Darien to the S. frontier, and including the whole of the Pacific coast S. of the Isthmus of Panama, traversed in the S. by the C. Riv., in the N. by the Atrato; cap. Popayán. See **Colombia,** table.

Caucagua, tn., S. America, Venezuela, Miranda, 55 m. SE. by E. Carácas.

Caucasus is a name indiscriminately applied to: (*a.*) the great chain of mountains which run NW. to SE. from the Sea of Azov to the Caspian Sea (Caucasus proper, or Great Caucasus); (*b.*) to the whole of the mountains and highlands which fill up the isthmus between the Black Sea and the Caspian, including both the former and the highlands of Transcaucasia; and (*c.*) to the Russian General-Lieutenancy of the C., or Caucasia, which covers the same region from the Kuma-Manych depression in the N., to the frontiers of Persia, Asia Minor, including parts of the plateau of Armenia and the highlands of Asia Minor.

Caucasus, extensive chain of mts. which runs NW. to SE. from the Tamañ Penin. (between the Black and Azov Seas) to the Apsheron Penin. of the Caspian, attaining a total length of 940 m. (nearly 700 m. in a straight line). Although usually represented as one chain, it has a very complicated structure, and may be roughly divided, by Mt. Kazbek, into the Western and the Eastern C. The former is a relatively narrow chain, having its SW. foot on the Black Sea coast, and, further on, in the broad valley of the Rion, while extensive high plains, watered by the Kubañ and the upper Terek, spread at its NE. foot-hills. A low chain of mountains, 3000–5000 ft. high, the Meskes ridge, which may be taken as a continuation of the Pontic ridge (on the SE. coast of the Black Sea), and runs in a NE. direction, joins the Great Caucasus ridge near Mt. Kazbek. As to the Eastern Caucasus, it has the characters of plateau-like highlands (the Daghestan plateau), of which the main ridge appears as a south-western border ridge. The Great Caucasus may be divided into nine sections, as follows: (1) The **Black Sea Ridge** (*Chernomorskaya Tsyep*), about 155 m. long, from Anapa to Mt. Oshten, the first snow-clad peak in C. Tertiary deposits at the NW. extremity, and Jurassic and Cretaceous further on, prevail. The chain is narrow, the passes low, and the peaks gradually rise from 2140 ft. (Idokopaz) to 9369 ft. (Oshten and Fisht). It is all covered with thick wood, has a steep slope to the sea, and a gentle one to the NE.; (2) the **Alps of Abhazia** (or **Kuban C.**), from Mt. Oshten to Mt. Elbruz, about 120 m. long, and over 100 m. wide; the main ridge (water-parting) consists of granites, diorites, porphyries, gneisses, and crystalline slates, covered with a variety of subsequent deposits. The peaks rise above the snow-line, from 10,640 ft. (Pssashka) to 12,427 ft. (Psysh); and the passes, which are few, are from 6250 to nearly 10,000 ft. high. The main ridge is accompanied in the N. by a parallel ridge, the Black Mts., 3000–6000 ft. high, with a deep valley between, and sends spurs and has short parallel ridges in SW. The **Central Caucasus,** from Elbruz to Kazbek, comes next, and may be subdivided into: (3) the **Alps of Svanetia;** (4) the **Alps of Digoria;** and (5) the **Alps of Ossetia** (the two former also described as the **Elbruz C.**). It contains the highest peaks of C., Elbruz (18,463 ft.), Dykh-tau (16,925 ft., Shkhara (17,036 ft.), Janga (16,569 ft.), Koshtantau (16,875 ft.), Kazbek (16,546 ft.), Mizhirgi-tau (16,273 ft.), Gistola, Tetnuld, Himarai-khokh, Ushba, Adai-khokh (15,244 ft.), and several others above 15,000 ft. The passes are from 9300 ft. (Mamisson) to 11,000 ft. high, and all above the snow-line, even though the main crystalline ridge of the Ossetian Alps is pierced by the Terek and its trib. Ardon, which both originate in high valleys on its southern slope. The narrow gorge of the Terek, which has pierced through the main ridge, and the pass over the Cross Mt. (Krestovaya Gora), 7957 ft. high, have been utilised for the military road, which is the only pass across the middle C. available for carriages, and leads from Vladikavkaz to Tiflis in Georgia. Spurs and parallel ridges give to the aggregate chain a width of 110 m., and no less than three parallel chains accompany the eastern part of this division in the N. Large high valleys and depressions are inclosed between these secondary ridges, of which some exceed by the height of their peaks the main water-parting. Immense glaciers originate in this part of the C., over 200 great glaciers being already known on the maps, and over 25 further E. in Daghestan, while traces of immense glaciers of the Glacial Period are being discovered by modern exploration. The crystalline rocks and slates disappear further E., where we have next (6) the **Khevzur Alps,** from the gorge of the Terek to the Borbalo Mt. (10,807 ft.), the highest peaks of which do not exceed 13,000 ft. (7) With the **Alazañ Alps** (or Daghestan C.), from Borbalo Mt. to the meridian of Nukha town, the character of the C. changes. A great chain, the Andi Mts., shoots NE., and the space between it, the Great C. and the Caspian, is filled up with the Daghestan plateau, so ravinated that the highlands between the rivers flowing NE. often appear as so many separate chains; immense 'depressions' and plateaux lie between them. The peaks of the main ridge have alts. of from 9500 to 11,375 ft., but the passes still remain at about 10,000 ft. high, while the Andi ridge attains a still greater height (Tebulos-mta, 14,781 ft.; Kachu, 14,027 ft.; Donos-mta, 13,736 ft.). In the next division (8) the **Samur Alps,** from Borbalo to Baba-dagh, the snow-clad peaks rise again over 12,000 ft. up to 14,720 ft. (Begyul, 12,172 ft.; Bazar-dyuz, 14,722 ft.; Thfandagh, 13,764 ft.; and several others above 12,000 ft.), and the very difficult passes lie from 11,000 to 12,000 ft. high, but the width of the ridge is less than 50 m. It rapidly lowers eastwards, and in (9) the **Caspian Chain,** or Shemakha C., the highest peaks gradually decline from 9000 to 5000 ft., the chain ending in low hills, volcanic about Shemakha. The broad and fertile valley of the Rion and the Kura separates the Great C. from the steep slopes of the Armenian plateau, which are often described as **Little Caucasus,** or Anti-Caucasus, but are better known as Transcaucasia.

Caucasus, General Lieutenancy of, or **Caucasia,** part of the Russian dominions in Asia, occupies the large isthmus between the Black Sea and the Caspian. A succession of elongated lakes and old river beds, which connects the Manych (l. bk. trib. of lower Don) with the lower Kuma (trib. of the Caspian), and is known as the Kuma-Manych depression, through which the Caspian communicated with the Black Sea in Post-tertiary times, bounds it in the N., and is considered as a natural boundary between Europe and Asia; the Black Sea in the W., the Caspian in the E., Asia Minor in SW., and

Persia in SE. are its other boundaries. The **natural divisions** of which this extensive terr. is composed are: (**1.**) **The prairies, high plains and steppes to the NE. of the Great C. ridge,** gently sloping from its high foothills to the Kuma-Manych depression (Stavropol and most of Kubañ and Terek provs.). These prairies, covered with a fertile black earth soil, have a dense Russian population along the courses of the main rivers, Kubañ, Yegorlyk (trib. of Don), and Terek and Kuma (tribs. of Caspian), gathered in big, chiefly Cossack, villages. Climate warm, but rather dry, the average temp. and rainfall being: Stavropol (1919 ft.), yr. 47° F., Jan. 24°, July 70°; rainfall, 29.8 in.: Pyatigorsk (1656 ft.), yr. 48° F., Jan. 24°, July 72°; rainfall, 21.3 in. Agriculture and extensive cattle breeding are the chief riches, corn being largely exported. Vine culture on lower levels. Towards the Caspian, large steppes, often stony and dry, peopled by Nogai Tatars and some Turcomanes. The chief towns, Stavropol (35,600 inhabitants), Vladikavkaz (44,210), Pyatigorsk (13,000), Kizlyar (6000), are not of great importance. (**2.**) **The Great C. ridge and the highlands of Daghestan,** thickly clothed with forests, and containing between its spurs and secondary ridges a number of large and small depressions or broad high valleys, inhabited by a variety of indigenous stems: Cherkesses (Adyghe), Abhazes, and Kabardians in West C.; Svanetes, Ossetes, Pshaves, Khevzures, in the middle; and the Mountaineers (*Gortsy*) in the E., who include a variety of stems, of which the Chechens and the Lezghines are the most numerous. They all live a hard life in their high valleys, utilising every patch of available land for cornfields or gardens, chiefly relying upon some cattle for living; while the Mountaineers carry on a variety of domestic trades. The narrow strip of land at the foot of the West C., along the Black Sea (Chernomorsk dist.), formerly inhabited by Cherkesses, who were driven after the Crimean War to Turkey, and there became mostly the *Bashi-buzuks*, is covered with thick forests; notwithstanding its luxurious vegetation and warm climate, this region, partly on account of prevailing fevers, and partly because of the difficulties of communication with the interior—the seaports having but open roadsteads—this region is but slowly re-peopled by the Russians. Chief town, Novorossiisk (14,600); chief ports, Anapa (10,600), Gagry, and Sukhum-kale (500 inhabitants). (**3.**) **The broad and fertile valley which separates the Great C. from the Anti-C.,** and in which the Rion flows W. into the Black Sea, and the Kura flows SE. into the Caspian—the two drainage areas being separated by the (3000–5000 ft.) high Meskes Mts. This is the richest part of C., thickly peopled, chiefly with Georgians (Svanetes, Imeretes, Gurians, and Mingrelians), in the drainage area of the Rion, and by Georgians proper and Armenians in its middle, while the much drier steppes eastwards are peopled chiefly with various Turko-Tatars, and partly by Russian Nonconformists. The drainage area of the Rion (govt. Kutais) is filled up with spurs of the Great C., the Meskes Mts., and the Wakhan ridge (10,000–11,000 ft.). It has extremely heavy rainfalls, and warm climate, the average temp. at Poti being (11 yrs.), yr. 58° F., Jan. 41°, July 74°; yearly rainfall, 61.9 in. Luxuriant vegetation; the hills clothed with fine forests, and the valleys covered with gardens. Maize, the mulberry, the vine, various cereals, and a variety of fruit-trees are cultivated. Poti (4710 inhabitants), an important seaport, is connected by rail with Batum, and is the head of a line of railway running through the Suram Pass along that valley to Tiflis and Baku. The eastern part of the same valley (govts. Tiflis, Elisabethpol, and Baku), enclosed between the woody slopes of the Great C. and the Anti-C., is equally thickly peopled in its upper parts, and equally well cultivated by the Georgians and the Armenians; but the climate is much drier (at Tiflis, 1343 ft., yearly temp. 55° F., Jan. 32.5°, July 77°; rainfall, 18.9 in.; Baku, yr. 59° F., Jan. 39°, July 80°; rainfall, 10.4 in.), and the steppes of the lower Kura (Mugañ) are chiefly suitable for cattle breeding only. The chief towns of C. are situated in this valley: Tiflis, its capital, has 145,730 inhabitants; Baku, 103,000; Elisabethpol, 20,300. (**4.**) **The highlands of Transcaucasia,** 375 m. long NW. to SE., and 160 m. wide, offer two distinct regions: the Armenian plateau (Kars, Erivañ, and part of Elisabethpol and Baku), and the highlands of Asia Minor, recently annexed from Turkey (Batum and Artvin divisions of Kutais). The Armenian plateau, bounded on the S. by the deep valley of Araxes, is 5000–6500 ft. high, mostly undulating, and covered with rich meadows and often cornfields. Dome-shaped mountains, mostly grouped in low ridges, intersect it, rising to 8000–9500 ft. above the sea, and occasionally to 11,000 ft. and more (Ala-ghöz, 13,436 ft.). A number of lakes occur on it, Gokcha being the largest (500 sq. m., alt. 6130 ft.). Granites and other unstratified rocks, covered with Azoic, Devonian, Carboniferous, Tertiary, and Glacial deposits. Volcanic rocks are widely spread about Erivañ and Alexandropol, the Alaghöz and the Ararats being huge trachytic masses. Cotton tree is grown in the low valleys, especially of Araxes; but on the plateau, where the winters are very severe, wheat and barley are the chief crops. The temperatures are: at Alexandropol (5100 ft.), yr. 41.5° F., Jan. 13°, July 17°, at Erivañ (3230 ft.), yr. 51° F., Jan. 16°, July 75°. The population is very mixed, and consists of Armenians, Tatars, Kurds, Turks, Turkomans, Greeks, and Russians. Of the chief towns, Erivañ, Nakhichevañ, Kars, and Alexandropol, only the last has over 20,000 inhabitants. The W. part of the Transcaucasian highlands is occupied by Alpine ridges—the Pontic ridge along the Black Sea coast, and the Arjar and Arsian ridges (10,000–11,000 ft.) further inland. The Chorokh and its trib. mountain streams water the region. The climate is hot in the coast region, and distinguished by very heavy rains (at Batum, yearly temp. 59° F., Jan. 43°, July 75°; rainfall (5 yrs.), 89.7 in., often attaining 10 in. in a single day. A luxuriant subtropical vegetation and rich gardens cover the mountain slopes; wet valleys and fevers. Rice, wheat, millet, tobacco, and all sorts of fruits are grown. Population chiefly Georgian; chief town, Batum (20,170 inhabitants). The district of Lenkorañ, on the slopes of the Azerbaijan plateau, which are turned towards the Caspian, is a special region, distinguished by a hot climate, very heavy rainfalls, and the culture of the mulberry tree, the cotton tree, and the vine tree. At Lenkorañ, which is 73 ft. below the sea-level, yearly temp. 59° F., Jan. 37°, July 78°, yearly rainfall, 48.1 in. The population of Caucasia belongs to a great number of different nationalities. The following is an approximate estimate given for a total population of 6,200,000 (which now must be about 8,200,000):—

	Thousands.		Thousands.
Russians	1,916	Western (Adyghe, Abkhazian, Kabards, &c.)	188
Poles	9	Eastern (Chechenes, Lezghines, &c.)	708
Germans	24	**Mountaineers**	896
Greeks	43	Tatars	1,028
Europeans	1,991	Turks	76
Ossetes	127	Turkomans, &c.	44
Persians, Tates, Talyshins	133	Northern Tatars	126
Kurds	10	**Turks and Tatars**	1,274
Armenians	804	**Jews**	51
Iranians	1,074	**Kalmuks**	11
Georgians	310		
Mingrelians	200	**Total**	6,200
Imeretes	373		
Pshaves, Khevzures	20		
Kartvelians	904		

According to more recent data (1886–90), the chief populations of Transcaucasia are:—

	Thousands.		Thousands.
Russians	140	Mingrelians	215
Greeks	57	Abhasians	29
Kurds	97	Svanetes	14
Ossetes	76	Samurzakans	27
Tates	125	Turkomans	10
Talyshins	88	Turks	76
Armenians	965	Tatars	1,107
Georgians	400	Jews	34
Imeretes	420		
Gurians	74	The remaining nationalities number less than 10,000 each.	
Ajares	59		

Much has lately been done for education in Caucasia, which now has 19 lyceums for over 6000 boys, and 16 lyceums for nearly 5000 girls, 5 teachers' schools, 10 professional schools, and over 1000 primary schools, besides 150 Armenian and nearly 2000 Musulman and Jewish schools. Agriculture in Caucasia becomes of great importance, N. Caucasia, with its yearly crop of over 15,000,000 quarters of cereals, being already a granary for Russia; while considerable amounts of wheat begin to be exported from Transcaucasia, which produces about 11,000,000 quarters of cereals, as well as cotton, tobacco, wine, and various plants for dyeing. The mining industry yearly acquires more importance. The naphtha industry is the most important, the yearly extraction having attained 4,490,000 tons in 1892 (2,676,000 in 1887), out of which only 25,000 tons in N. Caucasia. Copper is extracted in Elisabethpol (chief mine Kedabek), Tiflis, and Kutais; coal in Kubañ and Kutais (Tkvibuli); lead in Artvin; manganese in Kutais; sulphur in Daghestan; and salt in Erivañ, Kars, Baku, Stavropol, and Daghestan. Industries begin to develop, and they lately gave occupation to 40,300 workers in Transcaucasia, the yearly production being over £4,000,000. C. has a great number of mineral waters, those of Kislovodsk and Pyatigorsk being the best known. Some mineral springs are met with in Transcaucasia as well. For administrative subdivisions see **Russia.**

Caussade, tn., France, dep. Tarn et Garonne, 14 m. NE. Montauban. P. <3000.

Causses (Lat. *calx,* lime), a series of arid, calcareous plateaux, 2600 to 4000 ft. in height, on the W. declivities of the Cévennes, France, in the deps. of Lot, Lozère, Aveyron, Gard, and Hérault; bounded N. by the Lot, S. by the Lodève, E. mainly by the Tarnon, stretching W. to the valleys traversed by the railway from Béziers to Mende, and covering an area of nearly 2000 sq. m. Numerous streams which here take their rise have cut for themselves deep gorges, presenting, though on a small scale, many of the characteristic features of the American cañons, and dividing the plateau, originally continuous, into four great promontories or 'causses,' and these again into numerous smaller ones. Features in general similar to those of the Karst (*q.v.*); surface wild, weird, and mostly sterile; surface pits, here called *avens* (100 to 600 or 700 ft. deep), underground streams, and stalactite caverns numerous. The four principal C. in order from N. to S. are the Sauveterre, the Méjean, the Noir, and the Larzac. The Sauveterre, the least sterile, is separated from the Méjean by the gorge of the Tarn, which between Ispagnac and Le Rozier, a distance of 31 m., receives 30 subterranean streams, but not a single surface one. The Méjean, the most arid, most elevated of the C., is almost isolated by surrounding fissures; on the S. the Jonte (noted for its grottoes) separates it from the Noir, the smallest and most picturesque of the larger C. The Noir is separated from the Larzac by the valley of the Dourbie; on its S. frontier stands the 'dolomite city,' named Montpellier-le-Vieux, discovered in 1883, where the rocks, worn into forms resembling houses, castles, arches, and bridges, present the appearance of a great ruined city. The climate of the C. is rigorous; during eight months of the year winter of almost Arctic severity prevails, while during the short summer the heat is intense. See *The Roof of France,* by M. Betham-Edwards, 1889; *Les Cévennes et les Regions des C.,* by E. A. Martel, Paris, 1890. [**E. J. H.**]

Cauterets, formerly **Cauldrés,** vil., France, dep. Hautes-Pyrénées, arr. Argelès, 25 m. SSW. Tarbes, with 22 mineral springs varying in temperature from 102° to 142° Fahr., much frequented since the 16th century, when Marguerite of Navarre composed at C. part of her *Heptameron.* The village stands in a fertile basin 3250 ft. above the sea, and enclosed by rugged mountains. P. <2000.

Cautin, prov., Chile, on the coast, crossed by 39° S.; cap. Temuco.

Cautin, riv., Chile, flows W. into the Pacific through prov. C. Length, 199 m.; area of basin, 4890 sq. m; discharge, 6200 cubic ft. per second.

Caution, cape, Canada, Brit. Columbia, in 51° 9′ N., at entrance to Queen Charlotte Sound.

Cauto, the longest riv. in Cuba (E. end), flows W. into the Bay of Manzanillo in 20° 35′ N.

Cauveripuram. See **Káveripuram.**

Cauvery, riv., India, rises in Coorg, and flows through Mysore and Madras, forming on the borders of Mysore and Madras, some distance below Seringapatam, the beautiful falls and rapids which enclose the island of Sivasamúdram. In the plains it forms one of the largest of the Indian deltas, spreading over the whole of that part of the coast which runs due N. from Palk Strait. The northern arm of this delta is known as the Coleroon, the name of the Cauvery being given to that which pursues a nearly easterly course. With respect to navigation this river is of little value, any navigation there is being carried on in basket-work boats. Its deltaic irrigation system, now supplying more than 1,000,000 acres, is said to have been in operation for 1600 years, and, though improved in some respects by British engineers, the general plan remains the same as it has always been, and has served as a model for all the other Indian works of the kind. Height of source, 5000 ft.; total length, 415 m.; area of basin, 37,417 sq. m.; maximum discharge above the delta, 284,000 cubic ft. per second.

Cavan, the southernmost co. of Ulster, Ire., to the S. of Monaghan and Fermanagh, divided into the following baronies:—

Baronies.	Acres.	P. 1891.
Castlerahan	69,278	18,171
Clankee	64,381	16,235
Clanmahon	51,460	13,182
Loughtee, Lower	28,294	6,552
Loughtee, Upper	64,056	17,452
Tullygarvey	59,874	15,549
Tullyhaw	89,847	15,323
Tullyhunco	39,835	9,453
Total, Cavan	467,025	111,917

Surface elevated in the E. and W., everywhere under 500 ft. in the middle portion, which is traversed from S. to N. by the R. Erne, which enters Upper Lough Erne on the N. boundary of the county. This river forms approximately the dividing line between Silurian rocks in the E. and Carboniferous in the W., the latter, however, having no productive coalfield. Small lakes are numerous. There are several mineral springs, that at Swanlinbar being the most celebrated. The soil is light and poor, except along the banks of the rivers. For agriculture, see **Appendix,** pp. 10–12. The linen trade was at one time extensively carried on here, and there are still many bleaching-greens. A branch of the G. N. R. (Ire.) runs from N. to S. through the county E. of the Erne. The county returns two members to Parliament, one each for the E. and W. divs. Since 1851 the population has continued to decrease. See **Ireland,** table.

Cawnpur, or **Cawnpore,** a great mercantile tn. of modern growth, Brit. India, NW. Provs., dist. C., 43 m. SW. by W. Lucknow, on the r. bk. of the Ganges. It is purely a British creation, having been quite an unimportant place when it was first occupied as a British outpost, with the permission of the Nawáb of Oudh, in 1778. It has developed a large trade in grain and other agricultural produce, and since February 1888 its mercantile advantages have been increased through the opening of the railway to Jhánsi, by which it has been brought into direct communication with Bombay. Cawnpur is now, indeed, one of the most important railway centres in India, having direct railway communication SE. with Allahábád and the lower Ganges, NW. with Agra, Delhi, &c., NE. with Lucknow and other places in Oudh, and SW. with Bombay. The manufactures of the place are also characteristic of a large modern town. They do not consist of articles of luxury and refinement, such as are made in many an old capital of India, but of articles of everyday use, such as leather and cottons, produced on a large scale. The Memorial Gardens of Cawnpur commemorate the massacre of a number of English people, chiefly women and children, by the rebels in the mutiny of 1857. The dist., being on the whole well drained, is fairly healthy even during the rains. P. (1872) 122,800; (1881) 151,400; (1891) 163,800; Hindú, 123,800; Moham. 38,300; total, including cantonment, 188,700.

Cayapos, tribe of Indians, Brazil, on the banks of the upper Araguay and its tribs.

Cayarí. See **Madeira.**

Cayaru, vil., near the E. ct. of Brazil, Bahia, 56 m. SW. São Salvador.

Caycara, tn., Venezuela. See **Caicara.**

Cayenne, cap. and chief seapt. of French Guiana, on the

W. point of the island, and at the mouth of the small river C., in the Atlantic, in 4° 56′ 5″ N., 52° 20′ W. Has a wide and safe bay, an imperial court, botanic garden, penitentiary, and leper hospital. The island of C. is separated from the continent of South America by a narrow channel, and is 30 m. in circumference, with an extremely unhealthy, fever-inducing climate. Connected by telegraph with Demerara, and thus with Europe, in 1891. Mean temp. (7 yrs., 1846–52), yr. 80.3° F.; rainfall (10 yrs.), 129.12 in. P. (of tn.) 8000.

Cayes, Aux, Haiti. See **Aux Cayes.**

Cea, small tn., Spain, prov. and 32 m. ESE. León, on l. bk. of **C. Riv.,** which joins the Esla, 5 m. NE. Benavente (near 42° N.), after a SW. course of about 70 m. P. <2000.

Cea, comm., Spain, prov. Orense, dist. Carballino. P. 6900.

Ceander, Loch, lake, Scot., W. Aberdeenshire, 4½ m. ENE. Ballater.

Ceannacroe Forest, an upland tract, Scot., in the extreme W. of Inverness-shire, in 57° 9–11′ N.

Ceará (native name for 'a parrot'), one of the states of Brazil, with coast-line on N. (400 m.) stretching from about 37° to 41½° W., and reaching S. to 7½° S. Large plains near coast, and the valleys of Camocim, Acaraçu (NW.), and Jaguaribe-Banabiu (S. to NE.). Climate healthy, but state subject to droughts. Produces cotton, coffee (*da Serra*, Maranguapé), sugar, tobacco, wax (*Copernicia, Carnauba*), fruits, caoutchouc (from *Manihot, Hancornia*), cattle (on the fertile *Campos de Criação*), skins, wood. Principal ports are Fortaleza, Camocim, Aracaty. See **Brazil.**

Ceará, or **Fortaleza,** seapt., on the NE. ct. of Brazil, cap. prov. C., on the top of a cliff overlooking a small bay in 38° 30′ W., which serves as the harbour. A reef in the bay prevents vessels drawing more than 16 ft. from anchoring in the inner roadstead. The outer roadstead affords a depth of 28 ft. at high, 18 ft. at low water. Lighthouse, visible 12 m., on Mocuripe Point, E. of the bay. A rly. from the port ascends the cliff and proceeds S. to Maranguapé and Baturite. The name is that of a small river W. of the town, so called on account of its noise being likened to that made by a parrot. Mean rainfall (28 yrs.), 58.6 in. P. 30,000.

Ceará-Merim, vil., about 12 m. from the E. ct. of Brazil, in 5° 45′ S., prov. Rio Grande do Norte, 165 m. N. by W. Pernambuco. P. 4000.

Celebes (pron. sele'bes, but usually in English, se'le-bes), one of the Sunda Is., in the E. Indies, lies E. of Borneo, being separated from it by the Strait of Macassar; its N. shore is washed by the Celebes Sea, its E. by the Molucca Sea, and its S. by the Sunda or Flores Sea. It consists of four long penins., striking out E., NE., SE., and S. respectively from a central nucleus. The E. arm, called Menado (Manado) or Gorontalo, but Minahassa at its E. extremity, is separated from the NE. arm, known as Barante, by the Gulf of Gorontalo or Tomini; the NE. arm from that stretching SE. by the Gulf of Tolo, Tomori, or Tomaiki; and the SE. from the S. penin., named Macassar (Mangkasar), by the Gulf of Boni. The island is covered with luxuriant vegetation, and is one of the loveliest in the E. Indies. The coasts are low and sandy, the interior mountainous. Mountain ranges thread each of the penins., reaching 6600 ft. in Klabat and 6000 in Saputan, both in Menado; 10,000 ft. in Bonthain (Bantaeng) and Bobokaraeng in the S.; and 8500 ft. in Tokala, near the head of the Gulf of Tolo. Menado is volcanic and subject to frequent earthquakes; the rest of the island differs entirely, being a series of sandstones and limestones resting on crystalline rocks. Lake Posso in the centre, Tempe in Macassar, and Tondano in Minahassa; there is a famous waterfall in the river that issues from this last. The streams are all short, though numerous, the principal being Salang (250 m.) and Tienrana in Macassar, and Solo (150 m.) in the SE. penin. Owing to the mountainous contour and the maritime situation of C., its climate, although the island is crossed by the equator, is, except on the low moist coast-lands, comparatively temperate and unusually healthy. The thermometer ranges between maxima of 90° by day and 70° by night. Rainfall (8 yrs.) averages from 40 in. in Menado to 127 in. in Macassar. The fauna is peculiar; no large wild animals, but several peculiar species, *e.g.*, a black ape, the cuscus, *Anoa depressicornis* (forest ox, bovine deer), butterflies, chafers, &c.; and the babirussa, numerous birds (many peculiar species), the python, snakes, fish, tortoises, and crocodiles abound. The people cultivate sago, rice, maize, and fruits for food; and coffee (most excellent, chiefly in Minahassa and Macassar), nutmegs, sugar-cane, tobacco, cotton, and cocoanuts for the Dutch for export. Besides, the island yields guttapercha, gums, honey, pearls, tortoiseshell, tripang, edible birds' nests, bamboo, ratan, timber (sandalwood, ebony, teak), and a highly esteemed race of horses—all exported. Buffaloes, deer, cattle, swine, goats, and sheep are kept and bred. Gold is extracted in Menado; poor coal in Menado and on W. coast; salt in Macassar; iron in the E.; whilst copper, tin, and sulphur are known to exist. Trade centres almost wholly in the free harbours of Macassar, Menado, and Kema; is carried on principally with Batavia and Chinese ports; the exports being as above, the imports chiefly the textiles, pottery, manufactured wares, and drugs of Europe and China. The pop. of the interior are heathen aborigines, called Alfures, a Malay stock strongly influenced by Papuan blood; they probably number 250,000. The ruling race are the Malay tribes of Buginese and Macassars, civilised and Mohammedans, except in Minahassa, where they have been mostly converted to Christianity; they are enterprising traders and bold navigators, and constitute three-fourths of the total pop. Another race is the Bajos or Sea-Gipsies, a Malayo-Papuan tribe, who live entirely in boats and follow the sea. There are also some 7000 Chinese, petty traders and merchants. P. 1,000,000 to 1,500,000 in all. The Portuguese established themselves in Macassar in 1525; the Dutch planted factories on the island in 1660, and since the early part of the 19th century have been the ruling nation, governing a number of vassal and (so-called) allied native states—Boni, Wajo, Kajeli (Palos), &c. Area, including several small islands, 72,000 sq. m., equal to eight-ninths of Great Britain. Administratively, C. is divided between three different residencies—(1) Menado, embracing Menado proper, the shores of the Gulf of Tomini, and the Sangir and Talaut archipelagoes, with a total area of 46,000 sq. m., and P. 530,000, cap. Menado; (2) C., consisting of Macassar, the W. coast, centre, most of the SE. penin., and the islands of Saleyer, Buton, Mina, Sumbava, and the W. half of Flores, 27,000 sq. m., and P. 865,000, cap. Macassar; (3) the shores of the Gulf of Tolo, with an area of 11,000 sq. m., and P. 70,000, belongs to Ternate. On the inland lakes of C.; see *Petermann's Mitteil.*, 1893, pp. 225, &c. **[J. T. Central India is the name officially given to a collection of native states under the supervision of an agent-general resident at Indore, and comprising eight sub-agencies. They lie to the S. of Rájputána and the NW. Provs., and are divided into two groups by a narrow tract belonging to the NW. Provs., stretching southwards. The E. group is part of a larger district, once known by the name of Bundelkhand (Bundelcund), but now divided into the Bundelkhand Agency in the W. and the Bághelkhand Agency in the E. This latter agency is made up chiefly of the native state of Rewá on both sides of the Son (Soane). The western group is bounded on the S. for a considerable distance by the Narbadá (Nerbudda), but in the SW. advances beyond that river, and in places even beyond the crest of the Sátpura Hills. This group is made up chiefly of scattered districts belonging to the native states of Gwalior, the largest separate portion of which is in the N.; Bhopál, the largest portion of which is in the SE.; and Indore, the fragments of which are all in the W. and SW. Almost the whole area belongs to the Indian tableland [**India**], but the N. of Gwalior is included in the plains of the Jumna basin. The most elevated tract is the plateau of Málwá, which is bounded on the S. by the Vindhya range overlooking the valley of the Narbadá. Being covered to a large extent with black cotton-soil [**India,** geology], this plateau is fertile, and not much in need of irrigation; it is indeed the richest part of the Central India Agency. The slopes of the Vindhyas, as well as the Sátpura Hills to the S. of the Narbadá, are forest-clad. A large part of the terr. belonging to the eastern group of states is composed of rugged and far from fertile country; but on the tableland N. of the Kaimur (Kymore range), which overlooks the valley on the Son of the N., and forms a continuation of the Vindhya range, there are numerous saucer-shaped depressions, each several miles in diameter, filled with a rich soil. The Narbadá is the only river which has considerable stretches of navigable water within the area of these states, and that only in the rainy season. The principal rivers in the N. are the Chambal, Betwá, and Ken, tributaries of the Jumna (*q.v.*) [**Ganges**], and the Son, tributary of the Ganges. **Climate.**—Although the greater part of the Agency lies N. of the tropic of Cancer, the heat in summer is very great, and, in the N. and less elevated parts, the climate is very unhealthy during the rainy season, which lasts from June to September; malarial fevers then prevail. The Málwá region enjoys a more equable climate. The maximum summer temp. at many stations exceeds 110° F., while during the cool season the mercury occasionally falls below freezing-point. The rainfall is least in the N. (less than 30 in.), increasing S. and SW. to between 40 and 50 in., and in the E. to over 50 in. [**Indore, Jhánsi, Nimach**]. The principal **irrigation** works are tanks [**India,** irrigation]. **Famine** is more frequent in the W. than in the E. group of states. In 1837–38 the NW. portion was visited by a severe famine; in 1868–69 famine was intense in the whole of the NW., and severe throughout the rest of the Agency; in 1876–78 a slight famine was experienced in the NW. (Chambal basin). Among special **crops** are opium, on the Málwá plateau generally, and excellent tobacco (reputed to be the best in India), grown around Bhílsá, in the E. of that plateau; rice is also grown. Among **minerals** are coal, in Rewá, worked in the Umaria district, now connected by rail with Allahábád and SE. with the Bengal-Nágpur Rly.; diamonds in the Bundelkhand Agency, NE. of Panna; and iron ore, worked by native methods, in many places. Three **railways,** connecting the railway systems of southern and northern India, cross these states. One of them (the easternmost) is the main line connecting Bombay with Allahábád (standard gauge); the next to the W., also standard gauge, that which ascends the Vindhya Mts. at the Bhopál Ghát, and proceeds first to Bhopál, then to Jhánsi (*q.v.*) in Gwalior, the centre of the Indian Midland system; the westernmost, a metre-gauge railway, which, after climbing the Vindhyas with steep gradients, proceeds by Mhau (Mhow), Indore, Ratlám (Rutlam), and Nímach (Neemuch) to Ajmere. The **languages** belong chiefly to the Aryan group, predominant among which is that of the Maráthás (*q.v.*), who form the ruling class; but there are many others. Of the 'aboriginal' tribes [**India**], the principal are the Gonds (*q.v.*), inhabiting the Gondwáná tract; the Bhíls (*q.v.*) in the forest-covered hills of the SW., and the Kols in Panna (*q.v.*) [**India**]. The bulk of the people are Hindus in religion; Mohammedans form a small minority; of the remainder, Jains are the most numerous [**India,** table]. The principal **towns** are Indore, the political centre, Gwalior, Ujjain, and Bhílsá in Gwalior, Panna, and Rewá.

Central Park, settlement, U.S., Montana, Gallatin co., 60 m. E. by S. Butte City.

Central Provinces.—These comprise a territory mainly under British administration, but embracing also a considerable area of native states, to the S. of the native states of Central India Agency and Bengal. The middle course of the Narbadá forms a large part of the N. boundary of the provinces, and the Wardhá, Pranhíta, and Godávari form together the greater part of the SW. boundary, separating these provs. from Berar and Haidarábád (Hyderabad). It is divided into divs. and dists.

as shown in the following table, in which the population is given in thousands:—

Provinces.	Area in sq. m.	Pop. 1872.	Pop. 1881.	Pop. 1891.	Inc. '81-'91.	Pop. per sq. m. 1891.

[1] According to the census of 1881.
[2] According to the census of 1891.

This territory contains the head-waters of some of the principal rivers of the tableland, including the Narbadá, the Taptí, the Mahánadi, and the Wardhá and Waingangá, belonging to the basin of the Godávari. It contains also the greater part of the course of the Indrávati, the principal trib. of the Godávari flowing from the W. The rivers are little navigable except after the rains, and the channels are obstructed by rocks. The regions containing the head-waters of the Wardhá and Waingangá, and the plains of Chhattísgarh (Chutteesgurh), traversed by those of the Mahánadi, include most of the area less than 1000 ft. above sea-level, and the most considerable tracts of fertile soil. In the higher region, to the N. of the Wardhá-Waingangá lowlands, there are other large tracts, especially in the valley of the Narbadá, well adapted for cultivation; but the highlands on the W., and still more those on the E. and S. of the Chhatísgarh plains, are rugged tracts, with a very sparse population. It is in these latter tracts that the principal native states are situated. The **climate** is for the most part hot and dry, though modified by elevation. In the Nágpur region it approximates to that of Calcutta [**Nágpur**]; in the northern provs. [**Jabalpur, Sagar**] the range of temperature is much greater, while in the Sátpura plateau [**Pachmarhí, Seoní**] the climate is slightly cooler. The rainfall is considerable, about 50 in. or over, but owing to the character of the surface the moisture quickly disappears [**Chhatisgarh**]. The rainy season lasts from June to September. **Irrigation** is supplied mainly by tanks; there are no irrigation canals. The only **famine** in the C. P., during the present century, occurred in 1868–9, when a great part of the Chhatísgarh district suffered severely. Less than one-third of the area of the provs. is under cultivation; a somewhat larger area is stated to be capable of cultivation, though not cultivated; and a still larger area is described as waste land. Of the area not under cultivation, only a small portion is now covered with forests, the jungle areas consisting mainly of low scrub yielding little useful timber. Among the **crops** of the provs. wheat is one of great importance; cotton is very extensively grown in the valleys of the Wardhá and Waingangá, the Taptí and the Narbadá, and a few other regions. Nágpur is noted for its oranges. The chief **minerals** are coal, obtained chiefly at Warorá, and iron ore of excellent quality, for which the Chándá district is especially noted. Cotton weaving and working in iron are the principal **manufactures**. The provs. are now traversed from side to side by two important standard-gauge railways, one the railway from Bombay by Jabalpur to Allahábád, the other that from Bombay by Nágpur to Calcutta. The latter traverses the plains of Chhattísgarh, a region well adapted for the cultivation of wheat, hitherto sparsely peopled on account of its isolation, first partly opened up by the establishment of railway connection with Bombay, and now brought into communication with the much nearer market of Calcutta by the opening of the Bengal-Nágpur Railway (March 1891). The construction of roads designed as feeders to the great railway systems is being actively prosecuted. The principal towns are Nágpur, the seat of administration, Jabalpur, Kamptí, Ságar, Burhánpur, Wardhá, Hingangnát, Warorá, Chándá, Ráipur, Biláspur, Sambalpur. Aryan **languages** now predominate, including the Maráthí, spoken chiefly in the SW., and the Uriyah in the S. of Chhatísgarh, besides several others. Of the 'aboriginal' tribes [**India**] the most numerous are the Gonds, who at one time were the dominant race throughout the greater part of the area now belonging to the C. P.; they occupy the hilly region S. of the Narbadá, and parts of the centre and S. In Bastár the hill tribes, of whom the Máriás are the chief, form three-fifths of the population. Rather more than three-fourths of the population are Hindus; there are many other religions, of which those having the greatest number of adherents are Kabírpanthís, Satnámís, and Mohammedans. In the 16th century, Gondwáná, though owning allegiance to the Emperor of Delhi, was practically independent, and enjoyed a great degree of prosperity. In the 17th century the Gonds fell under the Maráthá power, which soon became oppressive. In 1818 England annexed the terrs. of Ságar and Narbadá; other terrs. were subsequently added, and in 1861 these, with the Nágpur prov., were formed into the C. P. The dist. of Nimár, and the state of Bijeraghogarh, were added in the following years.

Centre, co., U.S., Pennsylvania, crossed by 78° W. and 41° N., partly bounded on the NW. by the W. branch of the Susquehanna.

Centre, Canal du, canal, France, dep. Saône-et-Loire, connecting the Loire and the Saône, from Digoin on the Loire, where it communicates both with the river and its lateral canal, to Châlon on the Saône; with 84 locks, 75 m. long; greatest alt. 990 ft.; constructed 1781–93.

Ceuta (corrupted from the Arabic *Sebta*, 'seven,' the Roman *Septem fratres*, 'seven brothers,' referring to seven adjacent mountains), Spanish fort and seapt., on a small penin. in the N. of Morocco, jutting E. into the Mediterranean at the entrance to the Strait of Gibraltar. The castle occupies the highest point of a mountain (the ancient *Abyla*, and one of the Pillars of Hercules), at the extremity of a penin. It is well supplied with water. C. is the chief of the Spanish *presidios* on the African coast. It was taken from the Moors by John, King of Portugal, in 1415, and has permanently belonged to Spain since 1640. P. 10,700.

Ceva, comm., Italy, Piedmont, prov. and 23 m. E. Cuneo. P. 5000.

Cevennes (from the Celtic root found in the Welsh *Cevn* or *Cefn*, 'a ridge'), the name of an important mountain range in the SE. of France. The name is variously applied. Sometimes it is used to designate the whole series of ranges extending from the Passage of Naurouse (625 ft.) between the foothills of the Pyrenees and those of the Central Plateau, and the depression through which the Canal du Centre passes, at the height of 995 ft., to the S. of the Côte d'Or, a total length of 330 m., along most of which the mountains form the SE. border of the Central Plateau. Sometimes the name is confined to the S. section of this series terminating at the gorge of the Chassezac, a r. bk. trib. of the Ardèche, immediately to the N. of the Montagne de Lozère (5580 ft.), in the S. of dep. Lozère. In the most restricted sense it is applied only to the mountains to the E. of the plateaux of the Causses, beginning with that of Lozère in the N., and ending in the S. with those round the massive of Aigoual (5140 ft.) on the S. border of dep. Lozère, at the head of the valley of the Gard. In the northern div. of the C., in the widest acceptation of the name, the subordinate ranges in the order from N. to S. are the Monts du Charollais (2540 ft.), Monts du Beaujolais (3320 ft.), Monts du Lyonnais, and the Monts du Vivarais, the last containing the culminating peak of this section, the Mont Mézenc (5755 ft.). In the S. div., the subordinate members in the same order are the C. Proper (the C. in the most restricted sense), the Garrigues, and the Monts de l'Espinousse. The whole series in the widest sense is mainly composed of metamorphic and granitic rocks, with volcanic rocks in places. In the S. div. the higher slopes are for the most part bare of vegetation, only the lower slopes being clothed with forests or presenting extensive cultivated tracts. The C. Proper are crossed in the N.E. by the railway from Nîmes by Alais to the valley of the Allier and Clermont. The C. served as a retreat for numerous Protestant families after the revocation of the Edict of Nantes.

Cévennes, old dist., France, which formed the NE. part of the govt. of Languedoc, cap. Mende. It was divided into Gévaudan, Velay, Vivarais, and C. Proper. The C. Proper is now included partly in the dep. Garde, and partly in Aveyron.

Ceylon (*Sinhala*, 'the land of the lion'), the *Taprobane* of the ancients, and the *Lanka-dwipa* ('shining island') of the Hindus, lies S. of India, with which it is almost connected by Adam's Bridge (*q.v.*), between 5° 55′ and 9° 51′ N., and between 79° 41′ and 81° 55′ E. The island is divided for administrative purposes into the following nine provs., which are subdivided into twenty-two districts—Northern, North-Western, North-Central, Western, Central, Eastern, Southern, Uva, and Sabaragamuwa. Its length, from Dondra Head in the S. to Palmyra Point in the N., is 266 m., with an area less than one-third that of Great Britain. It consists of a core of mountains surrounded by a plain, but the mountains are confined to the southern half of the island, and in that half leave only a narrow strip of plain, in some places hardly any, between them and the sea. The highest summit is Pedrotallagalla (8300 ft.), near the middle of the mountainous core; but Adam's Peak, though nearly a thousand feet lower, is much better known on account of its conspicuous position on the SW. of the mts. The chief river is the Mahavilla Ganga, which flows north-eastwards, and enters the sea by several mouths, partly in Trincomali Bay, partly to the S. of that bay. It is navigable for small boats to near Kandy. As regards **geological** structure, crystalline rocks predominate, with marine deposits, most extensive in the W., along the coasts. The **climate** [**Colombo, Newara Eliya, Kandy, Trinkomali**] is warm and very uniform; unhealthy on the coasts, but fine in the hilly parts of the interior; in the SW., which gets the rain from both monsoons, it is also very humid; the NE. and SE. coasts receive little rain, and irrigation is consequently required there. The northern region contains the remains of gigantic reservoirs constructed for this purpose by the natives in former times. **Vegetation** is most luxuriant in the W., S., and Central provs. On the plains and lower hills are extensive plantations of coco, areca, palmyra, and other palms, and rice-fields; higher up, in some places to 6000 ft., are European plantations of tea, coffee, and cinchona. Coffee was formerly the staple culture, but owing to the various diseases which attacked the trees, it has been widely replaced by tea, the area under which is about 250,000 acres, or more than six times that under coffee. The latter is now mainly cultivated in the Central provs. and in Uva. Tea is most extensively grown in the Central prov., though there are also large plantations in other provs.; the production of cinchona (grown mainly in Uva) has greatly increased, C. now furnishing the chief supply to Europe. Other important products are cinnamon, chiefly in the W. prov., cacao in the Central, tobacco in the Northern, cardamoms, areca-nuts, and rice; the coco-nut is widely cultivated, and much of its produce is consumed in the island; the palmyra palm, besides being a food-tree, has recently given rise to a new industry in the N. of C., about Jaffna, the stiff fibres of the sheathing leaves being prepared as a substitute for bristles. The **pearl-fisheries** of the N. coast are an important source of revenue. The island has many **minerals,** but at present a very pure graphite (containing more than 90 per cent. of carbon) is the only one of commercial importance, besides talc, which is now being developed. The chief **exports** of the island are the products of the European plantations, besides those of the coco-palm (oil, copra, and coir), graphite, cinnamon, and areca-nuts. The amount of tea exported in 1883 was under 2,000,000 lbs.; in 1887 it had risen to over 13,000,000 lbs., and in 1890 to over 45,000,000 lbs. Elephants are exported, chiefly to Southern India. The chief **imports** are rice (from

Brit. India, including Burma), cotton manufactures, and coal. The majority of the **inhabitants** are Sinhalese, a gentle people, Buddhists in religion. The local trade is mostly in the hands of so-called Moors, Mohammedan immigrants. In some parts of the mountain jungles there dwell two or three thousand survivors of a very uncivilised race, known as the Veddahs. The labourers on the European plantations are mainly Tamil-speaking immigrants from southern India, most of whom come only for the season, though some of them have formed permanent settlements for themselves on the dreary eastern coast. The northern plains are also very scantily peopled, the great mass of the population being contained in the West, South, and Central Provs. The principal towns are Colombo, the cap. and chief seaport; Galle, Trinkomali, Kalutara, and Jaffna, also seaports; and Kandy, Peridenіya, and Newara Eliya, inland. In the N. are the ruins of Anuradhapura (*q.v.*). There are several short lines of railway; the longest is that which ascends from Colombo to Kandy. C. was once a Dutch possession, but was taken by the British in 1795. At first annexed to Madras, it was made a separate colony in 1801. Area, 25,365 sq. m. P. (1850) 1,576,000; (1861) 1,893,000; (1871) 2,406,000; (1881) 2,764,000; (1891) 3,008,000. P. per sq. m. (1891) 119. Increase per cent. per annum (1850–61), 2.06; (1861–71) 2.43; (1871–81) 1.40; (1881–91) 0.85.

Cézambre, or **Césembre,** small isl., off the N. ct. of Brittany, France, NW. of St. Malo; two forts.

Cèze, riv., France, dep. Gard, rises in the Cevennes Mts., dep. Lozère, and after an ESE. course of about 50 m. joins the Rhone 6 m. W. Orange. Its sands are auriferous.

Chaco, govt. of Argentine Republic, extending about 5° W. from the rivers Paraná and Paraguay, N. of 28° N., and separated from the govt. of Formosa on the N. by the Rios Bermejo and Teuco to about 62° 10′ W. See **Argentine Republic** and **Gran Chaco, El.**

Chacombe, par., Northamptonshire. See **Chalcombe.**

Chad, Tchad, or **Tsad,** lake, central Sudan, between about 12° 20′–14° 30′ N. and 11–14½° E., occupying the bottom of an immense depression as yet little known in its southern part; a vast shallow sheet of water, varying in size with the volume of the rivers by which it is fed (principally the Waube or Yeu on the W., the Shari on the S.); bordered on the NW. by a range of dunes at high-water level; the remainder of the circumference, particularly the E. side, is without any marked line of separation from the surrounding plain. No permanent outlet, yet water perfectly fresh, probably owing to the fact that in time of high water the surplus is drained NE. by the Bahr-el-Ghazal into the Bodele and there evaporates. The E. portion in particular is very shallow, and strewn with innumerable archipelagos of isles and islets. The area covered occasionally reaches 19,300 sq. m., but in times of drought not more than 4200 sq. m. Nachtigal gives the mean area as 10,400 sq. m. See G. Nachtigal, 'Journey to Lake Chad and Neighbouring Regions,' *Jour. R. G. S.*, 1876, pp. 396–411.

Champion, vil., U.S., Michigan, co. and 28 m. W. Marquette, Alt. 1597 ft. (R.R.); alt., C. Mine, 1715 ft. (R.R.). P. <1500.

Champion Bay, the bay on which Geraldton, W. Australia, stands, 28° 46′ S.

Champion Hill, former stn. near London, on L. B. & S. C. R., now called E. Dulwich.

Champlain, vil., Canada, Quebec, Champlain co., on the l. bk. of the St. Laurence, 62 m. WSW. Quebec. P. <1500.

Champlain, co., Canada, Quebec, stretching NW. from the St. Lawrence, traversed and partly bounded on the W. by the lower part of the R. St. Maurice.

Champlain, Lake, named after Champlain, the French coloniser of Canada, U.S., between the states of New York and Vermont, extending 4 m. into Quebec prov., is 125 m. in length, N. to S., breadth varying from ½ m. to 10 m., greatest depth about 280 ft. It contains numerous islands; receives several rivers, and is drained N. by the navigable Richelieu R. into the St. Lawrence. C. Lake is remarkable for its beautiful and picturesque scenery, and is an important medium of commerce, being connected with the Hudson R. by the C. Canal (constructed 1818–23), which the U.S. government is now proposing to convert into a ship canal. Alt. 93 ft.; area, 595 sq. m.

Champlain, vil., U.S., New York, Clinton co., 36 m. NNW. Burlington (Vt.). P. <1500.

Champlitte, tn., France, dep. Haute-Saône, arr. Gray, on the Saulon, 30 m. NE. Dijon. P. <3000.

Champoton, tn., Mexico, 35 m. SSW. Campêche, on the W. ct. of the State of Campêche, in about 19° 20′ N.

Champsaur, dist., France, in the old prov. of Dauphiné, in the basin of the Upper Drac; principal place, St. Bonnet; now comprised in deps. Hautes-Alpes and Drôme.

Champsecret, tn., France, dep. Orne, arr. and near Domfront, with iron-works. P. <2000.

Chamúndibetta, precipitous hill, India, state, dist., and 2 m. SE. of the fort of Mysore. Alt. 3489 ft.

Chamusca, tn., Portugal, prov. Estremadura, on the l. bk. of the Tagus, 13 m. NNE. Santarem. P. 3000.

Chamu-to, tn., China. See **Chamdo.**

Chan, Chinese, 'courier station.'

Chanac, tn., France, dep. Lozère, on the Lot, 64 m. NNW. Montpellier, 8 m. WSW. Mende. P. <2000.

Chanak-Kalessia. See **Kale-i-Sultaniye.**

Chanár, fortress and ancient tn., Brit. India, NW. Provs., on the r. bk. of the Ganges, dist. and 20 m. E. Mírzápur, built upon a sandstone rock which supplied the material of which Benares is built. C. was a favourite residence of Warren Hastings; is now a place of confinement for State prisoners. P. 11,400; Hindus, 8500; Moham. 2800.

Chañaral, dep., Chile. See **Atacama.**

Chañaral Island, isl., S. America, Chile, off the W. ct., in about 29° 5′ S.

Chañaral de las Animas, tn., S. America, Chile, prov. Atacama, on the W. ct., about 75 m. NNW. Copiapo, in 26° 23′ S. It is 48 m. from Caldera, and excepting Caldera the most important port in the prov., with several rich copper-mines near. Water is obtained by condensation from salt water, and is a regular article of traffic. Railways have been made to Las Animas and Salado, with branches to some of the mines. P. <3000.

Chañarcillo, silver-mining dist., Chile, prov. Atacama, dep. Copiapo. P. 6000.

Chancay, tn., S. America, Peru, dep. Lima, on the W. ct., 35 m. N. by W. Lima, in about 11° 33′ S. P. <3000.

Chancelade, comm., France, dep. Dordogne, on the island, 3 m. WNW. Périgueux. P. <2000.

Chancellorsville, vil., U.S., Virginia, co. Spottsylvania, 76 m. NW. Richmond. P. <1500.

Chanchamayo, riv., Peru, rises near Oroya and flows NE. till it unites with the Paucartambo to form the Perene, one of the rivs. of the Ucayali (Amazon) basin. A road is now being made down its valley from Oroya to the navigable water of the Amazon basin.

Chancharskiy, vil., Russian Central Asia, govt. and 67 m. WNW. Akmolinsk. P. <2000.

Chanchengmo, or **Changchemmo,** dist., in the W. of Tibet, adjoining Ladakh.

Chanco, ct. vil., Chile, Maule, in 35° 40′ S.

Chanctonbury Ring, hill, with an ancient camp, Sussex, about 9 m. E. by N. Arundel, 2 m. NW. Steyning. Alt. 780 ft.

Chancy, tn., U.S., Iowa, co. and tp. Clinton. P. <1500.

Chándá, tn., Brit. India, Central Provs., cap. dist. C., 85 m. S. Nágpur, about 6 m. from the l. bk. of the Wardhá, surrounded by a continuous wall of cut stone, 5½ m. in circuit, and amid charming scenery. A great fair begins in April and lasts three weeks. From the middle of September to the end of November malarious fever prevails in the dist. Cholera, dysentery, diarrhœa, and smallpox are frequent. P. 16,200; Hindus, 14,600.

Chandarlü, ct. tn., in the W. of Asia Minor, on the N. side of **C. Bay,** 37 m. NNW. Smyrna.

Chandarnagar, popularly **Chandernagore** (which is also the French spelling), correctly Chandan-nagar, 'City of Sandalwood,' French settlement, Brit. India, Bengal, 20 m. N. Fort William, Calcutta, dist. and on the r. bk. of the Húglí, which now does not allow of vessels of more than 10 ft. draught ascending so high; occupied by the French in 1673, and acquired in 1688; in the time of Dupleix (1731–41) said to have had a pop. of 100,000. In 1757 C. was held by the British, but restored to the French in 1763; retaken in 1794 by the British, restored 1802, and finally in 1816 assigned by treaty to the French. At present a quiet suburban town. P. (1814) 41,400; (1871) 23,300; (1891) 24,300.

Chan-i-chou, tn., China, Yünnan, 78 m. E. by N. Yünnan-fu.

Chanidigote, tn., India, Baháwalpur, 82 m. SSW. Múltán.

Chanjur (Dutch spelling **Tjandjœr**), tn., Java, 25 m. SE. Buitenzorg.

Chankánal, tn., Ceylon, Jaffna dist., Valikâmam W. div. P. 5600.

Channagiri, vil., India, Mysore, 110 m. NE. Mangalore. P. (1881) <5000.

Channapata and Sukravárpet, tn., India, Mysore, 31 m. SW. by W. Bangalore. P. (joint, 1881) 7100.

Channel, or **Port-au-Basques,** port of entry, Newfoundland, near SW. end, 300 m. W. St. John's, with fisheries, in 47° 34′ N., 59° 7′ W. Mean temp., yr. 38.5° F., Feb. 19.6°, Aug. 58.8°. P. <1500.

Channel Islands, a name employed to designate a group of islands in the English Channel, off the NW. coast of France, the principal being Jersey, Guernsey, Alderney, Sark or Sercq, and Herm. They are officially comprised in the English county of Hants and diocese of Winchester, and are the only portions of Normandy now belonging to the English crown, to which they have remained attached ever since the Conquest. Jersey and Guernsey (in the latter case together with Alderney, Sark, Herm, and smaller adjacent islands) each have a separate legislature, and at the head of the administration a lieutenant-governor appointed by the crown. See the articles on the separate islands.

Channelkirk, par., Scot., Berwickshire, 5½ m. NW. by N. Lauder, 4½ m. NE. Fountainhall stn.; 14,191 ac. P. <750.

Channon Rock, P.O., Ire., co. and 2 m. from Louth.

Channu, tn., Brit. India, Punjab, dist. and 55 m. E. by N. Múltán. P. <5000.

Chanonry Point, cape, Scot., Ross-shire, at the W. of the entrance to Inner Moray Firth, in 57° 34′ N., with a lighthouse.

Chánsama, tn., India, Bombay Presidency, Gujarát, in the terr. of the Gáekwár of Baroda, in 23° 43′ N., 72° 15′ E. P. (1881) 7500.

Chantabun, or **Chantaburi,** tn., Siam. See **Chentabun.**

Chantada, comm., Spain, Galicia, prov. Lugo, 44 m. ESE. Santiago. P. 14,700.

Chantakam, tn., Siam, 72 m. ENE. Bangkok.

Chantapilli, or **Santapilli,** vil., Brit. India, Madras, dist. Vizagapatam, on the E. ct., 38 m. NE. Vizagapatam, with lighthouse, visible 14 m.

Chantenay, tn., France, dep. Loire-Inférieure, on the r. bk. of the Loire, arr. and 2 m. WSW. Nantes. P. 12,700.

Chantibund, tn., Siam. See **Chentabun.**

Chardinga, vil., Persia, prov. Khuzistan, limit of navigation on the Shateit arm of the Karun R., 18 m. by river (11 m. by land) below Shushter. *Proc. R. G. S.*, 1891, p. 595.

Chardstock, par. and vil., Eng., Dorsetshire, W. div., 7½ m. N. by W. Lyme Regis, 2 m. W. Chard Junc. stn., P.O.; 5362 ac. P.<1500.

Chardwár, fiscal div., Brit. India, Assam, in Darrang dist.; in the N., at the base of the Himálayas, the C. forest reserve includes an experimental plantation of caoutchouc trees (*Ficus elastica*). Area, 1120 sq. m.

Charente, dep. France, formed of the old prov. of Angoumois, with strips off the provs. of Limousin, Poitou, Saintonge, and Périgord, three-quarters of its area made up of the upper basin of C. river; divided into 5 arrs., Angoulême, the cap., Barbezieux, Cognac, Confolens, and Ruffec. It is physically divided into two regions, unequal in size and opposite in character. In the NE. dist. of Confolens, the basin of the Vienne, which here receives the Goire and Issoire, the clayey soil rests upon rocks of granite and schist, with numerous heights abounding in precipices and pools; the other region, much more extensive, is of calcareous rocks, in the S. even chalky, with a light and warm soil. In the SE. the dep. is bounded by the Dronne, r. bk. trib. of the Gironde, a clear river abundant in water throughout the year. Principal minerals, granite, limestone, iron and gypsum, manufactures paper (Angoulême), felt, wool and cotton goods, and has a national cannon foundry established at Ruelle in 1755. Area, 2306 sq. m. P. 360,300. See **France,** table.

Charente, riv., W. France, rises in the dep. Haute-Vienne, 14 m. NW. Chalus, flows W. through the deps. C. and C.-Inférieure, enters the Atlantic opposite the I. of Oléron. Affluents, the Boutonne on the r. bk., and the Trouve and Né on the l. bk. Discharge at low water, 1412 cubic ft. per second. Navigable from Angoulême to the sea, 104 m., and occasionally from the port of Lys (at the confluence of the Né); for vessels of 600 tons to Tonnay-Charente, 4 m. below which is the military port of Rochefort. The tide is observable as far as Saintes. Area of basin, 4054 sq. m.; length, 224 m.

Charente Inférieure, dep., on SW. ct. of France, composed of almost the whole of the old prov. of Aunis (arrs. Rochelle and Rochefort), the main part of Saintonge, a small portion of Poitou, and part of Angoumois; divided into six arrs., La Rochelle, the cap., St. Jean d'Angély, Jonsac, Marennes, Rochefort-sur-Mer, and Saintes. Off the coast lie the two islands Ré and Oléron,

the largest French islands, Corsica excepted; coast line 109 m. The dep., which is devoid of mountains, consists in its centre of the fertile and picturesque valley of the C. In the S., the valley of the Seugne terminates in the plateau of Double, covered with scanty heath, sparse pine-woods, and marshy dales, and extending to the charming valley of the Dronne. To the NW. this region merges into the hills of Jonsac, which in turn give place to an arid dist. almost destitute of streams. To the W. of Mirambeau lies Le Marais, an alluvial tract deposited by the Gironde, soil fertile, climate insalubrious. Along the whole length of the coast and the borders of the chief rivers, marshy dists. known as Les Marais occur, which are gradually being rendered less unhealthy. Four parallel river-basins succeed each other from the N. to S. of the dep., those of the Sèvre Niortaise, Charente, Seudre, and Gironde, which last bounds the dep. on the SW. for a distance of 22 m. The principal industries, apart from agriculture, are the distillation of brandy named from Cognac, the working of the salt marshes, and sea-fishery. La Rochelle and Rochefort are the principal ports. Area, 2792 sq. m. P. 456,200. See **France,** table.

Charenton le Pont, tn., France, dep. Seine, arr. Sceaux, at confluence of Seine and Marne, 3½ m. SE. by E. Notre Dame, Paris, 1 m. from the city wall. A bridge across the Marne, which has been frequently the scene of conflicts for the military possession of the cap., is now guarded by two forts forming part of the fortifications of Paris; the bridge unites this village with the hamlet **C. St. Maurice,** where there is a national lunatic asylum. P. 14,500.

Charleston, tn., U.S., Missouri, co. Mississippi. P.<1500.

Charleston, seapt. city, U.S., S. Carolina, cap. co. C., on a low point of land formed by the confluence of the Cooper and Ashley Rivs., 7 m. from the Atlantic, on C. harbour, 82 m. NE. by E. Savannah (Ga.); an outlet for a rich rice and cotton producing region. The harbour is spacious (about 15 sq. m. in extent), but entrance is impeded by a bar with only 18 ft. of water, which, however, the U.S. government is now attempting to deepen by the construction of jetties. An extensive trade in cotton, lumber, and naval stores, phosphate, and rice is carried on, and a large grain trade is expected to grow up if the deepening operations on the bar are successful. The Santee Canal, 22 m. long, connects C. with Santee R. The town was founded by English colonists under Wm. Sayle, in 1679. Open hostilities in the Civil War began at C. with the bombardment of Fort Sumter. The city suffered greatly by an earthquake, Aug. 31, 1886. Mean temp., yr. 66.3° F., Jan. 50.8°, July 82.8°; rainfall (14 yrs.), 59.9 in. P. (1850) 43,000; (1870) 49,000; (1880) 50,000; (1890) 55,000.

Fredericton; depth at entrance at high water, ordinary springs, 21 ft.; ordinary neaps, 19½ ft. Good anchorage in river for a distance of 25 m. Mean temp., yr. 39.8° F., Jan. 10.7°, July 64.8°. P. (of dist.) 5800.

Chatham, tn., Canada, Ontario, Kent co., on R. Thames, 44 m. E. by N. Windsor, an important rly. junc. P. 9000.

Chatham, isl., off the W. ct. of Chile, to the S. of Wellington I.

Chatham (chat'am), formerly *Coteham* ('village of huts'), parl. bor. (one member), mun. bor. (since 1890), naval arsenal, and par., Eng., on E. bank of the Medway, adjoining the city of Rochester, on N. Kent Rly., and L. C. & D. R., 30 m. ESE. London. The R. Medway here widens, and is flanked on the E. and S. by heights partly built over and crowned with several forts and batteries. A Seamen's Hospital, St. Bartholomew's Hospital. The military and naval establishments, separated from the town and suburbs beyond by a line of fortifications, comprise infantry, marine, engineer, and artillery barracks, a school for engineers, and a marine hospital; the dockyard and arsenal, founded in the reign of Elizabeth, surrounded by a wall enclosing 90 ac. The dockyard contains five tide docks, and eight building-slips for men-of-war of the largest size, while the neighbouring flats have been converted into docks; with sawmills, forges, machinery-works, and roperies. It has ordnance-ranges, an armoury, officers' and artificers' quarters, gymnasium, military institute, and a chapel. Near the dockyard is Brennan's torpedo factory. In 1667, the Dutch, under De Ruyter, sailed up the Medway, and in defiance of the forts on its banks succeeded in burning many vessels and stores. Mun. bor. P. (1891), 31,700; parl. bor., which includes also the par. of Gillingham, P. 59,200; par. 4444 ac., P. 31,900.

Cheïbsen, vil. and Buddhist monastery, China, prov. Kansu. 25 m. NE. Si-ning-fu. Alt. 8920 ft.

Chek, Turkish, 'little.' See *Chak.*

Chekiang, maritime prov., China, between Kiangsu on the N. and Fokien on the S. (31° 16′–27° 17′ N.), the smallest of all the provs. on the mainland (one-eighth larger than Ireland); cap. Hangchou; treaty ports, Ningpo in the N., Wenchou in the S.; other chief towns, Shaohing, Lanki, Huchou. Surface for the most part covered with innumerable ranges of hills 1000–1300 ft. in height, separated by narrow well-irrigated valleys, but including near the coast large areas of flat lowlands, especially on the borders of the Bay of Hangchou, where the surface is divided up into squares like the Dutch *polders,* bordered by dykes and canals, used both for irrigation and navigation. On the side of the bay this area is protected by a great embankment, more than 1000 years old, against the bores of Hangchou Bay (*q.v.*). Two ranges of hills, meeting about the middle of the prov. in about 29° N., the Sianhia-ling from the SW., and the Yen-tang from the SE., divide the prov. into a N. half belonging to the Tsientang-kiang (Hangchou) basin and a S. half belong to the Takhi (Wenchou) basin. The cultivated products are those of S. China generally. Minerals not abundant, but include beds of coal in the N., and deposits of iron ore, which are mined, in the S. Salt is extracted in large quantities on the coast, and near Ningpo are vast quarries of building-stone, which is despatched thence to many parts of China. Most of the rivers are navigable, or at least capable of being used for floating. Away from the rivers goods are mostly carried on the backs of men, in many cases along well-made roads, the most remarkable of which is the viaduct of Shaohing (S. side of Hangchou Bay), 90 m. long, which is carefully paved with stone slabs. The prov. was once one of the richest and most densely peopled in China, but suffered fearfully during the Taiping rebellion (1850–65). The pop., estimated in 1842 at 30,400,000, was officially returned in 1886 at only 11,700,000. See **China,** table.

Chelachap (Dutch spelling **Tjelatjap**), tn., Java, on the S. ct., in about 109° 8′ E., 80 m. W. by N. Jokjokarta.

Chelsea, parl. bor., Eng., W. of London, chiefly on the l. bk. of the Thames, but with a detached portion on the NW. of Paddington bor. C. stn. is on the West London Rly., 4½ m. SW. by W. St. Paul's. Its principal edifice is the hospital for superannuated soldiers, founded in the time of Charles II., and completed by Sir C. Wren in 1692. The establishment supports about 550 in-pensioners, and from 70,000 to 80,000 out-pensioners. Near it is the military school, founded on the suggestion of the late Duke of York in 1801, and in which 1000 children of soldiers are maintained and educated at the public expense; also extensive barracks for about 1000 men of the foot guards. The old church is a plain brick structure, with monuments to Sir Thomas More and to Sir Hans Sloane, who was lord of the manor, and founded the botanic garden of Chelsea belonging to the Apothecaries' Society. It returns one member to Parliament. P. (1891) 96,300; eccles. par. (**C. with Kensal Green**) P. <4000.

Cheltenham, parl. bor. (one member), mun. bor. (since 1876), market-tn., par., and fashionable watering-place, Eng., Gloucestershire, div. and 7 m. SSE. Tewkesbury, on the M. and G. W. Rlys., and on the Chelt, short trib. of the Severn, in a vale sheltered from the NE. and SE. by a semicircular sweep of the Cotswold Hills, of which the heights S. of the town are known as the Leckhampton Hills. Formerly frequented for its mineral springs, mainly saline, slightly ferruginous, with traces of iodine. An effort is being made (1893) to restore the spas. Has spacious squares, crescents, terraces, gardens, and promenades. Is the home of the Cotswold Hunt. Has during the last quarter of a century become a noted educational centre and place of permanent residence, with winter rather than summer season, largely due to the growing repute of its two great colleges: the Proprietary, for boys (1841); the Ladies' (1854); and in addition, the Grammar School (1574), the Dean Close Memorial School, numerous private schools, and two Church of England Training Colleges for schoolmasters and mistresses. Has handsome public library, schools of science and art, winter gardens, baths, and recreation grounds. Market-day, Th. and S. Par. and mun. bor. 4301 ac. Mun. bor. P. (1871) 44,500; (1891) 42,900; parl. bor. P. (1891) 49,800.

Chemkent, dist., Russian Turkistan. See **Chimkend.**

Chemnitz, one of the most important towns of the kgd. of Saxony, 39 m. WSW. Dresden. It is the industrial centre of the Middle Erzgebirge. Situated in the neighbourhood of some important coal-measures, its manufactories have greatly developed in the course of this century. The most important are cotton mills, print works, and machine shops. The textiles of C. have been famous since the 15th century. C. is now the leading town in Germany in the production of fine cotton yarns. The name, which in 1143 was spelt Kameniz, is derived, according to Egli, from the old Slavonic *kamen*, 'a stone.' The town owes its origin to the foundation of a fort by Henry the Fowler (beginning of 10th century) on a high rocky promontory in Wendish terr. Alt. 985 ft. P. (1850) 25,000; (1880) 95,000; (1890) 139,000.

Chemong Lake, lake, Canada, Ontario, Peterborough co., 40 m. E. Lake Simcoe, joins Lake Pigeon.

Chemoulin, Pointe de, cape, France, on the W. ct., on the N. side of the mouth of the Loire, in 47° 12½′ N.

Chemtulell, vil., equatorial Africa, in the sphere of British influence, 62 m. N. Lake Baringo, on a feeder of Lake Rudolph; Suk settlement.

Chemulpo, Chemulpho ('muddy harbour'), or **Jenchuan,** seapt., Korea, 25 m. W. by S. Söul, in 37° 30′ N., on a bay sheltered by islands to the S. of the estuary of the Han, 55 m. by water from Mapu, the port of Söul; opened to foreign commerce in 1883; chief exports, beans, hides, and rice; about 2000 foreign residents, principally Japanese and Chinese. Mean temp. (1½ yr., 1884–87), yr. 51.5° F., Jan. 23.9°, Aug. 78.1°.

Chemung, co., U.S., New York, on the S. frontier, bounded on the W. by 77° W.

Chemung, riv., U.S., New York, in the SW., formed by the confluence of the Canisteo and the Conhocton, which join at Knoxville, about 40° 9′ N., 77° 8′ W. It flows ESE. past Elmira to the Susquenanna, which it joins on the r. bk. about 76° 35′ W.; a good mill stream. The former **C. Canal** (from Elmira to Lake Seneca) is now abandoned and filled.

Chenáb, or **Chenaub,** a riv. of the Punjab, which has its rise in Lahúl, in 32° 48′ N., 77° 27′ E., at the height of about 14,000 ft. It flows through the Ritanka Pass, which is 13,000 ft. above the sea. At Tandi it is joined by the Suraj-bhaga, a river 40 m. long, flowing from the N. At Riasi the river, leaving the mountains, enters the level ground of the Punjab, where it is 600 ft. wide. It becomes navigable for rafts 50 m. lower down, and after a generally SW. course, in the latter part of which it is from ½ to 1½ m. across, and sometimes 14 ft. in depth, it joins the Sutlej. The united stream is then called the Panjnád (five rivers). Total length, 590 m. See **Indus.**

Chenango, co., U.S., New York, N. of 42° N. and E. of 76° W., traversed in the SE. by the Susquehanna R.

Chenango, riv., U.S., in the S. of New York, flows SSW. and enters the Susquehanna at Binghamton; one of the feeders of **C. Canal,** which connects Binghamton with the Erie Canal at Utica.

Chenaub, riv. See **Chenáb.**

Chenay, vil., France, dep. Marne, arr. Reims, near Fismes, with mineral springs. P. <2000.

Chen-chou, or **Chin-chou,** tn., central China, prov. Hunan, 169 m. S. Chang-sha, on a l. bk. trib. of the Lei-kiang.

Chêne-Bougeries, comm., Switzd., cant. and 2 m. E. by S. Geneva. P. <2000.

Cheng-tang, tn., French Indo-China, on the Mekong, 195 m. NNW. Saigon.

Cheng-te, tn., China, Pechili. See **Jehol.**

Chengtu-fu, or **Chingtu-fu,** tn., China, cap. prov. Süchwan, in 30° 45′ N., 104° 10′ E., 175 m. NW. by W. Chungking; one of the finest towns in the empire, situated in the middle of an admirably fertile plain, watered by beautiful streams belonging to the basin of the Min, and bounded towards the horizon by hills of graceful and varied forms. The principal streets are of a good width and remarkably clean. The inhabitants of this town have the reputation of being the most polished of the empire. Telegraphic communication is open with Hankow. Principal trade is in the numerous wild products of Tibet and Kuku-nor—furs, rhubarb, musk, medicines, &c., which are purchased with the tea, silk, and cotton-cloth of Süchwan. Marco Polo (end of 13th century), by whom it is called *Sindafu*, describes it as being 20 m. in compass, and speaks of it as having been in former days 'a rich and noble city.' P. (1887) 800,000.

Chephirah, place named in O. T. See **Kefireh.**

Chepo, riv., Colombia, Isthmus of Panama, flows W. then S. into the Pacific, 28 m. E. Panama.

Chepon, tn., in the country of the Laos, Indo-China, about 80 m. W. Hué; at present decayed, but occupying a favourable position for trade.

Chepstead, vil., Eng., Kent, Sevenoaks div., on the Darenth,

8 m. NW. Tunbridge, 1½ m. NW. by W. Sevenoaks stn., PM.T.O. (**Chipstead**).

Chepstow, market-tn., riv. port, and par., Eng., Monmouthshire, S. div., on the Wye, 12 m. S. by E. Monmouth, on the G. W. R. On the summit of a bold cliff overlooking the Wye stand fine ruins of an old castle (11th century). The tide sometimes rises to 50 ft., and even to 70 ft., and flows with great rapidity. Hence, though large vessels can come up to the town, the port is not much frequented, and its shipping has considerably declined in favour of Newport. C. is a sub-port of Gloucester. Salmon fisheries in the Severn and Wye. Market-days, W. and S. Par. P. <3500.

Chepstowe, post-tn., Victoria, Grenville co., 18 m. W. Ballarat. P. <1500.

Cheptsa, riv., Russia, l. bk. trib. of Vyatka, 270 m.

Chepultneticook, settlement, New Brunswick, on W. border of York co. (adjoining the state of Maine, U.S.).

Chequerbent, coal-mining vil., Eng., Lancashire, near Bolton, on the L. & NW. R., PM.T.O.

Cher, central dep., France, traversed from SE. to NW. by the Cher R., and divided into three arrs., Bourges (the cap.), St. Amand, and Sancerre. The centre, N., and W., form a slightly undulating plain; the chalk mountains of the Sancerre Range occupy the NE., and in the S. occur the first series of the granite mountains of the Central Plateau of France, culminating at the source of the Indre; alt. 1655 ft. The remainder of the dep. belongs to two regions, in the N. to the Berrichonne, which is the least unhealthy and least barren portion of all the Sologne (*q.v.*), but which is nevertheless the most thinly peopled part of a thinly peopled dep.; in the centre to the calcareous plateau of Bourges, arid, generally bare, at best of mediocre fertility, the limit between these being a line stretching from Vierzon on the C. to a point near the NE. corner of the dep. The whole dep. belongs to the basin of the Loire, by which and by the Allier and C. it is watered. Minerals are abundant. The very productive iron-mines of the plateau of Bourges yield ore of high quality (Dun-le-Roi, Mehun, Sancergues, Yvoy-le-Pré). Coal, manganese, and excellent building stone are obtained, also granite (Châteaumeillant), marls (Blancafort), &c. The metallurgical establishments take the first rank in the industries of the dep., which furnishes large quantities of iron, cast iron, and steel. The manufacture of porcelain ranks next. The dep. has been formed principally from Haut-Berry, together with parts of Bourbonnais and Nivernais. Area, 2819 sq. m. P. 359,300. See **France,** table, and **Bourges.**

Cher, riv., central France, rises in the dep. Creuse, flows E., N., and W. through the deps. Allier, Cher, Loire-et-Cher, and Indre-et-Loire, and joins the Loire SW. Tours. Principal affluences, the Tardes, Arnon, Evre, and Saudre. The Canal du Berri runs parallel to it in the upper part. Length, 200 m. Navigable for rafts from the confluence of the Tardes; for boats, from Vierzon.

Chera, one of the oldest kingdoms in southern India, on the W. ct., of uncertain extent.

Chéragas (Arabic, 'east'), vil., Algeria, 7½ m. W. Algiers, on a hill 650 ft. high, overlooking the plain of Staweli, with orangeries, vines, and manufactures of essences. P. <2000 (500 whites).

Cherasco, comm., Italy, Piedmont, prov. Cuneo, at the confluence of the Stura and Tanaro, 18½ m. E. Saluzzo, with several silk-mills and two magnificent arches. Here in 1796 Napoleon I. gained a decisive victory over the Sardinian troops, and in 1801 its fortifications were destroyed by the French. P. 9000.

Cherát, hill cantonment and sanatorium, India, Punjab, Pesháwar dist., on the W. of the Khattak range, in 33° 15′ N., 72° 1′ E. P. <5000.

Cheratte, comm., Belgium, prov. and 5 m. ENE. Liège. P. <3000.

Che'raw, vil., U.S., S. Carolina, Chesterfield co., at the head of navigation on the Great Pedee R., 80 m. NE. by E. Columbia. P. <1500.

Cherbourg (the *Coriallum* of the Romans), seapt., France, in the middle of the N. ct. of the dep. Manche, on the English Channel, at the N. extremity of the penin. of Cotentin, and nearly opposite the W. extremity of the Isle of Wight, cap. arr. It is a fortified city of the first class, at the head of a bay between Cape Levi on the E. and Cape La Hague on the W. The city and port are defended by several forts and redoubts. The military port can accommodate fifty ships of the line; the commercial port is safe and commodious. The magnificent basin, commenced by Vauban in 1686, interrupted during the Revolution, was opened August 7, 1858; the roadstead, formed by an immense breakwater (length, 4111 yds.; breadth at top, 103 yds.; height, 22 yds. Cost £4,000,000), and now being made more completely sheltered by the construction of additional breakwaters, has space for 400 ships. Chief industries, shipbuilding, lace-making, sugar-refining, tanning, and dyeing. Exports agricultural produce, Macadam stone, &c. Alt. 34 ft. Mean temp., Jan. 41.6° F., July 62.8°. P. 31,100.

Chernavoda (Roumanian spelling **Černavoda**), fortified tn., Roumania, Dobruja, on the r. bk. of the Danube, prov. and 33 m. WNW. Kustenji, with which it is connected by rail. P. <2000.

Chernechiya Sloboda, vil., Russia, govt. and 108 m. NNW. Poltava, dist. Romny. P. 5900.

Chernevtsy, tn., Russia, govt. Podolia, dist. Yampol, 85 m. ESE. Kamenets-Podolsk. P. 4000.

Chernigov, prov., Little Russia, having Moghilev in N., Orel and Kursk in E., Poltava in S., Kiev and Minsk in W. Undulating high plains, from 650 to 750 ft. above the sea-level, in the N., and from 370 to 650 ft. in the S., its SW. part belonging to the woody and marshy terr. known as Polyesie [**Minsk**]. Watered by the Dnieper on its SW. frontier, and the navigable Desna and Sozh, as well as by their smaller tribs. Many small lakes and ponds, as well as unhealthy marshes, chiefly in the basin of the Desna. Forests chiefly in the N., one-fourth part of the aggregate area being under woods. Climate much colder in N. part, the calculated average temp. being 43° (summer 68°, winter 21°). Pop., chiefly Little Russians (86 per cent.), Great Russians (5.7 per cent.), White Rus-

slans (5.3 per cent.), and Jews (2.6 per cent.). Religion chiefly Greek Orthodox (26,450 Jews and 1040 Catholics). The chief occupation is agriculture, corn being exported to the average amount of 645,000 tons. Tobacco is an important crop, so also beetroot for sugar-works, hemp, and flax. Gardening in a good state. In 1879 there were 493,600 horses, 464,400 cattle, and nearly 1,000,000 sheep. Many distilleries; the manufacture of woollen cloth is in rapid growth; considerable trade in corn shipped on the rivers. Area, 20,233 sq. m. P. (1846) 1,409,100; (1870) 1,659,600; (1887) 2,109,983.

Chernigov, tn., Russia, cap. of C. prov., 467 m. SW. Moscow, on the low and sandy bank of the Desna R. Nearest railway stn. at Nyezhin, 57 m. to the SE. P. (1886) 26,820, of which one-third are Jews.

Chernobyl, tn., Russia, govt. and 64 m. NNW. Kiev, dist. Radomysl, on Pripet R. P. 6500.

Chernolyesskoye, vil., Russia, Ciscaucasia, govt. and 89 m. ESE. Stavropol, dist. Alexandrovsk. P. 6000.

Chernomorsk Military District, govt., Caucasia, Russia, consisting of a narrow strip of land between the main Caucasus chain and the Black Sea, formerly inhabited by the Adyghe mountaineers. The steep slopes of the Caucasus are furrowed by narrow gorges and covered with a luxuriant vegetation. The moist climate contributes to the development of Caucasian fever. Thinly peopled by Russian immigrants. Communications difficult, the two main roads which are now built for military purposes, one along the sea-coast and the other across the Caucasus chain, being not yet terminated. The ports of Novorossiysk (cap. of dist.), Ghelenjik, Gagra, and Pitsunda have but open roadsteads, and the first suffers, moreover, from the Novorossiysk *bora* or *fæhn*. The C. Military Dist. has lately been incorporated in the govt. of Kutais. Area 2824 sq. m. P. (1888) 26,000.

Cheshire, a maritime co. in the NW. of Eng., to the S. of Lancashire, including the penin. of Wirral between the estuaries of the Mersey and Dee; divided into the following parl. divs.:—

	Acres.	P. 1891.
Wirral	62,477	73,119
Eddisbury	227,961	55,249
Macclesfield	40,731	53,147
Crewe	41,178	64,434
Northwich	42,796	69,893
Altrincham	51,997	63,392
Hyde	32,581	57,468
Knutsford	143,556	55,073
Parl. bors.[1]	13,791	238,283
Total	657,068[2]	730,058[2]

[1] Birkenhead and parts of Ashton under Lyne, Chester, Stalybridge, Stockport, and Warrington.

[2] The administrative county includes parts of Stockport and Stalybridge in the ancient county of Lancaster, and excludes parts of Mossley and Warrington administrative county of Lancaster, and part of New Mills administrative county of Derby. Its total area (including three county bors.), 655,036 ac. P. 743,869.

The surface is level or rolling, almost entirely under 500 ft. except in the extreme E. on the Derbyshire borders, where the New Red Sandstone which occupies the greater part of the area is succeeded by rocks belonging to the Carboniferous system, and the surface rises to above 1000 ft. The principal rivers are the Dee and the Mersey in the N. of the county; and the Weaver, with its trib. the Wheelock. The county is traversed by the Bridgewater, Trent and Mersey, Shropshire Union, Macclesfield, and Peak Forest canals, and from Eastham to Warrington by the Manchester Ship Canal. The county is well wooded in the E. and W., and has large tracts of peat moss in the SE The greater part is well suited to pasture, and is one of the finest

grazing dists. in England, its cheese being specially noted. The population is chiefly employed in agriculture. See **Appendix,** pp. 7–9. Of the minerals, the most important is salt, this county containing the principal salt-producing dist. in England, and one of the most productive in Europe. The dist. lies in the middle of the county, the valley of the Weaver and its trib. the Wheelock, rock-salt being mined at Northwich, and salt obtained from brine at Northwich, Middlewich, Winsford, Sandbach, and Weston Point (the brine pumped, however, to this last place from Marston, near Northwich). Coal is mined in the E. of the county at Harecastle, Dukinfield, Stockport, Hyde, Whaley Bridge, Port Shrigley, Wildboarclough, Mow Cop, Marple, and in the W. at Neston. The manufactures are cotton, silk, ribbons, fancy goods, linen, shoes, hats, chemicals, &c., shipbuilding, rope, nail, and file making. The railways are the L. & NW. R., Cheshire Lines, M. R., N. Staffordshire, and the G. W. R. The chief towns are Chester, Crewe, Stockport, and Macclesfield. At the time of the Roman invasion C. formed part of the terr. occupied by the *Cornavii*, and was included in *Britannia Superior* in the first division of England by the Romans, and afterwards became part of *Flavia Cæsariensis*. After the Romans, it was occupied by the British until about 607, when it was taken by Ethelfrith, King of Bernicia. Being retaken by the Welsh, it was annexed to the kingdom of Mercia by Egbert in 828, since when the English have always held it. It was made a county palatine with a separate jurisdiction by William the Conqueror. See **England,** table.

Cheshire, tn., U.S., Connecticut, co. and 14 m. N. New Haven. P. <2000.

Chester, the ancient Roman *Deva Castra*, 'camp on the Dee,' episcopal city, co. of itself, parl. bor. (one member), mun. bor. (one of the oldest in England), and co. bor., and seapt., Eng., cap. of co. Cheshire, on R. Dee, 11 m. NNE. Wrexham; the general terminus of several railways. It stands on a rocky elevation in part enclosed by walls erected by the Romans, 1¾ m. in circumference, and is the only city in England retaining the walls perfect in their entire circuit. The streets are sunk below the level of the houses, and the footways also, which are within piazzas or rows. The diocese comprises 255 benefices. Manufactures of boots and shoes for export, patent shot, leather, and gloves. The making of lead pipes is a very old industry. Principal edifices, the castle (comprising barracks and armoury), built by William the Conqueror about 1069; the cathedral, formerly the abbey church of St. Werburgh, founded in 1053, and restored by Sir G. Scott (1868–76); the beautiful chapter-house, blue-coat school, Church diocesan training college, and museum. The cathedral grammar school was founded by Henry VIII. There is a public park, the 'Grosvenor,' given by Richard, second Marquess of Westminster. The town has a monument to the memory of Matthew Henry the commentator, who was for 25 years minister of a dissenting congregation at C., and who died here; and a statue of Field Marshal Viscount Combermere, a native of the county. Races take place in May on the level space outside the city walls known as the *Roodee* (corrupted from Rood eye). Market-days, W. and S. Mun. and parl. bors. P. (1801) 15,100; (1851) 27,800; (1871) mun. bor. P. 35,300; parl. bor. P. 38,400; (1891) mun. bor. P. 37,100; parl. bor. P. 42,300; eccles. par. (**C. with Boughton**) P. 5400.

Chiamut, or **Clamut,** the highest village in cant. Grisons, Switzd., at the foot of Mount St. Gothard, on the borders of Uri. Alt. 5080 ft.

Chian, tn., China. See **Kingan.**

Chiana, Valle di, high valley, Italy, in the SE. of Tuscany, stretching about 25 m. S. from the neighbourhood of Arezzo. Formerly it was traversed from N. to S. by the R. Chiana, a trib. of the Paglia (Tiber basin), but the surface was in most places so level that the water collected in numerous stagnant pools, and the valley was excessively malarious. It is spoken of by Dante as 'an accursed place.' Since 1838, however, a water-parting has been established between the small lakes of Chiusi and Montepulciano, and the latter has been brought into connection with the Arno by the canalised northern portion of the Chiana, and subsidiary canals have been constructed to carry into the Arno the drainage of the whole valley, which has thus been rendered one of the healthiest and most populous parts of Italy.

Chianciano, comm., Italy, prov. Siena, dist. and 5 m. SE. Montepulciano, with warm baths and mineral springs. P. <3000.

Chiang-ho, China, prov. and on the Gulf of Pechili, 45 m. E. by N. Tientsin.

Chianni, comm., Italy, prov. and 21 m. SSE. Pisa. P. <4000.

Chianti, Monti, range of mts., Italy, Apennines, stretching about 20 m. NNW.–SSE. to the W. of the Arno and the S. of Florence, Tuscany. The slopes, covered with vineyards, supply the best wines of Tuscany.

Chiantla, tn., state of and 100 m. NW. Guatemala.

Chiapa, or **Chiapa de los Indios,** tn., Mexico, Chiapas, 40 m. WSW. San Cristobal, formerly cap. Mexico, though now an unimportant place.

Chiapas, the most south-easterly of the states of Mexico, cap. San Cristobal, on the NW. of the mountainous regions of Central America, with the Soconosco littoral lands E. of the Gulf of Tehuantepec, between Yucatan (N.), the Isthmus of Tehuantepec (W.), and Guatemala (SE.). Remains of ancient cities in NE. See **Mexico.**

Chicacole, tn., Brit. India, Madras, dist. and 105 m. SW. Ganjám, 4 m. from the sea, with an old fort once an important military station. Its muslins rival those of Dacca in delicacy of texture. P. (munip.) 18,200; Hindus, 17,300.

Chicago, city, U.S., co. Cook, Illinois, is the second city in the United States of America in population. It is situated on the west side of Lake Michigan, near its southern end, upon the small river Chicago, whose two branches unite in the heart of the city to form the main channel to the lake. This river-system affords it 35 m. of dock frontage, furnishing harbour accommodation for a lake commerce of 10,000,000 tons burden annually. The first Europeans who visited the site of Chicago were the French explorers, Louis Joliet and Jacques Marquette, when returning in 1673 from their discovery of the upper Mississippi. In 1685 a fort was built there, commanded by an officer in the Canadian service, and before the end of the 17th century the Jesuits made it a mission post. Indian hostilities prevented further occupation for 100 years or more; and in 1795 the only settler, aside from the natives, was a negro trader from San Domingo. In 1804 the United States government established there the frontier post of Fort Dearborn, which was destroyed by Indians in the war of 1812, but rebuilt in 1816, when a permanent settlement began. In 1830 the population was only 70 persons, but in 1835 a town was organised, and in 1837 it was incorporated as a city, with 4000 inhabitants, and an area of 10 sq. m. It now comprises 182 sq. m., and extends over a length of more than 21 m., with a breadth from E. to W. of 10½ m. It is almost entirely surrounded by magnificent parks and boulevards, with a total area of 2200 ac. The rapid growth of Chicago is due to its geographical position, which makes it the chief port of the great lakes and the distributing centre of the NW. The city was built originally upon the flat prairie, at an elevation too low to secure proper drainage. When this became apparent the grade of the whole city was raised 7 ft., and streets and buildings were brought with great rapidity to the changed level. The water supply became insufficient, and tunnels 4 m. long were then driven under Lake Michigan to obtain an additional supply. The drainage problem was temporarily solved by reversing the current of the river, by connecting it with the Illinois and Michigan Canal, and is now being permanently settled at an expenditure estimated at £4,500,000, to restore as a drainage outlet the prehistoric channel from Lake Michigan to the Valley of the Mississippi. When completed, the drainage canal will be a free waterway navigable for vessels drawing less than 22 ft. as far as Joliet (about 40 m.). In October 1871 Chicago was devastated by a conflagration, which destroyed its business centre, and swept over an area of more than 3 sq. m. Within the next three years the city was reconstructed with buildings of greater capacity than those burned, and more than twice their value. Among the many fine structures which adorn its streets may be mentioned the Auditorium, which contains the largest theatre and opera-house in the world, seating 8000 persons. Education is well provided for. A new university, commenced in 1889, has been splendidly equipped and richly endowed [**Illinois**]. The World's Columbian Exposition was located at Chicago by the Congress of the United States, and was opened May 1, 1893, on a scale of magnitude hitherto unparalleled. The great bulk of Chicago's outward trade consists in the despatch of wheat, maize, and other grains, seeds, flour, dairy produce, dressed, cured, and canned meats, and live stock, lumber ranking next in importance, and the aggregate amount of grain and prepared meats sent out from this city exceeds the amount despatched by any other city in the world. In 1850 the total value of the trade of the city was estimated in round numbers at £4,000,000, in 1891 at £300,000,000. Manufactures are varied and extensive, but there is no specialty. Alt. 661 ft. Mean temp., yr. 49.4° F., Jan. 25.5°, July 72.9°; rainfall (12 yrs.), 37.57 in. P. (1850) 30,000; (1860) 112,200; (1870) 299,000; (1880) 503,200; (1890) 1,099,900, including 292,463 Americans, 384,958 Germans, 215,534 Irish, 54,209 Bohemians, 52,756 Poles, 45,867 Swedes, 44,615 Norwegians, 33,785 English, 12,963 French, 6080 Canadians; (1893) by local census, above 1,500,000.

Chichen, or **Chichenitza,** vil., Mexico, Yucatan, 18 m. SW. Valladolid, with remains of an ancient Indian city.

Chichester, the anct. *Cissacaster*, anct. mun. (till 1885 also a parl.) bor., Eng., Sussex, C. div., on the Lavant, 9½ m. W. by S. Arundel, on the L. B. & S. C. R. It stands in a plain

between the Southdown Hills and the sea, and is enclosed by walls said to be built on Roman foundations, now formed into terraces with walks, and shaded by elm-trees. The site of the Grey Friars Monastery is now a public recreation ground. The cathedral, which dates from close of 12th century, is 411 ft. in length (including west porch and Lady Chapel), and 90 ft. in breadth, with a spire 271 ft. in height. This spire fell in 1861, but was replaced by another as nearly as possible like the old one. In its interior are a richly adorned choir and portraits of the bishops of Selsey and C. from the time of St. Wilfred to Bishop Sherborne, A.D. 1508. The octagonal market-cross was built by Bishop Storey about 1500. The see is nearly co-extensive with the county Sussex. The city has a grammar-school, blue-coat, national, Lancastrian, and other schools. Trade almost wholly in agricultural produce and live-stock. Manufactures coopers' and other wooden wares. Originally the town was a Roman station. It was taken and partially destroyed in about 491 by the South Saxons, under Ella, but rebuilt by his son Cissa (whence its name), and thenceforth it remained the cap. of the kingdom of Sussex till its conquest by the West Saxons. Various Roman remains with inscriptions have been discovered in the city and vicinity. **C. Harbour,** 2 m. SW. of the city, is an inlet of the English Channel, between the peninsula of Selsey and Hayling Island, containing several creeks and Thorney Island. Market-days, W. and S. Mean rfall. (1866–80), Chilgrove, alt. 284 ft., 34.90 in.; Westgate, alt. 40 ft., 29.16 in. Mun. bor. P. (1801) 4700; (1851) 8700; (1891) 7800; pars. P. 7900; parl. div. (**C. or South-Western**) P. 54,400: See, 549,000.

Chichou-fu, tn., China, prov. Nganhwei, 73 m. SW. by W. Wuhu, near the r. bk. of the Yangtse-kiang.

Chickahom'iny, riv., U.S., Virginia, flows SE. into James R.

Chickasauha, riv., U.S., Mississippi, in the SE., trib. of the Pascagoula, which it joins on the l. bk. in about 31° N.

Chickasaw, co., U.S., Iowa, crossed by 43° N., and W. of 92° W.

Chickasaw, co., U.S., Mississippi, in the NE., crossed in the N. by 34° N., and in the W. by 89° W.

Chickasaw Indians, tribe of the Appalachian nation, formerly occupying the terr. between the Ohio and Tennessee Rivs., now reduced to a few thousands and settled in the Indian Terr. (*q.v.*).

Chickenley Heath, stn., Eng., Yorkshire, on G. N. R.; near Dewsbury.

Chicken Rock, Eng., off SW. ct. of Isle of Man, with lighthouse, visible 16 m.

Chickerell, West, par., Eng., Dorsetshire, S. div., 2½ m. NW. by W. Weymouth, PM.O. P.<1000.

Chicklade, par., Eng., Wiltshire, Wilton div., 15 m. S. by E. Trowbridge, 4 m. NNW. Tisbury stn. P.<250.

Chickney, par., Eng., Essex, Epping div., 6½ m. S. by E. Saffron Walden, 3 m. ENE. Elsenham stn. P.<250; eccles. par. (**C. with Broxted**) P.<750.

Chicksands Priory, par., Eng., Bedfordshire, Biggleswade div., 8 m. SE. by S. Bedford, 1 m. W. Shefford stn. P.<250.

Chicla, tn., Peru, dep. and 70 m. ENE. Lima, on the Oroya Rly. Alt. 12,200 ft.

Chiclana, comm., Spain, prov. Jaën, 40 m. ENE. Linares, with mines and sulphur-springs; fine scenery. P.<3000.

Chiclana de la Frontera, tn., Spain, prov. and 12 m. SE. Cadiz. P. 12,300.

Chiclayo, tn., S. America, Peru, dep. Lambayeque, 315 m. S. Guayaquil. Well cultivated sugar estates. P. 13,000.
Chico, Chiquito, Spanish, 'small,' 'very small.'

Chico, city, U.S., California, Butte co., on Chico R., 85 m. N. by W. Sacramento. Mean temp. (20 yrs.), yr. 64.1° F., Jan. 46.5°, July 84.6°; mean rainfall, yr. 20.9, June-Sept. 0.68 in. P.<3000.

Chico, or **Atotolnico el Chico,** mining vil., Mexico, Hidalgo, 7 m. N. Pachuca.

Chico, name sometimes given to the Senguel or Senger R. Argentine Republic, below Lake Colhue.

Chicoana, tn., Argentine Republic, Salta, 120 m. N. by W. Tucuman, 25 m. S. by W. Salta. P.<2000.

Chicopee, riv., U.S., Massachusetts, in the S., flows W. to the Connecticut, which it joins on the l. bk. 4 m. N. Springfield.

Chico'pee, tn., U.S., Massachusetts, Hampden co., on the l. bk. of Connecticut R., 4 m. NNW. Springfield; contains the vast Dwight cotton-mills, and also manufactures bronzes, artillery, &c. P. (1880) 11,300; (1890) 14,100.

Chi'cot, co., U.S., Arkansas, in the extreme SE.

Chicou'timi River, riv., Canada, Quebec, rises from several lakes in Chicoutimi co., and flows SW. into the Saguenay R.

Chicoutimi, co., Canada, Quebec, drained by Lake St. John, bounded S. by 48° N., separated from Saguenay co. on the E. mainly by the meridian of 70° W.

Chicoutimi, tn., Canada, Quebec, C. co., on r. bk. of R. Saguenay, 111 m. N. by E. Quebec, in 71° 4′ W. The seat of a bishop. Mean temp., yr. 36.3° F., Jan. 3.4°, July 65.2°. P<3000.

Chicova, plain, Portuguese E. Africa, on the S. bk. of the Zambezi, in about 32°–32½° E., just above the Kebrabasa rapids, partly flooded every year; well adapted for the growth of cereals; with negro village and Portuguese fort of same name.

Chidambaram, India. See **Chilambaram.**

Chiddingfold, par., Eng., Surrey, div. and 9 m. S. by W. Guildford, 2 m. SSE. Witley and C. stn., on the L. & SW. R., PMT.O.; 7043 ac. P.<2000.

Chiddingly, par., Eng., Sussex, Eastbourne div., 8½ m. E. by N. Lewes, 3 m. NW. by W. Hellingly stn., P.O.; 4481 ac. P.<1000.

Chiddingstone, par., Eng., Kent, div. and 6 m. W. by S. Tunbridge, 1½ m. WSW. Penshurst stn., PT.O.; 5981 ac. P.<1500.

Chideock, ct. par., Eng., Dorsetshire, W. div., 5 m. E. Lyme Regis, 3 m. W. Bridport, P.O. P.<750.

Chidham, par., Eng., Sussex, Chichester div., on Chichester Harb., 5 m. W. Chichester, 2 m. SW. Bosham stn. P.<250.

Chidimba (Chingenge's residence), tn., Congo Free State, near the l. bk. of the Lulua, in 6° 8′ S., 22° 56′ E.

Chidley, or **Chudleigh,** cape, Labrador, N. ct., at the entrance to Hudson Straits.

Chidley, cape, Greenland, W. ct., in about 68½° N.

Chidlow, par., Eng., Cheshire, Whitchurch union. P.<250.

Chiefs Point, cape, Canada, Ontario, on Lake Huron, in 44° 40′ N.

Chiem-see, lake, Ger., kgd. Bavaria, govt. Upper Bavaria, 40 m. ESE. Munich, with the islands of Herrenwörth and Frauenwörth. Area, 34 sq. m.; depth, 262 ft.; alt. 1650 ft.

Chien-chang, dist., China. See **Kien-chang.**

Chieng-hai, tn., Siam, 95 m. NE. by N. Chieng-mai. P. small.

Chieng-hung, tn., Indo-China, on the Mekong, in about 21° 50′ N., 125 m. NW. by W. Luang-prabang, cap. of the chief state of Sipsong-Pana.

Chieng-kan, tn., Siam, on the Mekong, 177 m. ENE. Rahang.

Chieng-kaw, tn., French Indo-China, on the Nam-Ma, 103 m. WSW. Hanoi (Tongking).

Chieng-kheng, dist., Indo-China, on both banks of the Mekong R., in about 21° 20′ N.

Chieng-kwang, tn., French Indo-China, 91 m. ESE. Luang-prabang, once the cap. of one of the most beautiful provs. of Indo-China, now overgrown with jungle. Alt. 3900 ft.

Chieng-mai, or **Zimme,** tn., Siam, on the Me-ping, 130 m. N. Rahang, 180 m. NE. by N. Maulmain. One of the chief centres of trade in teak, the forests of which, within easy reach, are, however, rapidly becoming exhausted. P. roughly estimated at 100,000.

Chieng-rai, tn., Burmese Shan States, on r. bk. of Mekong, 122 m. NW. by W. Luang-prabang. P.<5000.

Chieng-sen, tn., Indo-China, on the Mekong, about the angle where it turns E., 125 m. NE. by N. Chieng-mai, in a fertile but thinly-peopled plain, 30 m. by 20 m.

Chieng-tung, or **Kiang-tung,** tn., Burmese Shan States, about 175 m. NNE. Chieng-mai (Siam), on a plateau 2700 ft. above sea-level, surrounded by mountains except on the N.; cap. of state of C.-T., which claims to exercise authority over the states to the E. as far as the frontier of Tongking [**Chiengsen**]. The soil in the neighbourhood is poor and little cultivated, but the town is an important centre of caravan trade. P.<5000. *Proc. R. G. S.*, 1889, p. 243; 1891, p. 707.

Chienhsi-chou, tn., China, Kweichou, 37 m. NW. Kweiyang-fu.

Chienti, comm., Italy, Apulia, prov. and 30 m. NW. Foggia. P.<2000.

Chienwei-hsien, tn., China, Süchwan, on the Min, 107 m. S. Chengtu-fu.

Chieri, tn., Italy, Piedmont, prov. and 8 m. SE. Turin. P. 15,000.

Chiesa, vil., Switzd., cant. Ticino, 20 m. ESE. Airolo. P.<2000.

Chiese, riv., Austria and Italy, rises on the Tirolese side of Mt. Adamello, and flows S. through the Lake d'Idro to the Oglio, which it joins on the l. bk. below Canneto (midway between Cremona and Mantua).

Chieti, tn., Italy, Abruzzi e Molise, cap. prov. C., 92 m. ENE. Rome, 39 m. E. Aquila. Alt. 1070-80 ft. Mean temp., yr. 56.3° F., Jan. 41.0°, July 74.8°. P. 23,000.

Chieveley, par., Eng., Berkshire, div. and 4½ m. N. Newbury, 2 m. WNW. Hermitage stn., PM.O.; 5328 ac. P.<1500; eccles. par. (**C. with Winterbourne and Curridge**) P.<1500.

Chièvres, tn., Belgium, prov. Hainaut, 11 m. NW. by N. Mons. P. (comm.)<4000.

Chifu, or **Chefoo,** a treaty port of China, opened to foreign trade in 1861; the only open port between the mouths of the Yangtse and Pei-ho rivers, on the N. coast of the prov. Shantung, 260 m. SE. by E. Peking. Lat. 37° 35′ N., long. 121° 22′ E. The climate is more suitable for Europeans than that of any other open port on the China coast. It is visited as a sanatorium by persons from southern ports. Being the northern-

most port open from December to March, while the Pei-ho remains frozen, it is the centre of a busy winter trade; mails and merchandise for Peking and Tientsin being landed here, and forwarded by interior routes. It has, however, a poor harbour, a semi-circular bay exposed to N. and NE. winds, where ships anchor and goods are discharged by lighters; but it is now (1893) proposed to construct a wharf accessible to cargo boats at all states of the tide. Average value of exports (silk, brancake, straw-braid, &c.), £1,000,000 to £1,500,000. P. 120,000.

Chifumbe, vil., Nyassaland, in 15° 9′ S., 35° 18′ E.

Chigakhor, vil., Persia, prov. Irak Ajemi, 62 m. SW. by S. Ispahan, a summer resort of the Bakhtiari. Alt. 7500 ft.

Chigirin (Polish *Czehryr*), dist. tn., Russia, govt. and 232 m. SE. Kiev, on Tyasmina R., 13 m. from Dnieper. Renowned in the history of Little Russia during its struggles with Poland. P. (1845) 5660; (1889) 16,840.

Chigla, New (also *Pourovka*) and **Old,** two vils., Russia, govt. and 58 m. SE. Voronezh, dist. Bobrov. P. 8500 and 4100.

Chignall, par., 1½ m. S. Chignall Smealy, 3 m. NW. Chelmsford. P. <500; eccles. par. (**C. with Mashbury**) P. <500.

Chignall Smealy, eccles. par., Eng., Essex, div. and 4½ m. NW. Chelmsford, P.O. (**Chignal Smeeley**). P. <250.

Chignecto Bay, Canada, inlet of Fundy Bay (*q.v.*), between Cumberland co. (N.S.) and Albert and St. John cos. (N.B.).

Chignecto Cape, cape, Canada, Nova Scotia, on the W. ct., in 45° 20′ N., 64° 55′ W., where the Bay of Fundy divides into Chignecto Bay and Minas Channel.

Chignolo-Po, comm., Italy, Lombardy, prov. Pavia, 12 m. NW. by W. Piacenza. P. 5000.

Chigonaise, or **Ishgonish River,** vil., Nova Scotia, co. Colchester, 13 m. from Truro. P. <1500.

Chigwell, par., Eng., Essex, Epping div., 5½ m. NW. Romford, 1½ m. E. Buckhurst Hill stn., 2 m. S. Chigwell Lane stn., PMT.O.; 5009 ac. P. 6300. **Chigwell Row,** eccles. par., adjoining Chigwell on the S., PMT.O. P. <1000.

Chigwell Lane, stn., Eng., Essex, Epping div., on the G. E. R., 12 m. NE. St. Paul's, London.

Chihuahua, tn., Mexico, on R. Chihuahua (trib. Rio Grande del Norte), cap. of state C., 275 m. E. by N. Guaymas. Trade centre for the neighbouring gold and silver mines. P. 25,000.

Chihuahua, one of the states of Mexico, on the plateau of N. Sierra Madre, formed by: (*a*) a mountainous region (Sierras Tarahumara and Candola; (*b*) the valley of Rio Conchos; (*c*) a N. and (*d*) a S. lacustrine region. See **Mexico.**

Chihumbo, riv., Portuguese W. Africa, flows N. into the Kassai, which it joins on the frontier of the Congo Free State, in about 21° 10′ E.

Chikala, precipitous mt., on the W. shore of Lake Shirwa, in 15° 7′ S., 35½° E. Alt. 6000 ft.

Chikalda, vil. and sanitarium, Brit. India, Berar, dist. Ellichpur, 45 m. NW. Amráoti, situated in the midst of beautiful scenery. Alt. 3656 ft. Mean temp., yr. 70° F., Dec. 62°, May 82°; rainfall, yr. 66.6 in., June–Sept. 58.6 in. P. <5000.

Chikapa, riv., Portuguese equatorial Africa, flows N. into the Kassai, which it joins just above the Pogge Falls, in about 20¾° E.

Chikballapur, tn., India, Mysore, 36 m. NNE. Bangalore. P. (1881) 9100.

Chikishlyar, military post and chief tn. of dist., Russia, Transcaspian terr., on SE. shore of Caspian Sea, 200 m. SSE. Krasnovodsk.

Chikmagalúr, tn., India, Mysore, on Yagachi R., 71 m. ENE. Mangalore. P. (1871) <3000.

Chiknáyakanhalli, tn., India, Mysore, 72 m. WNW. Bangalore. P. (1881) <4000.

Chikoi, riv., E. Siberia, r. bk. trib. of Selenga, flows from Yablonovoi Mts. in a wide fertile valley; 270 m.

Chikorl, tn., India, Bombay Presidency, dist. and 42 m. NNE. Belgáum. P. <5000.

Chikou, tn., China, prov. and on the Gulf of Pechili, 45 m. SSE. Tientsin.

Chikugo, a kuni or old prov., Japan, now included in Fukuoka ken.

Chikurindi, tn., Portuguese E. Africa, on the r. bk. of the Zambezi, 30 m. E. Zumbo.

Chikut-cho, lake, Tibet, N. of 31° N., W. of 88° E., drained northwards.

Chikuzen, a kuni or old prov., Japan, now included in Fukuoka ken.

Chikwawa, govt. stn., Brit. Nyassa-land, S. Africa, on the Shire, 23 m. SW. Blantyre, with which it is now connected by road, 2 m. above Katunga.

Chilambaram, more correctly **Chittambalam,** 'the atmosphere of wisdom,' tn., Brit. India, Madras, dist. S. Arcot, 21 m. S. by W. Cuddalore; during the wars of the Karnatic considered of considerable strategical importance. Its temples, the principal sacred to Siva, are held in highest reverence throughout Southern India and Ceylon. Entered in the census as **Chidambaram.** P. 18,600; Hindus, 17,400.

Chilapa, tn., Mexico, state Guerrero, 65 m. NE. Acapulco. P. 4000.

Chilas, tn. and fort, on the l. bk. of the Indus, 35 m. S. by W. Gilghit, cap. of a small state stretching N. from the frontier of Kashmír to the Indus.

Chilaw, in old Portuguese spelling **Chilao,** tn., Ceylon, NW. Prov., 44 m. N. Colombo, with pearl fisheries. Destroyed by the Portuguese in 1565. P. <4000.

Chilbolton, par., Eng., Hampshire, Andover div., on the Test, 8½ m. NW. by N. Winchester, 1 m. ENE. Fullerton Junc., P.O. P. <500.

Chilca, tn., S. America, Peru, dep. and 40 m. SE. by S. Lima.

Chilcat Inlet, Alaska. See **Lynn Canal.**

Chilcoh, lake, Canada, Brit. Columbia, crossed by 51½° N., and W. of 124° W., drained NE. by the Chilcoh R. into the Chilcotin, trib. of Fraser R.

Chilcomb, par., Eng., Hampshire Petersfield div., 2 m. ESE. Winchester. P. <1500.

Chilcombe, par., Eng., Dorsetshire, W. div., 10½ m. W. Dorchester, 3½ m. E. by S. Bridport. P. <250.

Chilcompton, par., Eng., Somerset, N. div., 7½ m. NE. by E. Wells, on the M. R., P.O. P. <750.

Chilcoot Inlet, Alaska. See **Lynn Canal.**

Chilcoot Pass, pass, Alaska, in 59° 45′ N., 135° 15′ W., connecting the basin of Yukon R. with Taiya Inlet.

Chilcote, par., Eng., in a detached part of Derbyshire, S. div., 7 m. NE. Tamworth, 3 m. W. Measham stn. P. <250. See **Clifton Campville.**

Chilcotin, riv., Canada, Brit. Columbia, flows on the whole WSW. and joins Fraser R. in about 52° N.

Childerditch, par., Eng., Essex, Chelmsford div., 6½ m. E. Romford, 1 m. WSW. of E. Horndon stn. P. <250.

Childerley, par., Eng., co. and 6½ m. WNW. Cambridge, 4½ m. SW. by W. Oakington stn. P. <250.

Childer Thornton, par., Eng., Cheshire, Wirral div., 8 m. SSE. Birkenhead, close to Sutton stn. P. <750.

Child Okeford, par., Eng., Dorsetshire, N. div., 12½ m. E. by S. Sherborne, 1 m. NE. Shillingstone stn., PMT.O. P. <1000.

Childress, co., U.S., Texas, in the NW., on the E. frontier, S. of 35° N.

Childrey, par., Eng., Berkshire, div. and 10 m. SW. by W. Abingdon, 2 m. S. Challow stn., PMT.O. P. <500.

Childs Ercall, par., Eng., Salop, Newport div., 14 m. NE. by E. Shrewsbury, 3½ m. ENE. Peplow stn., P.O. P. <500.

Childs Hill and Cricklewood, stn., Eng., Middlesex, on the M. R., 6 m. NW. by W. St. Paul's, London.

Childs Wickham, par., Eng., on the N. border of Gloucestershire, Tewkesbury div., 3½ m. SE. Evesham, P.O. P. <500.

Childwall, par. and tn., Eng., Lancashire, Bootle div., 4½ m. ESE. Liverpool, on the Cheshire Lines Rly. P. <250.

Chile (native name, in the 16th century, for the central part of the present rep.), occupies a very long and narrow strip of land (half larger than Great Britain) stretching nearly 40 degrees N. to S. (17°–56° S. lat.), between the summits of the Andes and the Pacific Ocean, with a width varying from 90 m. (33° lat.) to 110 m. (38° lat.), forming, as a whole, a plane of double inclination from N. to S., and from E. to W. It is divided into provs., as shown in the following table:—

Provinces.	Area in sq. m.	Pop. in Thousands, 1885.	Pop. per sq. m.
Tacna	8,687	30	3.4
Tarapaca	19,306	45	2.3
Antofagasta	72,202	34	.5
Atacama	28,379	64	2.2
Coquimbo	12,905	176	13.6
Aconcagua	6,332	...	22.8
Valparaiso	1,659	...	122.4
Santiago	5,223	330	63.1
O'Higgins	2,524	88	34.7
Colchagua	3,975	156	41.0
Curicó	2,913	100	34.3
Talca	3,678	133	36.3
Linares	3,489	111	31.7
Maule	2,931	124	42.4
Ñuble	3,556	150	42.2
Concepcion	3,535	182	51.6
Bio-Bio	4,158	102	24.4
Arauco	4,247	74	17.3
Malleco	2,857	59	21.2
Cautin	3,128	33	10.6
Valdivia	8,315	51	6.1
Llanquilhue	7,822	63	8.0
Chiloé	3,995	73	18.4
Magallanes	75,291	2	.03
Total	290,827	2,527[1]	8.7

[1] The total enumerated pop. in 1875 was 2,075,971, but the Census Commission believed that 10 per cent. of the pop. escaped enumeration. Probably a larger proportion escaped enumeration in 1885.

The lands around the Straits of Magellan, with half Tierra del Fuego and Cape Horn Is. (including Diégo Ramirez Is.), belong to C. Provs. of Tacna and Arica, from riv. Sama to riv. Camarones, were ceded by Peru to C. for 10 yrs. (1883–93), at the end of which a plebiscite was to decide their definitive nationality. (See **Peru, Bolivia, Argentine.**) **Regions and Orography.**—C. is naturally divided into three regions, each occupying one-third of the entire length, from N. to S.: (1.) The N. saline Pampas, from Peru and Bolivia to Copiapó, traversed by volcanic highlands, which sometimes reach the coast, but showing from N. to S. a central longitudinal depression, with salt masses (*Salares*) in the beds of old lakes (Huasco, Coposa, Atacama), and nitrates (*salitrales*, in some parts, 1000 sq. m., 10 ft. thick) on the plateaux and slopes along the Coast Cordilleras, where the rivers disappear. The riv. Loa divides the first region in two, and the Pampa of Tamarugal from the Atacama desert. (2.) The central old C., which is the economical and political centre of modern C., as far as Valdivia, well-watered by permanent rivers, populous, agricultural and industrial. From this region, down to the extreme S., there are two parallel mountainous zones (the Andes and the Coast Cordillera), with a deep depression between, which becomes the *valle central* ('central valley'), an old lacustrine bed, and is continued, in the third region, by a still existing lake region and a series of channels. (3.) The fjord, glacier, and insular region, to the Cape Horn, with numerous and large lakes in the N., gradually becoming fjord-like gulfs. South, the central Cordillera forms the continental E. lands to the Strait of Magellan, Tierra del Fuego, and States Is. (**Argentine**), while the Coast Cordillera shows itself in the islands from Chiloé to the Cape Horn (1400 ft.), with *cerros* 3000 and about 4000 ft. high. All the islands of the fjord region are the highlands of five partly submerged peninsulas: (*a*) Chiloé group (*Chil-hue*, 'part of C.'); (*b*) Taytão-Chonos-Guayteca group; (*c*) Madre-de-Dios—Norths' group; (*d*) Queen Adelaide's group; (*e*) Tierra del Fuego group. The third is the forest region. Mountainous connections between the Central and Coast Cordilleras are frequent in the first and N. part of second region. Between the zone of the highest summits of the Andes (Mercedario, Aconcagua, Juncal) and that of the Coast Cordillera, often cut by the rivers running from the Andes to the sea, the *valle central* (length, 581 m.; mean width, 308 m.) is uninterrupted. (See **Andes, Chilean-Argentine** and **Patagonian.**) **Hydrography.**—In the first region rivers are generally wadies; they become lakes and fjords in the third. N. of the riv. Loa, rivers run straight towards the coast. As the two parallel Cordilleras become more distinct, rivers have many branches and bends (Maipo-Mapocho, Rapel-Cachapoal, Maule-Claro-Perquilauquen, Bio-Bio, the longest, 220 m. with the Antuco-Laja Falls). Fluvial navigation is limited by the falls at the crossing of the two Cordilleras. S. of the Choapa, rivers are abundant and regular. S. of Bio-Bio the rivers flow, as a rule, from lakes which gradually become fjords and gulfs, useful for interior navigation. Some of the rivers of the third region come from the E. slopes of the Andes. The isl. of Chiloé is separated from the peninsular lands of Llanquilhue-Carelmapu only by the channel of Chacao. Further S., between the islands and the continent, the depression of the *valle central* is represented by gulfs (senos) and canals. Hundreds of channels, between hundreds of islands, surround the S. extremity of the continent. The most important are the Straits of Magellan (347 m. long), between the continent and the last group of insular lands, and the Beagle Channel, between Tierra del Fuego and Cape Horn Is. **Geology.**—The Coast Cordillera is the oldest. From the S. of first region to Cape Horn the formations are Archæan (Laurentian and Huronian gneiss, granite, and schist), and Palæozoic (in the S. islands). Old Mesozoic rocks exist to the N. The ranges connecting the two Cordilleras, where the principal metallic deposits occur, are more recent than the Coast Cordillera, the Central Andes being the youngest of all (Mesozoic, Cretaceous, sandstones with metamorphic porphyries). Jurassic formations are to be met with from the centre of the second region far into the first, and from the *valle central* to the summit of the Andes. Tertiary rocks (with lignite at Talcahuano-Concagua), lie on the Archæan formations of the coast and along the *valle central* (sandstones and clays) from Santiago to Reloncavi, covered by more recent alluvial deposits and transported rocks from the Andes. Great alluvial deposits in the *Salares* region. There seems to have been two glacial periods in the S. Volcanic rocks occupy large spaces. Many volcanoes are still active. Violent earthquakes (ninety in one year) in the second region and the extreme N. (Arica). Considerable actual upheaval all along the coast. **Mineral production.**—The first is the mining region of C. It is covered with nitrates (Tacna, Pisagua, Iquique, Patillos, Cachinal, 225,000 ac., with 2316 million tons; production in 1830, 1380 tons; in 1891, 870,000), borax (Arica, Chañaral), and salt (Atacama, Punta Negra). Silver (mined since 1556, at Huantajaia) is plentiful (Tacna, Copiapó, Caracoles, Placilla, Mejillones, Antofagasta, Chañaral, 335,000 lbs. annually). C. copper (Rebenton, Carrizalillo, Chañaral, Carrizal, Yerbabuena, and Lebu, in the second region), forms one-sixth of the total consumption of the world (foundry at Tocopilla). Meteoric iron at Copiapó (Imilac). Gold in river sands (from the 16th century to 1888, £40,000,000; now 1000 lbs. annually), and at the Straits of Magellan and in Tierra del Fuego. Coal abundant near Arauco (lignite, at Coronel, Lota, Lebu, worked since 1855, present annual production more than 10,000,000 tons), and at the Strait of Magellan (Punta Arenas). Manganese, lead, mercury, are met with. Sulphur in the craters of old volcanoes (Copiapó, Tuiguiririca, Chillan). Numerous thermal springs (Cauquenes). **Climate.**—C. is between isotherms 64° and 42° F. The Andes check the influences from the E. Seasons become gradually distinct, and mean temp. diminishes 1° per degree of lat. from N. to S. In the same lat. the mean temp. in C. is 6° F. lower than the temp. on the E. coast. Rain (winter) augments from N. to S. There is a cold polar current from S. to N. along the coast. SW. is the dominant wind (spring, summer), becoming warmer and dry northwards. N. winds (winter) become cold and damp southwards. Winds, alternately cold and warm, blow from the Argentine pampas (*terrales*, *puelches*). Storms from SW. In the first region great differences of temp.—70°–90° between day max. and night min.; very dry (Iquique, mean temp. 66°, rain 0.1 in.). There is sometimes no rain in Atacama for fifty years; in Copiapó it rains about once a year. Dews are frequent. The second region is temperate (Valparaiso, 5 yrs., med. temp. 57°, 25 days' rain, 13 in.; Santiago, 5 yrs., med. temp. 55°, 21 days' rain, 16½ in). Rains, April to October. The third region is very damp (Valdivia, 27 yrs., med. temp. 51½°, rain, 8 ft. in 150 days; Straits Magellan, mean temp. 5°, 175 rainy days; Cape Horn, 300 rainy days, 9 ft. in 41 days). See also **Andes,** snow-line. **Flora.**—Large areas in the first region are without plants. To the S. thorny shrubs prevail. S. of Copiapó, trees begin to appear on the Cordilleras. Woods begin in the middle of second region. S. of riv. Maule the whole surface is covered with forests. From 32°–35° is the region of the only palm-tree (*Jubœa*, almost extinct). In the Araucania, the Piñon (*Araucaria imbricata*, 36°–40°). S. of the second, and all over the third region to Cape Horn, dense forests, with great variety of species. In the third region (from 40°) begin the antarctic forests. The potato (*Papas*, *Poñis*) is a native of third region. **Fauna.**—C. forms part of the temperate zone of the neotropical zoological region. The Vicuña is only found in the extreme N. The Guanaco (to 16,000 ft.) in the first and second region. The Chinchilla is limited by 12,000 ft. alt. and the 32° lat. *Cervus chilenses* (Huemul Guelmul) is to be met on the Andes, the *C. antinensis* on the extreme S. **Ethnography.**—From the 15th to the 16th century the native people of C. (Picun-che 'Men of the N.') were conquered by the Quichua (Incas) to the riv. Maule. S. (to 40°), the inhabitants were the Moluche, Puelche, or Pehuen-che (Pehuen, native name of **Araucania**). From the 40th parallel the Guilliches (guilli, 'south'); the Cunchos, on the Chiloé Is.; Chonos or Guaytecas on the islands. The Pehuen-che were neither conquered by the Quichuas, nor by the Spaniards, who in the 16th century submitted the latter and called the former Araucanes (aucas, in quichua, 'rebels'). The oldest known inhabitants of Magalhães and Fuego lands seem to have been the Alakaluf (W.) and the Yamana ('small men,' S.). The Ona ('tall people') are old emigrants from Patagonia. **Means of Communication.**—C. was the first state in S. America to build railways. In the first region railways connect the mines with the ports. One (Antofagasta) goes as far as Bolivia. In the second they connect the centres of population along the *valle central*, one to the other and to the exterior world. In the third they only exist in the N. as the mere continuation (to the fjord region—Santiago, Victoria, Puerto Montt) of those in the *valle central*. The Valparaiso, Mendoza, Buenos Aires crosses (at 10,400 ft.) the whole continent. **Agriculture** is only temporarily possible in the first region, when the thick saline efflorescences are removed (*cauchones*). Regular culture begins in the Huasco valley, and is seen at its best in the second, and N. of third region (Coquimbo to Chiloé). Principal productions are: Indian corn, wheat (27,000,000 bushels), barley, oats, beans, beet-root, tobacco, fruits (oranges, figs, pomegranates, olives, grapes), silk (11,000 lbs.). C. furnishes with corn-flour the Pacific States (2,000,000 hectolitres per year). In the second region (S. of Huasco) vines, introduced since the 16th century, are very productive (2,500,000 gallons of wine). Cider is largely manufactured. Good timber (third region). Cattle (500,000), horses, asses, mules, sheep, goats are reared. All the **industries** connected with mining are much developed. The most important industrial centres formed themselves around the Arauco coal region. There are manufactures of glass, wool and linen, paper, earthenware, leather, soap, sugar, brandy. Extensive deposits of guano (along the coast of first region) have been explored. **Commerce** is mainly with Great Britain (44 per cent. of all import, and 68 per cent. of all export); next with Germany, France, United States, and

Peru. The export is principally of mining, animal, and forestal extractive products. Dress articles, machinery, arms, jewellery, wine, and tobacco are imported. The ports open to foreign trade (*habilitados*) are: Arica, Pisagua, Iquique, Tocopilla, Antofagasta, Taltal, Caldera, Carrizal Bajo, Coquimbo, Valparaiso, Talcahuano, Coronel, Corral, Puerto Montt, Ancud. Punta Arenas (Straits of Magellan) is free. Three-tenths of the whole navigation is English. The decimal metric system of weights and measures is the legal one, but the old Spanish measures are still in general use. (See **Bolivia.**) The silver *peso* is the unit = 3s. 9d. Gold *condor*, *medio condor*, or *doblon*, *escudo* of 1, 2, 5, 10 *pesos* (5-*pesos* piece with 6.8639 grains of fine gold). From 1st July 1895 the gold *peso* will be the unit. The *doblon* (= 10 *pesos*) will be equal to the English sovereign. Silver coinage only legal to 20 *pesos*. **Population.**—The second region, forming old Spanish C., with the capital, Santiago, and the most important port, Valparaiso, is the populous centre. The first and third regions are thinly populated. There are colonies of Germans and Swiss in the latter. Great immigration of Italians and Chinese, the latter only into provs. Tacna and Arica. Many English (some 5500), mostly merchants and miners. **Public Institutions.**—The President is elected for five years by indirect vote. Parliament of two elected chambers (one deputy for 15,000–30,000 inhabitants, one senator for three deputies). Principal revenues from import and export duties and agricultural taxes. The Roman Catholic is the official religion; the exercise of all others is permitted. There is State instruction; thirty per cent. of the whole population attend the schools. **History.**—In the 16th century (1534) the King of Spain granted to Almagro the lands of Nuevo-Toledo (C.) S. of Peru. In 1540 Valdivia laid the foundation of Santiago. The war with the Araucanians lasted more than one century (1641). The war of independence against Spain lasted from 1810 to 1826. The independence of the country, proclaimed in 1818, was at last recognised by Spain in 1846. The constitution was proclaimed in 1833. War was waged with Bolivia and Peru from 1879–84, and in 1891–92 the country was in a state of civil war. The Straits of Magellan are neutral. See **America, 8.** [**J. B. E.**]

Chile, ancient *Notion Kolophon*, seapt., Asia Minor, prov. and 29 m. S. Smyrna.

Chilecito, tn., Argentine Republic, Rioja, 179 m. NNE. San Juan, 45 m. WNW. Rioja, in 29° 12′ S. Alt. 3525 ft. Mean rainfall, yr. 11.9 in., April–Sept. 1.6 in.

Chiloane, isl. See **Chiuan.**

Chiloango, or **Chilwango,** riv., W. Africa, flows W. into the Atlantic, forming part of the S. frontier of the French Congo Terr. Also the name of a terr. to the N. of the mouth of this river.

Chiloe, isl., W. ct. of S. America, which, with several smaller islands, forms a prov. of the Chilean Republic. It is separated from Patagonia by Gulf of Ancud, and extends from 44° 40′ to 43° 20′ S., 74° W. It is 95 m. in length, and 35 m. in breadth. It is hilly and densely wooded, except around the coast, where it is partially cleared and cultivated. Climate temperate, but moist. Produces excellent potatoes in great abundance. Discovered by the Spaniards in 1558. Castro, the ancient capital, was founded in 1566. Ancud is now the chief town and port. The archipelago consists of upwards of sixty small islands, about thirty of which are inhabited, and several are well cultivated. See **Chile.**

Chilomo, Nyassaland. See **Chiromo.**

Chiltepec, tn., Mexico, state and 83 m. SSE. Vera Cruz.

Chiltepec, an arm of the R. Tabasco, Mexico, leaves the main stream at San Juan Bautista, and after a N. course of 60 to 70 m. enters the Gulf of Mexico, 30 m. WSW. La Frontera.

Chiltern, tn., Victoria, Bogong co., 23 m. W. by S. Albury. P. <1500.

Chiltern Green, stn., Eng., Bedfordshire, div. and 3 m. SE. Luton, on the M. R.

Chiltern Hills ('chalk place'), a range of chalk hills, Eng., extending from Goring in Oxfordshire through Bucks to Tring in co. Herts. The main line of the G. W. R. passes round their SW. end between Reading and Didcot, and that of the L. & NW. R. by their NW. end between Berkhamstead and Leighton Junction. The only line crossing the range is the branch of the G. W. R. from High Wycombe to Thame. The name of the range is however sometimes extended so as to include the heights to the NE. of Tring as far as the S. of Cambridgeshire. The region is said to have been formerly covered with a forest, some traces of which are extant, and it was notoriously infested with depredators, to suppress whose ravages the office of 'stewards of the Chiltern hundreds' was established under the crown. The duties of the office are now only nominal, but the recognition of them is retained to enable members of the House of Commons, by accepting them under the crown, to relinquish their seats in that assembly, which a member cannot do except in this or a similar manner. Breadth from 15–20 m. Alt. of principal summit near Wendover, 820 ft.

[1] Sinkiang, Mongolia, Tibet, and the Kuku-nor region.

The area of China proper, as shown in the preceding table, is almost one-eleventh less than that of Europe exclusive of Russia, and its pop. is not far short of that of the entire pop. of Europe. It is in comparison with Europe rather than any other individual country that nearly all facts about China, whether in the nature of parallels or contrasts, should be considered. **Form, Natural Limits, and Coast-line.**—By way of contrast, it should be noted that the whole country is compact. Apart from the two large islands of Hainan and Formosa, it forms one great continuous area. There is only one large penin., jutting beyond the general outline of the coast. The irregularities of the coast-line, except in the great estuaries of the Yangtse-kiang, the Gulf of Hangchou, and the Canton R., are only small indentations. In the N., round the Gulf of Pechili and on the Yellow and China Seas as far S. as the Gulf of Hangchou, these are rare except in the Shantung penin., and even there not many of them are convenient for shipping. S. of the Gulf of Hangchou, on the other hand, the inlets and small coast islands are innumerable, forming great numbers of good harbours for Chinese junks if not always for large shipping. Inland, China proper is cut off in a very striking manner from the rest of Asia. On the N. is the great desert of Mongolia, accessible only by a few mountain passes; on the W., the vast and lofty tablelands of Tibet; on the SW., a succession of high mountains and deep valleys shutting it off from India; and in the S., a less complicated mountain region separating it from Indo-China. The degree to which it is isolated in these directions will be better understood when the surface features have been described. Only in the NE., where China borders on Manchuria, the southern part of which is now administered entirely as a Chinese prov., is there easy communication by land. **Surface.**—One of the most remarkable features of C. is a great plain in the E., stretching S. from the mountains N. of Peking to the lower valley of the Yangtse-kiang, through 8° of latitude, with a breadth varying from 3° to 5° or 6° of longitude, and comprising also the penin. between the estuary of that river and the Gulf of Hangchou. It is the margin of this great plain that forms the monotonous coast-

line already mentioned, and the only interruption to it, and that merely a partial interruption, consists in the mountainous area that juts out in the penin. of Shantung ('eastern mountains'), where the coast-line, as we have seen, is more irregular. In all other parts of C., mountains and other highlands prevail, but with great contrasts in different parts. The plain W. of the Gulf of Pechili and the Shantung penin. is bounded on the N. by a succession of mountain ranges with an E. to W. trend, the last (northernmost) of which forms the outer escarpment of the plateau of Mongolia. Across these mountains there leads only one road from Peking, namely, that proceeding NW. by the Nankou Pass and the town of Kalgan, and the Nankou Pass is incapable of being used by carts. On the W. this part of the plain is bounded by the steep escarpment of the elevated and mountainous prov. of Shansi ('western mountains'), across which also there is only one road, and that traversable only with difficulty by carts, in wet weather not at all. This road leads SW. up the Hwolu Pass, thence to Taiyuen-fu, the cap. of Shansi (in the middle of prov.), and then to Tungkwan in Shensi, just outside of the SW. angle of Shansi, where the Hwang-ho receives the Wei and abruptly changes its course from S. to E. The broad, rich longitudinal valley of the Wei which this road now enters is one of the most important physical features in C. The road proceeds first W. to Singan-fu, which has always been the chief town in this region, and at one time was the cap. of the country, then WNW. to Lanchou, a little to the W. of that crosses the Hwang-ho, and then proceeds NW. by Liangchou, Suchou, and Ngansichu (the last a little to the W. of 96° E.), whence it crosses the desert by the shortest route, that leading to Hami and Dzungaria, N. of the Tianshan (Tian-shan-pe-lu), or westwards from Hami, S. of the Tianshan (Tian-shan-nan-lu), to Yarkand and Kashgar. Between Singan-fu (1500 ft.) and Lanchou (5500 ft.) the road crosses several passes, one, Liu-pin-shan, at an alt. of 8840 ft., and in places passes through defiles so narrow that there is no room for two carts to pass one another; before reaching Liangchou the pass of Wusoling (about 10,000 ft.) is crossed, and another pass 8750 ft. high has to be crossed before reaching Suchau (4800 ft.). Coming eastwards one has a few alternative routes after passing Liangchou, but there is no entrance into the NW. of C. from Eastern Turkistan or Dzungaria to the W. of the Suchou-Liangchou-Lanchou route, that route skirting the base of the Nanshan mountains which form the N. and NE. border of the Kuku-nor plateau,—a plateau above 10,000 ft. in height, and hence impracticable for ordinary traffic or as a military route. To the S. of the Wei valley the Tsinling-shan (*q.v.*) range continued E. into Honan, S. of the Hwang-ho, by the Funiu-shan, forms a great barrier between the N. and S., being crossed only by mule-tracks leading into the valley of the Han-kiang, one near its head, and the other by the valley of its trib. the Tan-ho, the great route from Singan-fu south-eastwards. To the S. of the valley of the upper Han-ho, which runs E. and W. parallel to that of the Wei, there lies an assemblage of valleys and hills, some of the valleys of considerable breadth, forming together a region of immense agricultural and mineral wealth, but as much isolated from the rest of C. as C., as a whole, is from the rest of Asia. This is the basin of eastern Süchwan traversed by the Min, To, and Kialing, with their numerous affluents, on the l. or N. bk. of the Yangtse-kiang, and by the Nan-kwang, Yungning, Chihshui, and Sung-kan, on the r. or S. bk. On the N. this basin is separated from the Han-kiang valley (Shensi) by the Tapa-shan range, but the Kialing passes through a breach in the mountains by which a road leads to Hanchung, whence the mule track across the Tsinling-shan forms the only communication with N. China. All the roads leading W. from this basin cross a succession of hills and valleys and converge at Tachienlu (alt. 8400 ft.), whence the sole road proceeds W. by Litang and Batang across difficult passes into Tibet. The roads leading eastwards are also difficult, so that all commerce is carried on by means of the Yangtse-kiang, though the navigation of that river is here greatly impeded by the rapids occurring between Chungking and Ichang [**Yangtse-kiang**]. To the S. and SW. of this basin lies a region nearly conterminous with the prov. of Yünnan and the W. part of the prov. of Kwei-chou, consisting of a broken plateau with an average height of about 5000 ft., having no level surface except an occasional lake-basin, and no communication by water with the lowlands that encompass it on the N., S., and E., its outer margin breaking away precipitously to the valleys of the Yangtse-kiang on the N., and the Irâwadi, Mekong, and Song-koi (Red R.) on the W. and S., and somewhat more easily to that of the Si-kiang (W. River) and to the plains of Kwangsi and Hunan on the S. and E. Several roads lead from the Süchwan basin across this plateau. One, the westernmost, leads across a pass 9700 ft. in height to the Kienchang valley (W. of a mountainous region inhabited by independent Lolos) to Yung-pei-ting and Talifu. Three others terminate in Yünnan-fu, one ascending the Nankwang R. from Suifu, and then proceeding by Tungchwan-fu, and keeping entirely within the provs. Süchwan and Yünnan, another ascending the Yangming and passing through the W. of Kweichou, descending and ascending the sides of a tremendous chasm as it enters that prov., and the third proceeding S. from Chungking by Tsuni-fu to Kweiyang-fu (the cap. of Kweichou), and thence WSW. to Yünnan-fu. But all these routes, including that to Tali-fu, pass through such mountainous country that it is very doubtful whether trade can ever pass by any of them to the lowlands lying beyond the intervening plateau. The remainder of C., comprising the provs. to the S. of the Yangtse-kiang (in the extreme E. to the S. of the Gulf of Hangchou), and to the E. of Süchwan, Kweichou, and Yünnan, and including the E. portion of Kweichou itself, forms a highly varied region of mountains, hills, and valleys, the latter in some places expanding into considerable plains, and in which the rivers are mostly navigable nearly to their source and form the principal means of communication. Looked at broadly, the N. of China is characterised by the prevalence of a yellow earthy deposit of great fertility termed lœss, believed to have been carried thither by wind from the highlands of central Asia. It fills the valleys and hollows between the mountains sometimes to a depth of thousands of feet, and is apt to weather away in such a manner as to form terraced perpendicular precipices. The narrow defiles through which, as above-mentioned, the roads are sometimes carried in the NW., are formed of this material. Being soft it is easily washed away from the banks of rivers, so that the rivers are apt to spread over wide channels, to change their course frequently, and to get their beds encumbered by shoals. Hence, partly from this circumstance, partly from their impetuosity, few of the rivers of the N. are navigable. In the NW. (beyond Singan-fu) there are neither navigable rivers nor canals. It is to its lœss sediment that the Hwang-ho (Yellow R.) owes the colour from which it derives its name. In S. China the lœss is generally absent. All the chief **rivers** of C. have a general course from W. to E. The three longest are the Hwang-ho or Yellow R. in the N., the Yangtse-kiang in the middle, and the Si-kiang or West R. in the S. The first two both rise within no great distance of one another on the lofty tableland of eastern Tibet. In character they differ greatly. The Hwang-ho is of little utility, and one of the most unmanageable rivers in the world. It is a characteristic river of the lœss region, with a broad, shallow bed, difficult to navigate, and apt to shift its course. Well called 'China's sorrow,' it has on many occasions caused immense destruction and loss of life by bursting its banks and causing widespread inundation, and at the same time changing the last 300 m. of its course through an angle of 60°, sometimes entering the sea to the S., sometimes (as now) to the N. of the Shantung penin. In its course through the plains accordingly there are few important towns on its banks. All the great towns lie at the distance of several miles from the river. The Yangtse-kiang, on the other hand, is the great navigable artery of C., unsurpassed in importance in this regard by any other river in the world, and having on its banks a more remarkable succession of large towns than any other river can show. Large ocean steamers can ascend to Hankow, and even to Ichang, in about 111° 20′ E. and about 1100 m. above the mouth, but just above Ichang the navigation is seriously impeded, though not altogether interrupted, by the series of rapids already referred to. The minor arteries connected with it add greatly to its importance as a navigable stream, and all the more since they bring down traffic from great distances N. and S. On the l. or N. bk. the principal trib., and the only one of importance below the rapids, is the Han-kiang, navigable from its mouth at Hankow to southern Shensi near its source, and having navigable feeders also entering it from the N. The principal tribs. above the rapids have already been mentioned in connection with the basin of Süchwan. On the r. or S. bk. two of the principal tribs. flow almost at right angles to the general course of the main stream, the Kia-kiang affording a waterway from Kiu-kiang almost to the S. frontier of the prov. of Kiangsi, and the Siang-kiang, with one of its tribs. navigable from the Tongting Lake nearly to the frontier Hunan, both forming important parts of the commercial routes from the Yangtse-kiang to Canton. The Lo-kiang is an important navigable affluent of the Siang-kiang from the SW., and the Tongting Lake also receives from the SW. the Yuan-kiang, which is the great waterway to eastern Kweichou. The Si-kiang, on the delta of which Canton stands, is the great waterway of the S., having navigable waters connected with it leading to nearly all parts of the provs. of Kwang-tung and Kwangsi. Above the confluence of the Hunshui (*q.v.*), the affluent giving access to the N. parts of Kwangsi, its navigation is impeded by numerous rapids, still it serves as waterway along both its two headwaters, the Yu-kiang or Right R. (or as it would be called in the United States, the N. Fork), which is navigable up to the eastern frontier of Yünnan, and the Tso-kiang or Left R., which is navigable to the frontier of Tongking, just above Lung-chou. Of its l. bk. tribs. below the Hunshui, the Fuho forms the waterway from Wuchow N. into Hunan, being connected by canal with the Siang-kiang, and the Pe-kiang (*q.v.*) or North R. forms that from Canton

towards Hunan and Kiangsi. Of the rivers not connected with the three great streams, the chief are the Laumu-ho, flowing S. into the Gulf of Pechili, those which unite to form the Pei-ho or river of Tientsin, flowing E. into the same gulf, and the Hwei-ho, flowing E. between the basins of the Hwang-ho and Yangtse-kiang, through Lake Hongtse, and entering the Yellow Sea by a channel which is in reality one of the old beds of the Hwang-ho. The principal **lakes** of C. belong to two groups, one in the eastern plains, the three largest being the Tai-hu, between the estuaries of the Yangtse-kiang and the Hangchou R., and the Kao-yu-hu and Hongtse- or Hungtse-hu just mentioned, N. of the Yangtse-kiang; the other group occupying the angle between the rivers Han-kiang and Yangtse-kiang and the other plains adjacent, the two largest lying S. of the Yangtse-kiang, and receiving respectively the drainage of the provs. Kiangsi and Hunan, the Poyang-hu connected by a short outlet with the Yangtse-kiang at the S. of the great bend of the river between Nanking and Hankow, the Tangting or Tungting-hu, connected with the same river by another short inlet at the S. end of the bend of the river between Hankow and Ichang. There are two smaller but still considerable lakes in Yünnan, with the towns of Yünnan-fu and Talifu on their banks. There is so far a great lack of data to illustrate the **climate** of China. The Europeans to whom meteorological observations are due, have mostly been stationed in places near the coast. In the following table the only stations far inland are Hankow and Chungking, and the observations at Hankow refer to a period of only four years (1877–81), those of Chungking to an interrupted period of four years (1877–80); the average never being computed for more than three of these years, whereas in the other cases, except Canton, which is for four years, and Zikawei (near Shanghai), which is for twelve years, the average is for fifteen years:—

	N. Lat.	Mean Temperature.		
		Year.	Jan.	July or Aug.
Peking . . .	39°	53.3° F.	23.4° F.	79.3° F.
Tientsin . . .	39° 10′	55.2	26.9	81.2
Zikawei . . .	31° 13′	59.4	36.9	81.1
Hankow . . .	30° 35′	62.2	37.9	84.0
Chungking (845 ft.) .	29° 34′	64.2[1]	44.5[1]	82.6[1]
Canton . . .	23° 15′	70.3	54.6	82.3
Hong-kong . .	22° 20′	73.5	59.6	84.5

[1] At 9 A.M.

The range of temperature even on the coast within the tropics is noteworthy. Both the inland stations, though within about 7° of the tropics, show genuine winter temperatures, that of Hankow in January below that of London. Rainfall figures for coast places are even more inadequate than those of temperature for illustration of the climate of the country. It may be said, however, in general terms, that throughout China proper the rainfall is generally sufficient for agriculture, and that even in the northernmost parts of the country the influence of the causes that produce the monsoons is manifested in the prevalence of rainy sea winds in summer and dry land winds in winter. **Agriculture** is pursued throughout the empire with great industry, intelligence, and success. Nowhere is it held in greater honour. Nowhere perhaps is more care shown in the cultivation and irrigation of the ground, the selection of seeds and of the best varieties of cultivated plants, and the utilisation of manure, above all domestic manure. Small holdings and spade husbandry are the general rule, and large numbers of plants are first sown in seedling-beds, and the seedlings carefully selected and transplanted. The soil and climate combine with this industry to bring forth remarkable abundance in many parts of the country. The lœss soil, as above stated, is of remarkable fertility, but to exhibit all its productiveness it has to be found in the plains. On high ground, where the lœss lies to a great depth, repeated rains are necessary, as the extreme porosity of this soil allows of the surface water rapidly sinking into the ground, and thus becoming lost to vegetation. But in the plains, and especially in those parts which are inundated and coated with a new surface of lœss every year, as some parts are, the productiveness is extraordinary, and according to Richthofen such dists. (as in the N. of Honan) are probably unsurpassed as respects their capacity for maintaining a dense population. In some parts of these flat plains percolated water is always to be reached at the depth of a few feet, and a well is hence found in every field, as in the middle parts of the Ganges valley in India. Though the lœss does not show its full productiveness except in the lowland plains, it is nevertheless cultivated as high as 8000 ft. above sea-level, whereas in the S. of China, where the lœss is absent, agriculture is mostly confined to the plains and valleys, and to artificial terraces cut out in the lower slopes of the mountains. [See, however, **Süchwan.**] As regards **products**, N. China is the land of wheat, millet, cotton, and pod fruits; the S., of rice, tea, silk, sugar, opium, indigo, and other tropical or sub-tropical products. Some of these are, however, spread over all parts of the empire. Opium, for example, is now grown in all the provs., and its cultivation is rapidly extending in the NE. as well as in the SW. (Yünnan, &c.), where it has long been practised. Varieties of rice are cultivated in the extreme N. Silk is most abundantly produced in Kiang-su and Chekiang, next in Kwangtung. The most productive tea dists. are all S. of the Yangtse-kiang, but tea is also largely grown in W. Süchwan N. of that river, where it is largely manufactured into 'brick-tea' (tea compressed into brick-shaped cakes, a form in which it is largely exported to central Asia). Green tea, which is merely a special preparation of the leaves of the same plant as that which yields black tea, is most largely produced in the N. of prov. Chekiang. Kitchen vegetables, oil-plants of various kinds, and tobacco are almost universally grown—tobacco very largely by the Mohammedans of Kansu in the NW. Many lacker shrubs, from which gum varnish is obtained; the *croton sebiferum* or tallow tree, an inferior sort of cinnamon tree, rhubarb, smilax, and other herbs, are common, and the rare plant ginseng. Among the fruits are the China orange, the ly-chee, loquat, and wampee. The *nelumbium*, a large water-lily, yields edible seeds; and the camellia, the *olea fragrans*, the tree peony, and the Indian chrysanthemum, are among the most conspicuous flowers. The wild animals of China, if they ever abounded, have been long since almost extirpated; but the tiger is still known in the forests of Yünnan, and wild cats in the forests of the S. The prov. of Süchwan is specially noted for its medicinal herbs, and among its other agricultural specialties may be mentioned the care of the white-wax insect in the SW. [**Süchwan**]. Camphor is an important product of Formosa. The larger live-stock are few in number wherever the population is dense, the ground being more profitably utilised for tillage, and it is a peculiarity of Chinese agriculture, as compared with that of Europe (though not with that of some other Asiatic countries), that dairy farming (the production of milk, butter, and cheese) is unknown. Poultry, on the other hand, abound. Though the mineral production of China is as yet comparatively small, the **mineral wealth** of the country is enormous, even when compared with Europe as a whole. In point of the abundance of the deposits the first place belongs to coal, which is estimated by some to cover an area about equal in extent to that of all the other coal-fields of the world put together, and which certainly covers an area at least five times as great as the coal-fields of Europe. The production, however, is as yet trifling, partly because the richest coal-fields lie in regions difficult of access, partly because the Chinese miners have not succeeded in coping with water in the mines where mining is carried on by means of shafts. Chinese mines, accordingly, are mostly in the form of horizontal adits, or pits dug to a comparatively small depth below the surface. The tableland of Shansi (*q.v.*) is probably the richest of all parts of China in coal, bituminous coal occurring in the W., while in the E. there is a field of anthracite without a parallel in the world. Other extensive coal-fields occur in Süchwan and N. and S. Kweichou, but the difficulty of communication causes all these deposits to be utilised chiefly for local consumption. In Eastern China the principal coal deposits are in Pechili to the NE. of Peking, where mines are now worked by European methods under European direction, in Shantung, in the N. of Honan, and in the S. of Hunan, where there is a large boat traffic in coal, derived from fields on the Lei-kiang. Excellent iron ores also abound in the prov. of Shansi, in Kweichou (one of the richest of all the provs. in minerals), in Hupe, and elsewhere. Copper is very abundant in the S. of Süchwan and the NE. of Yünnan, and silver in the parts of Yünnan adjoining Kweichou. Rich lead mines occur in the N. of Shantung. Salt is largely extracted from seawater at many places on the coast, and is produced in immense quantity from brine-springs in Süchwan, principally at Tsuliu-king (between Chengtu-fu and the Yangtse-kiang) and Paiyen-king in the SW. of the prov. It is also largely produced in the northern provs. China clay and *petuntse*, the two principal ingredients in the manufacture of porcelain (a manufacture which was long confined to C.) are found most largely near the borders of the provs. of Kiangsi and Nganhwei [**King-te-chin**]. **Manufactures** are of the most varied, and often of the most exquisite description. Chinese porcelain, silks, embroidery, and lacquered wares are unequalled for brilliancy, richness, and durability; and in carved goods in tortoiseshell, ivory, and horn, in engraving, the manufacture of paper, ink, cabinet-work, and bell-casting, the whole of which are carried on without the aid of machinery, the Chinese excel. Silks, cottons, and China-grass fabrics, the last chiefly for summer wear, are largely made; woollen garments are little worn, except by the rich, cotton garments, padded and quilted, forming the general winter clothing. Hostile as the Chinese are to foreign intrusion and the introduction of modern methods of production, they have not been able to prevent their adoption altogether. The inferiority of the Chinese arms and armaments having been proved in the

wars of China with European powers, the Chinese Government first sought the aid of Europeans in the establishment of dock-yards and arsenals.. The first arsenal in China on a foreign type was begun in 1863, and now the government is building war-ships on European models at Foochow (Fuchou) and Shanghai in China proper, and at Port Arthur in Manchuria, and turning out guns and munitions of war at these places as well as at Nan-king, Tientsin, and elsewhere. Steam filatures have been erected in the heart of the silk-producing districts of Kwangtung. Cot-ton-mills (both for spinning and weaving) have been erected at Shanghai and Wuchang (opposite Hankow), and others are projected elsewhere. Large iron-works have been erected at Hanyang (adjoining Hankow), intended to utilise iron ore and coal found at no great distance near the Yangtse-kiang, and a railway 17 m. in length has been constructed from the river to the iron-mines, and other large iron-works in the neighbourhood of Kweiyang-fu, cap. of Kweichou.

Throughout the greater part of C. the rivers form the principal **means of communication.** In the NE. plains, though difficult to navigate, as already stated, they, along with canals, are still largely used, and are indeed the principal medium of commerce. In these parts, however, springless carts drawn by mules are also largely employed. N. of the Tsinling-shan range and W. of Sin-gan-fu there are no navigable rivers or canals, and carts and pack-animals, including camels, are the principal means of transport. At one time excellent roads appear to have connected distant provincial capitals with the seat of the supreme government, but though in some places well-made roads still run for long distances [**Chekiang**, and from some of the chief towns good roads radiate for short distances, the roads are now for the most part wretched, and in S. China wheel traffic is almost unknown. The **Grand** or **Imperial Canal,** from Hangchou to Tientsin, about 700 m., constructed in the first part of the 7th century primarily for the conveyance of the tribute of rice from the southern provs., still forms an important means of communication between the N. and S. in the eastern plain, though the section stretching N. from the Hwang-ho to the Yu-ho has been dry since about 1852. Away from the rivers and canals goods are generally carried on the backs of porters, and well-to-do travellers are borne in palan-quins. To the introduction of railways the Chinese government long showed a peculiar aversion, but this aversion is at last being overcome by the necessity of meeting the possibility of foreign aggression, especially on the part of Russia on the N. frontier, and foreign competition. The first railway in C. was con-structed by some English merchants in 1876 between Shanghai and Wusung, but was bought and torn up by the provincial authorities in 1877. Since 1877 a line has been laid from Taku to Tientsin, thence to the coal-mines of Kaiping, and it is now being continued further NE. towards Shanhaikwan, on the border of Manchuria, at the seaward terminus of the Great Wall. A short railway in Formosa, and the railway in Hupe already mentioned, are the only others that yet (1893) exist, but large projects have now received government sanction. The **electric telegraph** has made further progress. Chungking and Chengtu-fu in the prov. of Süchwan are already connected by telegraph with Peking, so also is Kashgar in Eastern Turkistan (a distance of about 2500 m. from Peking, and only 190 m. from the nearest Russian telegraph station at Osh); and there are submarine cables bringing the islands of Hainan and Formosa into communication with the mainland.

The **commerce** of C. with western Asia dates back to a very remote period. It was carried on partly by land partly by sea. The land routes all passed through the opening in the NW. between the Nanshan range and the desert, and then diverged, one route passing to the S. of the Tarim basin to Yarkand and thence across southern passes of the Pamirs, two others on the N. side of the desert, one of them along the S. base of the Tianshan Mts. to Kashgar (the Tianshan-nan-lu route), and the other along the N. base of the Tianshan into the valley of the Ili. The trade by sea seems to have been carried on at an early date by Arabs, and seems to have been the means of introducing several economic plants into the country. A Chinese work on botany belonging to the fourth century speaks of sugar as a product of Cochin-China known at Canton, where there was an Arab trading colony. The Portuguese were the first among Europeans to establish direct trading relations with C. They were tacitly allowed to trade at Canton in the early part of the sixteenth century, and in 1586 Macao, at the mouth of the Canton R., was granted to them. Down to 1842 Canton remained the only place at which European nations generally were allowed to carry on trade with C., and even the right to trade there was never formally recognised by the Chinese govern-ment. The wider scope for foreign trade subsequent to that date was the consequence of a war with Great Britain which was due to the Chinese government having destroyed without compensation upwards of 20,000 chests of opium belonging to English merchants. At the peace of Nanking which concluded the war (Aug. 29, 1842) it was agreed that European merchants and a British consul should be allowed to reside at Canton, Amoy, Foochow, Ningpo, and Shanghai, and the island of Hong-kong (near the mouth of the Canton R., E. side) was ceded to the British. By subsequent treaties (1858 and 1860 on the con-clusion of other wars, and 1876 by the Convention of Chifu) other ports were opened and the navigation of the Yangtse-kiang was declared free. The following is a list of the Chinese so-called **treaty-ports** at which foreign merchants are allowed to reside: Newchwang or Riuchwang, in Manchuria; Tien-tsin, Taku, on the Gulf of Pechili; **Chefoo** (Chifu), on the N. side of the Shantung penin.; **Shanghai, Ningpo,** Wenchow, Foochow, **Amoy, Swatow, Canton,** on or near the E. coast S. of the Shantung penin.; Pakhoi, on the Gulf of Tonking; **Chinkiang,** Wuhu, Kiukiang, **Hankow,** Ichang, and Chung-king (*q.v.*), on the Yangtse-kiang; Tamsui, Kelung, Taiwan, and Takow on Formosa; and Kiungchow, on Hainan. By far the most important of these, especially for imports, is Shanghai, and besides Shanghai all those at which the foreign trade in foreign bottoms amounts to as much as one-tenth in value of that of Shanghai are printed in thick type. A large part of the foreign, especially British trade, is centred at Hong-kong. The **customs' duties** on foreign imports are fixed at 5-6 per cent. *ad valorem* in the case of most articles, 8-12 per cent. on some others, and 33 per cent. on opium. Under the treaties the collection of the duties is entrusted to a European commission known as the Imperial Maritime Customs. Chinese commerce is, however, hampered also by internal duties. Some of these are levied on the frontiers of the provs., but it is stipulated in the Convention of Chefoo that by the payment of one-half extra duty foreign goods may be allowed to pass free to any part of the empire. Goods covered by such transit-passes must, however, have their destination stated when the pass is issued, and are covered by the pass only up to the place mentioned. Hence the import-ance to foreign merchants of having open ports as far in the interior as possible. At present the furthest is Chungking, the commercial centre of Süchwan, the most important of the western frontier provs. In addition to the provincial duties another duty is levied on goods in transit under the name of *likin* or *lekin*. This is regarded by the Chinese government as an exceptional tax for war purposes, and is levied at 'barriers' on the trade routes (stations on navigable rivers, &c.) not coinciding with provincial boundaries. This tax is the cause of much complaint on the part of foreign merchants, who contend that their goods ought to pass free of such duties also when the transit-pass has been obtained, and recently arrangements have been made for the payment of *likin* on opium to cover the whole distance at the treaty-port where it is landed. **Foreign Commerce.**—Tea, raw silk, and silk manufactures make up more than three-fourths of the value of the Chinese exports, and the principal imports are opium, cotton, and other manufactures, and metals. The recent history of Chinese commerce shows several noteworthy features. On the export side there has been a great decrease in the amount of tea exported by sea, but this has been partly balanced by a great rise in the amount exported overland, chiefly by way of Maimachin and Kiakhta to Russia. The amount so exported increased pretty steadily from about 10,000,000 lbs. in 1874 to upwards of 94,000,000 lbs. in 1888 (the maximum down to 1891 inclusive). The exports of silk-refuse (which is now manufactured in Europe into silk fabrics), of silk goods, and of straw-braid (which is now an export of considerable value) have all rapidly increased in amount in recent years. On the import side there has been a decline on the whole in the amount of Indian opium imported, but there has been a pretty steady rise in the amount of the coal import, and a rapid rise in that of petroleum. **Money, Weights, and Measures.**—The *tael* (in Chinese, *liang*), in which the value of Chinese commerce and customs revenue is generally reckoned, is merely a money of account. The tael is properly a weight, the amount of which differs at different places. Hence there is the Shanghai tael, the Canton tael, and the Haikwan or customs tael, this last being the tael in which customs dues are levied, and being equal to 574.948 grains of silver, and the value of which, before the fall in the price of silver beginning in 1873, was about 6s. 8d. For the average value in subsequent years see **Appendix,** p. 14. Till recently the only Chinese coinage consisted of *cash* (Chinese *li*), made of brass mixed with lead, and pierced in the middle with a quadrangular hole, which allows of their being strung together. From 1600 to 1700 of these are equal to one Haikwan tael. In default of other coinage the Chinese make large use among themselves of private banking orders. Large payments are generally made in silver bullion, which is made up in shoe-shaped bars (sycee silver). In the treaty ports Mexican and trade dollars are also much used. Recently dollars of about the same weight and fineness as the United States silver dollar have been coined at a mint established at Canton by a former viceroy, and in 1890 these were declared by an Imperial decree legal tender throughout the empire. Most commodities, includ-ing liquids, are sold by weight, the usual unit for large amounts being the *picul* (Chinese, *tan*), recognised by treaty as equivalent to 133⅓ lbs. avoirdupois, and divided into 100 *catties* (Chinese, *kin*), each accordingly = 1⅓ lb., these again divided into 16 *taels* (Chinese, *liang*), each = 16 *mace* (Chinese, *tsien*), each =

10 *candarens* (Chinese, *fun*). The units of length vary in different parts of the empire, but that fixed by treaty and made use of by the customs department for short measurements is the *chih* = 14.1 English in., 10 *chih* making 1 *chang*. The *li*, the ordinary unit in road measurements, is approximately equal to 3 cables (720 yds.), or two-fifths of a mile. **Government.**—The emperor is at least nominally supreme in every department of the state. The dignity is hereditary in the family, but the reigning emperor has the right of naming his successor from among the members of that family. The reigning dynasty is of Manchu origin and acceded to the throne in 1644. All the officials of the empire are appointed in the emperor's name, but there are important institutions restricting the power of the emperor. In the first place he is bound to govern in accordance with the maxims of the sacred books of Confucius, and the laws of the empire as laid down in the 'Collected Regulations of the Tsing Dynasty.' In the second place he is bound to choose all officials from the lettered class, that is, from those who have passed the state examinations, which are held all over the empire, and in which all Chinese subjects are allowed to compete. The higher official ranks are reserved for those who pass the severest examinations, and to pass with distinction is the sure avenue to position and honour. The supreme direction of the administration is confided to a cabinet of four members, two of Chinese and two of Manchu origin, along with two assistants from the Hanlin or Great College. This body is composed of the more distinguished members of the lettered class, and has very important functions of different kinds. Even women are occasionally included among its members. It serves to some extent as a great council of state. No new laws are inscribed in the statute-book without being submitted to it. If any law suggested by an official as likely to be beneficial to the empire has received the approval of this body, it is promulgated throughout the empire, but is not added to the Imperial code during the life of the emperor then reigning, but may be so added on the accession of the next emperor if the law has meanwhile proved to be beneficial in practice and acceptable to the people. From this body also are chosen the members of what is called the Court of Censors, forty in number. Some of these are appointed to watch over both the public and private life of the emperor himself, and to admonish him when guilty of any conduct unworthy of his position. Others are sent on special missions to distant provs. to supervise the conduct of the governors. Of others it is the duty to write a history of the reign, a history never opened during the lifetime of the emperor under whom it is written. There are seven government departments, a department charged with the supervision of the civil functionaries, and of finance, rites, war, justice, public works, and the admiralty, the last in existence only since 1885. The ministry of rites corresponds to some extent to the home office, but one branch of it is the *Tsung-li-yamen*, which is the body that deals with foreign affairs. All the officers of the empire, civil and military, are divided into nine orders, which are distinguished by buttons differing in material and colour worn at the top of the official cap. To Europeans these officers are known as *mandarins*, a term which seems to have originated with the Portuguese, and probably derived from the Portuguese *mandar*, 'to command.' In C. the members of the nine orders are known collectively as *kwang-fu*. The highest officials subject to the supreme government of Peking are the viceroys, who have the supreme control of the provincial administration, some of whom, however, have two provs. under their charge. Next in rank are the lieutenants of the viceroy, of whom there is one for each province. In addition to the hierarchy of officials dependent on the government of Peking, there is a very important system of local government on a popular basis. All the communes of the empire have local councils freely elected by the people for a term of three years. The commune as a whole being responsible for the payment of government taxes, these councils have first the duty of distributing the burden among the individual members. But in addition to that they inquire into the necessity of public works for the locality, procure the funds for those which can be carried out by the commune itself, act in accord with the councils of neighbouring communes for those which require the co-operation of two or more communes, superintend the working of the regulations for irrigation, exercise some control over the benevolent institutions of the district, &c. &c. The great bulk of the **people** are Chinese proper. The Manchus though the reigning family is of that race, make up but a small proportion of the population. They are chiefly officials and soldiers. In all the larger towns there is, however, a Manchu quarter, which is sometimes walled off from the Chinese town. In the mountainous dists. in the SW., there are still some non-Chinese races either living amongst the Chinese, and gradually adopting Chinese modes of life, or occupying isolated tracts, where they live in complete independence. The most important of these are the Sifan (*q.v.*), in the W. of Süchwan, the Lolos (*q.v.*), in the S. of Süchwan, and the Miau-tse, the original inhabitants of the prov. of Kweichou, now principally confined to the SE. of that prov. and to the adjacent parts of Kwangsi. The term Man-tse is not the name of any particular race, but is a general term applied to all aboriginal non-Chinese inhabitants of the present C. In the dists. adjoining Burma and Siam (Yünnan and Kwangsi) there are large numbers of Shans. In the NW. there is a considerable number of Mohammedan Tunganis (or Dunganis), and Tibetans occupy the extreme W. of the prov. of Süchwan. Of the character of the Chinese proper very diverse accounts are given. Those who know them only in the larger treaty ports often pass a very unfavourable opinion upon them, while those who have become acquainted with them in the country dists. have often been charmed with the patriarchal simplicity of their life and manners. While some travellers complain of their hostility to Europeans, others speak of nothing but kindness received in every part of the empire, and generally it may be said that those who have resided longest amongst them, and learned to know them best, are those who speak of them with most respect. Nearly all are agreed in ascribing to them industry, perseverance, and sobriety. Baron Richthofen maintains that in the struggle for existence, the Chinese have the advantage over the inhabitants of the tropics and over uncivilised races generally of restless industry, over the people of Europe that of extreme thrift (*Genügsamkeit*), and apparently over all other inhabitants of the earth that of being suited to any climate, and looks upon the possibility of their adopting the practically utilisable elements of western civilisation as a danger to be dreaded by the rest of the world, as introducing a competition of an extremely formidable character (*China*, vol. ii. p. 14). The same dread is felt by the countries inhabited by people of European race in the temperate zone (in the United States and Australia), among whom the Chinese have sought to settle in considerable numbers. In the tropics, however, they are more readily welcomed. But the Chinese are on the whole averse to emigration, and though they are now found in large numbers as agriculturists and miners in the Eastern Archipelago and Indo-China, and have been largely introduced as coolies into Cuba and parts of S. America, the total number of Chinese emigrants is as yet small when compared with that of emigrants from Europe. As regards **religion,** ancestor-worship, or the religion of the family, may be said to be the only religion that has retained a general hold of the people. Confucianism is in no proper sense of the word a religion, but only a code of moral maxims and ceremonies, the keynote of which is the inculcation of everything tending to promote the union of the family and the maintenance of the state as one great family. Tablets in honour of the immediate ancestors are preserved in every household, and it is the duty of the head of every household to collect his family frequently, in order to hear the record of the lives of their ancestors, and to pay them honour and worship. The same honour that is thus paid by the living to the dead is paid by the young to the old. Even in the administration of justice this institution holds an important place. Offenders are often tried before family courts, and the decisions of such courts for the most part have as much weight as those of the official courts. To be excommunicated from the family is one of the greatest degradations and punishments that can be inflicted on a Chinese. The other religions prevailing in C. are not regarded as incompatible with this family religion. Of these Buddhism, which appears to have been introduced about the first century A.D., is the most widespread. Taoism, founded by a Chinese teacher named Laotse, is also accepted by a large number in certain classes. But the Chinese observance of either of these religions is very lax, and consists chiefly in the making use of a Buddhist or a Taoist priest in certain ceremonies. Mohammedanism and Christianity both count large numbers of adherents, but they are both regarded with distrust and suspicion by the government, not as religions (for to religion as such the Chinese government is wholly indifferent), but as teaching doctrines that tend to isolate those who adopt them from the rest of their countrymen, and to undermine the idea on which the state is founded. In the case of Christianity there is a further ground for jealousy, in that it is believed to be a political movement on the part of European powers. Mohammedans number altogether three or four millions in the W. and SW. In Yünnan they are known to the Burmese, and through them to the Europeans, as Panthays. The Christians are less numerous, though Christianity was introduced by Nestorians as early as the 7th century, and again by Franciscans in the 13th century. Such hold as Christianity has gained in China, however, dates chiefly from the efforts of the Jesuits in the 17th century, which were for a time remarkably successful chiefly through the favour bestowed on them by the enlightened emperor Kanghe. This favour was, however, withdrawn in consequence of the interference of the pope on the question of the compatibility of the family worship of the Chinese with Christian teaching, and every effort was made to extirpate and exclude Christianity, until protection for Christian missionaries was stipulated for in the treaty of

Tientsin in 1858. During the whole period of repression, however, Christian communities continued to survive in all the provinces—in greatest numbers in Süchwan. Altogether they are estimated to count by hundreds of thousands. The Chinese **language** is the type of monosyllabic languages—entirely composed of monosyllabic words, or words formed by the combination of monosyllabic roots, without modification. The writing is not alphabetic but ideographic, that is, the characters do not represent even sounds but ideas, so that while the same characters form one written language for the whole empire, they are read differently, so far as the sounds are considered, in different parts, according to the differences of dialect. These dialectical differences are to a large extent merely differences of pronunciation, and among the educated classes one dialect prevails more or less over the empire. This is known as the *gwanhwa*, or *kwanhwa;* but even in this there is not perfect uniformity, the *gwanhwa* of the northern provs. differing to some extent from that current in the S. The number of distinct characters in Chinese is stated by some to be upwards of 7000, but many of these characters are formed by combinations of simpler ones, so that the mastery of about 2000 characters affords, it is said, the key to the Chinese language. Notwithstanding the difficulty which this system of writing must throw in the way of learning to read, there are few countries in the world where a knowledge of reading and writing is so widely diffused, and that altogether without government aid. The number of large **towns** in C. is a very remarkable feature in the distribution of the population, and when we consider the absence of the modern means of communication that do so much to stimulate the growth of large towns, by creating centres of trade and manufacturing industry for wide areas devoted to the production of food and raw material, it may fairly be said that this aggregation of population in large towns is without a parallel on the surface of the globe. The only country that could fairly be compared with it is India before the introduction of railways and modern machinery, and in this respect India even yet presents a contrast, not a parallel. In the list of the large towns of the world in the 9th issue of *Die Bevölkerung der Erde* (1893), the number of towns in C. with an estimated population of more than 100,000 is 45 as against 28 in India, 116 in Europe, 25 in the United States; and of those above 100,000 fourteen were estimated to have a population exceeding 500,000, and four a population of 1,000,000 or more. Towns which are centres of administration are divided into three orders, which are distinguished by certain terminations, but these terminations are frequently omitted. Those of the first order have the termination *fu*, those of the second order *chou* or *ting*, those of the third order *hsien* or *hien*. All such towns are surrounded by ramparts, which in the case of *fus* take the form of rectangular stone walls. Of the **history** of C. hardly anything can be said in a brief sketch. The Chinese are believed to have entered the country from the N., and their history in C. may be summed up as a gradual process of adding field to field as they multiplied and spread steadily southwards, driving before them or absorbing the earlier inhabitants. A brief sketch of their relations with Europeans is given above under **Commerce.** In the present century one of the most remarkable events was the Taiping rebellion, which broke out about 1850, headed by a Christian convert who professed to have for his object the Christianisation of the whole country, and which was not suppressed till 1865, after several of the most populous provinces in the S. had been desolated, and their population reduced to an appalling extent. Of the numerous works on C. the following may be referred to as among the most comprehensive:—Williams's *Middle Kingdom* (1848); *The Chinese Empire*, by Abbé Huc (Eng. trans. 1855, 2 vols.); *Cathay and the Way Thither* by Col. Yule (1867, 2 vols.), and the most exhaustive of all, *China* (German), by Baron Richthofen, of which as yet (1894) only vols. i., ii., and iv. have been published (vol. i. 1877). In 1885 appeared the first sheets of a large atlas of C., geological and physical, also by Baron Richthofen, and not yet completed; and in 1893 a map of NE. China by C. Waeber (1 : 1,355,000). See **Japan** (end of article) and **Formosa.**

China, tn., Mexico, Nuevo Leon, 76 m. E. Monterey.

China, tn., U.S., Maine, Kennebec co., 20 m. NE. Augusta. The Kennebec affords excellent water-power. P. <1500.

Chinchorro, El, reef, E. ct. of Yucatan, Mexico, in 18° 20′–50′ N. Length, N. to S., 23 m.; greatest breadth, 9 m.

Chinchosho, place, W. Africa, French Congo Terr., on the coast, in 5° 10′ S., situated high and healthily between Luemba and Luiza-Loango. Mean temp. (6 yrs.), yr. 75.9° F., Feb. 79.3°, July 71.2°.

Chin-chou, China, Hunan. See **Chen-chou.**

Chinchou, tn., China, prov. Honan, 225 m. N. by E. Hankow.

Chinchou, tn., China, prov. Kwangtung, 39 m. NW. Pakhoi.

Chinchou-fu, tn., Manchuria. See **Kingchou-fu.**

Chinchu, or **Tsinenchou,** maritime dist. of China, between 23° and 26° N., 116° and 119° E., comprising parts of the provs. Fokien and Kwangtung on the SE. ct., and inhabited by a hardy and industrious people, who man most part of the imperial and commercial navy.

Chincoteague Island, U.S., Virginia, Accomack co., off the NE. ct., in 37° 52′–38° 5′ N. Much frequented by sportsmen, and celebrated for its oysters and ponies.

Chin Coulee, a deep riv. valley in the SE. of Alberta and SW. of Assiniboia, Canada, joins the Forty Mile Coulee.

Chindant, Cossack vil., E. Siberia, Transbaikalia, dist. and 200 m. SW. of Nerchinsk, at the junc. of Onon with Ononborzya. Chief town of military dist., centre for trade. P. <750.

Chinde, one of the mouths of the Zambezi. See **Zambezi** and *Proc. R. G. S.*, 1890, pp. 139–40, *Map*, p. 192.

Chinde, new port at the mouth of the Chinde R., Portuguese E. Africa, in 18° 34′ S., connected by telegraph with Blantyre and Kiliman. Land has been leased here for a bonded warehouse of the British administration of Nyassa-land.

Chindwara, India. See **Chhindwára.**

Chindwin, or **Kyendwin,** riv., Burma, the principal trib. of the Iráwadi, rises in the Patkoi Mts. near the frontier of Assam, flows S. and joins the main stream about midway between Mandalay and Pagan; length about 500 m., of which about 300 are navigable by steamers in the rains, 150 m. in the dry season. The Iráwadi river steamers ascend to Kendat in about 23½° N. The navigation is a good deal impeded by shifting sand-banks, and by the swiftness of the current, in consequence of which native boats take about three weeks to ascend 250 m. See *Proc. R. G. S.*, 1889, p. 197.

Chindwin, valley in Tibet, forming a wedge between Bhutan and Sikkim.

Ching, tn., China, in the SE. of prov. Hunan, 185 m. N. by W. Canton.

Ching, Chinese, 'city.'

Chingchen-hsien, tn., China, Kweichou, 14 m. W. Kweiyang-fu, with coal-mines on the E.

Chingchi-hsien, tn., China, Süchwan, 110 m. SW. Chengtu-fu. Alt. 5090 ft.

Chingene Dervent, defile traversed by the Vardar, Turkey, NW. of Salonica, about 8 m. long, crossed in the S. by 41° N.

Chinhai, tn., China, prov. Chekiang, on Hangchow Bay, at the mouth of the Yung-kiang R., 18 m. NE. Ning-po. It stands on a tongue of land at the foot of a hill abruptly rising from the sea, and crowned by a citadel; taken by the British in 1841.

Chini, vil., Brit. India, in Bashahr State, Punjab, about 1 m. from the r. bk. of the Sutlej, 69 m. NE. by E. Simla. The vicinity is well watered by numerous rills, which run down the side of a mountain, and flow into the Sutlej. Vines of excellent quality and in great quantity are here cultivated. Dried grapes form a favourite food of the people. Alt. 9100 ft. above the sea, 1500 ft. above the Sutlej. P. <5000.

Chiniot, tn., Brit. India, Punjab, dist. Yhang, 80 m. W. by N. Lahore, near the l. bk. of the Chenáb, celebrated for its wood-carving and masonry. P. 13,500; Moham. 9100; Hindus, 4300.

Chin-ju, tn., Korea, 51 m. W. by N. Fusan.

Chink, name given to the abrupt slopes of the Ust-urt plateau towards the Aral-Caspian depression.

Chinkiang, or **Chinkiang-fu,** tn., China, prov. Kiang-su, on r. bk. of the Yangtse-kiang, at its junction with the Grand Canal, 45 m. E. by N. (62 m. by river from) Nanking, and communicating by natural and artificial waterways with Shang-hai; situation little malarious. Formerly an important fortified city, the key of central China; taken by the Taiping rebels in 1853, four years after which the population was massacred by the Imperialists, and only the walls of the town were left standing. It is an open port under the Tien-tsin treaty (1858). Occupying one of the finest sites in China, it has become the second port of the empire for the importation of foreign goods. The principal curiosity here is a pagoda of cast-iron, 30 ft. high, and conjectured to be at least 1200 years old. This city was taken by the British, July 21, 1842. The principal items of import are opium, cottons, sugar (average value about £1,500,000); and of export, silk, dried lily-flowers, rice (value £300,000–£400,000). Mean rainfall, yr. 30½ in. P. 135,000.

Chinley Bugsworth and Brownside, par., Eng., Derbyshire, Chapel-en-le-Frith union, with a stn. (**Chinley**) on the M. R., PM.O. (**Chinley**). P. <2000.

Chippewa, co., U.S., Minnesota, bounded on the S. by the Minnesota R., crossed by 45° N., and in extreme NW. by 96° W.

Chippewa, riv., U.S., Wisconsin, in the W., it rises in the N. of the state in the Penokee Iron Range, and flows SSW. past Chippewa Falls to the Mississippi, which it joins on the l. bk., a little to the W. of 92° W.; navigable to Eau Claire.

Chippewa, co., U.S., Wisconsin, in the W., crossed in the S. by 45° N., and in the E. by 91° W.

Chippewa Falls, city, U.S., Wisconsin, Chippewa co., on the Chippewa R., 85 m. E. St. Paul (Minn.). P. (1880) <4000; (1890) 8700.

Chippewa Indian Reservation, U.S., Minnesota, Cass co., in the N., traversed from W. to E. by the upper part of the Mississippi.

Chippewas, or **Ojibways,** Indian tribe, U.S., inhabiting several reservations in Michigan, Wisconsin, Minnesota, and on both sides of the basin of Lake Superior.

Chippewayan Fort. See **Fort Chippewayan.**

Chipping, 'a place of merchandise,' from Anglo-Saxon *ceapan,* 'to buy.'

Chipping, par., Eng., Lancashire, Darwen div., 7½ m. W. by N. Clitheroe, 4 m. NNE. Longridge stn., PM.O.; 5634 ac. P. <1000.

Chipping Barnet, par., Eng. See **Barnet.**

Chipping Campden, market-tn. and par., Eng., Gloucestershire, Cirencester div., 8 m. ESE. Evesham, with a stn. (**Campden**) on the G. W. R., PMT.O. (**Campden**). Market-day, W. 4699 ac. P. <2000.

Chipping Hill, Roman camp, Eng., Essex, div. and 6 m. NNW. Maldon, close to Witham Junction, PM.O.

Chippinghurst, par., Eng., Oxfordshire, Headington union. P. <250.

Chipping Norton, mun. bor. (incorporated under James I.), Eng., Oxfordshire, Banbury div., 10½ m. NW. Woodstock, with stns. (**C. N.** and **C. N. Junction**) on the G. W. R.; has large woollen and tweed factories, and carries on glove making. A common of about 80 ac. is used as a recreation ground. Chipping Norton Junc., a stn. 5 m. SW. Market-day, W. P. <4500.

Chipping Ongar, market-tn. and par., Eng., Essex, Epping div., on the Roothing, 9 m. NNE. Romford, with a stn. (**Ongar**) on the G. E. R. Market-day, S. P. <1000.

Chipping Sodbury, market-tn. and par., Eng., Gloucestershire, Thornbury div., 11 m. NE. by E. Bristol, 2 m. E. Yate Junc. P. <1500.

Chipping Warden, par., Eng., S. div. of Northamptonshire, 6 m. NNE. Banbury, 3 m. SSW. Morton Pinkney stn., P.O. P.<500.

Chipping Wycombe, Eng. See **Wycombe.**

Chipstable, par., Eng., Somerset, Wellington div., 10 m. NNE. Tiverton, 3½ m. W. Wiveliscombe stn., P.O. P.<500.

Chipstead, vil., Eng., Kent, 2½ m. NW. Sevenoaks, PMT.O. See **Chepstead.**

Chipstead, par., Eng., Surrey, div. and 4½ m. NE. by N. Reigate, 3 m. N. Merstham stn., PM.O. P.<750.

Chipurupalle, tn., Brit. India, Madras, E. ct. dist. and 19 m. SW. by W. Vizagapatam. P.<5000.

Chiputneticook Lakes, on the border of Canada, New Brunswick, and Maine, U.S., drained by the R. St. Croix into the Bay of Fundy.

Chiquimula, city, Central America, the most ancient in the E. of Guatemala, cap. dep. C., 64 m. E. by N. Guatemala; destroyed by earthquake in 1773. P. 3000.

Chiquinquira, tn., S. America, Colombia, Santander, 80 m. N. by E. Bogotá. P. 18,000.

Chiquita, Mar, Argentine Republic. See **Mar Chiquita.**

Chiquito, 'small.' See *Chico.*

Chiquitos, Indian tribe, En. Bolivia, giving name to a prov.

Chira, isl., Central America, in the Gulf of Nicoya, in the W. of Costa Rica.

Chira, tn., central Asia, E. Turkistan, 41 m. E. by S. Khotan. The Takla Makán or Gobi Desert skirts the vegetation at the distance of 3 m. N. Alt. 4500 ft. P. about 40,000.

Chirakchi, tn., Bukhara, 54 m. SSW. Samarkand.

Chirala, large vil., Brit. Nyassa-land, on l. bk. Shire, in 16° S.

Chirála, tn., Brit. India, Madras, dist. Kistna, 74 m. W. by S. Masulipatam. P. 10,600; Hindus, 10,000.

Chiráwa, tn., India, Rájputána, 100 m. W. by S. Delhi. P. 5500.

Chirbury, par., Eng., Salop, Oswestry div., 6 m. S. by E. Welshpool, 3½ m. E. Montgomery stn., with barytes mines, PMT.O.; 11,317 ac. P.<1500.

Chirchik, riv., Russian Turkistan, r. bk. trib. of Syr-Daria; made by the confluence of Chotkal and Pskem. Flows SW., watering the plain of Tashkend by its numerous canals, and joins the Angren before entering the Syr, 40 m. SW. of Tashkend.

Chirdon, par., Eng., Northumberland, Bellingham union; 6516 ac. P.<250.

Chire, tn., S. America, Colombia, Boyaca, on the Chire, 150 m. NE. by E. Bogotá.

Chirgat-cho, lake, Tibet; same as **Chargat-cho.**

Chiri-Chiri, bay, Colombia, in the S. of the Gulf of Cupica.

Chiriguana, tn., S. America, Colombia, Magdalena, 150 m. SE. by E. Cartagena.

Chiriguanos, tribe of Indians in the S. of Bolivia, in the plains E. of the Andes; allied to the Tupiguarani tribe.

Chiriqui, prov., riv., lagoon, and archipelago of Central America, state of Panama, in the U.S. of Colombia. The river, after a N. course, enters the lagoon, which is separated from the Caribbean Sea by the archipelago in 9° N., 82° 30′ E. The C. lagoon is a spacious bay with three entrances, the Boca del Drago (Dragon's mouth) and Boca del Toro (Bull's mouth) on each side of the Isla del Drago (in the NW.), and the Boca del Tigre (Tiger's mouth), the widest of the three, in the E. The lagoon is capable of containing ships of the largest class. It extends along the coast about 90 m., and 40 to 50 m. inland.

Chirivel, riv., Spain. See **Sangonera.**

Chirk, par., Wales, Denbighshire, E. div., 5½ m. SE. by E. Llangollen, on the G. W. R., with slate-quarries and coal-mines, PMT.O. Market-day, S. 4773 ac. P.<2500.

Chirkat, sulphur mine, Russia, Caucasia, govt. Daghestan, dist. Andi.

Chirmen, tn., Turkey in Europe, prov. and 17 m. W. by N. Adrianople.

Chirnside, par. and vil., Scot., Berwickshire, 5½ m. E. by N. Duns, 1 m. E. by S. of its stn. on the N. B. R. Par. 5553 ac., P.<1500; vil. P.<1000.

Chiro'mo, or **Chilo'mo,** vil., Brit. S. Africa, Nyassaland, on a healthy site free from marshes, at the confluence of the Shire and Ruo, at the head of steam navigation on the Shire. It is proposed to make a road from this point to Zomba.

Chironico, vil., Switzd., cant. Ticino, on the R. Ticino, 13 m. SE. by E. Airolo. P.<2000.

Chironji, or **Chironzi,** tn., Portuguese E. Africa, Bororo Land, on the Shire, 81 m. S. by E. Blantyre.

Chirowe, vil., Portuguese E. Africa, on the l. bk. of the Loangwa, in 14° 40′ S., 29° 46′ E., 73 m. NNW. Zumbo.

Chirpan, Chirpilü, tns., Bulgaria. See **Ćirpan, Ćirpilü.**

Chirra Poonjee. See **Cherra Punji.**

Chirton, par., Eng., Wiltshire, Devizes div., 14 m. E. Trowbridge, 3 m. WSW. Woodborough stn., P.O. P.<500

Chirton, par., Eng., Northumberland, in par. of Tynemouth, P.O. P. 13,100.

Chirundumusia, French Algerian Roman Catholic mission stn., Brit. Central Africa, in the Mambwe country, about midway between the head of Lake Nyassa and the S. end of Lake Tanganyika.

Chiruve, range of hills, Portuguese E. Africa, crossed by the railway to Chimoyo, about 30 m. from Fontesvilla.

Chirwa, lake, Brit. Central Africa. See **Chilwa.**

Chi'sago, co., U.S., Minnesota, on the St. Croix R. (E. frontier), S. of parallel 46°.

Chiselborne, P.O., Eng., Dorsetshire, near Dorchester.

Chiselborough, par., Eng., Somerset, S. div., 5½ m. W. by S. Yeovil. P.<500; eccles. par. (**C. with West Chinnock**) P.<750.

Chiseldon, stn., Eng. See **Chisledon.**

Chisenbury, hamlet, Eng., Wiltshire, Devizes div., 14½ m. N. Salisbury, 5 m. S. by E. Woodborough stn. Near it is a circular earthwork called C. Camp.

Chishall, Great, par., Eng., Essex, div. and 7½ m. W. Saffron Walden, 4½ m. ESE. Royston stn., P.O. P.<500.

Chishall, Little, par., 1 m. S. Great C. P.<250. See **Heydon.**

Chishima, Japanese name of Kurile Is.

Chisledon, par., Eng., Wiltshire, Cricklade div., 4 m. SE. by S. Swindon, with a stn. (**Chiseldon**) on the M. & SW. Junc. R., P.O.; 4917 ac. P.<1500.

Chislehampton, par., Eng., Oxfordshire, 6 m. NW. Abingdon, on the Thame. P.<250; eccles. par. (**C. with Stadhampton**) P.<500.

Chislehurst, or **Chiselhurst** ('the thicket at the sand-bank'), par., Eng., Kent, Sevenoaks div., 5½ m. S. Woolwich, 1 m. E. of its stn. on the SE. R. At Camden Place, near C., the Emperor Napoleon III. died in exile, Jan. 1873; his tomb is in a side chapel added to St. Mary's Catholic Church. P. 6000.

Chislett, par., Eng., Kent, St. Augustine div., 6 m. NE. Canterbury, 1 m. NW. Grove Ferry stn., PT.O. (**Chislet**); 6807 ac. P.<1500.

Chistopol, dist. tn., Russia, govt. and 90 m. SE. of Kazan, on l. bk. of Kama; trade in corn. P. 24,800.

Chisumula, small isl., about the middle of Lake Nyassa, Brit. Central Africa, W. of Likoma I., just S. of 12° S.; Universities mission stn.

Chiswell, PM.O., Eng., 1 m. from Portuneswell, Dorsetshire, I. of Portland.

Chiswick ('sandy bay'), par. and tn., Eng., Middlesex, Ealing div., on the l. bk. of the Thames, 7 m. W. by S. St. Paul's, London, on the L. & SW. R. (**C. and Grove Park**), with another stn. (**C. Park and Acton Green**) on the District Rly. P. 22,000; eccles. par. (**C. with Turnham Green**) P.<5000.

Chisworth, part of par., Eng., Derbyshire. See **Ludworth.**

Chita, tn., Colombia, Boyacá, 74½ m. NE. Tunja, on the W. side of a snow-covered range (Sierra), on the other side of which is the important mine of rock-salt known as Salina.

Chita, tn., Russia, En. Siberia, cap. of Transbaikalia terr., 585 m. E. of Irkutsk, on Chita R., near its junction with Ingoda. Founded in 1851 for administrative purposes. Spot from which the supplies for the military forces on the Amur are shipped every year when the spring high water renders the Ingoda navigable. P. 7000.

Chitabe, French Congo Terr. See **Konkuati.**

Chitaldrúg, tn., India, Mysore, 73 m. SW. by S. Belláry, cap. C. dist., stands at the NE. base of a cluster of hills covered with extensive fortifications. The cantonments are abandoned on account of their unhealthiness. P. 5000. See **Mysore.**

Chitalwana, tn., India, Rájputána, on the Luni, 128 m. SW. Jodhpur.

Chitambo's, vil., Brit. S. Africa, to the SE. of Lake Bangweolo, in about 12° 16′ S., 30° 26′ E., where Livingstone died May 1, 1873. In 1892 C. vil. was about 20 m. WNW., at an alt. of 3764 ft. (Thomson in *Geog. Jour.*, I. p. 109).

Chitarkot, hill and place of pilgrimage, Brit. India, NW. Provs., Bánda dist., 71 m. SW. Allahábád.

Chitawan, tn., Nepál, 50 m. W. by S. Khátmándu.

Chitete, vil., Ger. E. Africa, in 9° 13′ S., 33° 11′ E.

Chit Firozpur, tn., Brit. India. P. 10,700; Hindus, 9800. See **Baragaon.**

Chithurst, par., Eng., Sussex, Horsham div., on the Rother, 11½ m. N. Chichester, 2 m. NE. Elsted stn. P.<500. See **Iping.**

Chitignano, comm., Italy, prov. and dist. Arezzo, with sulphur springs. P.<2000.

Chitor, tn., India, Rájputána, 108 m. S. Ajmere, in native state of Udaipur. The fort **Chitorgarh** stands on a long narrow hill of solid rock, and within its entire top covered with the ruins of temples, palaces, and reservoirs. P. 7000.

Chitradurg, India. See **Chitaldrúg.**

Chitral, l. bk. trib. of the Kabul R. Its longest headstream, the Yarkhun, issues from a small lake close to the source of the Karambar, about 36° 50′ N., 74° 5′ E., flows W. then SW. past the towns of Mastuj, Chitral, and Asmar (*q.v.*), takes the name of Chitral or Kashkar R., and finally that of Kúnar, entering

the Kabul a little below Jalalábád. The N. part of the valley, which has little level ground, communicates northwards with the Pamirs by the Baroghil Pass, and eastwards by the Tui Pass (16,000 ft.) leading from Mastuj to Yasin and Gilghit. See *Geog. Jour.*, I. pp. 51–3, and the authorities there referred to, also map, *Proc. R. G. S.*, 1879, p. 160.

Chitral, state occupying the whole of the C. valley above the state of Asmar; cap. C., a group of vils. in an expansion of the valley in about 35° 50′ N., at an alt. of about 5000 ft. P. (of state) 150–200,000. See references at Chitral R.

Chittae, one of the Laccadive Is., Indian Ocean, 155 m. SW. Mangalore.

Chittagong, tn., Brit. India, Bengal, a few miles above the mouth of the Karnaphuli, 130 m. SE. Dacca. The port has a bar with 22–24 ft. water over it at high water in ordinary spring tides. Exports rice, jute, gunny, and tea. The export trade steadily increasing, and already exceeds £1,000,000 in value; import trade trifling. Alt. 87 ft. Mean temp., yr. 76° F., Jan. 67°, May 82°; rainfall, yr. 105.8 in., June—Sept. 80.6 in. P. (1891) 24,100; Hindus, 6300; Moham. 16,800.

Chittagong, dist., Brit. India, a long narrow strip of coast, backed by low ranges of hills, between the Bay of Bengal and the C. and Arakan Hill Tracts. Ceded to the East India Company in 1760, and very unhealthy, with every form of malarious disease. Average breadth about 15 m. See **Bengal.**

Chittagong Hill Tracts, dist., Brit. India, in the C. div. of Bengal; divided into four valleys by its four chief rivs., the Pheni, Karnaphuli, Sangu, and Matamuri. Presents a general aspect of hill, ravine, and cliff, covered with a tangled mass of dense tree, bush, and creeper jungle. The majority of the population are either Chakmás or Mághs, both races Buddhists. Elephants are met with in large numbers; the rhinoceros and tiger are common, also the boa-constrictor, often of enormous size. The climate is cool, but unhealthy to strangers, though natives thrive. Largest vil. Bandarban. See **Bengal,** table.

Chittambalam, tn., Brit. India. See **Chilambaram.**

Chittenan'go, vil., U.S., New York, Madison co., 15 m. E. Syracuse. P. <1500.

Chittenden, co., U.S., Vermont, in the NW., crossed by 44½° N., bounded on the W. by Lake Champlain.

Chitterne All Saints and **Chitterne St. Mary,** two adjoining pars., Eng., Wiltshire, Westbury div., 13 m. SE. Trowbridge, 3½ m. NE. Codford stn., P.O. C. All Saints, 4449 ac., P. < 500; C. St. Mary, P. <250.

Christianë, small isl., in the Grecian Archipelago, SW. of Santorin, in 34° 53′ N., and 26° 8′ E.

Christian Island, isl., Canada, Ontario, in the SE. of Georgian Bay, in 44° 47′ N., 8 m. long by 4 m. broad.

Christiania, in Norwegian spelling **Kristiania,** cap. city of Norway, at the head of C. Fjord, built upon the site of a former town called *Opslo.* It has a cathedral, citadel, the arsenal of the kingdom, a royal residence, a university, astronomical observatory in 59° 54′ 43″ N., 10° 43′ 28″ E., and a botanic garden. Manufactures of woollen fabrics, tobacco, hardwares, paper, wood-pulp, matches, &c.; has also distilleries and breweries. It receives about half, and exports about one-fourth of the value of Norwegian imports and exports respectively; chief exports, wood-pulp, timber, matches, condensed milk, margarine, and horse-shoe nails. C. was almost entirely destroyed by the terrible incendiary fire of 1624. Christian IV., King of Denmark and Norway, then built the present town. Mean temp., yr. 41.6° F., Feb. 23.7°, July 62.8°; rainfall (20 yrs.), 22.72 in. P. (1870) 66,700; (1891) 148,300.

Christiania, or **Kristiania,** diocese (*stift*), Norway (*q.v.*).

Christiania Fjord, the inlet running due N. from the head of the Skager-rak, accessible to vessels of any size. Oyster culture practised with great success.

Christian Malford, par., Eng., Wiltshire, Chippenham div., 13 m. W. by S. Swindon, 2½ m. WSW. Dauntsey stn., P.O. P. <750.

Christianopel, fishing tn., Sweden, prov. Blekinge, on the E. ct., 17 m. ENE. Karlskrona. P. <2000.

Christiansand, in Norwegian spelling **Kristiansand,** diocese (*stift*), Norway (*q.v.*).

Christiansand, or **Kristiansand,** fortified seapt. **tn.,** Norway, on a fiord of the Skager-rak, 157 m. SW. Christiania. Principal edifices, the citadel Frederick's-holm, and a Gothic cathedral; it has a secure and deep harbour. Founded in 1641 by Christian IV., taken by the English in 1807. Principal export, fresh fish. P. 12,500.

Christiansborg, settlement, British Gold Coast of Africa, Upper Guinea, 4 m. E. Accra, formerly a Danish possession. Mean temp. (7½ yrs.), yr. 80.3°, Jan. 80.6°, July 77°; rainfall (9 yrs.), 22.64 in.

Christiansburg, vil., U.S., Virginia, Montgomery co., 165 m. W. by S. Richmond, and 74 m. W. by S. Lynchburg. P. <1500.

Christiansfeld, tn., Prussia, prov. Schleswig-Holstein, 7½ m. N. Hadersleben. It is a colony of Moravian Brothers, by whom it was founded in 1773. P. <2000.

Christianshaab, Danish settlement on the W. ct. of Greenland, SE. of Disko I.

Christiansoe, a group of isls. in the Baltic, 13 m. NE. Bornholm. Lat. of lighthouse, 55° 19′ N., long. 15° 12′ E. P. <2000.

Christianstad, in Swedish spelling **Kristianstad,** fortified tn., Sweden, cap. prov. C., on the Helge, near the Baltic, 265 m. SW. Stockholm, 55 m. W. Karlskrona. Manufactures of gloves, linen, and woollen fabrics. P. 10,700.

Christianstad, län or prov., Sweden, near its S. extremity, its centre formed of the fertile valley of the Helge. See **Sweden.**

Christianstad, tn., on the N. ct. of the Danish island of Santa Cruz, W. Indies.

Chu-chou, tn., China, prov. Nganhwei, 30 m. NW. Nanking.

Chucuito, tn., Peru, cap. prov. C., 12 m. SE. Puno, on the W. side of Lake Titicaca, which has sometimes been known as Lake C.; woollen manufactures; dyeing of vicuña wool.

Chucunaque, riv., Colombia, isthmus of Panama, flows SSE. then NW. into the Bay of San Miguel, Pacific Ocean.

Chudleigh, cape, Canada. See **Chidley.**

Chudleigh, market-tn. and par., Eng., Devonshire, Ashburton div., 6 m. NW. Teignmouth, on the G. W. R., PT.O. Market-day, S. 6128 ac. P.<2500.

Chudleigh, or **Dunorlan,** vil., Tasmania, Westmoreland co., 34 m. W. by S. Launceston, 44 m. SE. Emu Bay. In the vicinity are some beautiful stalactite caves. P.<1500.

Chudleigh Knighton, eccles. dist., Eng., Devonshire, 3 m. from C.; P.O. P.<750.

Chudovo, vil., Russia, govt. and 45 m. NNE. of Novgorod, near Volkhov R., on St. Petersburg-Moscow Rly., where it branches off to Novgorod. Considerable shipping. P. 1000, considerably increasing in summer.

Chudskoye, Peipus, lake of NW. Russia, in the S. of the Gulf of Finland. It consists of two great lakes, Lake of Pskov and Chudskoye proper, which are connected by a broad strait, named Lake Teploye (Warm), the total length of the three lakes being 93 m., and greatest width 30 m. The three lakes may be considered as a transverse valley hollowed out in the Lower Devonian sandstones and clays. Their shores mostly are low and marshy. The greatest depth is 50 ft. in Lake C., 20 ft. in the Lake of Pskov, and 90 ft. in Teploye Strait. Lake C. receives some fifty small streams and two rivers: the Velikaya, which takes its origin in the marshes of Vitebsk, flows 235 m. towards the N., past Pskov, and is an important channel for navigation; and the Embach, which flows from Lake Wirtzjärvi in the W., past Dorpat. The outlet of Lake C. is the Narova, which flows 45 m. N. into the Gulf of Finland, has many rapids, and is only navigable for flat-bottomed boats for the first 35 m. of its course, and for its last 8 m. below Narva. Lake C. freezes towards the end of November or in the first half of December, but communication on the ice is only possible on the lakes of Pskov and Teploye, as well as along the shores of Lake C. It opens in the first half of May. Stormy as a rule. Pskov, Dorpat, and Syrenets at the beginning of the Narova are the chief ports of an active navigation. Fishing is an important branch of income for the nearly 25,000 inhabitants of its shores. Area, Lake C. proper, 1020 sq. m.; with Lakes of Pskov and Teploye, 1356 sq. m. Alt. 97 ft.

Chuen-chang, Manchuria. See **Kirin.**

Chuenpi, fortified port, China, on an island opposite Taikoktau Point, in the Canton R., 35 m. SE. Canton. Taken by the British in 1841.

Chu-kiang ('pearl river'). See **Canton River.**

Chulak, fort, Russian Central Asia, prov. Syr-daria, 153 m. N. of Tashkent. P.<2000.

Chulitao, riv. See **Chubut.**

Chulmleigh (chŭm'li), market-tn. and par., Eng., Devonshire, S. Molton div., 14 m. SE. by S. Barnstaple, 2 m. N. Eggesford stn.; 8906 ac. P.<1500.

Chulna, or **Crocota,** isl., in the Indian Ocean, 6 m. NW. Cape Monza, Baluchistan. It is a conical rock, about 3 m. in circuit.

Chulumani, tn., S. America, Bolivia, dep. and 30 m. NE. by E. La Paz. P.<2000.

Chulym, riv., Siberia, r. bk. trib. of Obi. Formed in Achinsk dist. of Yeniseisk prov., by confluence of Black and White Yus which flow from the Kuznetskiy Alatau; flows N. past Achinsk and W., joining Obi 100 m. below Tomsk. A canal, which it is intended to enlarge, has now been dug to connect the C. with the Yenisei. Length, 985 m.

Chulym, trib. of Lake Chany, W. Siberia; 182 m.

Chulyshman, riv., W. Siberia, Altai region, trib. of Lake Teletskoye (alt. 1702 ft.), rises in Lake Juvlu-kul. Alt. 7433 ft. Length, 140 m.

Chumah, stn., Canada, Manitoba, on the Great NW. Central Rly., 160 m. W. by N. Winnipeg.

Chumalari, or **Chamalhari,** mt. peak, in the Eastern Himálayas, between Sikkra and Bhután. Alt. 23,930 ft.

Chumbi, valley in Sikkim (*q.v.*).

Chumbul, India. See **Chambal.**

Chumik, Tibetan, 'spring.'

Chumparun, dist., India. See **Champáran.**

Chumpi, tn., S. America, Peru, dep. Ayacucho, 130 m. SW. Cuzco. P.<2000.

Chumysh, riv., W. Siberia, Altai region, r. bk. trib. of Obi. Ironworks. Rich finds of Quaternary mammals. Length, 415 m.

Chunar, or **Chunargurh,** India. See **Chanár.**

Chundowsee, India. See **Chandausi.**

Chung, Chinese, 'middle.'

Chungching, China. See **Chungking** and **Chi-.**

Chung-chou, prefectural city and riv. port, China, prov. Süchwan, on the l. bk. of the Yangtse, about 100 m. ENE. Chungking, in 30° 28′ N. Country in vicinity mountainous, but productive in fruits, opium, silk, cereals, tobacco, and hemp. The largest crop is rice, which is cultivated on the hill-sides, in small terraced fields, watered by mountain streams.

Chung-chow, isl., China. See **Foochow.**

Chungking, or **Chungking-fu,** city and riv. port, China, prov. Süchwan, 832 m. above Hankow, in 29° 35′ N., 106° 8′ E. It stands on a rocky promontory at the confluence of the Kialing with the Yangtse, and consequently has water frontage on two sides; of the nine gates that pierce its walls, eight open out upon one or the other of the rivers. On the opposite side of the Kialing stands Li-ming, or Kiangpeiting, and all round the two towns for the distance of 5 m. the shores are lined with boats engaged in the traffic of C. The town is essentially the port of the wealthy prov. of Süchwan (*q.v.*). The port was opened to foreign trade in 1891, but the development of foreign trade is hindered by the fact that steamers have not yet been allowed to navigate the tract of the Yangtse between this port and Ichang, a tract in which numerous rapids occur, and that the period when navigation is easiest between Hankow and Ichang (high water) does not coincide with that in which it is easiest between Ichang and C. (low water). P. 200,000–250,000; with suburbs, 700,000.

Chunglang, tn., India, Sikkim, 52 m. NE. by N. Darjiling.

Chungunga Island, isl., S. America, Chile, off the W. ct., in about 29° 25′ S.

Chúnián, tn., Brit. India, Punjab, dist. and 45 m. SSW. Lahore. P. 10,300; Hindus, 4400; Moham. 5300.

Chupara Point, cape, W. indies, on N. ct. of Trinidad

Chupat, riv., Argentine Republic. See **Chubut.**

Chuprija, a (nearly) phonetic spelling of **Ćuprija.**

Chuquibamba, tn., S. America, Peru, dep. Arequipa, 90 m. NNW. Mollendo, at the foot of C. peak (alt. about 21,000 ft.). Lead ores near.

Chuquibamba, tn., Peru, dep. Huanuco, 200 m. N. by E. Lima; with gold and silver deposits.

Chuquisaca, tn. See **Sucre.**

Chuquisaca (Indian, *Chuquichaca*, 'place of gold'), dep. in the SE. of Bolivia; cap. Sucre.

Chur, French **Coire,** ancient *Curia Rhætorum*, 'court of the Rhætians,' tn., Switzd., cap. cant. Grisons, 11 m. S. by E.

Ragatz, with a cathedral said to date from the 8th century, and many antiquities. Alt. 2135–2350 ft. Mean rainfall (15 yrs.), 33.42 in. P. 9400.

Chúra, tn., India, Gujarát, cap. C. state, 56 m. W. by N. Cambay.

Churáman, port, Brit. India, Bengal, dist. Balasor, 75 m. NE. Cuttack. P.<5000.

Church, par. and tn., Eng., Lancashire, div. and 1 m. W. Accrington, on the Leeds and Liverpool Canal, and the L. & Y. R., PMT.O. P. 5900.

Chute Forest, par., Eng., adjoining Chute. P. <250.

Chutiá Nágpur, or **Chota Nagpore,** a div. in the W. of Bengal, Brit. India, NW. of Orissa, mainly hilly or mountainous, especially in the W. or SW., where it is occupied by a number of tributary states, the chief of which are Sirguja, Gángpur, and Jáshpur, situated between the valley of the Son and that of the upper Mahánadi. The territory of these states is a confused mass of hills, ravines, and plateaux, many of the hills table-topped, with a flat covering of trap rock. These are locally known as *páts.* In most parts the earliest settlers were probably of Kolarian descent, but these were afterwards subjugated by Dravidian Gonds. In the wildest jungles are remains of skilfully planned temples and embankments of fine tanks. See **Bengal,** table.

Chutteesgurh, or **Chhatísgarh.** See **Central Provinces** (India).

Chuvashes, a tribe formerly considered as Finnish, and now reckoned to be of Turkish stock, which inhabits E. Russia, chiefly in Kazan, Simbirsk, Samara, and Ufa. They are nominally Christians; about 540,000.

Chuya, riv., Siberia, flows N. into the Lena, which it joins a little above the confluence of the Vitim; 200 m.

Chwilog, rly. stn., Wales, Carnarvonshire, Eifion div., 8½ m. W. Portmadoc, on the L. & NW. R., PMT.O.

Cinquefrondi, comm., Italy, Calabrie, prov. and 32 m. NE. Reggio. P. <5000.

Cinque Ports, The, Eng., cos. Kent and Sussex; an ancient incorporation, said to have been enfranchised in the time of King Edward the Confessor, of the five ports, Dover, Sandwich, Romney, Hythe, and Hastings, to which were afterwards added in very early times, Winchelsea and Rye; each of these, except Hythe and Winchelsea, have also members, some of which are very distant, and now quite inland. The jurisdiction of the Cinque Ports extends along the coast continuously, from Seaford in Sussex to Birchington near Margate, and includes also the Swale at Faversham. They formerly had to provide a navy for the king's use, in return for which many important privileges were granted. The Lord Warden of the Cinque Ports is also governor of Dover Castle.

Cintegabelle, tn., France, dep. Haute Garonne, on the Ariège, 21 m. S. by E. Toulouse. P. <2000.

City Island, vil., U.S., New York, Westchester co., 16 m. NE. New York. P. <1500.

City of Salt, place named in O. T. See **Tell el Milh.**

City Point, vil., U.S., Virginia, Prince George co., on the S. side of James R., 19 m. SSE. Richmond. P. <1500.

Ciudad, Spanish, 'city.'

Ciudad Bolivar, tn. and riv. port, Venezuela, cap. state of Bolivar, on the r. bk. of the Orinoco, which is navigable to this point (373 m. from the mouth) for sea-going steamers, 190 m. SW. of the SW. end of the isl. of Trinidad. At high water (August, September, and sometimes part of October) such vessels as can pass the bar of the Orinoco (16½ ft.) can anchor alongside the quays, but at low water (February to April) vessels drawing more than 11 ft. have to discharge into flat-bottomed boats some way down the river. The town was founded by Mendoza in 1764, and was first called **Angostura** ('narrows'), owing to the fact that the river here contracts to 800 yards in width. In 1790 it was made the seat of a bishop. P. 11,700

Total, Clare	768,265[1]	124,483

[1] Exclusive of 59,729 ac. under the larger rivers, lakes, and tideways.

Surface is undulating in the centre of the county, with hills rising to between 500 and 1000 ft., in a few places to above 1000 ft., in the NE. and E. and NW. and W.; highest point Glenagalhagh, in the Slieve Bernagh, 1746 ft. In the W., which is part of the Munster coalfield, the soil is boggy, along the shore of the Shannon it is rich loam; the W. coast is rocky, and has several bays, of which the chief are Ballyvaghan, Liscannor, and Malbay. The scenery of this coast is magnificent, especially at the cliffs of Moher, N. of Liscannor Bay. The only considerable river is the Fergus, whose wide but shallow estuary opens into the Shannon about the middle of the S. coast-line. Chief towns, Ennis, the cap., Kilrush, Ennistimmon, and a part of Killaloe. The Midland Great Western Rly. runs from N. to S. through the county past Ennis, and the W. Clare Rly. from Ennis to Miltown Malbay on the W. coast, and Kilrush on the Shannon, and thence to the beautiful watering-place of Kilkee, on the Atlantic, near Loup Head. Manufactures frieze and hosiery for local use. The whole country affords excellent pasturage, and large quantities of stock are reared. For agriculture, see **Appendix,** pp. 10–12. By far the greater part of the surface belongs to the Carboniferous limestone, but the eastern hills belong to the Devonian and Lower Silurian systems. Slates are quarried at Kilrush and Miltown Malbay. Salmon-fishing carried on chiefly in the Shannon; there are large oyster-beds at Ballyvaghan and Burren. The county returns two members to Parliament, one for the E. and one for the W. div. Since 1841 the population has steadily decreased. See **Ireland,** table.

Clare, market-tn. and par., Eng., Suffolk, Sudbury div., 12½ m. SW. by S. Bury St. Edmunds, on the G. E. R. and Colne Valley Rly., PMT.O. Market-day, M. P. <2000.

Clermont, or **Clermont Ferrand,** the ancient *Augustonemetum*), arr., comm., and city, France, cap. dep. Puy-de-Dôme, built round the sides of a gently sloping hill overlooking the Limagne, 45 m. SE. by S. Montluçon. It is composed of two towns, Clermont and Mont-Ferrand, united by a fine promenade. Being situated near the Puy-de-Dôme, it is surrounded by volcanic formations of the most varied aspect. In one of its suburbs is the fountain of St. Aline, the incrustations of which, during the successive deposits of 700 years, have formed a curious natural bridge. Manufactures of macaroni and semolina, fruit preserves, chemical products, linen and woollen fabrics, &c. Sacked by the Normans in the 9th century; subsequently rebuilt and called *Clarus Mons.* Birthplace and in early years the residence of Pascal [**Puy-de-Dôme,** mt.]. Alt. 1273 ft. Mean temp., yr. 51.5° F., Jan. 37.4°, July 66.6°; rainfall, 20.08 in. P. city (1872) 33,000; (1891) 50,100.

Cluses, tn., France, dep. Haute Savoie, on the Arve, 24 m. ESE. Geneva, arr. and 8 m. E. by S. Bonneville. P. <2000.

Clusone, comm., Italy, Lombardy, prov. and 18 m. NE. Bergamo, with iron, copper, and vitriol-works. P. <4000.

Clusone, ancient *Cluso,* riv., N. Italy, prov. Turin, rises in the Alps, about 12 m. E. Mount Genèvae, flows SE. past Fenestrella, Perosa, and Pinerolo, and after a course of 50 m. joins the Po, 18 m. SSW. Turin.

Clutha, co., New Zealand, South I., on the S. ct., between 169° and 170° E.

Clutha, or **Molyneux,** the most important river in the S. of the South I. of New Zealand, in prov. Otago; it flows from the Wanaka and Hawea lakes, on the borders of Canterbury prov., and passing southwards intersects the prov. of Otago, reaching the sea at Molyneux in 46° 25′ S.

Clutton, par., Eng., Cheshire, Eddisbury div., 8½ m. SSE. Chester, 1½ m. NW. Broxton stn., PMT.O. P. <250.

Clutton, par., Eng., Somerset, N. div., 8½ m. S. by E. Bristol, on the G. W. R., PM.O. P. <1500.

Clwtybont, vil., Wales, Carnarvonshire, 4½ m. S. Bangor, 5 m. from Llanberis, P.O.

Clwyd, riv., Wales, rises in the S. of Denbighshire, and flows N., past Ruthin, St. Asaph, and Rhuddlan, into the Irish Sea at Rhyl. Its valley, the Vale of C., mainly an outlier of old red sandstone, one of the most beautiful in Wales, 20 m. long and 3 m. to 8 m. broad; chief affluent is the Elwy.

Clyda, small riv., Ire., co. Cork, flows N. to the Blackwater, which it joins a few miles above Mallow.

Clydach, hamlet, Wales, Brecknockshire, on the Usk, 15 m. SE. by E. Brecknock, 1½ m. NE. Clydach stn., on the L. & NW. R., P.O.

Clydach, eccles. par. and coal-mining vil., Wales, Glamorganshire, Gower div., 5 m. WNW. Neath, on the Tawe, close to Cwm Clydach stn., PMT.O. P. 6000.

Clydach Vale, coal-mining vil., Wales, Glamorganshire, near Pontypridd, and 1 m. from Ystrad stn., PMT.O.

Clydagh, riv., Ire., in the extreme E. of co. Kerry, the upper part of riv. Flesk.

Clyde (the *Glotta* of Tacitus), one of the largest and most important rivers in Scotland. It takes its rise from numerous streams flowing from a mountain range in S. part of Lanarkshire and borders of Dumfriesshire and Peeblesshire, the chief summits of which are the Lowthers, Queensberry Hill, and Clyde Law. The source of the Clyde, popularly so called, the Little Clyde's Burn, lies on the S. slope of Clyde Law at the elevation of 1550 ft., 4½ m. E. by S. of the village of Elvanfoot, within ⅝ of a mile of headstreams of the Annan and Tweed. After a course of a few miles this small stream joins the Daer, which flows N. from the S. borders of Lanarkshire (Cana Hill and Queensberry Hill), and should be regarded as the true headstream of the C. At the confluence it is already enlarged by the Potrail from the SW. Still flowing on the whole N., it winds to the E. round the Tinto Hills, then turning with many windings NW. and W., is joined by the Douglas Water from the SW., the Medwin, Mouse, &c., and entering Lanark parish, forms the celebrated falls, descending by several steps about 230 ft., amid high shelving sandstone rocks and picturesque scenery. The falls are Bonnington Linn, 30 ft.; Corra Linn, 84 ft.; and Stonebyres, 80 ft. Its course is now through rich and fertile valleys on to Glasgow (*q.v.*), up to which city it has been rendered navigable by successive improvements, since about 1770, for the largest ocean steamers, for the building of which the C. has become famous. From Glasgow the C. flows WNW., dividing the co. Renfrew on the S. from Dumbarton on the N., receiving the tributaries of the Kelvin, Cart, and Leven. At Bowling it receives the Forth and Clyde Canal. After passing Dumbarton, where the river may be said to end, it gradually widens, till between Greenock and Helensburgh it is 4 m. in width, spreading N. into Gareloch and Loch Long, W. into Holy Loch, and S. into the Firth of Clyde proper, with the isles of Bute and the Cumbraes situated at its mouth. Length from the source of the Little Clyde's Burn to Dumbarton 91 m., from the source of the Daer 106 m.; estimated area of basin, 1481 sq. m., or including the portion from

Dumbarton to Greenock and the Gareloch, 1580 sq. m. Length of the Firth of Clyde to the lat. of the Mull of Kintyre, 64 m. See H. R. Mill, *The Clyde Sea Area*, in *Trans. Royal Soc. Edin.*, vol. xxxvi.

Clyde, riv., Brit. N. America, entering Baffin Sea, in 70° 10′ N., 69° W.

Clyde, co., New South Wales, in the angle between the Darling R. on the N. and the Bogan on the SW.

Clyde, riv., New South Wales, enters M'Leay R. at Bateman's Bay.

Coast Province, a Cis-Leithan prov. of Austria-Hungary, at the head of the Adriatic, embracing Istria, Trieste, Görz, and Gradiska. The fertile littoral region is separated by the arid Karst (*q.v.*) plateau from the terrs. watered by the Save and its tribs. Of rivers have to be mentioned the Isonzo and the Rieka or Recca (near Trieste), the latter flowing in part underground. The climate of Istria and the valley of the Isonzo resembles that of Italy, whilst the interior is subject to great changes of temperature. The inhabitants are principally Slavs and Italians, the Slavs occupying the plateaux, and the Italians the coast region. The latter and the plains are densely peopled. Agriculture is in a very backward state. The sheep-breeding of

Istria is considerable. Sea-salt is produced at Capodistria and Pirano. Shipbuilding is the only important industry. Trieste is the great commercial emporium of Austria-Hungary. Other towns are Pisino (cap. of Istria), Görz, Rovigno, and Pola, which is the principal naval station of the Austrian empire. See **Austria-Hungary,** table. [**H. G. S.**]

Coast Ranges. See **California** and **British Columbia.**

Cochin, tn. and port, surrounded by native state of C., Brit. India, Madras, Malabár dist., on the W. ct., 87 m. SW. by S. Coimbatore, 97 m. SSE. Calicut; situated at the S. of the principal navigable entrance to the great lagoon of Travancore It has shipbuilding yards, an arsenal, harbour, citadel, and extensive trade. One of the first spots in India visited by Europeans. Christian and Jewish colonies said to have existed here since the first century of the Christian era, the Christians forming the sect of Nasaráni Mápplás (Moplas). In 1500, Cabral, the Portuguese adventurer, landed here. In 1530 St. Francis Xavier made many converts in these parts. C. was captured by the English from the Dutch in 1795, and formally ceded to the English in 1814. Lighthouse visible 15 m. Mean temp., yr. 80° F.; rainfall, yr. 115.1 in., May-Oct. 100 in. P. municip. (1881) 15,700; (1891) 17,600; Christians, 9800; Hindus, 4700; Moham. 3100.

Cochin, native state, India, Madras, W. ct., to the N. of Travancore (*q.v.*), which it resembles in physical features; cap. Ernakolam. See **Madras,** table.

Cochin, tn., India, native state C., ½ m. S. of British town of C. P. (1875) 13,800.

Cochin-China (native names—local, **Gia-Dinh**; official, **Nam-ki**; the last meaning the 'country of the south'), a French colony in the S. of Indo-China, comprising six provs. ceded by

Annam; roughly quadrilateral in form, stretching from Cambodia and Annam on the N. and NE., and forming in the S. the penin. which separates the China Sea from the Gulf of Siam. Divided for administrative purposes into the following four provs., in order from NE. to SW., Saigon, Mytho, Vinh-Long, and Bassak. The greater part of the country consists of vast alluvial plains, formed by the deltas of the Mekong and the Dongnai, or Don-nai, with the Saigon R. and Great and Little Vaco, all connected by a confused network of branch streams (*arroyos*). In the NE., towards Annam, are more elevated tracts, well wooded, with rocky summits rising in the Chua-Chang, near Bien-Hoa, and the Ba-Dinh, near Tay-Ninh, to about 2000 ft. In the W. are the last outliers of the Elephant Mts. of Cambodia, whose highest summit scarcely exceeds 1300 ft. The rivers form the principal means of communication, the larger being navigable by small steamers (Saigon accessible to ocean steamers). The mouths of all the rivers are obstructed by the deposits of sediment which are yearly adding to the area of the cultivable land. Two canals, narrow and shallow, connect the Posterior or Bassak arm of the Mekong with the Gulf of Siam; one, 44 m. in length, ends at Hatien; the other, 25 m., at Rash-Gia. Off the coasts are several islands, the principal of which are the Pulo-Kondor group and Pulo Obi, in the China Sea, and the Fu Kwok (Phu-Quoc) group in the Gulf of Siam. These islands are lofty, as compared with the neighbouring coast, rising from 1000 to 2000 ft., and generally well wooded. The **climate,** like that of other parts of Indo-China, is subject to the monsoons, and is particularly unhealthy during the period between the change of the monsoon in April and the rainy season, which sets in in May or June [**Saigon**]. Storms are of frequent occurrence, especially towards the end of the rainy season in October. **Agriculture** is the general occupation of the people, the principal crop being rice, cultivated throughout the low lands; cotton has a limited cultivation, and the conditions seem favourable for its extension; indigo, tobacco, sugar-cane, and cardamoms grow well; pepper chiefly on the Gulf of Siam. Forests estimated to cover about 3500 sq. m. are found in the NE., and contain valuable woods both for ship-building and cabinet-work. **Minerals** are unimportant. Saline lagoons at Saktrang, Baria, and elsewhere, yield a considerable quantity of salt. The principal export is rice, chiefly to China and the neighbouring states; other exports are fish, pepper, silk, cotton, and skins. The internal and export trade is mainly in the hands of the Chinese. Native industries are insignificant, the most characteristic being that of mats, carried on chiefly at Saigon and Rash-Gia, though some progress is being made in the production of articles for domestic use, formerly imported from China. The **money** is similar to that of Annam (*q.v.*). Annamites form by far the great majority of the **inhabitants,** Cambodians number over 100,000; in the NE. are the Mois, whose numbers are quite uncertain. The **government** is administered by a Lieutenant-Governor acting under the Governor-General of Indo-China, who resides at Saigon, and a council consisting of six French and six Annamite members. Local affairs are intrusted to native officials. Waterways afford the principal means of communication, the facilities for which are greatly enhanced by the tidal movements throughout the delta. Roads are being extended to connect the principal towns. There is a railway of about 50 m. between Saigon (*q.v.*) and Mytho. The principal towns besides those just mentioned are Sholon (Cholon), Vinh-Long, and Shodok (Chaudoc). Hatien and Rash-Gia are ports with coasting trade. Area roughly estimated at 23,000 sq. m., and pop. at over 2,000,000. [**E. J. H.**]

Cochinoca, vil., Argentine Republic, Jujuy, cap. dep. C., 277 m. N. by W. Tucuman; extremely rich in salt. Alt. 11,970 ft. Mean temp. (16 yrs., 1873–88), 55.4° F.; mean rainfall, yr. 9.4 in., April–Sept. 1.6 in. P. <2000.

Cochise, co., U.S., Arizona, in the SE. corner of the terr.

Cochran, settlement, U.S., Georgia, Pulaski co., 137 m. W. by N. Savannah.

Cochran, vil., U.S., Indiana, co. Dearborn, 2 m. SW. Aurora, on Ohio R. P. <1500.

Cochran, co., U.S., Texas, in NW., on W. frontier, S. of 34° N.

Cochrane, stn., Canada, dist. Alberta, on the C. P. R., 863 m. by rail W. Winnipeg.

Cochranton, settlement, U.S., Pennsylvania, Crawford co., on French Creek, 41 m. S. Erie.

Cockatoo Island, now **Biloela,** isl., New South Wales, in Port Jackson (Sydney Harbour), originally a place of imprisonment for convicts, now with a large graving-dock.

Cockayne Hatley, par., Eng., Bedfordshire, 13 m. E. Bedford, div. and 5½ m. NE. by E. Biggleswade, 1½ m. SE. by S. Gamlingay stn. P. <250.

Cockayne Ridge, hill, Eng., Yorkshire, N. Riding, Whitby div., 15 m. SSE. Middlesbrough. Alt. 1410 ft.

Cockburn, post-tn., S. Australia, on the E. border, 245 m. NE. Adelaide. P. <2000.

Cockburn Channel, strait, S. Chile, between Clarence I. on N. and the SW. penin. of the main island of Tierra del Fuego, crossed by 72° W., 54½° S.

Cockburn Harbour, in the S. of S. Caicos I., W. Indies.

Cockburn Island, isl., Canada, Ontario, W. of Grand Manitoulin I., in 45° 50′–46° N., 82° 18′–30′ W.

Cockburn Land, forms the W. portion of Baffin Land in the Gulf of Boothia, in 70°–74° N.

Colca, riv., Peru. See **Majes, Rio.**

Colchagua, prov., Chile, S. America, stretching from the Andes to the Pacific, crossed by 34½° S., cap. San Fernando.

Colchester, co., Canada, Nova Scotia, bounded partly on the S. by Cobequid Bay.

Colchester, vil., Canada, Ontario, Essex co., on Lake Erie, 23 m. S. by E. Windsor. P. <1500.

Colchester, settlement, Cape Colony, dist. Alexandria, on the Sunday, 23 m. NE. by N. Port Elizabeth.

Colchester ('castle on the Colne'), the ancient *Camalodunum*, an old mun. bor. and parl. bor. (one member), Eng., Essex, at the head of navigation on the Colne, which is navigable to the quay for vessels of 150 tons, with two stns. on the G. E. R. It has an old castle (part now used as a museum), round which there is a public park of 17 ac. For many centuries it was the seat of a considerable woollen industry, which was greatly promoted by the settlement of Flemish refugees in the reign of Elizabeth. At the present day its principal industries are iron-working and boot and shoe making. Market-day, S. P. (1801) 11,500; (1871) 22,600; (1891) 34,600.

Cologne, Ger. **Köln,** the principal tn. of Rhenish Prussia, on the l. bk of the Rhine, in a fertile plain. It occupies a very important geographical position, being situated on the spot where the natural high road from Northern France to Prussia crosses the Rhine; and it is at the head of navigation for sea-vessels. Lat. of cathedral, 50° 56′ 59″ N., long. 6° 57′ 52″ E. C. is a fortress. The old quarters with their narrow streets, still look like a mediæval town, whilst the suburbs which surround them in a semicircle are modern and well built. The grand Gothic 'Dom' (commenced in 1248, finished in 1880) is one of the finest cathedrals in Europe. Besides the 'Dom,' C. has many old churches and buildings of interest. A splendid railway bridge connects C. with the suburb of Deutz (*q.v.*) on the r. bk. C. is a great railway centre, and the headquarters of the steam navigation on the Rhine. Its traffic is increasing from year to year. It is also noted for its manufactories, the most important being cotton mills, woollen cloth factories, potteries, chemical works, machine shops, and distilleries of "eau de Cologne." C. was a well-known Roman colony of veterans, named after the daughter of Germanicus, *Colonia Agrippina*, from which its modern name is derived. During the early years of the Middle Ages it was a great centre for land and sea trade; but from the 15th century it rapidly declined, and it is only during this century that it has regained its previous importance. Alt. 155 ft. Mean temp., yr. 50.2° F., Jan. 35.9°, July 65.8°; rfall. (23 yrs.), 23.5 in. P. (13th to 14th century) about 100,000; (15th century) about 50,000; (1804) 40,400; (1855) 100,000; (1871) 129,000; (1885) 161,300; (1890) 197,000; including suburbs, 282,000. [**H. G. S.**]

Colombia, a republic in the NW. of S. America, comprising also the dep. of Panama in Central America, nearly six times the size of Great Britain, divided into the deps. named in the following table:—

Departments.	Area in sq. m.[1]	Cultivated Area in sq. m.[1]	Pop. 1870 (Thousands).	Pop. 1881 (Thousands).	Pop. per sq. m. 1881.
Magdalena . .	30,000[2]	9,653	97[4]	90	3
Bolivar . . .	27,028	11,583	249[5]	280	10
Panama . . .	31,893	13,938	224[6]	285	9
Cáuca . . .	257,463	22,588	435	621	2.4
Santander . .	16,293	7,143	425	556	35
Antióquia . .	22,791	12,741	366	470	20
Boyacá . . .	33,322	11,776	509[7]	702	21
Cundinamarca .	79,691	8,919	410[8]	569	7
Tolima . . .	18,436	14,016	235	306	17
Total (round numbers)	517,000[3]	112,356	2,951[9]	3879	7.5

Orography and Hydrography.—The S. American portion of the republic of C. is mainly composed of the part of the Andine system, enclosing the basins of the Magdalena and Cauca described under **Andes, A.,** together with lands on both sides of the system, those in the E. forming extensive *llanos* or plains belonging to the Amazon basins. The W. Cordillera of the Andes, and its W. spurs towards the coast, divide the waters into two principal channels (rivs. Atrato and San Juan), forming an almost uninterrupted depression between the Gulf of Uraba (Caribbean Sea) and the Bay of Charambira (Pacific). At the extreme N., the easternmost of the three Andine Cordilleras may be considered as divided into two more or less continuous branches, including the Maracaibo gulf region [**Venezuela**]. The W. one (Sierra de Porija) has, in the direction of its development, the isolated Nevada de Santa Marta and the hills of the Goajira Penins. To the NW. of it extends the vast lacustrine region of the lower Magdalena, between the northernmost heights of the E. and W. Cordilleras. As to the isthmian portion of Colombia, see **Panama.** The ancient course of riv. Magdalena seems to have been N.–E., along the depression between Sierra de Santa Marta and Sierra Porija, where Lake (Cie'naga) Tapatosa (19–26 ft. deep, 200–800 sq. m. in extent) now lies, and the rivs. Cæsar and Rancheria (Calacala) run in opposite directions. Riv. Magdalena is still inclining W., leaving the old bed for the Brazo (arm) Mompos, and the latter for the Brazo-Loba and the Cauca, flowing at last, with this, as one river, through a very extensive swampy plain, where the water runs along many channels (*Canos, Brazos, Brazuelos*), sometimes interrupted (*Tapones*), and collect into innumerable lakes (*Cie'nagas*), the northernmost of which (Cape de Santa Marta) has an area of 275 sq. m. Lakes Balsillos, Fontibon, Guatavita, Guasca, around Bogotá, are the remains of an old inland sea (Cundinamarca); so is Lake Fuquene. **Geology.**—Archæan rocks form the W., the Central, and, to a smaller extent, the E. Cordilleras, as well as the Nevada de Santa Marta, the central mass of the Goajira Penins. and the isthmus (granite, gneiss, schists, with numerous volcanic rocks); Mesozoic formations (Jurassic: high Magdalena, Cretaceous, sandstones) cover the older ones on the Darien and the Cordilleras. The littoral (between Cartagena and the Magdalena, Panamá), the valleys of the larger rivers and the *llanos* are to a great extent Tertiary (sandstones), and in some points Quaternary. There are many volcanoes and remarkable signs of constant volcanic activity. **Mineral productions.**—Two-thirds of all C. gold comes from Antioquia (gold also from Pamplona, Jiron, Bucaramanga, Chocó). There are old silver-mines (Santa Ana, Mariquita). Since the 16th century £125,000,000 of gold and £7,000,000 of silver have been produced—£650,000 annually. Iron is mined at Pradera (Bogotá, seventy tons per day). There is platinum, copper, lead, coal, petroleum. Mines yielding excellent emeralds (Muso, Rio Minero—£20,000 annually)

[1] According to Lemos, *Compendio de Geografia de la Republica de Colombia* (1887).
[2] In round numbers including the terr. in the Goajira Penin. claimed till 1891 by Venezuela.
[3] According to the calculations of Wagner and Supan (*Bevölkerung der Erde*, No. IX.), 464,500 sq. m.
[4] Including the terrs. of Goajira and Nevada y Motilones.
[5] Including the terr. of Bolivar.
[6] Including the terr. of San Andres y Providencia (the islands in front of the Mosquito Coast).
[7] Including the terr. of Casanare.
[8] Including the terr. of San Martin.
[9] Total, including uncivilised Indians (about 50,000), in round numbers, 3,000,000.

are worked by the state. So are the salines (Zipaquira, Nemocon, Antioquia, base of E. Cordillera). **Climate.**—C. is entirely tropical and partly under the thermic equator. The warmer regions are those turned towards the Caribbean Sea (80°), the Magdalena valley (103½°), the E. Andesian slopes and *llanos* (89°–91°). This last region is one of the hottest. The climate only changes further S. (Caquetá), where the Amazonian Hylæa begins. On the Caribbean coast the trade winds dominate. It rains ten to eleven months a year. On the Cordilleras and in their valleys all climates are to be met with, according to altitude and exposure, large zones with 57°–75° being temperate (Bogotá, 10 years: medium temp., 57°; rfall., 3 ft. 3 in.). Temperature is lower on the Pacific coast than on the Caribbean. N. winds blow regularly during the dry season. On the Pacific coast, from Ecuador to the Gulf of Panama (*las calmas*), winds are, on the whole, infrequent. Far from the coast the NE. and SE. trade winds meet (July–Nov., *vendavales*), but they often reach the continent (*cordonazos*). SW. winds get cold on the Ecuador-Andes, blow on the dry and hot valleys of south C., and give their moisture to the forests of the Chocó. At the Bay of Chocó it rains all the year; at Panamá eight months (April–Sept.). In the depression between S. America and the isthmus the humidity is intense and constant (Caribbean Sea, 8 ft. 2 in.; rivs. Atrato-San Juan, 20 ft.). All other localities in C. have two rainy seasons (*inviernos*) and two dry ones (*veranos*). **Flora.**—C. is, at the SE. extremity of Central America, what Mexico is at the NW.: the meeting-place of several floras — Isthmian, Brazilian, Venezuelan, Guianian, Andine, with an immense variety of types. With the exception of some points in the S. (valley of the Dagua), the SW. of Sierra de Santa Marta, the highest lands (*paramos*), the parts cleared for culture (*pajonales*), and the N. of the *llanos*, C. is covered with forests. Palm-trees are, everywhere, of great variety, but specially on the slopes of the E. Cordillera, towards the *llanos*. The wax palm (*Ceroxylon andicola*, at more than 3000 ft.), the *tagua*, or vegetable ivory (*Phytelephas macrocarpa*, Atrato, Patia, Isthmus), *corneto* (*Deckeria*). A Pandanus (*Carludovica palmata, naucuma*) yields the material for the Panama hats. Arboreal ferns go higher than the palm-trees (11,480 ft.). The bamboos and the *Speletia* (*frailegon*) go still higher (14,100 ft.). Oak-trees (*Quercus granatensis*) and many other plants with an European facies are abundant. On the *llanos* the forests are intersected with Gramineæ. The Cinchonas were first (1793) studied in C. (7870–9840 ft.). The cedron (*Sinahua cedron*) is also employed as tonic and febrifuge; the *guaca* (*Aristolochia ringens*) against snake poison. The *racacha*, the *coca*, the Tolu balsam, the *dividivi* (*cæsalpina*), the *Castilloa* (caoutchouc) are abundant in C. So are some of the best dye-woods (*rocu, Bija orellana*) and some of the most esteemed and now rare Orchideæ. **Fauna.**—Several faunas meet at C. too with all the Central and S. American mammals. The glyptodon, the megatherium, the taxodon, the mastodon lived in C. in old times; the last till a recent period. Insects, fishes, and birds are remarkably abundant and varied, distributed according to altitudes. The king vulture (*Sarcoramphus papa*) is the only bird of prey flying above the highest mountains. **Ethnology.**—Two old civilisations existed in C. (16th century): 1. The Muysca ('bodies of five extremities,' men), or Chibcha, in Cundinamarca. 2. The Nutabé and Tahami in the Cáuca valley, and the mountains between the Porcé and Magdalena. 3. The Chocó, in the Atrato-San Juan lands (Citaras, Catios, Bandó, Tadó, Noanama), extending N. to the isthmus and lower Cáuca, S. to the Ecuador. 4. Peoples of Quichua origin on the *Macisso* of C. (or mountain-knot from which the three Cordilleras diverge), and high Cáuca (Coconucos, Pastusos). 5. Peoples of Aztec-Maya descent (guaymi) to the Chiriqui Bay on the isthmus. 6. Nu-Arawaks (Aurolinacos, 'Coggaba,' men) on the Sierra de Santa Marta. 7. Caribs (Guayu, Goajiros, Goahiros) are settled at the Goajira Penins. and on the N. heights of the E. Cordillera (Motilones). 8. Some of the inhabitants of the *llanos* (Tunebos), Salivas, Quivas, Papiocos, Mocoas, Mataguajas, Oregones, Encabellados) are perhaps Maipures (Nu-Arawaks), others are Caribs. 9. Many other peoples, not yet well studied, are to be met with between the above-mentioned. 10. African negroes, or mulattos, exist principally on the littoral (Caribbean Sea and Pacific). **Population.**—There are large desert territories on the *llanos*, the littoral, on the N. damp and swampy region. The population is more dense on the *Macisso* and the highlands around the middle Magdalena–Cáuca at 2600–10,200 ft. alt. The Antioquia district is the great centre of colonisation for the rest of the republic. The low, hot, damp, swampy lands protected from winds are very unhealthy. **Agriculture.**—In temperate climates maize (*arepas*) is grown; on hot lands the manihot; in cold regions, wheat and potatoes (*papas, turmas*). Potatoes, oats, broad beans, and the *Oca* (*Oxalis tuberosa*) are cultivated above 12,000 ft. Coffee, cacao, and tobacco are among the important products. Alcoholic drinks are made with maize (*Chicha*) and the sugar-cane (*guarapo*). Cattle and horses are reared in the central districts (Bogotá).

Means of Communication.—There are very few roads. So far there are only short and isolated lines of railway (Savanilla-Barranquilla, Puerto-Berrio, Bogotá-Roble, Girardot-Anaponisa, Villamizar-Circuta, Buenaventura, Colon-Panamá. A ship-canal was begun between Colon and **Panamá** (1881–1889). All important towns are connected by telegraphs, which become international at Buenaventura, Panamá, and Colon. The **exports** are coffee (one-quarter of the total value), tobacco, vegetable ivory, cinchona bark, gold, silver, cacao, hides and leather, caoutchouc, sugar, vanilla, cochineal, woods, live animals. The **imports** are cotton, linen, and woollen goods, wines, manufactured iron. Very important commercial transit through Panamá and Colon. Ports on the isthmus are free. The value of exports and imports was, in 1887, 22,800,000 pesos; in 1891, 39,200,000: more than one-third with Great Britain. The decimal metric system of weights and measures is the legal one (1857), but the old Spanish measures are still in general use. The English yard is much used. (See **Bolivia.**) The *peso*, or silver dollar, has now a value of two shillings. In Panamá and Colon the Peruvian dollar is the legal tender. Paper circulation. C. is (1885) divided into nine departments, Bogotá being the cap. A congress, with two chambers, is indirectly elected. One *representative* for every 50,000 inhabitants; three senators for every dep.; six nominated by the president, who is elected for six years. The official religion is Roman Catholic, but all others are tolerated. The army has 5–6000 men. **History.**—The Darien Isthmus was first crossed, and the Pacific discovered, in 1518; C. visited (1531), and the name of Nueva Granada given to it, in the beginning of the 16th century, becoming soon after (1563) a *presidencia*, then (1719) a vice-kingdom, and a kingdom (1740, *Nuevo Reino de Granada*) subject to Spain. The war of independence lasted from 1810 to 1821, when S. Bolivar founded the Republic of Colombia, which in 1832 was divided into three nations—Nueva Granada, Venezuela, Ecuador—the first constituted as a confederation of eight states (constitution of 1858) under the name of *Estados unidos de Colombia*. After the revolution of 1885 (constitution of 1886) the states became simple deps. Total P. (1810) 800,000; (1870) 2,900,000; (1881) 3,800,000. [**J. B. B.**]

Colombo, or **Columbo,** chief seapt. tn. and modern cap. of Ceylon, on its W. ct. Lat. of lighthouse (in centre of fort, visible 17 m.), 6° 56′ N. The fortified town, about 1½ m. in circumference, stands on a peninsula, on three sides surrounded by the sea, and having landward a lake, moat, and drawbridges; internally it resembles a European town. The fortified town is the residence of the military authorities; the open town or petta to the E. is occupied by a mixed population of Dutch and Portuguese descent, and the suburbs are inhabited by native Singalese. The harbour, defended by the fort, and sheltered by a breakwater, is accessible to the largest vessels, but the vessels are moored to screw pile moorings, and loaded and unloaded by lighters. It is a port of call for the mail steamers to Calcutta, China, and Australia. Letters from England are delivered in about 18 days. Dist. from London, by sea direct, 6703 nautical miles, calling at Brindisi, 7058 m.; from Calcutta, 1380 m. C. was occupied by the Portuguese in 1517; taken by the Dutch in 1603, and by the English in 1796. Mean temp. (12 yrs.), yr. 81° F., Jan. 79°, May 83°; mean rfall., yr. 87.3 in., April to June 30.2 in., Oct. to Dec. 32 in. P. (1858) 55,000; (1871) 100,000; (1891) 127,000.

Colonia, or **C. del Sacramento,** seapt., Uruguay, cap. dep. C., on the Rio de la Plata, 96 m. W. by N. Monte Video. Founded in 1680 by the Portuguese as a military post; its possession was frequently disputed between them and the Spaniards; fortifications razed in 1777. Its port is formed by a bay protected by several islands near its mouth. P. about 3000.

Colonne, Capo, or **Capo di Nau,** cape, Italy, in the SE., in 39° 2′ N.; also the Italian name of **C. Sunion,** Greece.

Colonsay, an isl. of the Hebrides, Scot., included in Argyllshire, 9 m. WNW. Islay, separated from Oronsay I. by a narrow sound, left dry at low water. Length of both islands 12 m., and from 1–3 m. in breadth; length, exclusive of Oronsay, 8 m. Surface irregular, but not mountainous. Loch Fad is in the centre. PM.O. Area, 9000 ac., of which one-half is cultivated. Par., including Oronsay, 11,076 ac., P.<500.

Colonsay, Little, islet, Scot., Argyllshire, off the W. ct. of Mull, in 56° 27′ N. P. 2.

Colorado, Spanish, 'red,' the name of many American rivers.

Colorado, riv., in the N. of the Argentine Republic, states of Catamarca and Rioja, flows S. then SE. towards the Salina Grande, but dries up before reaching it.

Colorado, riv., Argentine Republic, formerly the N. limit of Patagonia, now forming, for the greater part of its course, the boundary between the prov. of Mendoza and the govt. of the Pampa on the N., and the govts. Neuquen and Rio Negro on the S., flows ESE. from the Andes into the Atlantic to the S. of the Bahia Blanca by two arms between 39½° and 40° S.

Colorado, or **Brazo Colorado,** an arm of the San Juan R., Central America, branching off on the right, and flowing S. then E. into the Atlantic in the NE. of Costa Rica.

Colorado, or **Colorado River of the North,** large riv. in the W. of the U.S., draining an area of about 267,000 sq. m., in the southern portion of the N. American plateau. The Green R., the most important head stream of the C., rises on Fremont's Peak of the Rocky Mts., in 43° 15′ N.; 110° W. it has a southwesterly course, receiving many smaller tribs. to where the Grand R. joins it from the mountains of C. near 38° N. From this point it is named the C., and with frequent wide bends flows through the dry plateau land SW. to the head of the Gulf of California. For 300 m. of its lower course the river has cut a narrow gorge of from 3000 ft. to a mile in depth, known as the Grand Cañon of the C. Other cañons occur higher up, and extend in succession over about 256 m. The Grand Cañon has been traversed by James White and Colonel Powell. The San Juan, Little C., and Rio Gila are its chief lower tribs., all from the E. It is little used for navigation, though steamers can ascend to Callville (612 m.), a little above the point where it finally turns S. The river was discovered by Fernando Alascon in 1540. See Powell, *Exploration of the Colorado River* (Washington, 1875); and *Scot. Geog. Mag.*, 1887, p. 441 (with map).

Colorado, riv., U.S., Texas, rises by many heads near 140° W., flows SE., and enters the Bay of Matagorda. Course 900 m. Austin, cap. of the state, is at the head of the steamboat navigation, 300 m. from the sea.

Colorado, one of the U.S., in the middle of the area traversed by the Rocky Mts., about one and a half times the size of Great Britain. The surface presents three great natural divs. (1) The great plains which occupy the E. half of the state, a region of low ridges and valleys, with an average height of 5000 ft.; (2) W. of this the foot-hills, 6500 to 8000 ft., well watered and timbered; (3) the Rocky Mts., which cover the greater part of the W. half of the state, a most complicated system of ranges, including many of the highest peaks of the system. The principal ranges are the Front, the Park, and the Saguache (or Sawatch). The Front range forms the E. rampart, and is crossed by several lofty passes; of its many summits the most noted are Pike's Peak (14,147 ft.), and Longs Peak (14,271 ft.). The Park Range, more to the W., culminates in Mount Lincoln. W. of the Park Range is the Saguache, which terminates N. in the famous Mount of the Holy Cross (14,176 ft.). S. of the Saguache is the Sangre de Cristo, with the Sierra Blanca (14,464 ft.); other ranges are the Culebra, the Sierra Mojado (Wet Mts.), the Elk, and the San Juan Mts., and the Uncompahgre plateau. Between the Front and Park ranges are three of the great 'parks' of the state—the North, Middle, and South, occupying the basins of former lakes, in a belt about 50 m. in width, and consisting of richly diversified tracts, walled in E. and W., and separated from each other by transverse ranges. In the S., between the Sangre de Cristo and the Culebra on the E. and the San Juan Mts. on the W., is the San Luis Park. The principal rivers of C. draining the E. slope are the South Platte and the Arkansas, with their numerous tribs.; in the W. the Grande, with its trib. the Gunnison; and in the NW. the Yampa. The rivers are unnavigable. C. exemplifies in a striking manner the action of volcanic and aerial agencies, the former having raised in a series of gigantic upheavals a vast region, through which many of the streams, favoured by the dry climate, have cut for themselves deep cañons with walls rising in some cases almost vertically 2000 and 3000 ft. The 'Garden of the Gods,' near Colorado Springs (*q.v.*), and Monument Park, with rocks of weird and fantastic forms, and the caverns of Manitou are remarkable natural phenomena. The mountains consist chiefly of Archæan rocks; in the SW. are extensive volcanic areas, and E. and S. cretaceous and post-cretaceous formations; carboniferous rocks extend in an interrupted belt NW. and SE. through the state, with patches in the SW.; the San Luis valley consists of Quaternary deposits. Much of the soil is arid, but a large part is capable of cultivation under irrigation, which has already been carried out extensively in the Platte region, though the Arkansas basin seems to offer greater facilities for water storage. The **climate** varies much, chiefly with altitude, but is very healthy; that of the foot-hills being especially beneficial in pulmonary affections. Over by far the greater part of the state the rainfall is less than 15 in., and only within very limited areas and at great elevations does it exceed 20 in. [**Colorado Springs, Denver, Golden City, Pike's Peak**]. The state is pre-eminently rich in **minerals**; W. of the 105th meridian the mountains contain immense deposits of gold and silver; Leadville, Aspen, and Silverton are great silver-mining centres; lead mainly in the Leadville region, amounts to half the total product of the U.S.; iron ore, mostly hematite and magnetite, covers great areas, the deposits in Gunnison co. alone are said to equal those of Pennsylvania; coal-fields cover an area equal to half that of England; copper and petroleum occur in large quantities; mineral springs of great medicinal value occur at Colorado Springs, Manitou, Buena Vista, and many other places. Several of the railways are marvels of engineering skill, the most remarkable being the Denver and Rio Grande, which crosses two passes of over 10,000 ft., and a third (the Fremont), 11,540 ft., while a tunnel has been constructed at an elevation of 11,623 ft. Several gorges are traversed, including the Grand Cañon of the Arkansas, where the railway is carried along shelves of rock, blasted out of the face of the cliff. The principal towns are Denver, the cap., Pueblo, Leadville, Colorado Springs. In some of the gorges of the SW. are the remains of cliff-dwellings, perched on almost inaccessible ledges, and hewn out of the solid rock. Area, 103,925 sq. m. P. (1890) 412,198. See **United States,** table. [**E. J. H.**]

Colorado Desert, large desert in the S. of California, U.S., to the W. of the C. Riv., containing a depressed area known as the Coahuilla Valley, the lowest part of which formerly constituted the San Felipe Sink, about 300 ft. below sea-level. In July 1891 an outlet or overflow of the C. Riv., below Yuma, called the New R., attained sufficient volume to form a lake, called Salton Lake, estimated at about 8000 sq. m. in extent, in the depressed area. This lake afterwards dried up, but it began to form again in 1893. See *Proc. R. G. S.*, 1892, pp. 309–14.

Colorados, group of isls. and shallows near the N. ct. of Cuba, towards its W. extremity.

Colorado Springs, city, U.S., Colorado, El Paso co., 62 m. S. by E. Denver, with a delightful climate and mineral springs; place of summer resort, sheltered by mountain walls on the NW. and SW., but with a wide expanse of plains on the E. and S. Near it is the famous Garden of the Gods, with miles of weather-worn pinnacles and towers of red sandstone, some of them more than 3000 ft. high. Alt., freight depôt, 5960 ft. (R.R.); signal stn., 6032 ft. (U.S. Signal Office). Mean temp. (9 yrs.), yr. 47.2° F., Jan. 25.2°, July 69.4°; rfall., yr. 14.8 in., May to Aug. 9.5 in. Founded 1871. P. (1881) 4200; (1891) 11,100.

Colunquape, Lake. See **Colhue.**

Columbia, federal dist., U.S., once lying on both sides of the Potomac R., about 106 m. from its mouth, between Virginia and Maryland, by which states it was ceded to the republic in 1790 for the seat of the U.S. Congress; now confined to the left or Maryland bank. Washington is cap. of the dist., which is under the government of Congress. Area, 70 sq. m. P. (1890) 230,400.

Columbia, riv., western N. America, rises in the E. of Brit. C., beginning with a wide portion known as the Upper C. Lake, in about 50° 10′ N., within 2 m. of a part of the course of its chief Canadian trib., the Kootenay; flows first NW. by N. to the E. of the Selkirk Range, which it turns a little to the N. of 52°, flowing thence S. to the E. of the Gold Range, and expanding about 50° 40′ N. to form the Upper Arrow Lake. To this point it is too rapid for navigation, but below it is navigable to within a short distance of the U.S. frontier, a few miles below the place where it receives the Kootenay on the left. In the U.S. its course is on the whole S. till, a short distance below the point where it receives the Snake, its chief U.S. trib., it turns W., forming the greater part of the boundary between the states of Oregon and Washington. In U.S. terr. its navigation is interrupted in 48° 40′ by the Kettle Falls, and by several rapids in the N. to S. part of its course, but it is said to be fit for navigation by steamers in high water (middle of May to middle of July) from the Kettle Falls, 725 m. from the mouth, to the Dalles Rapids, which occur in the E. to W. part of its course in 121° 10′ W., about 210 m. from the mouth, and are succeeded by others, the Cascades (where the river pierces the Cascade Mts.), 43 m. lower down. The latter are avoided by a short railway on which river steamers are transferred from the upper to the lower navigable reaches. At the point where the river receives the Willamette, the principal trib. from the S., it begins to be navigable for ocean steamers. The harbour, at its mouth, is capable of sheltering the largest vessels, and has been protected by a jetty 4 m. long. Vessels can sail through main channel, and anchor one mile inland. Navigable for ocean vessels for about 100 m. The C. is first mentioned as the **Oregon,** or **Origan,** in J. Carver's 'Travels' (1766–68). Its mouth was first seen in 1775 by Captain Bruno de Heceta, and its lower course was explored in 1792 by Captain Robert Gray, who named it after his vessel, and this name is now universally used.

Commins Coch, hamlet, Wales, Montgomeryshire, 7 m. E. Machynlleth, P.O.

Commissaires, Lac des, lake, Canada, Quebec, Chicoutimi co., 12 m. S. by W. Lake St. John; 18 m. long N. to S. Belongs to the St. Maurice basin.

Commondale, par., Eng., Yorkshire, N. Riding, 6½ m. SE. Guisbrough, on the NE. R., with fireclay, P.O. P.<250.

Commondyke, vil., Scot., Ayrshire, 3 m. NE. Cumnock. Coal-mining. P.<500.

Commonhead, stn., Scot., Lanarkshire, near Airdrie, on the N. B. R.

Como, the ancient *Comum,* ancient episcopal city, Italy, Lombardy, prov. C., at the S. end of the W. arm of Lake C., 25 m. N. by W. Milan, with manufactures of textiles, glasses for optical instruments, &c. Has a fine Gothic cathedral, faced with marble, and having in the middle of its façade a statue of Pliny the younger. C. is the birthplace of the younger (and probably also of the elder) Pliny, of Pope Innocent XI., of the natural philosopher Volta, and was some time the residence of Paolo Giovio. Was destroyed in the Milanese wars in 1127, and rebuilt by Frederick Barbarossa in 1155. Mean temp., yr. 52.4° F., Jan. 33.4°, July 72.3°. P. 24,000. See **Italy,** Industries.

Como, vil., Canada, Quebec, co. Vaudreuil, on S. shore of Lake of Two Mountains, 37 m. from Montreal. P.<1500.

Como, vil., U.S., Colorado, Park co., 22 m. E. by N. Leadville. P.<1500.

Como, riv., W. Africa. See **Gabun.**

Como, Lago di, the ancient *Lacus Larii,* lake, N. Italy, stretches from N. to S., forking in its S. half at the promontory of Bellagio into two arms, the SW. terminating at Como, the SE. 4 m. below Lecco, whence issues the Adda, which enters the lake on the E. side, near its N. end. Liable to sudden storms. Length, Como to Riva, 35 m.; extreme breadth, 3 m.; area, 59.3 sq. m.; alt. 700 ft.; greatest depth, 1341 ft.

Comorin, Cape, the most southerly point of India, Travancore state, 8° 4′ 20″ N.

Comoro, group of four volcanic isls. in the Mozambique Channel, 350 m. from the NW. ct. of Madagascar, 200 m. from the E. ct. of Africa, between 11° and 13° S., 43½° and 45° E. The isls. are Mayotta, or Mayotte, in the SE., acquired by the French in 1841, with marshy lowlands, the most unhealthy of the group, but with several excellent bays and roadsteads; Hinzuan, Nzuani, Anjouan, or Johanna, to the NW., less marshy; Moheli, or Meali, W. of the latter; and Great Comoro, Angaziya, or Ngaziya, the NW. member of the group, with active volcano 8500 ft. high; very arid, but with large numbers of coco-nuts on the shores. Sugar-cane is cultivated on Mayotte, which has 200–300 inhabitants of French origin, among 10,000 natives. The whole group has been a French protectorate since 1886. Total area, 800 sq. m. P. 40,000–50,000.

Comox, vil., Canada, prov. Brit. Columbia, Vancouver I., on the E. ct., 115 m. NW. by N. Victoria. P.<1500.

Compagnie Post, vil., Cape Colony, dist. Tulbagh. P.<1500.

Compass Berg, mt., in the Sneeuwbergen Range, Cape Colony, 30 m. N. Graaff-Reinet; so called since 1778 (when the Dutch Governor, Plettenberg, made the ascent with Colonel Gordon) on account of the wide outlook. Alt. 8500 feet.

Cómpeta, comm., Spain, prov. Malaga, dist. Torrox. P.<4000.

Compiano, the ancient *Complanum,* tn., Italy, prov. Parma, circle Borgotaro, on the l. bk. of the Taro. P.<3000.

Compiègne, tn., France, dep. Oise, on the Oise, 22 m. W. by N. Soissons; cap. arr. Its palace, rebuilt under Louis XIV., XV., XVI., and restored by Napoleon I., is surrounded by parks and a forest of 36,000 ac. It was formerly fortified, and in defending it, while besieged by the Duke of Burgundy, Joan of Arc was made prisoner in 1430, and sold to the English. Here Napoleon married Marie Louise, Archduchess of Austria, in 1810. It now contains an important museum of Khmer and Gallo-Roman antiquities. Mean rfall., 15.75 in. P. 11,900.

Staffordshire Rly.; has silk, towel, and fustian factories, &c. Market-day, S. P. (1801) <4000; (1851) 10,500; (1871) 11,300; (1891) 10,700. **C. Edge,** a hill to the SE.

Congo, or **Zaire,** the largest riv. of equatorial Africa, and one of the chief rivers of the earth. The length of its course is 2800 m., and the total area of its river system is estimated to more than 1,000,000 sq. m. The enormous bend (NW.–SW.) which the C. makes is due to the peculiar physical features of the country, the highlands of central equatorial Africa sloping down towards N. and W., and the water-parting north of the C. reaching far down towards the SW. The C. is a typical African river, the middle C. being navigable for more than 900 m., whilst the lower course is obstructed by a great many cataracts and rapids, the mighty stream forcing its way through the mountain chains which surround the whole of S. Africa, W., S., and E. The upper C. is formed by the junction of two rivers, the Lualaba and Luapula. The former flows in a NE. direction through Msiri's and Kasongo's country, where it is fed by a number of important tribs.; it passes through a series of lakes, of which the Upemba and Kissale are the most important. The Luapula (in its upper course called Chambeze) rises in the highlands NE. of Lake Bangweolo, and after passing through the marshes of this lake, it makes a descent of not less than 1200 ft. to Lake Meru (Mweru), and joins the Lualaba in 6° S. lat. Shortly afterwards the river receives the Lukuga, which issues from Lake Tanganyika. Further N., at Stanley Falls (seven falls and cataracts between 0° 20′ S. and 0° 25′ N.), the C. leaves the highlands, here being the limit of its upper course. The middle course of the C., where it attains in places a width of several miles, is characterised by the great bend (to 2° N. lat.), and by the stupendous tribs. which pour their waters into the C. The whole of the middle course is navigable. Principal tribs., see **Congo Free State.** The middle course ends at Stanley Pool, a lake-like extension (alt. 920 ft.). Here the river commences its lower course, forming a great many cataracts and rapids as it forces its way through the mountain chains near the coast. Three divisions may be distinguished in this part of the river, firstly, from Leopoldville to Manyanga, where the C. passes through crystalline schists; secondly, from Manyanga to Vivi, the region of the gneiss mts.; and thirdly, the navigable portion till Banana. The last part of the river, near its mouth, is an estuary of about 7 m. in width. The upper course of the C. is also navigable for long stretches, but between about 4½° and 5½° S. the navigation is stopped by rapids. The mouth of the C. was discovered in 1484 by Diogo Cão. Livingstone discovered several portions of the upper C., but the principal explorer of this river is Stanley (1876–77). See **Congo Free State, Urua, Lunda, Garenganze.** [**H. G. S.**]

Congo Free State, an independent state in equatorial W. Africa, extending from the Atlantic to Lake Tanganyika, and from the Ubangi-Welle to Lake Bangweolo and Lake Dilolo [see **Angola**]. It was founded in 1885 by the efforts and under the sovereignty of Leopold II., King of the Belgians. But already previously (soon after Stanley's discovery of the course of the Congo), many efforts had been made to bring the vast territories of the Congo Basin under European influence. Many European stations were established (1879–1883), but the majority of them had soon to be abandoned. At present the following stations are still of importance:—Leopoldville, Kimboko, Bangala, Falls Station, Luebo, Luluaburg, Bena Kamba, and one on the Ubangi-Welle above Ali Kobbo's Seriba. The

seat of the administration of the C. F. S. is at Brussels. The C. F. S. is peopled by numerous Bantu tribes, the most important of which are the Wafua, Manyema, Waregga, Watomba, Bangala, Balolo, Bateke, Bakongo, Bakutu, Bakuba, Baluba, Bashilange, and Balunda. The principal occupation of these Bantu tribes is agriculture, and those living on the Congo and its tribs. are excellent fishermen and boatmen. Dispersed among the Bantu live numerous pygmy tribes, the most important of which are the Batwa, Wambutti, Achwa, and Akka. Many of the natives are cannibals, *e.g.*, the Manyema, Waregga, and the tribes on the Aruwimi and Welle. The most densely populated districts are those on the Middle Congo and on its southern tribs., whilst the enormous primeval forests farther to the E. are more sparsely peopled. The E. terrs. of the C. F. S. are under the influence of the Arabs who raid the country for slaves and ivory. Nyangwe, on the Upper Congo, is one of their principal settlements. The C. F. S. has at present hardly any roads, but river communication is excellent, and far better than anywhere else in Africa, not less than 5800 m. of the Congo and its tribs. being navigable, viz. :—

	Miles.
Congo between Stanley Pool and Stanley Falls	990
Kasai-Sankurru and its tribs.	1860
Chuapa, Ikelemba, and Lake Mantumba	450
Lulongo	370
Boloko	600
Ubangi-Welle	600
Various other tribs.	930

The rapids and cataracts of the Lower Congo are, however, a great hindrance to navigation and commerce, but a railway of 260 miles length is being constructed, which will connect Matadi with Stanley Pool. There are only small import and export duties; and commerce and navigation are everywhere free. Under these circumstances, the C. F. S. has to rely chiefly upon its natural resources. The principal of these are ivory, caoutchouc, palm-nuts, coffee, palm-oil, and copal, the total value of these being at present estimated at about £300,000 per annum. This is not sufficient to cover the necessary expenses, and great efforts have to be made to render the enterprise a success. Banana, at the mouth of the Congo, is a good harbour. The climate is on the whole unhealthy, especially in the lowlands of the rivers; on the higher plateaux of the S. dists. the changes of temperature are considerable, but fevers are less dangerous. The area of the C. F. S. is about 925,000 sq. m. (more than ten times the area of Great Britain). The pop. is uncertain, the different statistics varying from 12,000,000–40,000,000 [**Congo**]. [**H. G. S.**]

Conneautville, settlement, U.S., Pennsylvania, Crawford co., 30 m. SSW. Erie.

Connecticut (kon-net'i-kut), riv., U.S., the largest in New England, rises on N. border of New Hampshire, separates that state from Vermont, traverses Massachusetts and C., and enters Long Island Sound, 30 m. E. New Haven, after a S. course of about 450 m. It has shad fisheries, and is navigable for vessels drawing 8 ft. 50 m. up to Hartford. Its W. branch (Hall's Stream) forms the boundary between the U.S. and Canada to 45° N. Area of basin, 10,800 sq. m.

Connecticut, lake, U.S., New Hampshire, in the N. of Coos co., 17 m. SW. by S. of the NE. corner of the state, traversed by Connecticut R.

Connecticut (a native, Algonquin, name, *Quinni-tuk-ut*, 'long river'; also written in 17th century deeds Quinetucquet and Quenticutt), one of the thirteen original states of the U.S., E. of New York and N. of Long Island Sound. Rivers form the main topographical features of the state, the principal being the Connecticut R. (*q.v.*), which flows S. through the centre; in the E. is the Thames, with a navigable estuary, and in the W. the Farmington, a trib. of the C., and the Housatonic; following the line of the last-named is the principal range of hills in the state, culminating in Bear Mt. (2355 ft.). Archæan rocks predominate, traversed N. and S. by a belt of Triassic formations, with post-Tertiary deposits in the C. valley. As to climate, see **New Haven, New London,** and under **United States.** The principal agricultural product, for export, is tobacco; fruits and vegetables are widely cultivated for home use. The minerals comprise iron ore (brown hematite); building stones are, however, the most important minerals, including sandstone, extensively quarried at Portland, marble, limestone, slates, and flagging, the last, for which Bolton and Haddam are noted, being largely supplied to New York and Washington. C. is pre-eminently a manufacturing and invention-producing state; machines and instruments of all kinds for domestic, farming, manufacturing, and scientific purposes are produced in large quantities, besides a great variety of fire-arms. Chief towns, New Haven, the cap., Hartford, Bridgeport, Waterbury, Meriden, New Britain. C. was visited in 1614 by Adriaen Blok, a Dutchman, and subsequently colonised by Dutch settlers and later by English Puritans. Its charter of 1639 was the first embodiment in America of the principle of free representation. Area, 4990 sq. m. P. (1890) 746,258. See **United States,** table.

Connel Ferry, stn., Scot., Argyllshire, on the C. R., 4 m. NE. by E. Oban, close to the ferry of the same name across the mouth of Loch Etive, PMT.O. (**Connel**).

Constance, Ger. **Constanz,** or **Konstanz,** ancient *Constantia,* city and busy lake-port, Ger., gd.-duchy Baden, occupying the only terr. belonging to Germany on the S. side of the Lake of C., at the place where that lake communicates with the arm known as the Untersee ('Lower Lake'), and where the Rhine issues from it, 35 m. NE. Zurich. Chief edifices, a cathedral, the Kaufhaus, in which the famous Council of C. sat from 1414 to 1418 (and which deposed three anti-popes, and condemned Hus and Jerome of Prague); an ancient palace, a grand ducal residence. One of its suburbs is connected with it by a long covered bridge across the Rhine. Manufactures of cotton goods, carpets, chemicals, sacking, &c. C. is said to have been founded in 378 A.D. by Constantius Chlorus as a bulwark against the Alemanni. In the Middle Ages, when it reached the height of its prosperity (at the time of the Council it was able to receive 20,000 visitors), it was frequently called Kostnitz. It was annexed to the Austrian dominions in 1549, and to Baden in 1805. P. (1871) 10,100; (1890) 16,200.

Constance, Lake of, Ger. **Boden-See,** ancient *Brigantinus lacus,* lake, between Switzd., Ger. (Baden, Würtemberg, and Bavaria), and Austria (Tirol), traversed from E. to W. by the Rhine. Near Constance it separates into two branches, Untersee on the W., and Ueberlingen-see on the NW. of Constance. The occurrence of *seiches* (locally called *russ*) has been observed here [**Geneva, Lake of**]. The lake is rarely frozen over. Two cases are recorded in the 19th century (1830 and 1880, on the latter occasion from the 7th to the 20th of Feb.), one in the 18th (1789). Length along centre of lake, 46.5 m.; extreme breadth, 8 m.; elevation above the sea, 1305 ft.; greatest depth, 827 ft.; area, 206.8 sq. m.; volume, 11.5 cubic m.

Constantia, Cyprus. See **Famagusta.**

Constantina, tn., Spain, prov. and 40 m. NE. by N. Seville, with lead-mines; timber hewn in large quantity. P. 12,000.

Constantine, the ancient *Cirta,* fortified city and bishopric, Algeria, cap. dep. C. (of which the other chief towns are Philippeville and Bona on the coast, Setif and El Wad in the interior), on a detached rocky height, surrounded on three sides by ravines, crossed in one place by a Roman bridge (in 36° 22' 21" N., 6° 37' E.), elsewhere by four natural bridges. At the bottom of the ravines flows the Wad Rummel, here a turbid and filthy stream. Has Roman remains, and a citadel on the site of the ancient Numidian fortress, rising 300 ft. above the level of the rock. Manufactures saddlery and leathern goods, and exports corn to Tunis. Taken by the French, October 13, 1837, after two memorable sieges. Alt. 2165 ft. Mean temp., yr. 60° F., Jan. 45.6°, July 80.4°. P. (1872) 30,300; (1891) 40,700. See **Algeria.**

Constantinople, called by the Turks **Istambol, Stambol,** or **Stambul** (a corruption of the Greek *εἰς τὴν πόλιν,* 'into the city'), the chief seaport and cap. of the Turkish, as formerly of the Byzantine or Lower Roman empire, near the E. extremity of European Turkey, separated by the Bosporus (here about 1 m. wide) from Asia Minor. Lat. (Mosque of St. Sophia) 41° 0' 16" N., long. 28° 59' 14" E. C. comprises, besides the city proper (occupying a triangular promontory between the Sea of Marmora, the Bosporus, and its inlet the 'Golden Horn'), the European town N. of the inlet, consisting of Pera, Galata, and Top-hâna, and the Turkish town of Skutari on the Asiatic side of the Bosporus. The project of connecting the European with the Asiatic side by a foot and railway bridge is now under consideration. The city proper is enclosed by a triple range of walls 12½ m. in circuit, is built on seven low hills, and traversed by a small stream, the Lycus. Externally it has an imposing appearance, with its picturesque mosques, cupolas, and minarets, its cemeteries interspersed with cypresses, and its port crowded with shipping, including numbers of caïques; but internally it consists mostly of a labyrinth of crooked, ill-paved, and dirty lanes, and a crowd of small, low houses, many of which are built of wood, though the frequent occurrence of destructive fires has led to the erection of improved buildings. The extreme point of the city on the E. is occupied by the 'Seraglio,' formerly the private domain of the Sultan, and containing also various state offices, on the site of the ancient *Byzantium.* It is separated from the rest of the city by a tower-flanked wall, pierced by several gates, the chief of which, the Bab-i-Humâyûm, or 'Sublime Porte' (burned to the ground in 1863), has given its name to the Turkish government. The new palace built by Abdul Mejid is on the W. shore of the Bosporus, 2 or 3 m. N. of the old Seraglio. To the W. of the old palace is the noble mosque of St. Sophia, originally a Christian cathedral, built between 531 and 558 A.D., at a cost equivalent to £1,000,000. This edifice is in the form of a Greek cross, 269 ft. in length by 143 ft. in breadth (in its interior), and surmounted by a flattened dome 180 ft. above the ground. The interior, in which are numerous large columns, a floor of variegated marble, and bronze gates, was renovated 1847–49, and now presents a magnificent appearance. Near St. Sophia is the mosque of Akhmet, on the At-meidan, or 'Horse square,' the ancient *Hippodrome,* a space 300 yards in length by 150 in breadth, and on which are also the Theban obelisk of Theodosius, the broken pyramid of Constantine Porphyrogenitus, and the identical brass column which supported the tripod in the temple of Delphi. Other antiquities in C. are the burnt column erected by Constantine the Great, a part of the column of Arcadius, the pillar of Marcius, pillars from Troy in the Valide mosque, the aqueduct of Valens, and several subterranean cisterns, of which the principal, called by the Turks the 'thousand and one columns,' is a vault about

200 ft. in length and from 160 to 180 ft. in breadth, supported by 424 columns. At the SW. angle of the city is the citadel of the Seven Towers. Connected with the mosques are libraries, various charitable institutions, caravanserais, and baths. There is a university, erected in 1847; government naval, military, and medical colleges, as well as numerous inferior schools, and forty public libraries. The bazaars are extensive and well supplied, but have no architectural beauty. The city proper comprises separate quarters for the Jews, Armenians, and Greeks; that of the last, 'the Fanar,' extends along the shore of the 'Golden Horn.' The suburbs on the N. side of this inlet are connected with Stambul by two bridges of boats. Pera (*q.v.*), the residence of the ambassadors and of the principal Europeans, occupies the summit and slope of a hill at the foot of which is Galata, the merchant and shipping quarter; adjoining the latter on the Bosporus is Top-hana, so called from its cannon-foundry. Farther along the shore is the magnificent palace of Dolmabachka, the modern residence of the Sultan. W. of Pera is Kissim-Pasha, the seat of the admiralty; and still farther W. Hasköi, occupied by Jews and Armenians. Near the head of the Golden Horn, on the S. side, is the picturesque village of Eyyub (*q.v.*). The manufactures of C., which are very limited, include, besides cannon-founding, carpets and silks. The Golden Horn forms a magnificent natural harbour, about 4½ m. SE. to NW., breadth varying from 1 to 4 furlongs. It is deep enough to float ships of the largest size, can receive 1200 sail of the line, and is always full of mercantile and other vessels, with a vast number of *caïques*, graceful light boats, which here form the principal vehicles of transport. There are four graving docks, the largest of which, 400 ft. by 100 ft., has a depth of 35 ft.; a floating dock accommodates vessels up to 1500 tons. Quayage is limited, and vessels are loaded and discharged by lighters. The principal exports are mohair, opium, yellow berries, and gum tragacanth; also carpets and lambskins. The transit trade has suffered of late years owing to more direct means of communication with Persia and Turkish Kurdistan. Since 1888 C. has been connected by express railway service with western Europe. Originally a Greek colony, said to have been founded B.C. 667, it became, in the time of Vespasian, a Roman prov. Constantine transferred thither the seat of the empire, and caused the new cap. to be built. Twice destroyed by earthquakes, and afterwards burnt to the ground, it was rebuilt by Justinian in the 6th century. In 1453 the city was taken by Mahomet II., from whose time dates the use of the name Stambul. During the Crimean war the allied armies defended it against Russia. The climate is healthy but very variable, and, especially in winter and spring, subject to great vicissitudes. Rheumatic affections and mild intermittent fevers are the most common diseases. Mean temp., yr. 57.6°, Feb. 41.7°, July 73.9°; rfall. (38 yrs.), 28.23 in. P. (1885) 874,000.

Constanz, city, Ger. See **Constance.**

Constitucião, Brazil. See **Piracicaba.**

Constitucion, founded in 1794 under the name of Nuevo Bilbao, tn., Chile, prov. Maule, near the mouth of the Rio Maule, 165 m. S. by W. Valparaiso, in 35° 19° S.; roadstead with dangerous shifting bar, due to the sands washed down by the R. Maule; railway to Talca in progress. P. (1885) 6500.

Constitution Hill, post-tn., Tasmania, Monmouth co., 27 m. from Hobart. P. <1500.

Consuegra, tn., Spain, prov. and 35 m. SE. by S. Toledo; manufacture of coarse cloth; in great part destroyed by a flood, Sept. 11–12, 1891, when more than half of the population is said to have perished. P. (1887) 7600.

[1] The northernmost point on a coast island is on Magerö I. (*q.v.*). [2] Punta Marroqui, the S. point of the small coast island adjacent, is in 35° 59′ 43″ N. [3] Capt. Fleuriot de Langle. Cape Guardafui, at the mouth of the Gulf of Aden, about 60 m. N. of Ras Hafun, is from 1′ to 4′ W. of that point. [4] *Petermann's Mitteil.*, 1890, p. 91. The boundary assumed for Europe in the SE. is the Manych depression and the Ural Range, but no further information is given. [5] *Die Bevölkerung der Erde*, viii., pp. xi., xiii. Europe, exclusive of Iceland, Novaya Zemlya, and Atlantic islands, but otherwise including the whole area within the administrative limits of the different countries; in the case of Russia, however, exclusive of Caucasia but inclusive of the Sea of Azov; Asia and America, exclusive of Polar islands; Africa, exclusive of Madagascar, &c.; Australia with Tasmania. The area of Europe within the narrowest physical limits, that is, to the crest of the Urals, the Manych depression, and exclusive of the Caspian steppe, the islands of Iceland, Novaya Zemlya, and Spitsbergen, but including the Sea of Azov, is calculated by Wagner-Supan at 3,750,000 sq. m.; Europe to the crest of the Urals, the Ural Range, and the Manych depression, but otherwise as before, 3,688,000 sq. m.; Europe to the crest of the Caucasus, but otherwise as before, 3,790,000 sq. m.; Europe, as before, but including Iceland and Novaya Zemlya, 3,866,000 sq. m.; including also Spitsbergen, 3,893,000 sq. m. [6] Reuschle, 1809; see *Petermann's Mitteil.*, 1890, p. 91. [7] Rohrbach, *ib.* The relative accessibility determined by dividing the mean distance from the sea of all points in an equal area of land extending uniformly in all directions from either pole by the actual mean distance. [8] *Petermann's Mitteil.*, 1889, p. 19. [9] Recalculated by Dr. Supan by the method adopted by Dr. J. Murray in his paper, 'On the Height of the Land and the Depth of the Ocean,' in *Scot. Geog. Mag.*, 1888. For other estimates see *Scot. Geog. Mag.*, 1889, p. 616 (Von Tillo), and 1891, p. 385 (Heiderich). See also **Ocean.**

Contoocook, settlement, U.S., New Hampshire, Merrimack co., on Contoocook R., 7 m. W. Concord.

Contra Costa (Spanish, 'against the coast'), co., U.S., California, bounded on N. by San Pablo Bay and estuary of Sacramento R., and on W. by San Francisco Bay.

Contrary Head, cape, Isle of Man, 1½ m. SW. Peel.

Contraviesa, mt. chain, S. Spain, Granada, rising to a height of 6215 ft.

Contrecour, vil., Canada, Quebec, Verchères co., on the r. bk. of the St. Lawrence, 30 m. NE. by N. Montreal. P.<1500.

Contres, tn., France, dep. Loir et Cher, 12 m. SSE. Blois. P.<2000.

Contréxéville, vil., France, dep. Vosges, arr. Mirecourt, 38 m. SSW. Nancy, on the Vair, with cold mineral waters, used for bathing and drinking, and largely exported. Alt. 1150 ft. P.<2000.

Conturst, tn., Italy, Campania, prov. and 25 m. E. Salerno, on the Sele. P.<4000.

Conty, or **Conti,** tn., France, dep. Somme, 13 m. SW. by S. Amiens. P.<2000.

Conversano, tn., Italy, Apulia, prov. and 17 m. SE. Bari; seat of a bishop. P. 12,000.

Convinth, ancient par., Scot., Inverness-shire, now forming part of Kiltarlity par.

Convoy, par. and tn., Ire., E. co. Donegal, bar. Raphoe, 7 m. W. by N. Lifford, on R. Deele, 2 m. from Killygordon stn., PMT.O. Par. 20,080 ac., P.<3000; tn. P.<500.

Conwal, par., Ire., co. Donegal, bars. Kilmacrenan and S. Raphoe, containing Letterkenny; 45,251 ac. P. 7800.

Conway, vil., U.S., N. Dakota, Walsh co., 53 m. SSW. Pembina. P.<1500.

Conway, or **Aberconway,** parl. and mun. bor., par., market-tn., and seapt., Wales, in N. of Carnarvonshire, at mouth of riv. C., 12½ m. ENE. Bangor, on the L. & NW. R.; surrounded by a wall 12 ft. thick, with battlements and 24 round towers. The castle, one of the most perfect of its kind in the country, was built by Edward I.; the abbey was removed by the same king to Maenan near Llanwrst. The ruins are still shown, and the ancient church of C. contains the magnificent oak screen and the unique font formerly belonging to the abbey at Maenan. Plas Mawr, an old Elizabethan mansion, is now the home of the Royal Cambrian Academy. In the church is a memorial bust of John Gibson, the sculptor (1791–1866), who was a native of C. C. is the ancient *Conovium.* For some time the station of the tenth Roman Legion was at Caer Rhun, 5 m. up the river, where Roman remains have been discovered. The Lord Keeper Williams garrisoned the castle for the king during the Civil War. Market-day, F. The parl. bor. is a member of the Carnarvon dist. of bors. Bor. P. (1891)<3500; par. P.<2500.

Conway, riv., Wales, rises in Carnarvonshire, forms the greater part of the boundary between that county and Denbighshire, and flows N. into the Irish Sea, near C.; 30 m. long, navigable 10 m. up for vessels of 100 tons. The scenery of its valley is noted for its beauty, the upper part being bold and picturesque.

Conwayboro, settlement, U.S., S. Carolina, Horry co., 64 m. WSW. Wilmington.

Conway Springs, tp., U.S., Kansas, Sumner co., 205 m. SW. by W. Kansas City. P.<1500.

Conwil, stn., Wales, Carmarthenshire, W. div., on the G. W. R., 4½ m. NNW. Carmarthen.

Conwil Caio, par., Wales, Carmarthenshire, E. div., 8 m. SE. by E. Lampeter, P.O. (**Caio**); 26,187 ac. P.<2000; eccles. par. (**C. C. with Llansawel**) P.<3000.

Conwil Elfet, par., Wales, Carmarthenshire, W. div., 5½ m. NW. by N. Carmarthen, P.O.; 13,100 ac. P.<2000. See **Abernant.**

Conyers, tn., U.S., Georgia, Rockdale co., 24 m. E. by S. Atlanta. P.<1500.

Conza della Campania, ancient *Compsa,* tn., Italy, prov. Avellino, circle and 9 m. SE. St. Angelo' de Lombardi, with a cathedral, seat of an archbishop. P.<2000.

Coogee (ku'ji), vil., New South Wales, Cumberland co., on C. Bay, a sandy bight, 5 m. S. Sydney. P.<1500.

Coohore, electoral div., Ire., NW. co. Westmeath, bar. Fore, 10 m. N. by W. Mullingar.

Cook, co., New South Wales, between 150° and 151° E., touching 34° S. on the S.

Cook, co., New Zealand, North I., on the E. ct., crossed by 38½° S.

Cook, co., Queensland, E. ct. (Hervey Bay), crossed by 25° S.

Cook, dist., Queensland, formed by Cape York Peninsula.

Cook, co., U.S., Illinois, cap. Chicago.

Cook, co., U.S., Minnesota, in the extreme NE.

Cook, Cape, Canada, Brit. Columbia, on the W. side of Vancouver I., in 50° 10′ N.

Cook, James (1728–1779), one of the greatest navigators and discoverers, in honour of whom numerous geographical names have been bestowed, made three important voyages, the first (1768–71) in the *Endeavour* to Tahiti, where he observed the transit of Venus, June 3, 1769, and then to New Zealand and the E. ct. of Australia, when he charted the coasts of both; the second (1772–74), when he commanded the *Resolution* and *Adventure* (the latter in charge of Captain Furneaux), and explored high southern latitudes; the third (1776–79), when he commanded the *Resolution* and *Discovery* (the latter in charge of Captain Clerke), and traversed the Pacific to discover a NW. passage, but was killed by natives of Maui I. (Hawaiian group), Feb. 14, 1779.

Cook, Mount, New Zealand. See **Aorangi.**

Cookardinia, post-tn., New South Wales, Hume co., 120 m. E. Denilquin. P.<1500.

Cookbury, par., Eng., Devonshire, Tavistock div., 14 m. N. by E. Launceston, 2 m. N. Dunsland Cross stn. P.<250. See **Milton Damerel.**

Cook Channel, strait, Philippine Is., between the NE. of Palawan and the isl. of Dumaran, in 10½° N., 119° 43′ E.

Cooke, co., U.S., Texas, on the Red R. (N. frontier), W. of 97° W.

Cookham, par., Eng., Berkshire, Wokingham div., on the Thames, 7 m. NW. by N. Windsor, on the G. W. R.; 6548 ac. P. 8800; eccles. par. (**C. Holy Trinity**) P.<1500.

Cookham Dean, eccles. par. and vil., 3 m. from Cookham, PM.O. P.<1000.

Cookhill, P.O., Eng., 3 m. from Astwood Bank, E. Worcestershire.

Cookhouse, Dutch **Cookhuis,** vil. and rly. stn., Cape Colony, dist. Bedford, 82 m. ESE. Graaff-Reinet.

Cook Island, one of the Gilbert Is. (*q.v.*), Pacific Ocean.

Cook Islands, or **Hervey Islands,** Pacific Ocean, S. Polynesia, in SW. of Society Is., between the archipelago of Tonga on the W. and Tahiti on the E. The principal are Mangeia, Atiu, Rarotonga (the largest—about 25 m. in circumference), Aitutaki, Mauki, Mitiero, and Hervey Is. The inhabitants are of the Malay race, and many of them have been converted to Christianity by English missionaries. Produce coffee, cotton, oranges, and copra. Taken under British protection in 1888. P. 2000–3000.

Cookley, par., Eng., Suffolk, Eye div., 17 m. SW. by W. Lowestoft. P.<250. See **Huntingfield.**

Cookley, eccles. par., Eng., Worcestershire, Wolverley par., 2½ m. NE. Kidderminster, PMT.O. P.<1500.

Cooranbong, post-tn., New South Wales, Northumberland co., 17 m. SW. by W. Newcastle. P. <1500.

Coorg, or **Kurg,** native name **Kodagu,** 'steep mountain,' a dist. under British administration, on the SW. of Mysore, India, about equal in area to the county of Kent, between 11° 56′ and 12° 50′ N., 75° 25′ and 76° 14′ E., on the E. side of the Western Ghâts, cap. Merkára. It is a rugged and mountainous country, the lowest part being 3000 ft. above the sea, and mostly covered with large forests. It contains the headwaters of the Cauvery. Rainfall abundant [**Merkára**]. The narrow valleys, which form all the lowland area capable of cultivation, are almost entirely occupied by rice-fields. The hill slopes have in many places been cleared for coffee, cardamom, and cinchona plantations. The forests in the S. are specially noted for their bamboos. Of the natives, the Coorgs proper, or Kodagus, formerly the dominant and still the leading race, form only about one-sixth of the pop. They are a tall and handsome race, not inferior in physique to any natives of India. In religion most of the people are Hindus, less than 10 per cent. Mohammedans. C. was annexed to Britain in 1832, and is directly under the rule of the governor-general, who administers the dist. through a commissioner. Area, 1583 sq. m. P. (Feb. 17, 1881) 178,300; (Feb. 26, 1891) 173,055, a decrease of 2.94 per cent., attributed to the fact that the immigrant labourers in the coffee plantations had returned to their homes in Madras and Mysore at the date of the census of 1891, but not in 1881. See **India,** table.

Coorla, tn., India, Thána dist. See **Kurla.**

Coorong, The, a remarkable portion of the ct. of Encounter Bay, S. Australia, in which a narrow spit of land, 90 m. long, encloses within it a narrow arm of the sea of corresponding length.

Copeland Forest, high moorland tract, Eng., Cumberland, between Ennerdale Water and Wast Water, about 10 m. SE. by E. Whitehaven.

Copenhagen, Danish **Kjöbenhavn** ('Merchant's Port'), cap. and principal seapt. of the kingdom of Denmark, in the Sound, is built on the islands Seeland and Amager, which are separated by a narrow arm of the sea, forming an excellent harbour. Lat. of observatory, 55° 41′ 13″ N., long. 12° 34′ 44″ E. The city is strongly fortified and divided into two parts, the smaller of which, called Christianshavn, is on the island Amager. On the N. of the city, and connected with it by an esplanade, is the citadel of Frederikshavn, a regular polygon with five bastions. The city contains many public buildings, among which are the palace of Amalienburg, inhabited by the royal family; the castle of Charlottenburg, now used as an academy of the fine arts, and its parks as a botanic garden; the colossal palace of Christianborg, exchange, museum of Thorvaldsen's statuary, town-hall, church of St. Peter; the cathedral, with a spire 270 ft. high, and many of the finest works of Thorvaldsen; university, rich and distinguished; three public libraries, with 500,000 volumes and many MSS.; museums of ethnology and antiquities; the castle of Rosenburg, in which are deposited the regalia and many antiquities. C. possesses many scientific and literary establishments; besides a university, it has a polytechnic school, a royal academy of sciences and art, and a gallery of paintings. It is the centre of commerce of the kingdom, and, by means of canals, large ships reach its warehouses in the middle of the city. Extensive works, including the construction of four large basins with a depth of 24–30 ft., with a view to the establishment of a free port at C., which was opened in 1894, were begun in 1891. C. is now connected by steam-ferry with Malmö. It is the station for the naval force of the kingdom, and has a cannon foundry, an arsenal, and, on the island of Amager, iron and steel shipbuilding yards. It has woollen factories, spinning mills, distilleries, breweries, iron-foundries, a rapidly rising engineering industry, tanneries, sugar refineries, and manufactures of sailcloth, porcelain, and tobacco. The city was founded in 1168 by Bishop Axel, and first called Axelhuis. Originally built of wood, it was burned in 1728 and 1795. It was taken by Nelson in the battle of the Baltic, April 2, 1801, and bombarded by the English in 1807. Being little above the level of the sea, it is liable to be overflowed during storms. Mean temp., yr. 45.4° F., Feb. 30.7°, July 62.1°; rfall. 22.01 in. P. (1861) 155,000; (1870) 181,000; (1890) 312,900; including Frederiksberg and Sundbyernes Sogn, 373,100. See **Denmark,** table II.

Cordillera, Spanish, 'a mountain-chain'; sometimes applied in a specific sense to the Andes.

Córdoba, prov. or state in the heart of the Argentine Republic, between about 29½° and 35° S.; mainly a plain gently inclined from W. to E., but containing a mountainous tract in the W., with elevations above 6500 ft.; bordered on the NW. by the *Salinas Grandes,* through the middle of which the boundary line runs. Soil and climate, where the water-supply is sufficient, well adapted both for tillage and cattle-rearing; but the lack of water is the chief drawback of the prov. Five rivers, Primero, Segundo, Tercero, Cuarto, Quinto (First, Second, &c.), traverse the prov. from W. to E., but mostly dry up before reaching the E. limit of the prov. Mineral wealth varied; as yet, however, little developed, though mines of galena, copper, copper pyrites, silver, &c., are worked.

Córdoba, tn., Argentine Republic, cap. state C., 210 m. W. Santa Fé. Alt. 1440–1460 ft. Mean temp. (4 yrs., 1872–76), yr. 61.9° F., Jan. 73°, July 50.4°; rfall. (16 yrs., 1873–88), 26.2 in., April–Sept. 3.5 in. P. (1887) 35,800.

Córdoba, tn., Mexico, prov. and 55 m. WSW. Vera Cruz, 11 m. ENE. Orizaba, in 18° 51′ N., 96° 54′ W. Alt. 2879 ft. Mean temp. (5 yrs., 1861–65), yr. 68.9° F., Jan. 63.9°, Aug. 71.6°. P. (1889) 6000.

Córdoba, prov., Spain, in centre of Andalucia, in the form of an ellipse (NW.–SE.), having as its minor axis riv. Guadalquivir, which divides C. into two natural regions: (*a.*) The mountainous, to the N., formed by a part of the slopes and plateaux of Sierra Morena (bordering on provs. Badajoz and Ciudad Real); (*b.*) the plains, *La Campiña,* from the S. banks of riv. Guadalquivir to the mountains of Jaën, Granada, and riv. Jenil. The former is the cooler, the damper, but the less cultivated, given up to the rearing of sheep, goats, and pigs; the N. part on the plateau, inclined to the valley of the Guadiana, *Los Pedroches,* is covered with thickets and less peopled. Iron, copper, lead, and silver are met with, principally coal (Belmez). The latter region is traversed by saline affluents of the Guadalquivir (Guadajoz, Jenil-Cabra). The climate is very dry, and very hot (*El Sarten de España,* 'Spain's frying-pan'). The fertility of the *Campiña* is intermittent (ceasing where and when there is too much efflorescence of salt), but considerable, yielding abundant harvests of wheat, wine (Montilla), and oil. Prosperous and very picturesque small towns (Montilla, Baena, Lucena, Priégo), surrounded by all sorts of fruit trees, are scattered over it. C. was one of the four Moorish kingdoms of Andalucia. Califate from 756–1235. See **Andalucia, Guadalquivir, Sierra, Morena, Spain.**

Córdoba, tn., Spain, cap. prov. C. (37° 52′ 15″ N., 4° 50′ W.), 275 m. SSW. Madrid, 81 m. ENE. Seville, on riv. Guadalquivir. A decayed city, noted for its ancient splendour. Magnificent mosque of the 8th century transformed into Christian cathedral in the 16th century. *Karta-tuba* of the Cartaginians, *Corduba* of the Romans, cap. of *Hispania Ulterior,* and *Betica* (native place of Seneca, Lucan). The most important Moorish town in Spain from the 8th to the 11th century, and one of the great centres of learning, art, and industry in Middle Age Europe (long noted for its leather, cordwain; native place of Averroes and Maimonides). Conquered by Saint Ferdinand in 1235. In the time of the Moors the Guadalquivir was navigable up to Cordoba. Alt. 140 ft. P. (1860) 42,000; (1877) 47,800; (1887) 55,600.

Cordon, vil., Uruguay, dep. and 4 m. E. Montevideo.

Cordouan, Tour de (Tower of), lighthouse, France, in the Atlantic Ocean, at the mouth of the Gironde, in 45° 32′ N., on a rock, the remnant of the isl. Antros, 60 m. NNW. Bordeaux. The lighthouse is 206 ft. high, visible 21 m.

Cordova, English spelling of Spanish Cordoba. See Preface, under Orthography.

Corfu, Greek **Kerkyra,** ancient Latin *Corcyra,* the northernmost of the Ionian Is., Greece, separated by the C. Channel (the N. end of which is less than 2 m. wide) from the coast of the Turkish prov. of Epirus. Somewhat smaller than the island of Anglesey. Surface hilly and even mountainous; Pantokrator, in the NE., 3005 ft. Chief product, olives. With Paxos and Leukas it forms a nomos of the kingdom of Greece (*q.v.*). Area of island, 275 sq. m. (Wisotzki). See monongraph by Partsch, *Ergänzungsheft,* No. 88, to *Petermann's Mitteil.*

Corfu, seapt., Greece, cap. isl. and nomos of same name, near the middle of its E. ct., picturesquely situated on the slopes and summits of two rocky heights. Formerly a strong fortress defended by a detached citadel, a fort on the small island of Vidon, and other fortifications, but dismantled on the cession of the island to Greece in 1864. It is a free port. The harbour affords good anchorage in 6–8 fathoms of water. Vessels loaded and discharged by lighters and at the quay. A canal 2 m. long connects C. with Albania. Mean temp., yr. 64.5° F., Jan. 50.8°, July 80°; rfall. (22 yrs.), 46.5 in. P. (1871) 15,500; (1889) 19,000; with suburbs, 27,600.

Corinth (Greek **Nea Korinthos,** or New Corinth), city, Greece, cap. dep. of same name, on the Isthmus of C., between the Gulfs of Lepanto or C. on the W. and Ægina on the E., prov. Argolis and Corinthia, 43 m. W. Athens, about 3 m. NE. by E. of the site of the ancient C., and 2 m. SW. of Poseidōnia, the new town at the NW. end of the Isthmus of C. Canal. From its port, in the Bay of C., it exports currants, wheat, oil, honey, and wax. Chief remains of antiquity, seven Doric columns, and traces of an amphitheatre and Roman baths. This

was originally the cap. of Corinthia, taken and destroyed by Mummius, 146 B.C. It was the entrepôt of the commerce of Asia with Greece and W. Italy. Its inhabitants formed numerous colonies and acquired great riches, so that the city became proverbial for its luxury. St. Paul preached here for upwards of a year. The city came into the possession of the Venetians after the taking of Constantinople by the Crusaders, and remained in their hands till 1446, when it was taken by the Turks. The Venetians retook it in 1687. It was again captured by the Turks in 1715, and retained by them till 1823. Nearly destroyed by an earthquake on Feb. 31, 1858. P. (1889)<5000.

Corinth, or **Lepanto,** gulf, Greece, separates the Morea on the S. from Hellas on the N. Length, W. to E., 75 m.; average breadth, 15 m. It receives numerous small rivers, and communicates with the Gulf of Patras by the Strait of Lepanto. The shores of this gulf form one of the parts of Europe most liable to earthquakes, the seat of shock wandering from Patras to Poros. The greatest devastation is always on the alluvial strip of loose soil on the SW. shore of the gulf.

Corinth, Isthmus of, Greece, a neck of land uniting the Morea and Attica between the Gulfs of C. and Ægina. Length, 20 m.; breadth, 4 to 8 m. On it are various remains of antiquity, including the Isthmian wall and traces of the temple of Poseidōn. A ship canal through the isthmus, 3.7 m. long, 69 ft. wide at bottom, and with a minimum depth of 26½ ft., begun in March 1882, was opened Aug. 6, 1893. The new towns of Poseidonia and Isthmia have been founded at its NW. and SE. ends respectively.

Corinth, tn., U.S., Maine, co. Penobscot. P.<1500.

	City of Cork	2,266	75,345
	Total, Cork	1,838,921[1]	438,432

[1] Exclusive of 10,764 ac. under the larger rivers and tideways.

Greatest length 110 m., breadth 70 m. Surface mountainous in the W., the N. and E. are extremely fertile. The coast is indented by some fine bays and harbours, the principal being Bantry and Dunmanus bays, and Clonakilty, Kinsale, Cork, and Youghal harbours, the last belonging partly to Waterford. The islands of Cape Clear, Whiddy, and others lie off the SW. The chief rivers are the Blackwater, Lee, and Bandon, all of which flow from W. to E. before turning S. into the Atlantic, the course of the Blackwater within the county being wholly easterly. This valley is followed by one of the chief railways of the county, which is crossed at right angles at Mallow by the Cork & Limerick Rly. The other railways are the Cork and Youghal Rly., with branch to Queenstown (like that to Limerick in connection with the G. S. & W. system), the Cork, Bandon, & S. Coast Rly. (from Cork city by Bandon to Bantry and Skibbereen, with branches to Kinsale, and in connection with the system a light railway to Clonakilty); the Cork & Macroom Rly. (partly up the valley of the Bride, trib. Lee); the Cork, Blackrock, and Passage (light) Rly.; and a light railway from Skibbereen to the important fishing village of Baltimore. The county is noted for its dairy produce. For agricultural statistics, see **Appendix,** pp. 10–12. The portion of the county N. of the Blackwater is mainly composed of Carboniferous rocks, almost entirely non-productive. S. of the Blackwater are Upper Silurian rocks (to which belong the highest summits of the co.; Caherbarnagh in the extreme W., 2239 ft.), and these are followed by alternating strips of Old Red Sandstone and Carboniferous. Slate is quarried at Bantry, Drimoleague, Durrus, and Roscarbery; copper ore is found at Durrus and Killeen, and barytes at Bantry, Clonakilty, and Schull. The county returns seven members to Parliament, one for each of the E., Mid, N., NE., S., SE., and W. divs., besides two for the city **C.** The population has decreased steadily since 1851. The ancient terr. of Cork was more extensive than the county, and previous to 1172 formed a kingdom under the Macarthys. The Anglican diocese of Cork is co-extensive with the county, which, however, includes among the Roman Catholic eccles. divs., besides the diocese of Cork, the whole of those of Cloyne and Ross, and parts of those of Kerry and Lismore. See **Ireland,** table, and under Condition of the People.

Cork, ancient *Corcach-mor-Mumham* ('the great marsh of Munster'), city, parl. bor., and riv. port, Ire., cap. co. Cork, and bar., near the head of navigation on the Lee, 11 m. above the entrance of C. Harbour, and 137 m. SW. Dublin, with which, Limerick and Bandon Bridge, it is connected by railways. The city proper is built on an island formed by the Lee crossed by nine bridges, one of which, Patrick's Bridge, built to replace an old one, is a beautiful structure. It is the seat of an Anglican and a Roman Catholic bishop, and has Augustine, Franciscan, Dominican, and Capuchin monasteries, and two nunneries, Queen's College (one of the colleges affiliated to the Royal University of Ireland), a school of medicine and surgery, and the Crawford Municipal Schools of Science and Art. The Anglican cathedral, dedicated to St. Finne Bar, consecrated in 1870, stands on the site of two older edifices, the first taken down in 1734, the second in 1864. Among other churches may be mentioned that of St. Anne Shandon, near the site of the old Shandon Castle, once an important stronghold. The church contains the tomb of the Rev. Francis Mahony ('Father Prout'). There is a statue in the city to Father Mathew (1790–1856), who was connected with the Capuchin church of this city. A park of about 240 acres extends along the S. bank of the river to Blackrock, now converted into a racecourse. Near it are cavalry and infantry barracks. Manufs. leather, iron, and other metallic goods, chemical manures, tweeds, ginghams, friezes, and linen (the last in the suburbs of Blackpool and Douglas), and there are extensive breweries and distilleries. Exports butter, iron, whiskey, and other Irish produce. C. communicates by steam packets with London, Dublin, Bristol, Cardiff, Newport, New Milford, Plymouth, Southampton, Liverpool, and Glasgow. For amount of shipping, see **Appendix,** p. 13. It sends two members to House of Commons. **Cork Harbour** is a land-locked basin, formed by the estuary of the Lee, which is navigable to 1½ m. above C. city. It is large and deep enough to contain the whole British navy, and has an entrance 1 m. across, within which its breadth varies to 8 m. There are dry docks and patent slips and more than 3000 ft. of quayage, with a depth alongside of 20 ft. at low to 35 ft. at high water. The harbour contains Spike and Haulbowline islands, on which are a convict station, artillery barracks, and various ordnance works. On its shores are Queenstown (*q.v.*) and Passage. Market-day, Th. Mean rfall. (Blackrock, alt. 30 ft., 1866–80), 41.37 in. Mun. bor. P. (1841) 80,700; (1851) 85,700; (1861) 80,100; (1871) 78,600; (1881) 80,100; (1891) 75,300; parl. bor. P. (1891) 97,300.

Cornwall, or **Pye's Corners,** vil., Canada, Prince Edward I., Queen's co., 7 m. from Charlottetown. P. <1500.

Cornwall, the most SW. co. of England, is a peninsula, separated from Devonshire by the Tamar, surrounded on all other sides by the sea, and divided into the following parl. divs.:—

	Acres.	Pop. 1891.
Western or St. Ives	68,921	50,187
North-Western or Camborne	52,002	54,192
Truro	137,285	50,742
Mid or St. Austell	170,581	49,624
South-Eastern or Bodmin	171,116	52,288
North-Eastern or Launceston	266,394	48,084
Parl. bor.[2]	1,909	17,454
Total	868,208[1]	322,571

[1] The administrative county is co-extensive with the ancient county.
[2] Penryn and Falmouth.

Its surface is much diversified. Some of the valleys are picturesque, though a great part of the county, where mining is carried on, looks barren and dreary. The coasts, especially in the W., are bold and rocky, and much indented, and in parts remarkably picturesque. The narrow N. portion between the sea and the county of Devon is a continuation of the Lower Carboniferous tableland of Devon, cut by a succession of narrow gorges, the sides of which near the sea are upright black cliffs, and further inland are clothed with oak or furze, near the foot with turf. (See Kingsley's 'Westward Ho!' chap. vi.) In this part of the county there are shifting sands, often in hills several hundred feet high. The remainder of the county is mainly composed of Devonian clay-slates, known to the miners as *killas*, forming the bed rock in which most of the mineral veins are found. But there are also large bosses of granite, containing the highest summits of the county (Brown Willy, towards the N., 1368 ft.; Hensbarrow Beacon, about the middle, 1034 ft.). One of these bosses forms the peninsula of Land's End, but that of the Lizard is composed of metamorphic rocks, possibly archæan. The chief rivers are the Fal, Camel, Looe, and Fowey. There is a very large vinery (said to be second in size to that at Hampton Court) at St. Levan. For agricultural statistics, see **Appendix,** pp. 7–9. Mining is the chief industry, but the pilchard fishery is very profitable. Tin is the most important mineral of C., and is extensively worked, the mines at Camborne and Redruth (*Nabob Wolcoath* mine) yielding excellent tin in large quantities. It is also mined at St. Agnes, St. Just, Callington, Illogan, Calstock, Redruth, St. Austell, St. Mewan, Newquay, St. Ives, St. Neot's, St. Enoder, and many other places. Antimony ore is found at Trebullet; arsenic at St. Just, Callington, Illogan, Breage, Redruth, St. Day, and Carn Brea; arsenical pyrites at Calstock and Callington, fluor spar at West Damsel; wolfram at Illogan and Carn Brea; stone at Liskeard and Marazion; ochre at Uranium (late South Terras); copper precipitate at St. Just and Calstock; copper is mined at St. Just, Callington, Calstock, Illogan, Carn Brea, Redruth, and St. Agnes; and slate is quarried at Liskeard,

Tintagel, Lamb's House, and Camelford; china-clay is found near Launceston and St. Austell, and there is another large quarry near Grampound Road; it is sent in large quantities to Staffordshire. There are many logan stones (notably that at the Land's End), cromlechs, &c., in the county, and remains of ancient castles at Launceston, Trematon, Lostwithiel, St. Michael's Mount, and Tintagel, the reputed birthplace of King Arthur. The 'Land of Lyonesse' lies between the Land's End and the Scilly Is.; and it is said that the remains of a city can yet be seen below the sea. The submarine forests in this tract show a subsidence of at least 12 ft., and 140 parish churches are said to have been submerged. There is a single line of railway running through the S. of the county to Penzance, in connection with the G. W. R., and branches from Truro to Falmouth, and from Par to Newquay and Fowey, besides several coast routes. The chief towns are Truro (city), Bodmin, Launceston, Falmouth, Penzance, Cambourne, and Redruth. The county, which includes the Scilly Is., belongs wholly to, and makes up nearly the whole of, the diocese of Truro. The name Cornwall is said to be derived from the British *kernou*, 'a horn,' and the Saxon *weallas*, 'foreign.' C. was known to the Iberians, who traded in its products; many Welsh inhabited it in the time of the West Saxons, but Athelstane brought C. and the Scilly Is. fully under English rule. C. was created a duchy in 1329, and as such is held by the Prince of Wales. The Cornish dialect (allied to the Welsh) became extinct only during the present century. The mining trade of C. is under the jurisdiction of the Stannary Courts, presided over by the lord warden and a vice-warden. The great wealth of Richard of Cornwall, brother of Henry III. and titular emperor of Germany, was derived from the Cornish tin-mines which then supplied all Europe. See **England,** table.

Cornwall, cape, Eng., W. ct. Cornwall, in 50° 8′ N.

Corrales, settlement, Uruguay, in the SW. of dep. Rivera; with gold mine.

Corra Linn, one of the falls of the Clyde R., Scot.

Corralones, site, Peru, about 22 m. from Arequipa, with important remains of antiquity.

Corralongford, electoral div., Ire., co. Fermanagh, dist. Brookeborough.

Corran, bar., Ire., in the SE. of co. Sligo.

Corran Narrows, strait, Scot., Argyllshire, in the N., connecting Loch Linnhe and lower Loch Eil, in 56° 43′ N.

Corraneary, electoral div., Ire., co. Cavan, dist. Cootehill.

Corraun Achill, electoral div., Ire., co. Mayo, dist. Achill.

Corravaddy, electoral div., Ire., co. Donegal, dist. Letterkenny.

Corrawallen, P.O., Ire., 4 m. from Carrigallen (co. Leitrim).

Correctionville, vil., U.S., Iowa, Woodbury co., on Little Sioux R., 30 m. E. Sioux City. P. <1500.

Correggio, tn., Italy, Emilia, prov. Reggio, 11 m. NW. Modena; birthplace (1494) of the artist Antonio de Allegri, called C. P. 12,000.

Correllstown, tnld., Ire., SE. co. Westmeath, bar. Farbill, 7½ m. ESE. Mullingar, on the Royal Canal. P. <250.

Corrennie Forest, an upland dist., Scot., W. Aberdeenshire, about 17 m. ENE. Ballater.

Correnti, Isola di, small uninhabited isl. off the ct. of Sicily, SW. of Cape Passaro, with light visible 9 m.

Corrèze, dep. belonging to the Central Plateau of France, to the W. of the mountains of Auvergne, and almost entirely to the basin of the Dordogne, which traverses the SE.; formed out of Bas-Limousin, part of the ancient prov. of Limousin; divided into three arrs., Tulle, Brives-la-Gaillarde, and Ussel; cap. Tulle. The chief rivers besides the Dordogne are the Vezère, with its affluent the Corrèze, and the Cère, which bounds the dep. on

the SE. From the Millevache plateau in the N., with naked and arid bosses generally exceeding 2500 ft. (highest, Mt. Besson, 3230 ft.), the general inclination is from NE. to SW. The higher districts form an extensive region of plateaux, composed of granites, gneiss, and mica-schists, with a thin covering of soil, occupied by barren heath, and exposed to cold and violent winds. The lowlands have a fine climate, and are very fertile; superb calcareous rocks occur. Forests scanty. The principal cereals are rye and buckwheat. The vine covers between 1 and 2 per cent. of the surface, but the production per acre is very small. One-third of the area consists of moors and uncropped grasses. A small quantity of coal is produced, but there is no other mineral of importance. The most noteworthy manufacture is that of arms at Tulle. Area, 2273 sq. m. P. (1891) 328,100. See **France,** table.

Corrèze, tn., France, dep. C., on the C. Riv., 65 m. WSW. Clermont, arr. and 10 m. NE. by N. Tulle. P. <2000.

Corrèze, riv., France, flows S. then SW. through dep. C. past Tulle to the Vezère; it traverses a deep picturesque granitic valley. Length, 83 m.

Correzzola, tn., Italy, Venetia, prov. Padua, dist. Piove. P. <4000.

Corriarick, pass, Scot., near the head of the Spey R., Inverness-shire.

Corrib, Lough, lake, Ire., nearly dividing co. Galway into two parts, shape irregular; length, NW. to SE., 27 m.; breadth, 1 to 6 m; area, 63 sq. m., alt. 14 ft.; contains several islets, receives the Clare and other rivers, with the surplus waters of Loughs Mask and Carra, and discharges its own surplus by the Galway R. into Galway Bay.

Corridge, par., Eng., Northumberland, Wansbeck div., 8½ m. W. by S. Morpeth, 1 m. W. Angerton stn. P. <250.

Corrie, vil., Scot., co. Bute, E. ct. of Arran I., 4½ m. N. Brodick, PT.O. See **Hutton and Corrie.**

Corrientes, prov. or state of the Argentine Rep., occupying the N. half of the Argentine Mesopotamia, or low-lying portion of the tract between the Parana and Uruguay. The prov. has numerous depressions occupied by shallow lakes, the largest of which, the Laguna Ibera, has an area of nearly 2000 sq. m., but is hardly a continuous lake, being broken up into a string of lakes by numbers of wooded islands haunted by beasts of prey. Between this lagoon and its outlet, the riv. Corrientes on the one side and the Paraná on the other, stretch fine plains well adapted for pasturage and tillage, and studded with numerous palm-thickets. The southern portion has few lagoons, and is to a large extent covered with forests of quebracho and other trees. See **Argentine Republic,** table.

Corrientes, tn. and stn., Argentine Rep., cap. state C., on l. bk. of the Rio Paraná, 25 m. below the confluence of the Paraguay. Mean temp. (7 yrs., 1873–80), yr., 70.6° F., Feb. 79.5°, July 61°; rfall. (8 yrs.), 52.36 in. P. (1889) 14,000.

Corrientes, cape, Argentine Rep., on the E. ct., about 38° 8′ S., in the SE. of prov. Buenos Aires.

Corrientes, cape, South America, W. ct., about 5° 29′ N.

Corries, electoral div., Ire., co. Carlow, dist. Borris.

Corriestand, P.O., Scot., 6 m. from Lockerbie, Dumfriesshire.

Corrievrekin, or **Corrybrechtan,** a whirlpool off the W. ct. of Scotland, between the isls. of Jura and Scarba, occasioned by the tide-stream being opposed by a pyramidal rock which rises within 15 fathoms of the surface.

Corriga, P.O., Ire., co. Cavan, 5 m. from Carrigallen, 12 m. from Killeshandra stn.

Corriga, electoral div., Ire., co. Leitrim, dist. Carrigallen.

Corrigenroe, P.O., Ire., 4 m. from Boyle (Roscommon).

Corringham, par., Eng., Essex, SE. div., 11 m. W. Southend, 2 m. ENE. Stanford Hope stn. P. <500.

Corringham, par., Eng., Lincolnshire, W. Lindsey div., 4 m. ENE. Gainsborough, 2½ m. SE. Blyton for C. stn., PM.O.; 6366 ac. P. <750.

Corris, or **Abercorys,** eccles. par., Wales, Merionethshire and Montgomeryshire, 6½ m. S. by E. Dolgelly, near Talyllyn, on Corris Rly., with extensive slate-quarries, PMT.O. P. <2000.

Corris Cross, P.O., Ire., 4 m. from Bagenalstown (co. Carlow).

Corris Railway, a short rly. in Wales, running north from Machynlleth in Montgomeryshire to Aberllefenny; constructed for the conveyance of slates from Corris, but much used also by tourists on account of the beauty of the valley through which it passes.

Corrofin, or **Corofin,** tn., Ire., NW. co. Clare, bar. Inchiquin, 8 m. N. by W. Ennis, on W. Clare Rly., PMT.O. Market-day, W. P. <500.

Corroge, par., Ire., co. Tipperary, bar. Clanwilliam, near Tipperary. P. <250.

Corropoli, tn., Italy, prov., dist., and 14 m. NNE. Teramo. P. <4000.

Corrour Forest, an upland tract, Scot., in the SE. of Inverness-shire, to the W. of the S. end of Loch Ericht.

Corry, city, U.S., Pennsylvania, Erie co., 27 m. SE. by E. Erie. P. 5700.

Corrybrechtan, Scot. See **Corrievrekin.**

Corrygills Point, Scot., E. ct. of Arran I., in 55° 34′ W.

Corryong, post-tn., Victoria, Benambra co., 190 m. NE. Melbourne. P. <1500.

Corryvarligan, mt. pass, Scot., on border of cos. Ross and Inverness, between Loch Hourn and Glen Shiel. Alt. 2000 ft.

Corryvrechan, or **Corryvreckan.** See **Corrievrekin.**

Cors, Welsh, 'a marsh.' See *Corcagh.*

Corscombe ('marsh dingle'), par., Eng., Dorsetshire, W. div., 10½ m. SW. Sherborne, 4½ m. W. Evershot stn., PM.O.; 5008 ac. P. <750.

Corse, par., Eng., Gloucestershire, Forest of Dean div., 5½ m. NNW. Gloucester, PM.O. (**C. Lawn**). P. <500.

Corse, Cap, cape, the N. point of Corsica.

Corsemaul, Crofts of, dist., Scot., W. Aberdeenshire, in the extreme W., 6 m. S. by W. Keith.

Corsen, Pointe de, cape, westernmost extremity of France, dep. Finistère, 14 m. W. by N. of Brest, with a lighthouse, visible 14 m.

Corsenside, par., Eng., Northumberland, on the Rede, 5½ m. NE. Bellingham; 11,504 ac. P. <750.

Cor'sham, or **Corsham Regis,** market-tn. and par., Eng., Wilts, Chippenham div., 8 m. ENE. Bath, on the G. W. R., with freestone quarries, PMT.O.; 6605 ac. P. <4000; eccles. par. (**C. St. Bartholomew**) P. <3500. **C. Side,** hamlet, 2 m. to the S.

Corsica, isl., in the Mediterranean, about one-third of the size of Ireland, forming a dep. of France; 106 m. SE. from the nearest point of the mainland, and 50 m. W. of the coast of Tuscany; divided into five arrs., Ajaccio, cap., Bastia, Calvi, Corte, and Sartène. Almost entirely covered with mountains. The central chain far exceeds the highest summits of central France (Mte. Rotondo, 8610 ft.; Mte. Cinto, 8890 ft.). Immediately beyond its much indented coast-line rises a verdant belt of hills, their slopes planted with olive, citron, and orange trees, vines and laurels; to these succeed a zone of chestnuts, then rich pastures, and further yet dense forests of conifers or deep valleys covered with inextricable thickets known as *maquis* (Italian, *macchie*). Rivers are numerous but small and non-navigable, and torrential to their very mouths. The two principal are the Golo and Tavignano, both on the E. coast, the lower course of both traversed by one of the chief railways in the interior, marking off a section of the mountains to the NW. of the principal lowlands, the unhealthy and thinly peopled coast-plain of Algeria. On the W. side the chief valley is that of the Gravone, which is ascended by the railway from Ajaccio to the line already mentioned on the E. side of the central chain. The climate is of the Mediterranean type [**Europe, Ajaccio**]. Primary rocks, granites and schists, occupy most of the western part of C.; the eastern consists of cretaceous mountains and alluvial plains. Minerals abound in variety, but so far have been little developed. Copper is mined at the railway junction of Ponte Leccia, silver-lead at Galeria, and antimony at Luri-Castello and Meria in the N. penin. Copper occurs also near Bastia and elsewhere, silver-lead at Calenzana, iron ore at Farinole and Olmeta, NW. of Bastia. Algajola furnishes granite, Tallano porphyry, Orezza serpentine, Rostino and Serraggio white marble, &c. The principal cereal is wheat. The vine occupies more than 2 per cent. of the surface, and the produce per acre is fully up to the average. C. was colonised by the Phœnicians, then by the Phocæans, and in the fifth century B.C. by the Carthaginians, from whom the Romans wrested it after the first Punic war. Very flourishing during the Roman period, it suffered greatly during the Middle Ages by incursions of Saracens, and through getting mixed up with the quarrels of the small Italian states. The Genoese became the suzerains of the island in 1347. Their authority, interrupted by numerous insurrections, lasted till 1768, when they ceded C. to France (Aug. 15), exactly a year before the birth, at Ajaccio, of Napoleon Bonaparte. Area, 3368 sq. m. P. (1891) 288,600. See **France,** table; also a monograph in *Scot. Geog. Mag.*, 1894, p. 505.

Coruña, English **Corunna,** called by English sailors The Groyne, fortified city and seapt. tn., Spain, Galicia, cap. prov. C., 31 m. N. by E. Santiago, 320 m. NW. Madrid, terminus of the only railway that completely traverses Galicia. Lat. (Fort San Antonio) 43° 22′ 5″ N., long. 8° 22′ 7″ W. It stands on the E. side of a small penin., and consists of an upper (old) and lower town, the former having the citadel, and the latter, sometimes called La Pescaderia (fisher-town), built on a penin. jutting into the spacious, deep, and picturesquely granite-girt harbour (Ensenada) of Orsan (SW. of the Rias de Ferrol and Betanzos), and containing the arsenal and barracks. The harbour is defended on the E. by Fort San Diego, W. by Fort San Antonio. N. of it is the tower of Hercules, a lighthouse 92 ft. in height, on a Roman foundation. A great part of its pop. is employed in the herring and pilchard fishery on the coast. It has a large royal cigar factory, and manufactures of linen goods, hats, cordage, canvas, &c. It has a school of navigation. There are no docks. The harbour, which is safe and sheltered, has no bar. Anchorage good. Vessels usually loaded and discharged by means of lighters. Depth alongside quayage (4510 ft.), 15 ft. Large works for the improvement of the port have been commenced (1894). From this port the Spanish Armada set sail in 1588; and near this, on the heights of Elvina, the French were defeated, Jan. 16, 1809, by the British under Sir J. Moore, who was mortally wounded in the action. Mean temp., yr. 55.7° F., Jan. 47.8°, Aug. 66.1°. P. (1860) 30,100; (1877) 36,100; (1887) 37,200.

Costa Rica, republic in Central America, between 8°–12° N., 82°–86° W., equal to the fourth part of Great Britain, with coast-lines on the Caribbean Sea (NE., 217 m.) and the Pacific (SW., 293 m.), lying between two depressions, where oceanic canals have been planned, and composed of a mass of mountainous highlands (4000–5000 ft. mean alt.) stretching NW.–SE. (205 m. by 106 m.), surmounted by a line of volcanoes (*a.*, to the NW.: Orosi, Rincon de la Viega, Miraballes, Tenorio, mostly above 8500 ft.; *b.*, to the SE.: Poás, or Votos, Irazu, the highest, 11,196 ft., Turialva, 11,000 ft.), divided, towards the middle, by the depression Col d'Ochomopo, in which flow, from almost the same origin, in opposite directions, the Reventazon and Tárcoles. The NE. littoral is swampy. Two penins., including two bays on the Pacific (Dulce, Nicoya). The central rocks are Archæan. Volcanic rocks predominate; nearly all the volcanoes still active. Earthquakes frequent. Numerous hot mineral springs (Agua-caliente). Some late sedimentary formations (calcareous) are met with. Gold and silver are found in Mount Aguacate (since 1823), and on riv. Chaquinola (Talamanca) copper (Mount Candelaria); lead, mercury, sulphur, lignite, anthracite (Golfo Dulce). The NE., under the trade winds, is the dampest region—without a real dry season; annual rfall. about 118 in.; hence the NE. rivers carry much more water than SW. ones (San Juan, Reventazon). Temperature lower on the Caribbean side. On the coast, mean temp. 79° F., up to 3000 ft. alt. 76°, up to 8000 ft. (the temperate region) 62°; rfall., 68 in.; above 9000 ft. the water sometimes freezes. The SW. is less damp under W. winds, and has a dry season (Dec.–May) and a rainy one (May–Nov.). In the **flora** and **fauna** of Costa Rica, S. American types predominate Dense forests cover all the highlands, principally to the NE. To the SW. large savannas appear. Arborescent ferns go up to 7500 ft.; bananas, potatoes, and Indian corn up to 6500 ft., where oaks begin to grow. Two species of conifers are met with on the mountains (Barba). Myrtles and Vaccinieæ are the highest plants. In the forests grow the Castilloa (caoutchouc), the Cedrela (wood used in cigar-boxes and pencils), vanilla, cacao. Very dangerous vampires; numerous manatees. The **people** include three groups of Indians: Guatusos (N.), on the lands to riv. San Juan, probably related to the Nicaragua Chontales (very fair, supposed to have English blood); Talamancas, to the E.; Terraba, Bonica, towards the Pacific (Golfo Dulce); negroes and mulattos on the swampy NE. littoral. Nine-tenths of the population live on the high lands S. of the volcanoes; more than one-fourth in and round the cap. (San José). The deep valleys and the low swampy regions (NE. littoral) are very unhealthy. Maize (*milpas*) and beans (*frijoles*) are the staple food with rice (grown without irrigation), *Tiquisque* (*Colocasia*), *Yucca* (*Manihot Aipi*), from which starch is extracted. The great commercial cultures are coffee (since 1817); bananas (since 1880, especially in the swampy region of NE.). Sugar cane is indigenous. Very good pastures in the SW. savannas and on the highlands (Carthago). Remarkable hard wood in the forests (N., San Carlos valleys). The best oysters of all W. America, with abundance of pearls (bay of Nicoya). The principal **exports** are coffee, bananas (40,000 tons), hides and skins, and wood. **Imports** are flour (Chili, California), tobacco, cattle, cottons and woollens, machinery (from Great Britain). The two commercial ports are Punta Arenas (Nicoya Bay), on the Pacific; Limon, on the Atlantic. Railways from Punta Arenas to Esparta, and from Carillo, Alajuella (by Heredia, San José, Carthago), to Limon. Few roads, and these very difficult to keep up. In the N., steamers can go (by rivs. San Juan, Colorado) to the heart of the forests (riv. San Carlos, 12–24 ft. deep). There is a Congress, with one member for 10,000 inhabitants. The President is elected for four years. The state religion is the Roman Catholic. All others are admitted. In 1520 a colony from Galicia (Spain) was established on the highlands. The country was first called 'Nueva Carthago.' A prov. of the kingdom of Guatemala. Since 1821, a republic; 1824–38 part of Central American Confederation. First constitution in 1859; the present one in 1871. Since 1892, the President assumed the dictatorship. P. (1844) 80,000; (1872) 266,000 (including some 3–4000 Indians). [**J. B. R.**]

Côte d'Or, chain of mts., France, which separates the basin of the Saône from those of the Seine and Loire, and connects the Cevennes with the Plateau de Langres. See **Côte d'Or,** dep.

Côte d'Or, dep., France, formed almost entirely from the ancient prov. of Burgundy; divided into four arrs., Dijon, cap. Beaune, Châtillon-sur-Seine, and Semur. The surface is very undulating, and is traversed from S. to NE. by the water-parting between the Atlantic and the Mediterranean, here crossed by the Burgundy Canal (*q.v.*), which marks the div. between the range of the C. d'O. in the S. (2085 ft.), and the Plateau de Langres in the N. The Monts de l'Auxois, which branch off from the C. d'O. about the middle of the dep., cover a large part in the W., especially in the arr. of Semur-en-Auxois. The highest peaks of the dep. occur in Morvan, in the SW. (Mont de Gien, 2370 ft.). More than half the dep. belongs to the basin of the Rhone, the SE. being traversed by the Saône, which is navigable throughout the dep., and receives on the left the Oignon, on the right the Tille and the Ouche; two-fifths is watered by the Seine, which rises near St. Germain la Feuille, and its trib. the Armançon; and part is in the basin of the Loire, being drained by the Arroux. By far the most important cereal is wheat. Sugar-beet is grown to a considerable extent. Between 3 and 4 per cent. of the surface is occupied by vineyards. The production of wine per acre is above the average, and the vineyards of the E. slopes and the C. d'O. range near Dijon, Nuits, and Beaune produce the highly esteemed Burgundy wines. The exported wines, however, the produce of the grape known as the *pineau,* or *pinot,* are only grown on a small fraction of the area under the vine. A small quantity of coal is the only mineral production of importance. Area, 3392 sq. m. P. (1891) 376,900. See **France,** table.

Cote St. Antoine, W. suburb of Montreal, Canada. P. 3000.

Cotesbach, P.O., Eng., 2 m. SW. Lutterworth, Leicestershire.

Côtes de Fer, vil., isl., and repub., Haiti, S. ct., 57 m. SW. by W. Port-au-Prince, in 73° 3′ W.

Côtes du Nord, NW. dep. of France, one of the five formed from the ancient prov. of Brittany; divided into five arrs., St. Brieuc, the cap., Dinan, Guingamp, Lannion, and Loudéac, and having a coast-line of 155 m., numerous slight indentations not included. The dep. is composed almost entirely of granite and schistose rocks, and presents the general appearance of a very undulating plateau, with two slopes, one in the N. towards the sea, the other in the S. towards Vilaine. The highest point in the dep. is in the chain Montagne d'Arrée (1280 ft.). The chief rivers are the Rance, the Arguenon, the Gouët, the Trieux, the Leff, and the Guer, or Léguer, all, however, very short, but with wide estuaries in the Channel. The climate is damp and variable [**Lamballe**]. Fine granite is quarried at St. Brieuc; sandstone and slate in other dists. Agriculture has made great progress within the last 30 or 40 years, improved means of communication facilitating the more extended use not only of seaweed manure, which has been used on the coast from time immemorial, but also of other fertilisers. The principal cereals are wheat, oats, and buckwheat. A small quantity of hops is grown. The rearing of horses and cattle is an important industry. Area, 2787 sq. m. P. (1891) 618,700. See **France,** table.

Courland, Eng. See **Currey Mallet.**

Courland, a Baltic prov. of Russia, having the Baltic Sea in the W., the Gulf of Riga and Livonia in the N., Vitebsk in the E., Minsk and Kovno in S. The spurs of the Lithuanian plateau (*Kurisches Oberland*), 300–490 ft. high, spread along the l. bk. of Düna; another range of hills, 450–500 ft., occupies the SW. part of the C. penin. Lowlands (12–50 ft.) spread between the two and in the N. Watered by Düna on its NE. frontier for 188 m., the C. Aa, and the Windau in the W. Seacoast sandy, low, and devoid of ports in Gulf of Riga; Baltic coast has three good ports, Libau, Windau, and Polangen (*q.v.*), but generally sandy. Rows of downs run parallel to the coast, with marshes, ponds, and small lakes between. Active navigation on Düna. Timber floated down the Aa and its tribs. Many marshes and small lakes. Climate temperate [**Mitau, Libau**]. Boulder clay covers the Devonian and Jurassic rocks. Forests occupy nearly 20 per cent. of terr. Population consists of Letts (49 per cent.), Coures (30 per cent.), Germans (8 per cent.), Jews (6 per cent.), Russians (2 per cent.), Poles, Lithuanians, Lives, and Byelorusses. The Letts and the Germans are Protestants. Agriculture well developed on landlords' estates; the peasants are chiefly tenants. Manufactures begin to develop, especially at Mitau: cottons, matches. Active trade. C. had till lately retained some of its old institutions, guaranteeing some autonomy to the nobility and the trading classes; they are now gradually being abolished. Divided into ten districts, the chief towns of which are: Mitau, cap. govt.,

Bauske, Friedrichstadt, Goldingen, Grobin, Hasenpoth, Illuxt, Talsen, Tuckum, Windau. Area, 10,535 sq. m. P. (1863) 567,078; (1888) 676,580.

Cracoe, par., Eng., Yorkshire, W. Riding, Skipton div., 19 m. NNE. Burnley, 4½ m. NNW. Embsay stn., PT.O. P.<250.

Cracow (German **Krakau**; Slavonic **Kraków**—probably from Slavonic *krak*, a raven, though legendary history attributes the origin of the town and its name to Krak, a prince of Poland about 700), tn., Austria, cap. crownland Galicia, 158 m. SSW. Warsaw, on the l. bk. of the Vistula, where it flows from W. to E. through a narrow valley forming the approach from the E. to the SE. of Silesia, and to the Moravian Gate leading to the valley of the Danube. This situation gives it an important strategical position, to which probably may be largely ascribed the fact that C. was for two and a half centuries (1320–1569) the cap. of Poland, and is still a fortified town, walled and surrounded by forts on both banks of the river. It has a castle, a cathedral containing the tombs of the most celebrated Polish kings, a university (founded 1364), with a botanic garden, an observatory (50° 3′ 50″ N., 19° 57′ 36″ E.), a school of arts, and academy of painting. About 3 m. W. is a tumulus to the memory of Kosciusko, 120 ft. in elevation. Manufactures cloth and leather. The territory, which formed the republic of C. from 1815 to 1846, had an area of 445 sq. m., and comprised, besides the city, the towns of Chrzanow and Krzeszowice, till it was incorporated with the Austrian empire, after an insurrection, in Dec. 1846. Alt. 680–775 ft. Mean temp., yr. 45.7° F., Jan. 26°, July 65.5°; rfall. (29 yrs.), 24.8 in. P. (1869) 49,800; (1880) 66,100; (1890) 74,600; including Podgórze on the r. bk. of the river, 87,700.

Craddock, vil., Eng., Devonshire, div. and 8 m. E. Tiverton, 1 m. ESE. Uffculme stn., P.O.

Crêt de la Neige ('snow-crest'), highest peak of the Jura, in French dep. Ain, 10 m. WNW. Geneva. Alt. 5655 ft.

Crete, Greek **Krēta,** Turkish **Kirid,** Italian **Candia,** one of the largest islands of the Mediterranean, about one-tenth of the area of Ireland, belonging to Turkey, between 34° 55′ and 35° 43′ N., 23° 30′ and 26° 20′ E. Length, 150 m.; breadth, 6–35 m. It is traversed throughout its entire length by a chain of mountains, mainly composed of the hippuritic limestone (Cretaceous) which abounds in Southern Europe, analogous to the chalk of England. (The Latin *creta,* 'chalk,' from which the Cretaceous system is named, is derived from the name of this island.) The highest summits are found on the margins of the small plateaux Ori Madares (7650 ft.), in the W.; Psiloritis, or Ida (8060 ft.), in the middle; and Lasithi (5315 ft.), in the E. Caverns are very numerous, and one of great extent near Mount Ida is supposed to have been that anciently celebrated as the retreat of Minotaur. The principal towns are all on the N. ct., Kanea, or Khania, the cap., towards the W., Retimo further E., and Megalokastron, or Candia, about the middle. They have all harbours accessible for small vessels, but the only good anchorage for all vessels safe in all weathers is Suda Bay, SE. of Kanea, which is separated from it by an isthmus. Near the E. end on the same side, Sitia offers a good anchorage, though open to the E. The S. ct. is almost inaccessible, though Sphakia and Hierapetra have roadsteads available in fine weather. Heat excessive in summer, but tempered by a N. wind, termed *embat;* cold on the mountains. The island is salubrious, although leprosy is perpetuated by negligence. Soil fertile, but agriculture neglected; principal products, olive-oil (forming half the value of the exports), wheat, oranges, lemons, silk, wine, raisins, carobs, valonia, wool, and honey. It abounds in aromatic plants, and the honey of Mount Ida is celebrated. The soap manufacture is extensive, soap forming the export next in value to olive oil. Average value of total exports about £400,000. The northern ports are connected with one another and the chief ports in the Levant by electric cables. Though the language of the whole island is Greek, with some peculiarities of pronunciation (initial *i* or *hi* before a vowel being represented by *ts,* as in the Morea), only two-thirds of the people are adherents of the Greek Church, the remainder being Mohammedans. This division is the cause of frequent disturbances in the island. In 1866–67 the Christian population revolted against the Turkish government, and the civil war raged for the space of two and a half years. At the close of these troubles, the Porte granted to the island a certain amount of self-government, and in 1878 additional privileges were conferred on the recommendation of the Congress of Berlin, an arrangement being then concluded between the Turkish government and the Cretan representatives, in the settlement of which the foreign consuls assisted, though the arrangement has never been guaranteed by the great powers. According to the terms of that arrangement, the governor-general is appointed for a term of five years; the officials, with few exceptions, are to be natives of the island; all the higher officials are to have assistants of the other creed; and of the five governors, two are to be Mohammedans and two Christians. This settlement, however, has not proved altogether effective in securing harmony between the different sections of the pop., further disturbances of a serious nature having broken out in 1890–91. Area, 3328 sq. m. P. (census, 1887) 294,000 (orthodox Greeks, 204,800; Moham. 88,500), or 88 per sq. m.

Crete, vil., U.S., Illinois, co. Will, 30 m. S. Chicago by rail. P.<1500.

Crete, city, U.S., Nebraska, co. Saline, 21 m. SW. Lincoln by rail. P.<3000.

Crétell, comm., France, dep. Seine, 6½ m. SE. Notre Dame, Paris. P.<3000.

Cretingham, par., Eng., Suffolk, Eye div., 11 m. NNE. Ipswich, on the Deben. P.O. P.<500.

Crettyard, vil., Ire., NE. co. Kilkenny, bar. Fassidinin, 8 m. W. Carlow, with coal-mines, PMT.O.

Creuddyn, dist., Wales. See **Carnarvonshire.**

Creully, vil., France, dep. Calvados, arr. and 11 m. NW. Caen. P.<2000.

Creus, Capo de, the easternmost point of the mainland of Spain, the ancient *Aphrodisium.*

Creuse, riv., France, rises in dep. C., and flows NNW. through dep. Indre, and forms the boundary between deps. Indre-et-Loire and Vienne; joins the Vienne 12 m. N. Chatellerault, after a course of 150 m.

Creuse, dep. in the Central Plateau, France, to the NW. of the mountains of Auvergne, formed from the greater part of Haute-Marche, and certain portions of Limousin, Poitou, Berry, and Bourbonnais, and divided into four arrs., Guéret, cap., Aubusson, Bourganeuf, and Boussac. The N. and S. of the dep. are particularly mountainous, very sterile, and savagely picturesque, and are divided by deep, narrow, tortuous valleys, in the recesses of which are hidden straggling villages, surrounded by strips of cultivated fields. The Monts de la Marche consist of several chains, having their culminating points (3020–3055 ft.) in the SE. of the dep. Its rivers, all of which rise within its limits, belong to the Dordogne and Loire basins, mostly to the latter, which includes the Cher, Creuse, Taurion, and Maulde, none of which are navigable. Numerous ponds serve for irrigation. The climate is cold. Coal is obtained at Ahun, and in the neighbourhood of Bourganeuf, and there are undeveloped mines of iron, lead (near Souterraine), tin (Montebras), and antimony (Merinchal). Principal cereal, rye, next to that, wheat, oats, and buckwheat. The insufficient agricultural resources of the dep. render necessary the practice of annual migration. Nine-tenths at least of this migrating population return to pass

three winter months in their own country. The principal industries are carpet-making at Aubusson and Felletin, and porcelain and paper manufactures at Bourganeuf. At Clermont there is a university college. Area, 2164 sq. m. P. 284,700. See **France**, table.

Creusot, Le, or **Creuzot, Le,** tn., France, dep. Saône et Loire, arr. and 12 m. SE. Autun, 5 m. from a short branch of the Canal du Centre. The town is little else than an immense coal-mining and iron-working establishment, including works for the construction of fixed and locomotive steam-engines. In 1770 it was only a hamlet, called Charbonnière, and owes its rise to the establishment at that date of iron-works, which increased greatly in magnitude after 1837 under the direction of Messrs. Schneider. The coal-seam here worked (producing upwards of 1,000,000 tons annually) is nearly perpendicular, and is worked at several stages. Alt. 1355 ft. P. (1861) 16,000; (1872) 21,400; (1891) 18,100.

Crieff, or **Fraserville,** vil., Canada, Ontario, co. Wellington, 11 m. from Galt. P. <1500.

Crieff, market-tn. and par., Scot., W. Perthshire, on the Earn, 16½ m. SW. by S. Dunkeld, on the C. R. It stands near the base of the Grampians, and has manufactures of cotton, linen, worsted, and woollen stuffs and tanneries; Morison's Academy, founded in 1859, for the education of boys and girls; and a hydropathic establishment. Market-day, Tu. Par. 20,385 ac., P. 5300; tn. P. <5000.

Crieff Junction, stn., Scot., on the N. B. R. and C. R., 8 m. SE. by S. Crieff, 1½ m. SSW. Auchterarder.

Criffel, gold-mining locality, New Zealand, South I., on the E. border of Vincent co., on the top of the Pisa Mts. near the Clutha R., 180 m. SE. Christchurch. P. <1500.

Criffell, hill, Scot., Kircudbrightshire, 9 m. S. by W. Dumfries. Alt. 1865 ft.

Criftins by Ellesmere, eccles. par., Eng., Shropshire, in the ancient par. of Ellesmere. P. <750.

Criggion, par., Wales, Montgomeryshire, 6½ m. NE. Welshpool, 2 m. E. Ardleen stn., P.O. P. <250.

Crigglestone, par., Eng., Yorkshire, W. Riding, Normanton div., 3 m. SW. by S. Wakefield, on L. & Y. R., PM.O. P. <3000.

Crillon, mt., Alaska, near the Pacific coast, in 58° 40′ N. Alt. 15,900 ft.

Crillon, or **Notoro, Cape,** the SW. end of Sakhalin.

Crilly, tnld., Ire., SE. co. Tyrone, bar. Lower Dungannon, 10 m. SW. Dungannon, P.O. P. <250.

Crimea (*Taurida,* ancient *Chersonesus Taurica*), a penin. of European Russia in the Black Sea, connected with mainland by the narrow isthmus of Perekop. Has a rhomboidal form, and is prolonged to the E. by the sub-penin. of Kerch, which meets a penin. of the same width stretching W. from the Caucasus, being only separated from it by the Strait of Yenikale or Kerch (*Cimmerian Bosporus*), leading to the Sea of Azov. Extreme length 205 m. (32° 32′ to 36° 40′ E.), and 110 m. (44° 23′ to 46° 5′ N.). The NE. coast is covered by encroachments of the Putrid Sea (*Gniloye More,* or *Sivash*), which is separated from the Sea of Azov by the narrow Arabat penin. (*A. stryelka*), 70 m. long and 1–2 m. wide. The Kerch penin. has the bay of Theodosia on its southern coast. The SE. coast of C. is rocky, having but three small bays, Sudak, Alushta, and Yalta. From Cape Laspi the coast turns northwards, and has the bays of Balaklava, Sebastopol, and Eupatoria. From Cape Tarkhankut it turns NE., and has only one anchorage at Akmechet. The Yaila range of mountains rises along SE. coast, their wooded flat tops reaching from 1500 to 5113 ft. (Chatyr-dagh). This SE. slope is steep, and its valleys have the climate and the vegetation of Asia Minor and Italy. The olive, fig, vine pomegranate, and a variety of acclimatised Southern plants grow in the open air, and the coast offers a succession of vineyards and villas. The remainder of C. is a wide steppe, devoid of forests, interspersed with salt lakes, exposed to the severity of a Russian winter, and sparsely watered by small rivers, which dry up in the summer. Tartars previously were the chief inhabitants of these dry steppes, but since the Crimean war they have been emigrating *en masse* to Turkey, and no Russian settlers take their place. The population, which was nearly 500,000 when Russia took possession of C. in 1783, has thus been decreasing since. In the Crimean war, the allies' army landed in the Kalamita Bay on the SW. coast, September 14, defeated the Russians on the Alma, September 20, and began the siege of Sevastopol, October 17, 1854, which fell after an eleven months' investment. C. contains part of the Russian government Taurida, including the capital, Simpheropol, and the districts Eupatoria, Theodosia, Yalta, and Perekop. Area, 9773 sq. m. P. (1885) 368,797.

Crimmitschau, tn., Ger. See **Krimmitschau.**

Crimond, ct. par., Scot., E. Aberdeenshire, 7 m. SSE. Fraserburgh, 2½ m. SE. by E. Lonmay stn., P.O.; 5891 ac. P. <1000.

Crimplesham (krim'p'lz-ham), par., Eng., Norfolk, SW. div., 10½ m. S. by E. King's Lynn, 3 m. E. Downham stn., P.O. P. <500; eccles. par. (**C. with Stradsett**) P. <500.

Crinan, vil., Scot., Argyllshire, on the coast, 6 m. NW. by W. Ardrishaig, on **C. Loch,** and at the NW. end of the **C. Canal,** which connects Crinan Loch with Loch Gilp and Jura Sound, at Ardrishaig. Length, 9 m.; average width, 24 ft.; depth, 12 ft. It has fifteen locks, and is navigable for vessels of 200 tons; was completed in 1801. PT.O. (**C. Pier**).

Crinant, Wales, Glamorganshire. See **Crynant.**

Crni, Servian, 'black.'

Croagh, Gaelic, 'a rounded hill.'

Croagh, electoral div., Ire., co. Antrim, Ballycastle union.

Croagh, par. and tn., Ire., N., co. Limerick, bar. Lower Connello, 15 m. SW. by W. Limerick, 3 m. from Rathkeale stn., P.O. Par. 7220 ac., P.<1000; tn. P.<250.

Croaghaun, or **Croghan,** Mt., Ire., in the W. of Achill Is., co. Mayo, 29 m. WNW. Westport; the cliffs have a sheer descent of 2000 ft. to the sea.

Croaghmoyle, mt., Ire., NW., co. Mayo, 14½ m. SW. Ballina. Height, 1412 ft.

Croaghnakeela, isl., Ire., off SW. ct. co. Galway, near the entrance to Bertraghboy Bay.

Croaghonagh, tnld., Ire., SW. co. Donegal, bar. Raphoe, 14½ m. WSW. Lifford. P.<250.

Croaghpatrick, or **Reek,** mt., Ire., extreme SW. co. Mayo, 6½ m. W. by S. Westport, on the S. side of Clew Bay; height, 2510 ft. Tradition says that St. Patrick began his missionary work in Ireland here.

Croajingolong, co., Victoria, on the SE. frontier, crossed by 149° E.

Croan, Lough, small lake, Ire., co. Roscommon, 8½ m. S. Roscommon.

Croatan Sound, channel, U.S., N. Carolina, between Roanoke I. and the mainland, opening N. into Albemarle Sound, and S. into Pamplico Sound, in 35° 45′-55′ N.

Croatia-Slavonia, a Trans-Leithan prov. of Austria-Hungary, between the rivs. Drave and Save [**Austria-Hungary**], and thence to the Adriatic. The country consists chiefly of alluvial and diluvial plains, above which rise more or less isolated mountains, partly of tertiary, partly of mesozoic and palæozoic rocks. There are three groups:—Mts. of Croatia, Požega, and Vrtnik. The western mountains of Croatia (4000 to 5000 ft.) show most of the Karst features [**Karst**]. The mountainous and hilly parts of the country are covered with forests (oak, beech, pine, elm), which yield excellent timber. The lower parts of the country are full of unhealthy swamps and marshes, due chiefly to the inundation of the Save. In the mountainous and hilly districts, on the other hand, water is often scarce near the surface on account of cavernous rocks and subterranean water-courses. The country is naturally fertile, but agriculture and cattle-rearing are in a very unsatisfactory state. Chief minerals, coal and lignite (Ivanščica, Bilo, Požega, Vrtnick Mts.); iron ore (on the Unna R., and near Rude); zinc and lead (upper valley of the Save); copper (Samobor). The inhabitants are chiefly Croats, Slavonians, Syrmians, and Servians, the Croats belonging chiefly to the Roman Catholic, and the others to the Greek Church. There are also Germans, Magyars, and Jews. The zadrugas or 'family communities' are one of the characteristic features of the social life of the Croato-Servians. Each zadruga consists of ten to twenty persons, and is under the rule of a domaćin or gospodar. At present there are hardly any manufactures. It is, however, expected that the Austrian occupation of Bosnia will tend to the increased development of commerce and industries. The principal towns are Agram (cap. of Croatia), Varaždin, Karlovac Gornji, Essek, Brod, Mitrovic, Semlin. See **Austria-Hungary,** table. [**H. G. S.**]

Crobane, tnld., Ire., co. Down, bar. Lordship of Newry, par. Newry. P.<250.

Crocach, Loch, small lake, Scot., in the W. of Sutherland, 7 m. SE. Storr Head, drained into Loch Roe.

Crolly, P.O., Ire., co. Donegal, 4 m. from Gweedore, 24 m. from Letterkenny stn.

Crom, *crum*, Gaelic; *crwm*, Cymric, 'crooked.'

Cromar, dist., Scot., Aberdeenshire, on the l. bk. of the Dee; it comprises the pars. Coull, Logie-Coldstone, and Farland, and a small part of Glenmuick.

Cromarty, co., Scot., forming the promontory called Ardmeanach, or the 'Black Isle,' consisting of about 17½ sq. m., but including also nineteen detached portions of land in various parts of Ross-shire. The dist. is now included in the sheriffdom of Ross, with which it joins in sending a member to House of Commons, and a sheriff court is held every alternate Friday at the town of Cromarty. See **Ross-shire.**

Cromarty, parl. burgh, seapt. vil., and par., Scot., cap. of co. C., on **C. Firth** (inlet, 19½ m. long, opening by mouth less than 1 m. wide into the W. of the Moray Firth), 9 m. NW. Nairn, and 5 m. E. Invergordon stn., with manufactures of rope, sacking, and sailcloth, and a herring fishery; birthplace of Hugh Miller the geologist. PMT.O. Par. 8017 ac., P. <2500; burgh P. <1500.

Crombie, small vil., Scot., formerly a par., in the extreme SW. of Fife.

Cromdale, par., Scot., Elginshire and Inverness-shire, Strathspey dist., 18½ m. S. by E. Forres, with a stn. on the G. N. of S. R., PT.O.; 70,120 ac. P. <3500.

Cromdale, Hills of, a range of hills, Scot., mainly on the border of Elginshire and Banffshire, but stretching also into Inverness-shire.

Cromer, small tn. and par., now a favourite watering-place, Eng., Norfolk, N. div., on the N. ct., 21 m. N. Norwich, with two stns., **C.** on the G. E. R., and **C. Beach** on the M. & G. N. Joint Rly. All attempts to form a harbour have been frustrated by the heavy sea, which is here continually gaining on the land, and vessels load and unload on the open sandy beach. Nearly the whole of the old town, formerly called *Shipdon*, and the parish church, have been swept away by the sea. Crab and lobster fishing employ many of the inhabitants. Jet and amber are collected in the winter. There is a convalescent home in connection with the Norfolk and Norwich Hospital (Norwich). Lighthouse, visible 23 m. P. <2500.

Cromford, small market-tn. and par., Eng., Derbyshire, W. div., 2½ m. S. by W. Matlock, 1 m. SW. of its stn. on the M. R. The first cotton-mill was erected by Arkwright in 1776, and cotton manufactures are still carried on; has ochre pits and lead-smelting works. **C. Canal** (controlled by the M. R.) is connected with the Nottingham and Erewash Canals a few miles NW. Nottingham. Length, 17 m. PMT.O. Market-day, S. P. <1500.

Cromhall, par., Eng., Gloucestershire, Stroud div., 4 m. WSW. Wotton-under-Edge, 2 m. WNW. Wickwar stn., PM.O. P. <750.

Croydon ('chalk hill,' originally *Craydene,* and the supposed ancient *Noviomagus*), parl. bor. (1 member), mun. bor. (since 1883), co. bor., market-tn., and par., Eng., Surrey, 9 m. S. St. Paul's, London, in the diocese of Canterbury, on the L. B. & S. C. R. and the SE. R. (stns. New, E., W., and S. Croydon). A large boot manufactory and a pyrotechnic establishment in Norwood are the manufacturing establishments of the bor., which owes its recent growth chiefly to its general trade, and the attractiveness of its residential quarters, partly built on chalk hills. In its archiepiscopal palace, now used by the Kilburn Sisters as a girls' school, the primates usually resided from 1218–1757. The parish church supposed to have been rebuilt by Archbishop Courtenay (died 1396), a church having been founded at least as early as 962. Among the many charities of C. the most noted is Whitgift's Hospital, founded by Archbishop Whitgift, in the reign of Elizabeth, for the maintenance of a warden, schoolmaster, and 28 to 40 men and women. Market-days, Th. (cattle and corn) and S. The par. is very extensive, being nearly 36 m. in circumference. 9012 ac. P. (1801) 5700; (1851) 10,300; (1871) 55,700; (1891) 102,700. Cuayacanes, tn., I. of Haiti, S. coast, republic and 32 m. E. Santo Domingo, in 69° 23′ W.

Cuba (from 'Cubanacan,' the native name of the central region), called by the Spaniards 'the pearl or queen of the Antilles,' an island between the Mexican Gulf and the Caribbean Sea, by 20° 24′ N. lat., 74° 86′ W. long., in the shape of a Cornucopia, the mouth, from *punta* de Maysi to *punta* del Inglez, turned to SE., the convex part (from Cape Maysi to Cape Santo Antonio), more than 900 m. long, turned to the N., the concave part to the S., with a total coast development of more than 7000 m., 25–124 m. wide, and 43,000 sq. m. of surface (including the small adjacent islands), equal to one-fourth of Spain, or to one-half of Great Britain. C. is divided into two parts (the E. and the W.) by a large marshy depression (*trocha*) 47 m. wide, between the N. and S. coast, in about 79° 00′ W. (1) In the E. are: (*a*) in the S., the principal mountainous region, the Sierra Maestra, or Grupo Macaba (4000 ft. mean alt.; Pico Turquino, or Monte Azul, 8070 ft.), and its continuation, the *Sierra* del Cobre (Gran Piedra, 5180 ft.); (*b*) the hilly region W. of Yunque, or Bigorna, 3000 ft., to point Maysi (Sierras de la Vela, Toar, del Convento), much denuded and cut by the waters (*Cuchillas*), and limited on the W. by the Sierras Micaro and do Nipe, to the W. of which lies (*c*) an extensive more or less elevated tract, including the hilly regions around Puerto Principe (Sierras de Cabita-Cabernas, Najasa, Guaicanamas); (2) W. of the central depression there are (*a*) a S. hilly centre (600–1000 ft. mean alt.; *Pico* de Potrerillo, 2970 ft.) in Cinco-Villas (Sancti Spiritu, San Juan de los Remedios, Santa Clara, Sagua la Grande, Cienfuegos); (*b*) the N. high region of Matanzas (Pan de Matanzas, 1280 ft.); (*c*) stretching from NE. to SW. the Cordillera de los Organos, or Grupo de Guaniguanico (Pan de Guajaibon, 1920 ft.); (*d*) beyond, low, marshy, sandy lands from the penin. of Guanacahibes to Cape San Antonio. From Capes Maysi (S.) and de Cruz (W.) to Havana (N.) and Batabano (S.) the prevailing slope is SE. to NW. (*Vuelta de Arriba*); from Havana and Batabano to Capes San Antonio (W.), Mangle (E.), NE.–SW. (*Vuelta de Abajo*). The longest and more branched rivers, all in the S., are: (1) the Cauto (250 m., navigable for small ships half way up; for vessels of fifty tons to Embarcadero, 93 m.), draining the Sierra Maestra-Cobre to the N.; (2) the Saza, at the foot of Cinco-Villas hills; (3) Hatiguanico-Negro to the S. of Matanzas, forming in its lower part Lake del Tesoro and a vast marsh (for more than 60 m.) to the W. (Gran Ciénaga occidental), and to the E. (Gran Ciénaga oriental de Zapata) from Ensenada de la Broa to Cochinos. All others run more or less perpendicular to the coast, some of them disappearing in the marshy districts. The Sagua la Grande (great) and la Chica (small) are the best known on the N. The littoral low lands (principally on the S.) are extensively marshy (*savannas la mar*), the waters being sometimes stopped by the coral formations which surround the island, forming numerous coral reefs and coral isles (*cayos*), growing slowly but constantly in parallel lines, making navigation very dangerous, but affording abundance of convenient ports. The coral rocks and islands are: (1) along the N. coast, (*a*) the Sabanacamaguey Archipelago (*Jardines del Rey*) from Nuevitas to *punta* or penin. Hicacos (comprising the islands known as the Cayos del Sabinal, Guajaba, Romano, and Cocos), in all more than 300 m. long; (*b*) the Guaniguanico Archipelago, from Bahia Honda (deep) to Punta del Cajon (Cayos Inez de Soto, Rapado, de Buenavista, Bajos (banks) de los Colorados); (2) along the S. coast, (*a*) *Jardines de la Reina* Archipelago (Laberinto de Doze Leguas), opposite Manzanillo Bay; (*b*) the isl. of Pinos (Pines), with Cayos San Felipe (NW.) and Jardines Jardinillos (NE.), opposite Gulf of Matamanó, with numberless cayos and reefs between (Archipielago de los Canarréos). The coral cayos and reefs are very changeable. **Geology.**—Granite, porphyries, and syenites form a fundamental skeleton in several points all over the island, from Sierra Madre to Sierra Guaniguanico (Holquin, Santa Clara, Aguacate). Serpentines, diorites, occupy large zones (Holquin, Puerto Principe, Colon-Moron); near Santiago, trachytes and basalt. The Palæozoic formations are represented (SE. of Nuevitas, between Trinidad and riv. Arimao, Mantua). A zone along the whole Guaniguanico Cordillera is Mesozoic (Jurassic?); so are the rocks in Sierra Maestra, Cienfuegos, Remedios, and along the precedent formation (Cretaceous?). Between the points named almost all C. is Tertiary (Miocene fossils prove it has been united then to N. America); all surrounded by littoral Quaternary, and recent coralline rocks. Many of the C. hills (now more than 900 ft. high) were once coral reefs. Numerous Calcareous caves (Monte Libano, Cape Maysi). Many rivers run underground. Earthquakes frequent around Sierra Maestra. **Mineral productions.**—Gold in the Cinco-Villas region explored in olden times; copper in Sierra del Cobre; iron (Juragua) and manganese (in Santiago); argentiferous lead, mercury, zinc, coal, petroleum, bitumen (Sagua la Grande). Mineral waters (San Diego, Sierra de los Organos). **Climate.**—C. lies in the torrid zone, at the source of the Gulf Stream, between isotherms 77°–82°. All NE. lands (Vuelta de Arriba) and the SE. extremity being under the trade wind, have almost incessant rains. The principal rainy and hot season is, however, June–August. (Havana, mean temp. 77° F.; max., July 82° F.; min., Dec. 73° F.; rfall., 3 ft. 3 in. Santiago, mean temp. 80½° F.; max., July 83° F.; min., Dec. 73½° F.) The hottest months in C. are Aug.–Sept. The cold season Nov.–Feb. N. winds are prevalent in winter, after which the temp. sometimes falls to freezing point. The temperate season, March–May. In the S. coast rains more abundant in autumn than spring. The mean annual rfall. throughout the island varies from 39–157 in. Great humidity all over (mean, more than 58 per cent.). C. is in the way of great cyclonic hurricanes (principally occurring in Aug.–Oct.). Along with an endemic **flora** C. includes, besides W. Indian types, representatives of the tropical parts of the mainland of America (principally Venezuela and Guiana), the Gulf Stream dividing C. from N. America. The damp highlands of the SE. are covered to the top with forests rich in epiphytæ and climbers (mahogany, ebony, caju, palms, *Oreodoxa regia*, 108 ft. high, arboreal ferns, 320–6000 ft. alt., *Pinus Cubensis*, in the isl. of Pinos, wild orange trees). In the interior (*Tierra Adentro*) many forests have been cleared (thickets of Chamærops, *yarey*, and thorny plants, *manigua*). In all the

S. part the savannas are extensive (with many plants introduced from Para and Guiana, *Panicum maximum* and *molle*), intermingled with forests, or trees along the rivers (*cejas*). One-third of all C. is covered with forests and savannas. **Fauna.**—The **fauna** of C. is independent of those of the Continent, having scarcely any of the characteristic of the three Americas. Some mammals have become extinct since the 16th century. The domestic animals introduced by the Spaniards have become deeply modified; some now wild (dog, pig). Some birds, Cheloniæ (turtles) and molluscs are special to C. Manatees abundant. **Ethnology.**—Fossil human remains and signs of the existence of men of the polished stones time have been found, besides old accumulation of bones (*Caneyes*). The pure indigenous Indians are now very rare (*Aravacos*, to the E. of C.). They seem to have been connected with at least two currents, one from the Maya stock of N. America (Yucatan), the other from the Nu Arawak of S. America. **Population.**—The present population, though principally Spanish, is a very mixed one (*creollos*), old French colonies to the E., Anglo-American and German on the N. (Matanzas, Cardenas), American-Indian (Mexico, Yucatan) in the SW. Great number of Chinese and Negroes (*bozales ladinos*).

The low, moist parts of C. are very unhealthy. Yellow fever (epidemic); dysentery attacks specially the Whites; cholera, the Negroes and Chinese; Beriberi, the Chinese (in the sugar plantations). The E. highlands are the healthiest. The isl. of Pines is used during the summer as a sanatorium. **Vegetable and Animal Productions.**—Two-thirds of the area of C. is under cultivation. Sugar-cane (S. and E. of Matanzas) is the principal product of C. (one-fourth of the whole sugar production of the world). The plantations occupy more than 1300 sq. m., some yielding yearly 5000 tons of sugar. Tobacco (*cohiba*), which was discovered by the companions of Columbus, now ranks next in importance among the products of C. The plant (*vegas*) is grown in the Vuelta de Abajo, around Pinar del Rio (Riv. Cuyaguatejo), the next quality between Cienfuegos and Trinidad (Manicaragua). Coffee is also produced in large quantities (Guanajoy, *Cafétales*). Cacao, opium, aniseed, indigo, pisang, manihot, Indian corn (two annual crops), cotton and other textile plants, woods, and tropical fruits are also among the products. Important rearing of cattle (1,200,000), horses, mules, swine, sheep; numerous, and very good. Manufactures of sugar and cigars. **Commerce** is with (1) United States, maintained through differential tariffs, (2) Spain, (3) Great Britain. In the W. part of C. the N. is the commercial side; Havana and Matanzas are the two most important ports; in the E., it is the S. Santiago de Cuba, or 'Cuba,' is the third port. The other ports are (N.) Cardenas (sugar), Puerto Padre (bitumen), Nuevitas, Baracoa, Mariel, Cabañas, Bahia Honda; (S.) Coloma, Cortez (tobacco), Cienfuegos, Trinidad, Manzanillo; (SE.) Guantánamo. The **exports** are mostly sugar, tobacco, coffee, woods, minerals; the **imports** (paying 25 per cent. *ad valorem*) are food articles (rice, wheat, flour, meat, wines), cotton, woollens and silks, perfumeries, and building materials. The **Means of Communication** are very imperfect. One road (*camino central*) traverses three-fourths of the whole length of the island. Railways (since 1837) principally radiate from Havana, in the W. part (to Pinal del Rio, Batabano, Cardenas, Sagua la Grande, Santa Clara, Cienfuegos, and Trinidad to Sancti Spiritus, Tunas). In the E. only fragments—Moron-Jucaro (across the central depression), Puerto Principe to San Fernando de Nuevitas, Santiago to El Cobre, Guantánamo. The railways make some 1000 m. Telegraphic lines, about 3000 m. Two international telegraphic centres (*a.*) Havana to United States (Key W.), Mexico and Europe; (*b.*) Santiago to Mexico, Jamaica, Haiti, Puerto Rico, the Lesser Antilles, and S. America. **Institutions.**—C. is divided in six provs., and sends to the Madrid Cortes six elect *Senadores* and twenty-four *Diputados* (one per 40,000 inhabitants). The prov. and municip. are administered by corporations of councillors; a Gobernador-Capitan-General (at Havana) represents the Central Government. An archbishop at Santiago (for C. and Puerto Rico). C. has a special army corps (21,600 men), and forms a special naval department. **History.**—Columbus discovered part of the NE. ct. of C. in 1492, and almost all the S. ct. in 1495. Ocampo, in 1508, proved it to be an island by sailing around the NE. extremity. C. was successively called Juana, Fernandina, Santiago, Ave Maria, Alfa y Omegá. The first colonies were founded in 1501 (by Diego Velasquez) and 1511 (Baracoa). In 1818 commerce was declared free. From 1868 to 1878 an insurrection (the *manbi*) against Spain maintained a republican government in the E. half of C. Slavery was definitively abolished in 1886. Another insurrection broke out in 1895. P. (1774) 171,600; (1841) 1,000,000; (1877) 1,405,268 (including 48,800 Chinese); (1890) 1,600,000 (including 40,000 Chinese and 480,000 Negroes). Parl. bors.[1]	3,263	57,348
Total . .	970,161	266,549

[1] Carlisle city and Whitehaven.

The administrative county is co-extensive with the ancient county.

The surface, features, and geology of the county are among the most complicated in England. The southern part of the county, which is mainly composed of volcanic rocks in the S., and (generally slaty) rocks of the Ordovician and Cambrian system in the N., along with intensive plutonic areas here and there, embraces the greater part of the Cumbrian Mts., including the highest peaks in England (Scafell Pikes, 3206 ft.; Scafell, 3161 ft.; Helvellyn, 3118 ft.; Skiddaw, 3054 ft.; Saddleback, 2847 ft.),

and several of the English lakes (Derwent, Bassenthwaite, Crummoch, Ennerdale and Wast Waters, Ullswater lying on the border of this county and Westmorland). The rocks of this area are bordered by Permian or New Red Sandstone lowlands on that part of the coast which looks SW. In the E. this mountainous area is separated from Lower Carboniferous hills on the E. border by the rich Permian valley of the Eden. Triassic New Red Sandstones extend over all the lowlands in the N. of the county. Between the mountainous area in the S. and the Triassic lowlands in the N. lies a comparatively narrow area embracing all the members of the Carboniferous system, including a tract of highly productive coal measures, the N. limit of which is approximately marked by the R. Ellen. On the coast this tract extends from 2 m. S. of Whitehaven to Maryport, and it stretches inland in the NE. to within 3 m. of Wigton. The coal measures dip seawards, and at Workington the mines extend between 2 and 3 m. under the sea. Among the chief mining centres are Harrington, Maryport, Whitehaven, Cleator Moor, and Workington, all of which have also blast-furnaces for smelting the iron ore which also abounds in the county. The iron ore is the valuable red hematite, the bulk of the English production of which is derived from C. The most important mining centre for this ore is Millom, which also has blast-furnaces, and among those next in importance are Egremont, Eskett, Whitehaven, Cleator. Among other minerals are lead at Garrigill, Nenthead, and Keswick. Barytes found at Alston Moor and Wigton; gypsum at Knothill, Whitehaven, Little Salkeld, and Carlisle; umber at Alston and Wigton; plumbago at Keswick; slate at Borrowdale; and zinc ore at Alston and Keswick. The manufactures are cotton, woollen, linen, earthenware, paper, nails, glass, &c. Shipbuilding is largely carried on at Whitehaven. The railways are the L. & NW. R., M. R., C. R., N. B. R., G. & SW. R., the Furness, Whitehaven Junc., Maryport and Carlisle, and a line from Workington to Cockermouth, Keswick, and Penrith. For agricultural statistics, see **Appendix,** pp. 7–9. Traces of the Great Barrier, or 'Wall of Hadrian' are to be seen, and many remains of Roman camps, especially near Carlisle, Wigton, Penrith, and on the coast. Numerous peel towers are on the Scotch border. Carlisle and Workington are the only mun. bors. With the exception of Alston Moor, Garrigill, and Nenthead eccles. pars., which belong to the diocese of Newcastle, the whole county is in the diocese of Carlisle. See **England,** table, and **Cumbria.**

Cumbre, Spanish, 'summit' (Lat. *cumulus*).

Cumbres Mayores, comm., Spain, prov. Huelva, dist. Aracena. P. <4000.

Cumbria, an ancient British principality in the W. of Great Britain, stretching from the Clyde to the Dee. Its S. portion was conquered by Æthelfrith of Northumbria early in the seventh century, and in the latter half of the same century Ægfrith extended the sway of the Northumbrian kings to the Solway. The remainder was conquered by Eadmund of England, and by him given, early in the 11th century, to Malcolm, Prince of Scotland, to be held as a fief of the crown of England. Its name is preserved not only in that of Cumberland, but in the islands of Cumbrae, and in many places in Clydesdale.

Cumbrian Mountains, a range of hills, Eng., occupying part of the cos. Cumberland, Westmorland, and Lancashire, extending from Fell Top in Cumberland to near Ulverston in Lancashire, 37 m. N. to S., and 35 m. E. to W., embracing the 'Lake district,' and separated from the Pennine chain by the valleys of the Lune and Eden and the pass across Shap Fell, by which the main line of the L. & NW. R. passes from the one to the other of these valleys. Highest peaks all in Cumberland (*q.v.*). Granite, limestone, and slate are found in the mountains.

Cumbum, tn., Brit. India, Madras, dist. Karnúl, 100 m. NW. by N. Nellore, in 15° 34′ N., 79° 9′ E., with irrigation tank 15 sq. m. in area, formed by damming the Gundlakamma R. P. (1881) 7200; (1891) 5700; Hindus, 3400; Moham. 2300.

Custozza, vil., Italy, prov. and 10 m. SW. Verona. Battles were fought here in 1848, when the Austrians defeated the Piedmontese, and June 24, 1866, the anniversary of Solferino, in which the Austrians under Archduke Albert defeated the Italians under King Victor Emmanuel.

Cüstrin, tn., Ger. See **Küstrin.**

Cutch (*Kachchh,* 'the sea-coast land'), native state, Bombay, Gujarát, occupying the penin. between the Rann of C. and the Gulf of Cambay. On the whole treeless, barren, and rocky, but varied by well-tilled valleys. On the S., behind a high bank of sand that lines the sea-coast, lies a low, fertile, and well-cultivated plain, from 20 to 30 m. broad.

Cutch, Rann of, a highly peculiar feature of the physical geography of India. It is at one time water, at another time land—a hard, stony, salt-incrusted waste, roamed over by herds of wild asses and antelopes, which feed on the grasses on its borders, and on patches that remain as islands during the period of submergence. It is divided into the **Great Rann,** on the N. of the penin. of Cutch, and the **Eastern Rann,** on the E. of that penin. The Great Rann is filled during the rainy season partly by river-water and partly by sea-water, which enters chiefly by an inlet (Kori) on the W. of the penin. The Eastern Rann is filled by the rise of the Gulf of Cutch, even before the rains, and at high-water it can be entered by small craft. By October it is capable of being crossed on foot.

Cutchogue, vil., U.S., New York, Suffolk co., on Long I., 83 m. E. by N. Brooklyn. P.<1500.

Cypress Hill, U.S., New York, King's co., an E. suburb of Brooklyn. Known for its cemetery.

Cypress Lake, Canada, about 9 m. long, stretching along the S. base of the C. Hills, Assiniboia, crossed by 109½° W. and 49° 25′ N., drained E. by the White Mud R.

Cypress Lake, Canada, Quebec, co. Joliette, in 46½° N. and 74° 10′ W., drained N. into R. Mattawiti.

Cyprus, vil., Canada, Ontario, Parry Sound dist., 80 m. NE. by N. Collingwood, on the N. and Pacific Junc. Rly. P. <1500.

Cyprus, Turkish **Kipris,** the third largest island in the Mediterranean, in the Levant, between 34° 33′ and 35° 41° N. lat., and 32° 15′ and 34° 36′ E. long., about 50 m. from the Syrian coast, and 40 m. from Asia Minor. Extreme length, about 140 m.; breadth, 40 to 50 m. It is divided into six dists., Nicosia, Larnaca, Limasol, Famagusta, Papho, Kyrenia. The island is traversed by two parallel chains of mountains, one in the N., the other in the S.; the former extends as a single chain at a distance of about 2 m. along the whole of the N. ct. The W. div., called the Kyrenia Range, is the loftier; highest point, Buffavento, 3140 ft.; the E. div. comprises the low Karpas Range. The S. mountains are loftier (Troodos, 6406 ft.), and with numerous spurs N. and S., cover about one-third of the island in the SW. Between these two ranges, between the bays of Morfu (Morphou) and Famagusta, stretches the wide and exceedingly fertile plain of the **Mesaorea,** above the general surface of which rise numerous flat-topped rock plateaux, 100 to 200 ft. in height. The principal rivers are the Pediæus and the Idalia, flowing N. and then E. through the central plain, and the Sarákhis in the NW. These rivers, as well as numerous channels descending from the mountains, are torrents after rain; at other times the beds are usually dry. Archæan rocks form the mass of the S. mountains, Pliocene deposits in the great plain alternate with Calcareous rocks, which are elsewhere widely distributed, and Eocene formations occur in various parts of the N. The **climate** is of the Mediterranean type [**Europe, Nicosia, Larnaca, Famagusta, Kyrenia**]. The climate is healthy on the whole, but fevers are prevalent during the warm season amongst the natives in the low dists. The British troops suffered indeed greatly from fever in 1878, immediately after

the occupation of the island, but subsequent experience has not been unfavourable. Irrigation is chiefly effected by wells; an irrigation canal connected with the Pediæus has been restored, but a more complete system is required. The principal objects of culture are cereals (wheat, barley, vetches, and oats), cotton, carobs, olives, and the vine. The area under the last exceeds 500 acres, yielding annually about 2,000,000 gallons of wine; excepting the famous 'Commanderia,' it is, however, generally of inferior quality, owing to defective methods of preparation. Excellent silk is produced in the Paphos dist. **Forests** cover about 400 sq. m., chiefly in the mountains W. of Troodos; the Aleppo pine predominates. Forests were formerly of great extent, and yielded wood highly valued by the ancients for shipbuilding. Deforesting in modern times, due, amongst other causes, to the goats with which the island is overrun, has greatly diminished its productiveness. The increase of locusts, causing great devastation, has also been promoted by deforesting, though under British administration effective measures are being taken to destroy the locusts and to preserve the forests. There are few wild animals; the mouffion or wild sheep. C. was in ancient times famous for its copper mines, but these are no longer worked. Gypsum and 'terra umbra' are now the chief minerals obtained. Salt occurs as an incrustation in lakes in the Larnaca and Limasol dists. The sponge fisheries off the coast form an important industry. The principal exports are wheat, barley, carobs, wine, cotton, raisins, silk. There are no railways or canals, but some progress has been made in the construction of roads between important centres. Besides English coins, the Turkish 'lira' and the French 20-franc piece are legal tender, as is also the local bronze piastre (9 = 1s.). Turkish weights and measures are current. The chief towns are Nicosia, the cap., and only important inland town, and the ports of Larnaca, Limasol, Famagusta, Kyrenia, and Paphos. About 23 per cent. of the inhabitants are Moslems, the rest principally Christians of the Greek Church, the archbishop of which is independent of any other ecclesiastical authority. Originally peopled by the Kittim and Dodanim of the Old Testament, C. was colonised by the Phœnicians about 2000 B.C.; subsequently it fell under the dominion of various powers—Egypt, Assyria, Persia, Greece; after the death of Alexander the Great it again fell to Egypt, and in 58 B.C. became a Roman prov. In 1191 Richard I. conquered the island, and gave it to Guy de Lusignan, in whose family it remained till 1473, when it passed to the Venetians; about a century later it was conquered by the Turks. By the treaty of Berlin, 1878, it was placed under British administration, the British paying £92,800 annually to the Sublime Porte, which still nominally exercises dominion over the island. The administration is vested in a High Commissioner. There are many interesting archæological remains. Area, 3584 sq. m. P. (1891) 209,286. See **Larnaca.** [**E. J. H.**]

Dämme-vand. See **Dämme-vand.**

Daer Water, riv., Scot., principal headstream of the Clyde, rises in extreme S. of Lanarkshire, flows 10½ m. N., and unites with the Powtrail Water about 3 m. S. Elvanfoot.

Daet, tn., Philippine Is., Luzon I., cap. prov. N. Camarinas, 140 m. SE. Manila, on a small coast river with a bar at its mouth. P. (1887) 8000.

Dafar, Arabia. See **Dhafar.**

Dafen, eccles. par., Wales, Carmarthenshire, 2 m. SE. Llanelly, PM.O.; tin works. P.<4500.

Daga, river arm, Lower Burma, leaves the Bassein R. a few miles below the point where that river branches off from the Irráwadi, and rejoins it a few miles above Bassein, in 16° 55′ N. Practicable all the year round for native craft up to Kyún-pyaw.

Dagana, or **Daghana,** tn., W. Africa, on the l. bk. of the Senegal, 84 m. NE. St. Louis by the direct route; a French trading station and military post. Unhealthy. P. (1872)<3000.

Dagelet, or **Matsushima,** small wooded Japanese isl., in the Sea of Japan, in 37° 25′ N., and 130° 56′ E. Discovered by La Perouse in 1787.

Dagenham, par., Eng., Essex, div. and 2½ m. S. by W. Romford, on the London, Tilbury, and Southend Rly., PM.O. D. Level, a tract on the Thames to the S. of the village, having been flooded by the Thames, was drained and protected by an embankment by Perry in 1715–19. PMT.O. 6556 ac. P.<4500.

Dagerort, Finnish **Kallaniuna,** cape, Russia, on southern extremity of Dagö I., on limit between Gulf of Finland and Baltic Sea, 58° 55′ N., 21° 53′ E.

Daggens Road, stn., Eng., Dorset, on the L. & SW. R., 2 m. SW. Fordingbridge.

Dagh, tagh, Turkish, 'mountain.'

Daghana, tn., W. Africa. See **Dagana.**

Daghestan, Russian prov. (*oblast*) of Caucasia, on the NE. slope of the main ridge, having Terek in the N., Tiflis in the SW., Baku in the SE., and Caspian Sea in the NE. With the exception of a small part in the N., and a narrow strip along the Caspian shore, it is entirely occupied by the spurs and the plateaux of the Caucasus, intersected by the deep gorges of the four Koisu Rivs. (Avarian, Andian, Kazy-kumukh, and Kara Koisu), which unite to make the Sulak, and the Samur with its tribs. in the S. The littoral region has a warm climate, suitable for vineyards, almond, peach, and apricot trees, as well as for the culture of rice, Indian corn, and wheat. The slopes of the mountains are chiefly given to the culture of wheat; while the plateaux have a cold climate, with a very short summer, which only permits the culture of barley (highest inhabited spot, at Kurush, 8175 ft.). Forests are relatively scarce. No more than 400,000 ac. are under culture. Cattle breeding important source of income (45,000 horses, 1,500,000 sheep; buffaloes, donkeys, and goats extensively kept). Rich in various minerals, but only sulphur extracted at Chirkat, and some salt. Various domestic trades in the mountain villages. The population, which has long resisted against Russian conquest, is usually known under the name of **Lezghians,** who are divided into above fifty tribes, and speak the Avarian language in the W., and the Dargo and Kurin languages in the E., Kumyk Tartars in the N. The only towns are Temir-khan-shura (cap. of the prov.), Derbent, and Petrovsk. The prov. is divided into nine dists.: Temir-khan-shura, Avarian, Andian, Gunib, Dargo, Kazy-kumukh, Kaitago-Tabasaran, Kyurinsk, and Samur. Area, 11,492 sq. m. P. 590,400 (18,000 only in towns).

Daglingworth, par., Eng., Gloucestershire, div. and 2½ m. NW. Cirencester, P.O. P.<500.

Dagnall, eccles. par. and hamlet, Eng., Buckinghamshire, Aylesbury div., 7 m. WSW. Luton, 3½ m. NE. Tring stn., P.O. See **Edlesborough.**

Dagö (Dagden, Esthonian **Gio-ma),** isl., Russia, govt. Esthonia, in the Baltic Sea, near the entrance of the Gulf of Finland, separated from the isl. Oesel in the S. by Dagden Sund. Length, 34 m.; breadth, 15 m. Poor marshy soil; coasts rocky. P. about 12,000.

Dagomba, dist., W. Africa, in about 9½°–10° N., 0°–0° 40′ W.

Dagore'ti, abandoned stn. of the Brit. E. African Association, about 290 m. NW. Mombasa, in the Kikuyu country.

Dagsburg, French **Dabo,** comm., Ger., Alsace-Lorraine, 21 m. W. by N. Strassburg. P.<3000.

Dagshái, hill cantonment, India, 15 m. (42 m. by road) SW. by S. Simla. P.<4000.

Dagupan, terminus of a railway line running N. (for 120 m.) from Manila, Luzon I., Philippines.

Dagwomba, or **Dagwumba,** Negro kingdom, W. Africa, to the NE. of Ashanti and NW. of Dahome; cap. Yandi.

Dahme, riv., Prussia, Brandenburg, flows N. then NW. into the Spree, which it enters at Köpenick, 9 m. above Berlin, canalised for 21 m. up, and connected by a canal and navigable lakes with Teupitz, and this canal it is now proposed to continue southwards till it joins the Elbe a few miles below Meissen (**Elbe-Spree Canal**). See also **Notte Canal** and **Storkower Canal.**

Dahme, tn., Ger., Prussia, prov. Brandenburg, circle Jüterbog-Luckenwalde, 39 m. SSE. Potsdam. P. 5100.

Dahmer, Nubia. See **Ed Dahmer.**

Dahna, or **Dahana,** the great desert in the S. of Arabia.

Dahome, or **Dahomey,** a W. African negro state, in the rear of the slave coast. The country consists of undulating plains and plateaux, partly covered by extensive tropical forests. It is an agricultural country, maize, bananas, ground-nuts, sugar-cane, coffee, and cotton being the chief products. The principal exports are palm-oil (steadily increasing) and gold dust. The slave trade, which was in former times one of the most flourishing export trades of D., has now been completely suppressed. D. has an evil reputation on account of the human sacrifices which are annually offered in large numbers to the fetishes and to the King of D. The government is despotic. The king maintains a strong army, part of which are women. D. now belongs to the French sphere of influence, and it is hoped that by the recent occupation by the French the country will be raised from its present state of barbarism. The chief town is Abome; Whyda, on the coast, is of importance on account of its harbour. Area about 3900 sq. m. P. estimated at 200,000. [**H. G. S.**]

Dahouet, small port and fishing vil., France, dep. Côtes du Nord, on the bay of St. Brieuc; tidal harbour, 17½ ft. deep at high water; improvements projected.

Dahra, region, Algeria.

Dahshur, vil., Egypt, 18 m. S. by W. Cairo.

Daka, or **Guaka,** vil., Brit. S. Africa, 160 m. NW. Buluwayo.

Dakar, seapt., French W. Africa, Senegambia, with magnificent harbour opposite Goree I., sheltered by Cape Verde, connected by rail with St. Louis (163 m.). D. itself is fairly healthy, but at Hann, a short distance N., is a plantation cultivated by convict labour, where the soil is marshy and the climate malarious. P. 8700.

Dake, Japanese, 'peak,' 'mountain.'

Dakhara, vil., W. Africa, Upper Guinea, in about 8° 15′ N., 3° 32′ W.

Dakhel, or **Dakhleh, El,** the W. oasis of Upper Egypt, 50 m. W. the oasis El Khargeh, in about 25° 30′ N., and 29° E. Length, 28 m. by 15 m.; it contains the small towns El Kasr and Kalamun. The soil is fertile, yielding dates, olives, &c.; with a warm sulphur-spring.

Dakka, tn., Persia, on the Caspian Sea, 30 m. E. by N. Resht.

Dakkeh, the ancient *Pselchis,* vil., Lower Nubia, on the l. bk. of the Nile, about 71 m. above Assuan, with a fairly well-preserved temple of the time of Ptolemy Philadelphus.

Daklet, tn., Egypt, 27 m. N. Tanta.

Dakor, tn., Brit. India, Bombay, dist. Káira, 33 m. N. Baroda. P. (1881) 7800; (1891) 9500; Hindus, 9000.

Dakota, North and **South (Dahkotah, Dacoutah,** a native Sioux name meaning 'allied'), two of the U.S., with an area about 1½ times that of Great Britain. North D. on the Canadian frontier, its E. boundary formed mainly by the Red R. of the N. The surface consists mainly of vast rolling prairies and undulating plateaux, becoming more rugged in the W., where are numerous scattered 'buttes,' and rising in the forest-covered Black Hills of the SW. to an average height of 5000 ft; highest point, Harney's Peak, 7368 ft. In the E. is the plateau 'Coteau des Prairies,' 1000 to 2000 ft.; and between the James and Missouri Rivs., the 'Coteau du Missouri,' a grassy, almost treeless plain, which stretches S. from Manitoba, covering an area of about 30,000 sq. m. In the W. and SW. the 'Bad Lands,' so named because of the difficulty of traversing them, extend along the Little Missouri and White Rivs. Here numerous 'buttes,' worn into fantastic forms, rise from the broken grassy surface. With the exception of the Red R. and its tribs., all the rivers belong to the basin of the Missouri. As regards geological structure, Cretaceous rocks predominate; in the SW., Archæan rocks form the core of the Black Hills, flanked by Permo-Carboniferous and Mesozoic rocks; in the S., Tertiary deposits extend in from Nebraska. The surface soil is generally a rich black loam. The climate is one of extremes, but the winter temperature is sometimes modified by the 'Chinook' winds. Terrific 'blizzards' sometimes occur in the N. The rainfall, which averages over 20 inches, is greatest in the S. and W.; it falls chiefly in spring and summer. [North D.—**Bismarck, Fort Buford, St. Vincent, Pembina;** South D.—**Deadwood, Fort Sully, Yankton.**] Agriculture forms the principal industry. Wheat grows in perfection in North D., above all in the Red R. valley, and maize in South D.; flax, cultivated only for the seed, forms an important crop in South D. The production of wheat, the finest in the U.S., has risen from less than 3,000,000 bushels in 1880 to over 60,000,000 bushels in 1890. The scarcity of trees is being remedied by systematic planting. Irrigation from artesian wells is in extensive operation in the James valley (l. bk. trib. Missouri). The Black Hills, of which Deadwood is the mining centre, are exceedingly rich in minerals, including gold, tin, nickel, and silver; coal (lignite) is widely distributed, the principal workings being in Morton and Stark cos. in the SW., and Ward co. in the N. central. Large tracts in the W. and S. were reserved for the Indians, chief of whom were the Sioux, but these reservations are being gradually acquired by the U.S. government and thrown open to settlement. **N. Dakota,** area 70,795 sq. m., P. 182,700; **S. Dakota,** area 77,650 sq. m., P. 328,800. See **United States,** table. [**E. J. H.**]

Dalmatia, the most southern of the Cis-Leithan provs. of Austria-Hungary, consists of a narrow strip of country between the Adriatic on the one side, and Croatia, Bosnia, Herzegovina, and Montenegro on the other. Geographically and ethnographically it belongs to the Balkan penin. For the orographical and hydrographical features of D., see **Karst.** The chief rivers are Zermanya, Kerka, Cettina, and Narenta, the courses of which are in part subterranean. The coast-line of D. consists of many penins., islands, and sunken rocks, interrupted by a series of gulfs and bays. There is no doubt that the islands were formerly part of the mainland, from which they have been separated by long-continued erosion. Moreover, there is evidence of local upheaval of the country. The most remarkable of the bays of D. is that called Bocche di Cattaro (*q.v.*). Extensive forests formerly covered large tracts of the islands and of the mainland, but they have long since disappeared, and the bold contours of the barren rocks now form the characteristic features of the coast-line. The climate on the whole resembles that of Italy, but the mountain regions, where the snow sometimes continues till May, are much colder. Agriculture is of little importance, except in the vicinity of some of the towns. The rearing of cattle is likewise limited. The inhabitants are Slavs and Italians, and are excellent seamen. On the whole the pop. is thin. Towns of importance are Zara (cap. of D.), Sebenico, Spalato, Ragusa, Cattaro. D., in spite of its natural resources and its splendid geographical position, is at present in a state of decline, but it is hoped that the Austrian annexation of Bosnia will greatly favour its improvement and development. Damar, Pulu, isl., Java. See **Edam.**

Damara-land, a country of SW. Africa, forming part of the German possessions there. It is bordered N. by the Ovambo country, S. by Great Namaland, W. by the Atlantic, and E. by the Kalahari desert; the limits are, however, very uncertain, especially towards the Kalahari. D. is a mountainous and hilly country, Palæozoic rocks (gneiss and crystalline schists) and sandstones (table mountains) being prevalent. The highest summits are the Omatako (7500 ft.), Otyhivero (7200 ft.), and Awas (7000 ft.) mountains. The mountains contain copper, especially at Matchless and Otavi, but owing to the absence of coal and the difficulties of transport the copper mines have not yet been worked at a profit. Traces of gold have been found on the Tsoachaub and Kuisip rivers, but not in workable quantities. All rivers of D. are periodic, the deeply cut river-beds having, however, in most cases, underground water-supplies. The most important rivers are the Kuisip, Tsoachaub, and Omaruru. The country is inhabited by a Bantu tribe, the Ovaherero, whom the Hottentots call Damaras, whence the country derives its name. Their chief occupation is cattle-rearing, D. being well adapted for pastoral pursuits. D. is but thinly peopled; the principal places are Omaruru, Okahandya, and Otyimbingue, the last being the trading centre of the country and the seat of the German officials. Dispersed among the Ovaherero lives an interesting race, the Hill-Damaras, or Haukoin, who are the parias of the country. Their origin is quite uncertain; they speak the Hottentot language, but differ from Hottentots and Bantus. The whole coast-line W. of D. has but one good harbour, the Walvishbay (Brit.). P. estimated at 130,000. [**H. G. S.**]

Damaran, isl., Eastern Archipelago, to the E. of Paláwan, in 10° 45′ N., 120° 5′ E.; 45 m. in circumference.

Damariscotta, tn., U.S., Maine, Lincoln co., 25 m. SE. by S. Augusta, on the E. side of the inlet known as **Damariscotta R.,** which is navigable for vessels of any size 16 m. up. P. <1500.

Damarsara, vil., Malay Penin., in the Brit. protectorate of Selangor, on the R. Klang, at the head of navigation for steam launches.

Damascus (said to be derived from a Hebrew root meaning 'activity'), called in Arab writings **Dimeshk,** but known to the people only as **Esh-Shâm,** a city of Syria, and the cap. of the pashalik, situated on a vast plain of extreme fertility to the E. of the chain of Anti-Lebanon, and on the edge of the desert. Lat. (of Great Mosque) 33° 30′ 30″ N., long. 36° 18′ 24″ E. It is watered by the Barada (*Abana*) (*q.v.*), which sends off numerous branches to irrigate the meadows, corn-fields, and orchards. Its numerous mosques, surmounted by golden crescents, and its many tall white minarets, show to great advantage against the deep green foliage. Inside the walls, which comprise massive remains of Roman and Saracenic masonry, the streets are narrow, crooked, and unpaved. The most conspicuous objects are the Great Mosque, a magnificent building of Christian origin, with a dome 120 ft. in height, three minarets, one of which is 250 ft. high; the Great Khan, Greek cathedral and churches, and Armenian convent. The 'street called straight,' 1 m. in length, runs through the city

from E. to W.; at its E. end is an ancient gateway, W. and N. of which is the Christian quarter. The Jews' quarter is in the S., and the Turkish round the old castle in the NW. In the SW. is the large suburb of Meidan, in which is 'the Gate of God,' whence the pilgrim caravan passes on its way to Mecca. Outside the walls, on the SE., is the English cemetery, with the tomb of Arnold Broomfield and the grave of Mr. Buckle, the historian. From the great abundance of pure running water, the streets are much more cleanly than those of other Eastern towns. Climate healthy, though intermittent fever prevails from August till the cold season. Cotton, wool, and silk-weaving by hand are largely carried on. Metal-working and mother-of-pearl inlaid work are also important industries. The chief imports are Manchester cottons, petroleum from Batum, rice, sugar, and hardware; principal exports, grain and flour, fruit (above all, apricots), wool, and hemp. Its trade with the W. is much facilitated by the road to Beirut (*q.v.*), opened in 1863. Railways connecting the city with Beirut and Haifa are now projected, and a railway to Mezerib (70 m. distant), in the rich wheat-growing dist. of the Hauran, to the S. of D., is completed (1894). A carriage road to Homs has also been undertaken. According to Josephus, D. was founded by Uz, son of Aram, and grandson of Shem. It is first mentioned in Scripture as the residence of Eliezer, the steward of Abraham; and it has retained its perennial vigour while generations of cities have fallen into decay. A Protestant mission was established in 1848, and is carried on with great zeal by the Presbyterian Church of Ireland, and by that of the United States of N. America. D. suffered severely during the massacre of the Christians by the Druses in 1860. Alt. 2265 ft. Mean temp. (1 yr.), yr. 64° F., Jan. 45.5°, July 80.8°. Pop. estimated in 1891 at 210,000, of whom about 180,000 were Mohammedans, the remainder principally Christians and Jews, the Christians mostly of the orthodox Greek Church, but including also Maronites, Greek Catholics, Armenians, &c.

Danube, German **Donau,** next to the Volga the largest river of Europe. The D. takes its rise on the E. slopes of the Black Forest. It is formed by two small rivers, the Brege and Brigach, which unite at Donaueschingen. From there the river flows in a NE. direction through Hohenzollern and Würtemberg to Ratisbon (Regensburg), but there it changes its direction to ESE. on account of the Bohemian and Bavarian Forest Mts. Below Vienna, the D. enters the vast plains of Hungary, and having passed the 'Porta Hungarica,' formed by offshoots of the Alps and Carpathians, near Pressburg, it divides into numerous arms, forming many islands, the so-called Schütt extending as far as Komorn. A little E. of that town, near Waitzen, the river bends to the S., keeping this direction till it is joined by the Drave. Then it resumes its easterly course, and passing Neusatz, Belgrade, and Orsova, enters the Walachian plains. Below Báziás, it is hemmed in by the offshoots of the Transylvanian Mts. on the left, and the Servian highlands on the right. This part of the river, called Klisura, a defile, extending for about 80 m. to Orsova, near the Roumanian frontier, where the bed of the stream is largely composed of granite and crystalline schists, is full of cataracts and rapids, the most important being those of the 'Iron Gate,' just above Orsova, where the river gets narrowed to two-thirds of its previous width, and a shelf of rock succeeded by a jagged reef with teeth rising above the surface of the river compels most of the water to rush through a narrow channel (only 360 ft. wide) on the l. bk. From Orsova to Galatz the D. makes a great bend to the S., and from the latter town it flows again in an easterly direction. Between the D. and the Black Sea extend the steppes of the Dobruja. The river then forms a delta, reaching the Black Sea in various arms, the principal ones of which are the Kilia, Sulina, and St. George's mouth, the second being the most important for navigation. The total length of the D. is 1800 m., and its river system comprises 315,000 sq. m. The D. has many important tributaries. In its upper course the majority of them originate in the Alps, the principal one

being the Inn, which has until recently been regarded as even larger than the Upper D. But, according to Penck's most recent investigations, this is not the case, inasmuch as the D., near Passau, carries more water (25,780 cubic ft. per second) than the Inn (24,230 cubic ft. per second). In the middle course of the D., the most important affluents on the right are the Drave, Save, and Morava; and on the left, its largest trib., the Theiss (Tisza), which has innumerable windings. In its lower course, the D. is principally fed from the left, where the Schyl (or Syll), Aluta, Arjish, Sereth, and Pruth join the river. The D. and its tribs. abound in fish. The D. becomes navigable at Ulm. The principal company is the Danube Steam Navigation Company. There are measurements of the discharge of the D. in the region of its mouths for the period 1862–71. The average is about 205,900 cubic ft. per second, but the discharge in dry years is only one-third of the amount in wet years. Alt. of zero of river-gauge at Orsova, 142 ft.; of river-surface at Belgrade 220 ft., at Budapest 340 ft., at Pressburg 430 ft., at Vienna 500 ft., at Passau 940 ft. The D. is navigable for barges and small steamers to Ulm in Würtemberg, on the Bavarian frontier, and for ordinary river-steamers to Ratisbon. The Klisura is navigable only for vessels of 6 ft. draught or less, and even for these the navigation season lasts only from March to November inclusive, and sometimes a large number of the Danube Steam Navigation Company's steamers are compelled to lie idle from July to March. Before the introduction of steam (the first steamer passed the Iron Gate in 1846), very few vessels ventured to cross this barrier at all. In September 1890 works for making the river constantly navigable over this stretch were begun by the Austro-Hungarian government. (See *Geog. Jour.*, I., pp. 243–5, and Kanitz in *Mitteil. der k. k. Geog. Gesellschaft zu Wien*, 1874, pp. 49–58.) For sea-going vessels, which have ascended as high as Radujevac, the easternmost river-port of Servia, freedom of navigation is upheld by international treaty. On the Lower D. great improvements have been effected by a European commission, appointed in terms of the Treaty of Paris in 1856. The Sulina mouth of the river has been straightened and deepened to such an extent that even in years of very low water there is always a depth of at least 15½ ft. in the main channel as high as Braila. Much dredging is required to maintain this depth, for the swift and turbid rivers that flow into it from the N., especially the Sereth and Pruth, sometimes form large shoals in it with great rapidity. Rectifications of the course of the D. have also been made near Vienna (*'Die grosse Donauregulirung,'* 1868–71), at Budapest, and various other places. [**H. G. S.**]

Danube Circle, Ger. *Donau-Kreis*, the south-eastern of the four 'circles' of Würtemberg (*q.v.*).

Danzig (meaning of the name unknown, probably derived from the Slavonic Gyddanizc), fortified city and seapt., Prussia. It is situated in the delta and near the mouth of the Vistula, and traversed by the Mottlau (made navigable by artificial means). The mouth of the Vistula, which was formerly below D. at Weichselmünde and Neufahrwasser, is now above D. at Neufähr, where the river opened a new mouth in 1840. D. is the centre of export for the products of the Vistula terr., the most important being corn and timber. Its export trade is, however, no more of the same importance as it used to be in former times. On the other hand, its manufactories are increasing from year to year, the most important being woollen and paper mills, chemical works, machine shops, distilleries, and shipbuilding yards. The port is at present 22 ft. deep as far as the Royal Dockyard at Holm, but great improvements are now (1893) contemplated. It has an imperial floating dock, 15 ft. deep on sill, and a dry dock. D. is a very old town, and was already of importance during the early part of the middle ages. It joined the Hansa in 1350, and in the 15th century it flourished to such a degree that it was rightly called 'Northern Venice.' But in consequence of various sieges it rapidly declined, and it is only in our century that it has regained its importance. In appearance it is a quaint old town, many of its buildings being centuries old. Mean temp., yr. 44.9° F., Jan. 27.6°, July 63.8°; mean rfall. (16 yrs.), 18.7 in. P. (1816) 51,000; (1850) 70,000; (1870) 90,000; (1890) 120,338. [**H. G. S.**]

Darfield, post-tn., New Zealand, Selwyn co., 30 m. from Christchurch. P.<1500.

Dar Fur, or **Dar For** (country of the Fur), a country of the E. Sudan, situated between 9° and 16° N. lat. and 22° and 29° E. long. It is a mountainous country, having a mean elevation of about 2000 ft. The highest of its mountain ranges, the Jebel Marrah (6000 ft.), is the orographical centre of the eastern Sudan, forming the watershed between the Nile and the large basin of the central Sudan regions. The Jebel Marrah, as well as the other mountains of importance, the Jebel Tagabo and Jebel Medob (both about 3500 ft.) are of volcanic origin. D. F. is inhabited by two different races, the Arabs and the Fur. The Arabs, who are the dominant race, came into the country several centuries ago. They follow pastoral pursuits, and chiefly occupy the N. and E. dists. of D. F. The Fur, a numerous negro tribe (2 or 2½ millions of people), are the original population of the country. They inhabit the mountains and the southern dists., agriculture being their principal occupation. All the inhabitants are Mohammedans. D. F. was an independent sultanate till 1874, but in this year its army was defeated by the hordes of Zebehr Pasha, whereupon the country came into the possession of the Egyptians, who lost it, however, a few years afterwards, by the Mahdi rebellion. At present it is almost independent again, although nominally belonging to the Mahdi's possessions. The cap. of D. F. is El-Fasher or Tendelti, situated E. of the Jebel Marrah, in the Wadi El-Fasher. It is described by Nachtigal as a lovely town, forming a striking contrast to the dreary hills which surround it. During the Egyptian occupation it was proposed to construct a railway from Dongola on the Nile to El-Fasher, but the Mahdi rebellion put a stop to this enterprise. Other places to be mentioned are Kobeh (W. of El-Fasher), Turah (on the Jebel Marrah), and Hofrah-en-Nahas (in the S.), where copper is found. Trade is at present entirely at a standstill on account of the political disturbances; before the Mahdi rebellion, the principal exports used to be ivory and slaves. Area, 170,000 sq. m. P. estimated at 4,000,000. [**H. G. S.**]

Darley Abbey, eccles. par., Eng., Derbyshire, Derby St. Alkmund par., 2 m. from Derby, PM.O. P.<1000.

Darling, riv., Australia, the longest trib. to the Murray, rises under the name of the **Macintyre** in New South Wales, near 30° S., 151° 30′ E. It flows NW. for 130 m., W. for over 200 m., forming the northern boundary of the colony, then SW., becoming known as the **Barwon** about the place where it re-enters New South Wales, and continues its SW. course for 700 m. to its confluence with the Murray at Wentworth, in 34° 8′ S., 141° 56′ E. It receives on its right the Dumaresq, Moonie, Culgoa, and Warrego; on its left the Gwydyr, Macquarie, and Bogan. Navigable by shallow-draught steamers in high-water to Bourke (terminus of the Great Western Rly. from Sydney), but in summer reduced in many parts of its course to a chain of small lakes. The entire length of river 1160 m. Area of basin, 198,000 sq. m.

Darling, vil., Cape Colony, dist. Malmesbury, 38 m. N. Cape Town. P.<1500.

Darling, co., New South Wales, crossed by 30½° S., and in the E. by 151° E.

Darling Downs, a squatting dist. of Queensland, Australia, between 27° and 28° 15′ S., between river of same name and the Condamine. A fine grazing dist., embracing several counties.

Darlingford, rly. stn., Canada, Manitoba, on a branch of the C. P. R., 96 m. S. Winnipeg.

Darlingford, post-tp., Victoria, Wonnangatta co., 70 m. NE. by E. Melbourne. P.<1500.

Darling Range, a range of mts. in the S. of W. Australia, running N. to S. parallel to the coast, at the distance of 20–70 m.

Darlingscott, hamlet, Eng., Worcestershire, Evesham div., 8 m. S. by E. Stratford on Avon, 5½ m. ENE., Campden stn., P.O.

Darlington, parl. bor. (1 member), and mun. bor. (since 1867), market-tn., and par., Eng., in the SE. div. of Durham, 238 m. from London, 18 m. S. from Durham, on the Skerne, 1 m. from the Tees, which forms the county boundary. There are two lines of railway communication, one by the Stockton and Darlington section, opened in 1825, and the first public railway in the kingdom, the other by the main line of the NE. R. (stns. **D.** and **North Road**). The first locomotive engine and tender used on a public railway, and built by George Stephenson, now stand on a pedestal in the Central railway station. A hundred years ago the water-power of the Skerne was employed in driving corn, linen, and other mills; at present the principal manufactures are iron and worsted, with extensive locomotive works belonging to the NE. R. The parish church was founded in 1160, and restored in 1865; there are six other churches of recent date. Principal market, Monday, a market for the sale of butter, eggs, poultry and hay on Friday; and a general market, Saturday evening. Par. P. 35,900; tn. P. (1801) <5000; (1851) 11,200; parl. and mun. bor. P. (1871) 30,300; (1891) 38,100.

Darlington, suburb of Sydney, New South Wales, Cumberland co. P. <3500.

Darlington, tn., U.S., S. Carolina, D. co., 69 m. ENE. Columbia. P. <3000.

Darror, valley, E. Africa, Somali-land, stretching E. and W., in 10½° N., between the mountain range of Karkar (terminating in Ras Hafun) on the S., and that of Almaskat on the N.

Darros, isl., one of the Amirante group, Indian Ocean.

Darrynane, electoral div., Ire., co. Kerry, Cahersiveen union.

Darsham (dar'sam), par., Eng., Suffolk, Eye div., 22 m. NE. by E. Ipswich, on the G. E. R., PMT.O. P. <500.

Darslub Forst, large forest in the extreme N. of the Prussian prov. of W. Prussia.

Darss, penin., in the extreme NW. of the Prussian prov. of Pomerania, having a cape called the Darsser-Ort at its N. end, with a lighthouse, visible 16 m.

Dart, riv., Eng., in the S. of Devonshire. It has two headwaters, one rising in the S. of Dartmoor Forest, the other (the E. Dart) on Cut Hill, in the NE. of Dartmoor Forest. After their union, the river flows SE. past Totnes to the English Channel, which it enters by a deep estuary. See **Dartmouth.**

Dart, Little, riv., Eng., in the N. of Devonshire, trib. of the R. Tawe, which it joins on the r. bk., about 2 m. W. Chulmleigh.

Dartford, vil., Canada, Ontario, co. Northumberland, 18 m. from Colborne. P. <1500.

Dartford, market-tn. and par., Eng., co. Kent, D. div., on the navigable Darenth, with a stn. on the SE. R., 14 m. ESE. London Bridge, and 6½ m. W. Gravesend. It has powder, paper, corn, and flour mills, calico and silk printing works, tanneries, leather-works, cartridge works, &c.; also the pharmaceutical laboratories of Messrs. Burroughs, Wellcome & Co., the original makers of the well-known tabloids of compressed drugs. One of the first paper-mills in England was built here in 1588 by a German named Spielmann. Wat Tyler's insurrection commenced at D. in 1377. Market-day, S. 4251 ac. P. (1801) <3000; (1871) 8300; (1891) 12,000.

Dartington, par., Eng., Devonshire, Totnes div., 8 m. W. by S. Torquay, 1 m. SE. Staverton stn. P. <750.

Dartmoor, elevated tract, Eng., Devonshire (*q.v.*). On it is a meteorological station, Lee Moor, in 50° 27° N., 4° 1′ W. Alt. 860 ft. Mean rfall. (1866–80), 70 in.

Dartmouth, seapt., Canada, Nova Scotia, Halifax co., on Halifax Harb., opposite Halifax. P. (1881) 3800; (1891) 6200.

Dartmouth, seapt., Canada, Prince Edward I., Princes co., on Richmond Bay.

Dartmouth, an old mun. bor. (till 1868 also a parliamentary bor.), seapt. of importance in early English history, and par., Eng., Devonshire, Torquay div., in Exeter diocese, at the mouth of the Dart, on the r. bk., 8 m. SSW. Torquay, connected with S. Devonshire Rly. by steam ferry to Kingswear, on the E. side of the Dart. At one time the Newfoundland fishery formed the staple commerce of the town, near which Sir Humphrey Gilbert, who took possession of Newfoundland for Queen Elizabeth, was born; now the trade is confined to coasting, but D. is the principal coaling station on the English Channel. The Dart, which forms the harbour, a secure refuge for ships, is defended at its entrance by a castle and batteries, and at Kingswear tidal wharf has a depth of 6–14 ft. at ordinary low, 20–28 ft. at ordinary spring tide. The Royal navy cadet-training ship *Britannia* is stationed here. The castle is supposed to date from the time of Henry VII. D. was twice burnt by the French—in the reigns of Richard I. and Henry IV. Birthplace of Newcomin, the first great improver of steam-engines (early in the 18th century). Market-day, F. P. 6000; eccles. par. (**D. with Townstall**) P. 5000.

Dartmouth, tn., U.S., Massachusetts, Bristol co., 6 m. SW. New Bedford. P. <4000.

Dartmouth River, riv., Canada, Quebec, Gaspé co., flows SE. into Gaspé Bay, in 48° 50′ N.

Daya, vil., Algeria, 41 m. ESE. Tlemsen. P. (comm.) 10,400.

Dayak, Great, riv., Borneo. See **Kahayan.**

Dayaks, or **Dyaks,** a people of Malay race, who live in the island of Borneo, in houses mostly resting on piles, under the nominal governance of chiefs, who, however, are controlled by the tribal assemblies. Though short of stature and slight in build, they are strong and untiring in activity. The women cultivate the rice, on which they principally live. They are heathens. The gruesome practice of collecting human skulls underlies many of their social institutions, but is being slowly suppressed by the English and Dutch. P. close upon 1,000,000.

Dayamar Peak. See **Nanga Parbat.**

Deace's Rock, islet, Ire. See **Calliaghcrom.**

Deadman Bay, Newfoundland, on the E. ct., in 49° 18′ N., 53° 42′ W.

Deadman's Island, N. America, one of the Magdalen Is., in the Gulf of St. Lawrence.

Dead Sea, properly **Salt Sea,** or **Lake Asphaltites** (Arabic, *Bahr Lut,* 'Sea of Lot'), is the lowest and largest of the three lakes which interrupt the course of the Jordan, in 31° 6′ 20″ to 31° 46′ N., 35° 24′ to 35° 37′ E. Its N. extremity is where the Jordan enters it, 20 m. E. Jerusalem. Having no outlet, its level is determined by the amount of water it receives and the extent of evaporation. The great fissure in which it lies is walled in by a range of nearly parallel mountains, bare and stern, and estimated at 1200–1500 ft. above the lake, and composed of red sandstone overlaid by limestone. Well-marked terraces are seen on its shores at the height of about 785 ft. above the surface, which is about the highest level of the gorge of Arabah, leading S. from the Dead Sea to the Gulf of Akabah, and no doubt marks the level attained by the sea when it had an outlet through that gorge. Its water is clear and transparent, but salt and peculiarly bitter to the taste; its density is so great that a man cannot sink lower than the arms when standing in it. Sea-water contains about 3½, while the Dead Sea contains 24½ per cent. of salt. The mountain of rock-salt, on its SW. side, is called Jebel Usdum (Mount Sodom). Only the lowest forms of animal life exist in its salt and acrid waters, but birds fly over its surface, and animals and plants inhabit its shores. Its scenery, far from being gloomy, is grand, bright, and pleasing. Length, N. to S., 46 m.; breadth in middle, 10 m.; depression below the Mediterranean 1290 ft., but with a difference of about 15 ft. between the lowest summer-level and the high water in early summer (about April), when the Jordan is flooded by the melting of the snows on Mount Hermon; greatest depth of the N. portion 1308 ft.; the S. part is very shallow. Area, 353 sq. m.

Deadwater, stn., Eng., Northumberland, on the N. B. R., in the Cheviot Hills, on the Scotch border, 16½ m. S. by W. Jedburgh.

Deadwood, city, U.S., S. Dakota, Lawrence co., 98 m. N. by E. from the SW. corner of the state, centre of trade for the Black Hills. Connected by rail with Omaha and Sioux City. Alt. signal stn. 4630 ft. (U.S. Signal Office). Mean temp., yr. 41.8° F., Jan. 20.4°, July 64.7°; rfall. (5 yrs.), 26.47 in. P. <3000.

Deaf Hill with Langdale, eccles. par., Eng., Durham, Trimdon and Kelloe par. P. <3000.

Deaf Smith, co., U.S., Texas, in the NW., on the W. frontier, crossed by 35° N.

Deák, comm., Hungary, co. and 32 m. E. Pressburg. P. < 3000.

Deal (called by ancient Britons *Dole,* 'a low open plain upon the sea'), mun. bor. (since 1699), market-tn., seapt., and mun. div., Eng., Kent, St. Augustine div., on the E. ct., opposite Goodwin Sands, 4 m. SE. by E. Sandwich, on the SE. R. and L. C. & D. R., with coastguard stn. There is a light-vessel 9 m. E. by S., and another 5 m. NE. by E. D. is a member of the Cinque Ports of Sandwich, and of late years has been resorted to as a watering-place; noted for its bloaters. The skill and boldness of the D. boatmen shown in relieving distressed vessels is renowned. Of three castles built by Henry VIII., Walmer Castle is the official residence of the Lord Warden of the Cinque Ports, Deal, now a family residence, and Sandwich, now in ruins. Till 1885 D. combined with Sandown in sending two members to parliament. Market-days, Tu. and S. Bor. P. (1801) 5400; (1851) 7100; (1871) 8000; (1891) 8900.

Debir, place named in O. T. See **Thoghret ed Debr.**

Deblin, vil., Moravia, govt. Brünn, dist. Tischnowitz, with silver-mining. P. <2000.

Debo, Deboe, or **Dibbie** (Arab *Baor-Tieb,* the 'Black Lake'), lake, central Africa, western Sudan, 150 m. SW. Timbuktu, traversed by the Joliba (Upper Niger) R. On its SW. shore is a town of same name.

Debor, tn., Turkey in Europe. See **Dibra.**

De Boyne, isls., Louisiade Archipelago, crossed by 10° 45′ S., 152° 25′ E.

Debra Libanos, tn., E. Africa, Shoa, in about 9° 42′ N., 8° 54′ E. Alt. 8120 ft.

Debra Tabor, or **Dobra Tabor,** dist., Abyssinia, Amhara, to the E. of Lake Tsana, contains Samara (alt. 8200 ft.), the cap. of the country.

Debreczen, improperly **Debreczin,** municip., Hungary, cap. prov. Hajduken, 36 m. NNW. Grosswardein, in the midst of a vast sandy plain traversed by downs stretching N. and S.; seat of a Roman Catholic and a Protestant theological college. Alt. 395 ft. Mean temp., yr. 49.3° F., Jan. 27.4°, July 71.0°. P. (1850) 30,900; (1869) 46,100; (1890) 56,900.

De Briel, fortress, Holland. See **Briel.**

Débrousseville, tn., Algeria, prov. and 35 m. E. by S. Oran, on the lower Habra, which supplies water for its irrigation.

Debschwitz, vil., Ger., princip. Reuss of the Younger Line, circle Landrathsamt Gera. P. <4000.

Debtling, or **Detling,** par., Eng., Kent, Medway div., 2 m. ENE. Maidstone, 1½ m. NNW. Bearstead stn., P.O. P. <500.

Debûrieh, vil., Palestine, *Daberath* in the O. T., 32° 42′ N., 35° 22′ E., 4 m. E. by S. Nazareth.

De Castries Bay, Russian Manchuria, on the Pacific coast, 51° 28′ N., 123° 10′ E. The Amur approaches here the coast so as to be separated from D. Bay by but a low ridge 10 m. wide.

Deca'tur, city, U.S., Alabama, Morgan co., on the l. bk. of the Tennessee, 75 m. N. by W. of Birmingham; has recently risen to importance through the development of iron and other manufactures. Alt. 575 ft. (R.R.). P. <3000.

Decatur, tn., U.S., Georgia, Dekalb co., 8 m. E. by N. Atlanta. Alt. 1033 ft. (R.R.). P. <1500.

Decatur, co., U.S., Georgia, in extreme SW.

Decatur, city, U.S., Illinois, Macon co., 39 m. E. Springfield. Alt. 666 ft. (R.R.). P. (1870) 7200; (1880) 9500; (1890) 16,800.

Decatur, city, U.S., Indiana, Adams co., 94 m. NE. Indianapolis. P. <4000.

Decatur, co., U.S., Indiana, N. of 39° N., W. of 85° W.

Decatur, co., U.S., Iowa, S. frontier, crossed by 94° W.

Decatur, co., U.S., Kansas, on the N. frontier, W. of the meridian 100° W.

Decatur, vil., U.S., Michigan, Van Buren co., 52 m. ENE. of the SW. corner of the state. P. <1500.

Decatur, tp. and vil., U.S., Nebraska, Burt co., on the r. bk. of the Missouri, 53 m. N. by W. Omaha. P. <1500.

Decatur, co., U.S., Tennessee, S. of 36° N., bounded on the E. by the Tennessee R.

Decatur, tn., U.S., Texas, Wise co., 55 m. NW. by W. Dallas. P. <2000.

Decazeville, tn., France, dep. Aveyron, arr. Villefranche, 44 m. N. Albi, 12 m. ESE. Figeac, with coal-mines and important iron-works founded about 1825 under the ministry of the Duc Decazes. P. (1872) <5000; (1891) 6700.

Deccan, or **Dukkinshahabazpoor Island.** See **Dakshin Shâhbâzpur.**

Deccan, The ('the south'), region, India, properly the whole region to the S. of the Vindhya and Káimur Mts., though this name is sometimes restricted to the area between the rivs. Narbadá and Kistna.

Deception, stn., Canada, prov. Ontario, on the C. P. R., 1310 m. by rail W. Montreal.

Deception Bay, at the head of the Gulf of Papua, on the S. ct. of New Guinea, in about 144½°–145° E.

Deception Island, Antarctic Ocean, near S. Shetland; volcanic, consisting of alternate layers of ashes and ice, with a deep lake of 5 m. circumference, and hot springs, temp. 140° F.

De Cewsville, vil., Canada, Ontario, co. Haldimand, 3 m. from Cayuga. P. <1500.

Decherd, vil., U.S., Tennessee, co. Franklin, 69 m. NW. Chattanooga by rail. P. <1500.

Dechy, comm., France, dep. Nord, arr. and cant. Douai, with coal-mining. P. <2000.

Decies within Drum, bar., Ire., SW. co. Waterford.

Decies without Drum, bar., Ire., S. co. Waterford.

Decima, Japan. See **Desima.**

Decimomannu, comm., Sardinia, prov. Cagliari, on the Mannu, 10 m. NW. Cagliari. P. <2000.

Decize, tn., France, dep. Nièvre, arr. and 18 m. SE. by E. Nevers, with coal-mines. P. <4000.

Decollatura, comm., Italy, prov. Catanzaro, circle Nicastro. P. 5000.

Deco'rah, city, U.S., Iowa, Winneshiek co., 32 m. WSW. of NE. corner of state. P. <3000.

Deddington, small market-tn. and par., Eng., Oxfordshire, div. and 6 m. S. Banbury, 2 m. W. by S. Aynho stn., PMT.O.; 4271 ac. P. <2000; eccles. par. (**D. with Clifton and Hempton**) P. <2000.

Deddington, post-tn., Tasmania, Cornwall co., on R. Nile, 97 m. N. by E. Hobart.

Dede-Agach, seapt., Turkey in Europe, cap. prov. D.-A., 10 m. NW. of the mouth of the Maritsa, terminus of a branch of the Belgrade-Constantinople Rly.; insecure roadstead, without good anchorage.

Dedeleben, comm., Prussia, prov. Saxony, govt. Magdeburg, circle Oschersleben, dist. Osterwieck. P. <3000.

Dedham, par., Eng., Essex, on the Stour, div. and 5½ m. NE. by N. Colchester, 2½ m. WNW. Manningtree stn., PMT.O. P. <2000.

Dedham, tn., U.S., Massachusetts, Norfolk co., on Charles R., 9 m. SW. Boston. P. 7100.

Dědítz, tn., Austria, Moravia, on R. Hanna, 18 m. ENE. Brünn. P. <2000.

De Don Bermudo, tn., Spain. See **Fuentes de Nava.**

Deduru-oya, riv., Ceylon, flows first N. then W. and enters the Gulf of Manaar about the middle of the W. ct.; great irrigation works in progress.

Dedworth Green, eccles. par., Eng., Berkshire. See **Clewer.**

Dee, riv., Eng. and N. Wales, rises in Merionethshire, near Aran Mowddwy, flows through Lake Bala to Corwen, thence E. into Denbighshire through the Vale of Llangollen and Wynnstay, then turns N., separating the co. Denbigh on the W. from detached part of Flintshire, and Cheshire on the E., passing by Chester, from whence a straight channel, 6 m. long, has been formed to its estuary. It flows into the Irish Sea. Total course, 70 m. Principal affluent, the Alwyn, which joins it at Holt. Its estuary is 14 m. in length, 2 to 6 m. broad, but is encumbered by sandbanks; it has inland communication with the rivers of central England.

Dee, riv., Eng., Yorkshire, N. Riding, rising on Ingleton Fells, in the NW. of the Skipton div., and joining the Rawthey on the l. bk. about 1 m. below Sedbergh.

Dee, riv., Ire., in the NE. of co. Meath and in the middle of co. Louth; flows into Dundalk Bay.

Dee, riv., Scot., Aberdeenshire, rises in Cairngorm Mts., Braemar, and flows with a generally E. course to the North Sea at Aberdeen. Total course 90 m., and with its affluents it drains nearly 1000 sq. m. It rises in the wells of D., at an elevation of 4000 ft., 12 m. from which, at an elevation of 1190 ft., its waters are hemmed into a narrow intricate chasm of rock, flowing over which it forms the 'Linn of Dee.' One of the best fishing rivers in Britain; valley finely wooded. Castletown of Braemar, Balmoral, Ballater, Aboyne, and Kincardine O'Neil are on its banks.

Dee, riv., Scot., Stewartry of Kirkcudbright, flows southward through Loch Ken, and past Carsphairn, Dalry, New Galloway, and Kirkcudbright, and below the latter town joins the Solway Firth, after a course of 50 m., for the last 7 m. of which it is navigable. Contains salmon, trout, pike, perch, and pearl mussels.

Deebridge, post-tn., Tasmania, Cumberland co., on R. Dee, 53 m. NW. by N. Hobart. P. <1500.

Dee, Loch, lake, Scot., Kirkcudbrightshire, in the W., in 55° 5′ N., 4° 24′ W., drained SE. by the R. Dee.

Deece, Lower and **Upper,** two bars., Ire., in the S. of co. Meath. Upper D. on the frontier of the county.

Deel, Dutch, 'part,' 'division.' A frequent termination in Dutch geographical names, as in Baarderadeel.

Deel, electoral div., Ire., co. Mayo, dist. Crossmolina.

Deel, riv., Ire., in the W. of co. Limerick. It flows N., passes Rathkeal, and enters the estuary of the Shannon in 9° W.; is navigable from Asheaton downwards.

Deel, small riv., Ire., in the N. of co. Mayo, flows E. and then S. into the N. end of Lough Conn.

Deele, small riv., Ire., co. Donegal, bar. Raphoe, issues from a small lake called **Lough Deele,** at the height of 871 ft., and flows E. to the R. Foyle.

Deells, electoral div., Ire., co. Kerry, dist. Castlegregory.

Deene, par., Eng., N. div. of Northamptonshire, 11 m. SW. by S. Stamford, 3½ m. E. by S. Gretton stn., P.O. P. <250; eccles. par. (**D. St. Peter**) P. <500.

Deene Thorpe, par., Eng., N. div. of Northamptonshire, 11 m. SW. by S. Stamford. P. <250.

Deenish Island, Ire., off S. ct. co. Kerry.

Deep, small watering-place and fishing vil., Prussia, Pomerania, on the coast, 13 m. WSW. Colberg.

Deep Brook, or **Clement's West,** settlement, Canada, Nova Scotia, in co. and 12 m. from Annapolis.

Deepcar, eccles. par. and vil., Eng., Yorkshire, W. Riding, Hallamshire div., at the confluence of the Don and the Little Don, 6½ m. SW. Barnsley, with stn. (**D. for Stocksbridge**) on the M. S. & L. R., PMT.O. See **Bolsterstone.**

Deep Cove, inlet, Canada, Nova Scotia, co. Lunenberg, with a village of the same name. P. of vil. <1500.

Deep Creek, settlement, New South Wales, Raleigh co., near the coast, 356 m. NNE. Sydney; gold and silver near.

Deep Dale, valley, Eng., Yorkshire, in the NW. of Richmond div. of the N. Riding, opening into the valley of the Tees at Barnard Castle.

Deir Nakhkhâs, site, Palestine, probably the *Ir Nahash* of the O. T., 31° 47′ N., 34° 55′ E., 13 m. NW. by W. El Khulíl (ancient Hebron).

Deister, range of hills, Prussia, Hanover (*q.v.*).

Deiva, comm., Italy, Liguria, prov. Genoa, on the coast, 17 m. WNW. Spezia. P.<2000.

De Kaap, goldfield. See **Kaap.**

Dekalb, co., U.S., Alabama, touching NE. frontier.

Dekalb, co., U.S., Georgia, crossed in extreme NW. by 34° N., and W. of 84° W.

Dekalb, city, U.S., Illinois, Dekalb co., 58 m. W. by N. Chicago. P.<3000.

Dekalb, NE. co., U.S., Indiana, bordering on Ohio.

Dekalb, vil., U.S., Missouri, Buchanan co., 12 m. SW. by S. St. Joseph. P.<1500.

Dekalb, co., U.S., Missouri, in the NW., to the E. of 95° W., crossed in the N. by 40° N.

Dekalb, co., U.S., Tennessee, E. of 86° W., crossed in the N. by 36° N.

Dekin, vil., Africa, Nubia, on the Takazze, formerly the cap. of a state of the same name.

De la Bêche, mt., New Zealand, 9 m. NE. Mount Cook, in the Southern Alps. Alt. 10,058 ft.

Delabole, large slate quarries, Eng., Cornwall, 2 m. W. Camelford, on L. & SW. R., PM.O. See **St. Teath.**

Delagoa Bay (Portuguese, 'bay of water'), large bay, Portuguese E. Africa, crossed by 26° S.; receives the Crocodile, Umbelosi, Tembe, Maputa, and Umfusi rivers. The SE. portion of the bay, sheltered by Inyak penin. and island, forms the admirable natural harbour of Port Melville, but the commercial port of Lourenço Marques, whence the railway starts for the eastern parts of the Transvaal, at the head of the bay, can be approached only by narrow and tortuous channels, and at low tide access is hindered by a bar at Reuben Point (mouth of English R., the estuary of the united Umbelosi and Tembe Rivs.), 30 ft. deep at high water, ordinary spring tides, when the rise of the tide is 15 ft. Vessels loaded and discharged by lighters.

Delahasey, P.O., Ire., 3 m. from Balbriggan, co. Dublin.

Delalah, co., New South Wales, on the N. frontier, crossed by 143° E.

Delambra, small isl., W. Australia, off the NW. ct. of De Witt's Land, in 20° 28′ S.

Delamere, par., Eng., Cheshire, Eddisbury div., 7½ m. SW. by W. Northwich, 1 m. S. of its stn. on the Cheshire Lines Rly. P.<750; eccles. par. (**D. St. Peter**) P.<1500.

Delamere Forest, a royal (ancient) forest, Eng., Cheshire, in the N. of the Eddisbury div.

Delanasan, place with meteorological stn., Fiji Is. Mean temp. (5 yrs., 1876-80), yr. 79.3°, Jan. 81.0° F., July 76.7°; rfall. (14 yrs., 1871-84), amount, 101.13 in.; greatest fall in one day, 14.95 in.; number of days of rain, 154.

Deland, tn., U.S., Florida, co. Volusia, 60 m. S. St. Augustine; popular health resort; sulphur springs. P.<1500.

Delaney, small mining locality, Queensland, Gilbert co., on Etheridge R., 220 m. WNW. Townsville. P.<1500.

Delano, bor., U.S., Pennsylvania, co. Schuylkill, 39 m. N. Allegheny by rail. P.<1500.

Delano, co., U.S., S. Dakota, bounded on the N. by 45° N., between 102° and 103° W.

Delatite, co., Victoria, crossed by 37° S. and 146° E.

Delatyn, vil., Austria, crownland Galicia, 61 m. WNW. Czernowitz, with salt springs. P.<3000.

De Lauwers, channel, Holland, prov. Groningen, between two small islands midway between the larger islands of Schiermonnikoog and Rottumeroog.

Delavan, city, U.S., Illinois, co. Tazewell, 157 m. SW. Chicago by rail. P.<1500.

Delavan, vil., U.S., Wisconsin, co. Walworth, 57 m. NE. Freeport by rail. P.<3000.

Delaware, co., U.S., Indiana, N. of 40° N., and W. of 85° W.

Delaware, co., U.S., Iowa, between 42° and 43° N., and W. of 91° W.

Delaware, riv., U.S., rises in Catskill Mts., New York, flows S., dividing this state and New Jersey from Pennsylvania, and finally expands into D. Bay, between New Jersey on the E. and D. state on the W. Course, 300 m. Area of basin, 11,500 sq. m. Principal affluents, the Popacton and Lehigh. It is navigable from the ocean to Philadelphia, 50 m. from D. Bay, 120 m. from the ocean, for large ships, and for sloops 35 m. farther, to Trenton, where navigation is interrupted by falls, and above which rapids (navigable in high water by small boats) occur at frequent intervals as high as Easton (60 m. farther). See **Delaware Watergap.**

Delaware, one of the thirteen original states of the U.S., and the smallest except Rhode I., situated between Maryland and D. Bay. Surface hilly in the extreme N., which is the only part of the state having any important minerals (china and other clays, granite, and a little brown hematite); elsewhere level; on the bay shore nearly one-twentieth of the entire surface composed of tidal marshes, parts of which, however, are dyked and reclaimed; in the S. Cypress swamp, yielding fine timber; the Atlantic shore, on which there are several favourite wateringplaces (Rehoboth Beach, &c.), bordered by long and narrow sandy ridges. Chief river the D., in the E. The Brandywine, a romantic stream, is famous for the revolutionary battle of September 1777. Among the early settlers (first half of the 17th century) were Dutch and Swedes, and for a time the present D. was known as New Sweden (*Nya Sverige*). Christiana Creek, on which Wilmington stands, on the site of a Swedish fort called Fort Christina, still recalls Queen Christina of Sweden, who sent out a body of settlers to found a country 'in which every man should be free to worship God as he chose.' It afterwards passed into the hands of the Dutch, by whom it was handed over with New Amsterdam (New York) to the English. Its name commemorates Earl de la Warr, first governor of Virginia. Area, 2050 sq. m. P. 168,500.

Delaware, co., U.S., New York, in the SE., bounded on the SW. by the Delaware and the W. branch of the Delaware, crossed by 75° W., and in the S. by 42° N.

Delaware, city, U.S., Ohio, D. co., on Whetstone Creek, 23 m. N. by W. Columbus. P. (1880) 6900; (1890) 8200.

Delaware, co., U.S., Pennsylvania, on the Delaware R., to the W. of Philadelphia.

Delaware Bank, shoal, in the Atlantic Ocean, to the E. of Trinidad I., in 10° 43′ N., and 60° 5′ W.

Delaware Bay, U.S., New Jersey, at the mouth of Delaware R., SW. of New Jersey, and E. of Delaware; discovered by Hendrik Hudson in 1609. A harbour of refuge has been formed at its mouth (S. side) by the construction of a magnificent breakwater (completed 1828), stretching WNW. from Cape Henlopen.

Delaware City, tn., U.S., Delaware, Newcastle co., on the r. bk. of the Delaware, 11½ m. S. by W. Wilmington. P.<1500. See **Chesapeake and Delaware Canal.**

Delaware Mine, vil., U.S., Michigan, co. Keweenaw; has mines of copper. P.<1500.

Delawares, tribe of Indians of the Algonquin family, called

in their own language Lenni Lenape, originally found on the banks of the Delaware and Schuylkill, now mostly in the Indian Terr.

Delaware Watergap, vil., U.S., Pennsylvania, co. Monroe, on the Delaware R., where it passes through the Kittatinny Range, in 40° 59′ N., flowing through a narrow gorge bounded by cliffs about 1300 ft. high. A favourite holiday resort.

Delawarre, vil., Canada, Ontario, Middlesex co., on R. Thames, 11 m. SW. by W. London. P.<1500.

Delby Mount, mt., Brit. India, Madras, on W. ct., in 12° N.

Delden, tn., Holland, prov. Overijssel, 8 m. WNW. Enschede. P.<2000.

Deleau Bay, Newfoundland, on the S. ct., N. of Fortune Bay, in 55° 32′–40′ W.

Delegate, post-tn., New South Wales, Wellesley co., 65 m. NW. by W. Cape Howe, with gold-mining. P.<1500.

Delémont, Ger. **Delsberg,** tn., Switzd., cant. Bern, in the Jura, 17 m. SW. Basel, on the Birs; has iron mines and an iron industry, and carries on watch-making. Roman remains. P.<4000.

Delfshaven, tn. and comm., Holland, prov. S. Holland, on the r. bk. of the Maas, 2 m. W. Rotterdam, with a canal to the Hague. The patent slip at Fyenoord is 180 ft. long, with lifting power of 1200 tons. P. (of comm.) 13,000.

Delft ('a town intersected by canals,' from *delf*, Teutonic, 'a canal'), tn. and comm., Netherlands, prov. S. Holland, cap. cant., 9 m. NW. Rotterdam, 5 m. SSE. The Hague, on the canal between it and The Hague. Has a palace in which Prince William I. of Orange was assassinated, now used as a barrack; an arsenal, and school of military engineering. It has manufactures of earthenwares, but most of the coarse table goods known as 'Delft ware' are made in England. The birthplace of Grotius, Leeuwenhoek, and Von Heinsius. P. (1869) 21,500; (1889) 28,300.

Delft Island, Ceylon, off the N. ct., in Palk Strait, Indian Ocean. Length, 7 m. by 3½ m.

Delfzijl, fishing tn., Holland, prov. Groningen, on the Dollart (estuary of the Ems), 17 m. ENE. Groningen. The Outer Harbour (Buitenhaven), tidal, has a depth at entrance, ordinary springs, of 21½ ft. high water, 12½ ft. low water; depth at quayside, high water 16½ ft., low water 7½ ft. The Inner Harbour (Binnenhaven) has a depth of 17.5 ft. over sill, depth within, 14¼ ft. A new basin, constructed with a mean depth of 16–17 ft. at low water, was near completion in April 1893. The D. Canal, between Groningen and D., is available for vessels drawing 13 ft.; length, 16 m. P. (of comm.) 6600.

Delga, or **Delje,** tn., Upper Egypt, on the Bahr Yusuf, in 27° 35′ N. P. (1882) 8200.

Delgado, Cape, headland, E. ct. of Africa, in 10° 41′ S.

Delgany, par. and tn., Ire., NE. co. Wicklow, bar. Rathdown, 5 m. S. Bray, 2 m. W. of its stn. (**Greystones and D.**) on the Dublin, Wicklow, and Wexford Rly., PMT.O. Par. 3968 ac., P.<2000; tn. P.<250.

Delhi, tn., Brit. India, Punjab, dist. D., 38 m. SW. Meerut, 110 m. NNW. Agra, the easternmost of the chief towns of the prov., and a place of great note in Indian history. Standing on a fertile plain on the r. bk. of the Jumna, which was formerly navigable to this place by large boats, it occupies the first favourable station for a great capital on the route of an army entering India by the north-western passes. Its site has accordingly been that of many successive capitals, but it attained its greatest glory as that of the Mughal Empire, after the seat of government of that empire had been transferred thither from Agra in 1637 by Sháh Jahán. It was this emperor who built the present town, who first constructed the present fortifications (including the wall of solid stone which encloses it on three sides), and who adorned it with some of its finest buildings, among these his own palace and the great mosque (Jamá Masjíd). Among the principal industries are the making of gold, silver, and tinsel filigree-work and fine muslins. D. was long the terminus of the East Indian Rly., which is now continued northwards. During the mutiny of 1857, D. was held by the rebels, and besieged for three months by the British troops, who entered on Sept. 14, and after a sharp contest occupied the town on the 20th, the formal surrender taking place on the 21st. Alt. 718 ft. Mean temp., yr. 77° F., Jan. 59°, June 93°; rfall., yr. 27.6 in., June–Sept. 23.3 in. P. (1870) 154,400; (1881) 173,400; (1891) 192,600; Hindus, 108,100; Moham. 79,200.

Delhi, or **Fredericksburg,** vil., Canada, Ontario, co. Norfolk, on Rowan R., 12 m. from Simcoe by rail. P.<1500.

Delta, from the Greek letter Δ, a name applied to alluvial tracts enclosed between the bifurcating branches of a river and their common recipient. Deltas are called *fluvial*, *lacustrine*, *mediterranean*, or *oceanic*, according as the streams which form them fall into a river, lake, or sea. They are simple deltas when the stream is divided into two branches only, and compound when intersected by other branches. The principal deltas are those of the Nile, Ganges, and Niger. *Deltaic branches* of a river are those which enclose a delta; and *deltaic islands* are those formed by the branches of a compound delta. The deltaic arms of a river are apt to change their direction at frequent intervals, their beds and banks being gradually raised by the deposition of sediment, until at last one of the banks bursts and a new channel is formed. According to Credner (*Ergänzungsheft*, No. 56, to *Petermann's Mitteil.*; Gotha, 1878)

the following are the areas of the largest deltas of the world (for the sake of comparison, Ireland, 32,500 sq. m.):—Ganges-Brahmaputra, 31,880 sq. m.; Mississippi, 12,300 sq. m.; Nile, 8569 sq. m.; among others, Danube, 8000 sq. m.; Rhone, 290 sq. m.; Aude, 77.2 sq. m.

Denbigh, Welsh *Din-bach,* 'little fort,' tn., parl. bor. (1 member) and mun. bor. (since the time of Edward I.), Wales, in the NE. and cap. of Denbighshire, on the L. & NW. R., with manufactures of gloves and shoes; a free grammar school (1727) and blue-coat school (1714). Market-days, W. and S. Bor. P. 6500; eccles. par. (**D. with Llanfarchell**) P. 5200.

Denbighshire, co., N. Wales, with coast-line on the Irish Sea, between Flint and Carnarvon, belonging wholly to the diocese of St. Asaph; cap. Denbigh; divided into the following parl. divs:—

	Acres.	Pop. 1891.
Eastern	59,966	47,317
Western	347,794	46,339
Parl. bors.[1]	15,717	24,216
Total[2] . . .	423,477	117,872

1 Denbigh dist. of bors. (Denbigh, Holt, Ruthin, and Wrexham).

2 The administrative county includes part of Colwyn Bay and Colwyn urban sanitary dist. in the ancient county of Carnarvon, and excludes part of Rhyl urban sanitary dist. in the administrative county of Flint. Area, 424,435 ac. P. 118,843.

In large part mountainous, especially in the W. (Mynydd Hiraeth) and SW. (Mount Berwyn, with Moel-Sych, 2716 ft.), where the surface, composed chiefly of Silurian and Ordovician or Cambrian rocks, is fit for little but sheep pastures, and the pop. is very scanty. The more populous parts are on the N. coast, and in the E.—in the Vale of Clwyd, the Vale of Llangollen (upper part of the Dee valley), and still more in that part of the co. which is interposed between the two parts of Flint (forming the eastern of the two parl. divs. into which the co. is divided), and which includes a productive section of the coal-measures; and besides coal, which is mined at Wrexham, Chirk, and Ruabon, produces fire-clay and red-clay (for terra-cotta) at Ruabon, and lead and zinc ore at Wrexham. Of the other minerals of the county, the most important is slate, quarried at Llangollen and Glyn beiriag. For agricultural statistics, see **Appendix,** pp. 7–9. The Upper Dee valley in D. is traversed by the G. W. R., which crosses the E. parl. div. from NE. to SW., and the Vale of Clwyd is traversed by the L. & NW. R., which also has a line along the coast and up the Vale of Conway on the W. border of the county. Area E. parl. div., 59,966 ac., P. 47,317; area W. div., 347,794 ac., P. 46,339; Denbigh dist. of bors., area 15,717 ac., P. 24,216. Total, 423,477 ac., P. 117,872. See also **Wales,** table.

Denman, postal-stn., New South Wales, Brisbane co., 70 m. NW. by W. Newcastle. P. <1500.

Denmark, the smallest of the Scandinavian countries, consists of the penin. of Jutland and several islands—Seeland (Själland), Funen (Fyen), Laaland or Lolland, Falster, Möen, Langeland, Taasinge, Ärö, Amager (Amak), Samsö, Läsö, Anholt, and smaller islets—lying between the Baltic (East) Sea and the North (West) Sea, together with Bornholm in the Baltic and Fanö in the N. Sea. The extremities touch 54° 33′ N. lat. in Falster, and 57° 45′ in the Skaw (Skagen), and 8° 5′ E. long. in Blaavands-huk, and 15° 2′ in Bornholm. Jutland is separated from Sweden by the Cattegat, and from Norway by the Skagerrack. The Baltic and North Seas are connected by three waterways: (1) on the E. side, between Seeland and Sweden, is the Sound or Öresund, 50 m. long, 2½ to 18½ m. wide, and minimum depth 23 ft.; (2) the Great Belt, between Seeland and Funen, 70 m. long, 11 to 19 m. wide, and 50 to 100 ft. deep; (3) the Little Belt, on the W., between Funen and the mainland (Jutland and Schleswig), 50 m. long, 1½ to 19 m. wide, and 30 ft. deep. Navigation is always dangerous in the sea-waters round the Danish islands and penin. owing to their shallowness, the swift currents that set between the islands, and the sandbanks that run up both sides of Jutland and lie athwart the various straits; the coasts (2500 m. long in all) are, however, studded with a great number of lighthouses and rescue stations. The subdivisions of D. are shown in the following tables:—

I.

Population of Denmark in thousands by bailiwicks (amter), Feb. 1, 1890.

Copenhagen[1] city	313	Svendborg[3]	121	Viborg[4]	101
Copenhagen[1] amt	153	Odense[3]	136	Ringkjöbing[4]	99
Frederiksborg[1]	85	Vejle[4]	112	Ribe[4]	79
Holbæk[1]	94	Aarhus[4]	157	D. Proper	2,172
Sorö[1]	89	Randers[4]	110	Faroe Is.	13
Præstö[1]	101	Aalborg[4]	105	Greenland	10.2[5]
Bornholm	39	Hjövung[4]	110	Iceland	69.2[5]
Maribo[2]	101	Thisted[4]	69	Danish W. Indies	34[6]

[1] These form the isl. of Seeland, with Samsö, Möen, and other small islands adjacent.
[2] Composed of the isls. of Laaland and Falster.
[3] Forming Funen with Langeland, Arö, &c.
[4] These form Jutland. [5] 1888. [6] 1880.

II.

Area of Denmark by natural divisions, with the population in thousands at different censuses, and the increase per cent. per annum between the successive census years.

	Area in sq. m.	Population on the 1st of Feb.				
		1801.	1840.	1860.	1880.	1890.
Copenhagen, city		101	121	155	235	313

Incr. per cent. per ann.			0.85	0.99	1.19	1.45

[1] Total insular bailiwicks: total pop. (1890) 1,230,000, or 244 per sq. m.; exclusive of Copenhagen, 917,500, or 182 per sq. m.
[2] Including adjacent isls. [3] Or 97 per sq. m. [4] Or 147 per sq. m.

The **surface** is everywhere low, the highest altitude—Ejer Bavnehöj, on the E. side of Jutland—not exceeding 560 ft., and more than one-half of the land-surface lying lower than 100 ft. above sea-level. Structurally both islands and penin. form part of the great plain of Northern Europe, and consist chiefly of softly undulating plains that slope gently seawards E. and W., and are diversified by extensive heaths, moors, marshes, and sand-dunes. The heaths cover about 14 per cent. of the entire area, and are mostly uncultivated, and probably uncultivable, being tracts of sandy soil, mixed with loose stones, resting on a basis of Cretaceous origin; they occupy the middle parts of Jutland throughout its entire length. Everywhere in the valleys and lower-lying parts, the soil of which is generally good clay or loam, there are numerous small lakes, moors, and marshes, some of these last even reaching 27 sq. m. in extent. A string of salt-water lagoons—Ringkjöbing Fjord, Nissum Fjord, and Thyborön Canal—run along the W. shores of Jutland; and parallel with them a belt of sand-dunes or downs, which cover some 230 sq. m. in all, and attain an altitude of 100 ft. Geologically the SW. of Jutland rests upon different strata from the rest of the kingdom, viz., upon a Lignite (Tertiary) formation. Bornholm (*q.v.*) is in every way an exception. **Streams** are numerous, but all small and short, the longest, Gudenaa, in Jutland, being barely 100 m. long. The Sus, 32 m., is the longest in Seeland, and the Odense, 23 m., the longest in Funen. The shores of the islands, as well as the E. side of Jutland, are, however, broken by many **bays, fjords** (long narrow indentations), and harbours. Liim Fjord, 100 m. long, in the N. of Jutland, practically cuts it in two, and towards the W. side expands into a large lake with several ramifications. Proceeding S. along the E. coast of the penin., there follow—Mariager Fjord, penetrating inland 23 m.; Randers Fjord, 14 m.; Kalö Bay, Horsens Fjord, Veile Fjord, and Kolding Fjord. In Funen, Odense Fjord and Kjerteminde Bay on the N. coast. In Seeland, Ise Fjord, penetrating from the N., with two long arms; Kjöge and Faxe (Prästö) Bays on the E.; and Vordingborg Bay, between Seeland and Laaland. Owing to its low and maritime situation, D. has a more temperate **climate** than the latitude would indicate. The means of temperature at Copenhagen, which well represents the kingdom, are (39 yrs.) Jan. 31°, July 63°, yr. 46.6°. Cool breezes frequently blow in off the sea in all parts of the country. During the summer months the W. side of Jutland suffers from chilling mists (*havguse*), which drift in upon the coast shortly before sunset; and after very warm summers the islands of Falster and Laaland are wont to be visited by malarial fever. The rainfall at the cap. averages during the twelve months 21½ in. (45 yrs.). D. is essentially an **agricultural country**; the land is now in process of passing into the hands of peasant proprietors. Setting aside as uncultivated about 20 per cent. of the total surface, including 14 per cent. heaths, the remainder is divided amongst meadows and grass-land, 41 per cent.; arable crops and gardens, 33⅓ per cent.; and forests, 5⅓ per cent. The cereals grown in largest quantities are oats, barley, and rye; then come wheat, buckwheat, and potatoes, and various green crops for fodder. Cattle, swine, and horses are bred with considerable care and in large numbers. Sheep are proportionately fewer. The greatest pains and highest skill are devoted to the making of butter, the most valuable of all the native productions. The beech flourishes admirably on the sandy soil of D., and coniferæ are being diligently planted in many parts of the country. The other **forest trees** are birch, oak, elm, poplar, mountain-ash, and willow. **Fish**—herring, mackerel, cod, salmon, plaice, flounders, pike, oysters, lobsters—abound in the seas and fjords, but are not taken to the extent they could be and should be. Sharks, seals, and porpoises visit the coasts. The **wild animals** are almost exclusively game, as the fox, otter, badger, hare, and numerous aquatic birds. There are no **minerals** to speak of, except clays and sand and some anthracite. Besides imported coal, the people use for fuel, turf, heather, and seaweed. In consequence of the lack of easily obtainable fuel, there is not much **manufacturing industry.** The making of machinery, iron-smelting, the production of pottery, distilling and brewing, and the manufacture of beetroot sugar, are the only branches of note, though bricks, tobacco, gloves, and cloth are also made or prepared. There is, however, a good deal of domestic industry—the weaving of linen, and making of hosiery, sacking, wooden shoes, and lace. **Communication** is effected as much by water as by rail and road: sixty out of the seventy towns of the kingdom stand on the sea or on navigable rivers, and steamboats ply constantly between the islands, and at regular intervals, to Christiania, Malmö, Hamburg, Stettin, Antwerp, London, Amsterdam, Hull, Kiel, Lübeck. There are some 1250 m. of railway, of which 1000 are state property, main lines crossing the larger islands, and running down each side of Jutland to connect with the German system of Holstein; also about 4500 m. of driving roads, 3700 m. of telegraph lines, and 10,000 m. of wires. The **exports** of D. consist almost entirely of agricultural produce. The trade in butter has grown at an enormous rate, the export value of this commodity (with eggs, bacon, and lard) reaches six millions and a half sterling annually. Adding to this the value of the live stock (cattle, sheep, horses, pigs) and cereals, the aggregate value (which goes on steadily increasing) of all the exports is £13,000,000. The total **imports** are valued at £17,000,000, and consist principally of textiles, grain and flour, metals, groceries, coal, butter, &c. (for re-exportation), and timber. In respect of value, 36⅓ per cent. of the aggregate foreign trade of D. is carried on with the United Kingdom, 26½ per cent. with Germany, 14½ per cent. with Sweden and Norway, 5⅓ per cent. with Russia, and 4⅓ per cent. with the United States. D. gets her imports principally from the countries named, but a larger quantity from Germany than from the United Kingdom, but the United Kingdom alone receives much more than one half of D.'s aggregate exports. D. has a commercial fleet of 3500 vessels of 300,000 tons burden. The bulk of the trade passes through Copenhagen. **Money, weights, and measures.**—The unit of currency is the crown (*krone*) = 1s. 1⅛d., and divided into 100 *öre*. The Danish ell (2 ft.) = 2.06 English ft.; the Danish mile = 4.78 English miles. The *pund* = 1.102 lb. avoir.; 100 pund make a *centner*. One *tönde* of land = 14,000 sq. ells, or 1.36 acres; but land is usually taxed according to its productiveness, reckoned in *tönde* of hard grain. One *tönde* of corn = 3.8 bushels; of liquids, 29 imperial gallons; of butter, 247 lbs.; of coal, 4.7 bushels. The **inhabitants** belong to the Teutonic stock, and are generally described as industrious and persevering, but phlegmatic and somewhat slow, with a tendency to melancholy, which seems to be borne out by the high rate of suicidal deaths—26 in 100,000 of the pop. every year. One-third of the pop. is urban, and quite one-half of these live in Copenhagen, the cap. From 8000 to 10,000 Danes **emigrate** every year, and nearly all go to the United States. The great bulk of the people profess the creed of the Lutheran Church. There are seven bishoprics, of which that of Seeland ranks as the first. According to the revised constitution of 1866, the executive **government** is vested in a king and seven ministers, who form the Council of State, and are responsible to the *Rigsdag* or Diet. The Diet is composed of the Upper House or *Landsthing*, and consists of 66 members, 12 life members nominated by the crown and 54 elected indirectly by the people for terms of eight years, one half retiring every four years. The 102 members of the Lower House or *Folkething* are chosen by universal suffrage for terms of three years; there should be one representative for every 16,000 inhabitants. The national **income** and **expenditure** balance at a little over £3,000,000 every year. All able-bodied men of the age of twenty-two and upwards are liable to serve in the **army** for eight years; but only 11,000 are drafted annually for some few weeks' training with the colours. They are attached to the reserve for a further term of eight years. The **fleet** embraces 40 to 50 vessels of all kinds, and is manned by some 1400 men. Copenhagen is the only fortress, and the naval depôt and arsenal. **Education** is compulsory and good. There is an excellent university at Copenhagen, and besides two academies at Sorö and Herlufsholm (Seeland), a number of colleges and grammar, training (normal), technical, and special schools. Less than one-half per cent. of the annual recruits are set down as illiterate. The rate of illegitimacy stands at 10 per cent. of the births. **Possessions.**—The Faroe Is. are an integral part of the kingdom of D., sending one member to each house of the Diet. Iceland (*q.v.*) has a constitution of its own. Besides these, D. rules Greenland and the islands of St. Croix, St. Thomas, and St. John, in the W. Indies. The only **towns,** except the cap., that have more than 10,000 inhabitants each—none exceed 34,000—are Aarhus, Odense, Aalborg, Randers, Horsens, Elsinore (Helsingör), and Fredericia. **History.**—D. is first known as the home of the Cimbri. When the Angles and Jutes left it in the 5th century to conquer England, their place was taken by the Danes. In their history three periods of greatness are clearly marked—(1) the Viking period, which culminated in the reign of the Great Canute; (2) the time of the first two Waldemars (1157–1227), when D. was mistress of the Baltic; (3) the 14th century, distinguished by the duel between Waldemar IV. and the Hanseatic League, and the imperial Margaret's union of all the Scandinavian lands by the Treaty of Calmar (1397). From the early part of the Thirty Years' War, D. was compelled to yield the first place in the Baltic to Sweden, though she retained possession of Scania until 1660, of Norway until 1814, and of Schleswig-Holstein until 1864. A good popular account of D. is given in English in Weitemeyer's *Denmark*, 1891. The best maps are General-stabens topografiske Kaart, 1:80,000 and 1:40,000. [**J. T. B.**]

[1] The administrative county (which includes part of the urban sanitary dist. of New Mills in the ancient county of Chester, and excludes part of the mun. bor. of Burton-on-Trent in the administrative county of Stafford) has an area of 657,550 ac. P. 520,914.

The county is mountainous in the N., and low-lying in the S., where the rocks belong almost wholly to the New Red Sandstone, and the soil is very rich. The NW. is occupied by the S. end of the Pennine chain, called the High Peak, or D. Highlands, with its culminating point, The Peak (alt. 1880 ft.), and the Kinder Scout (alt. 2088 ft.). This tract, which belongs mainly to the Carboniferous Limestone series, and is flanked on the E. within the county by the Millstone Grit and the Coal Measures, forms the watershed between the Mersey on the W. and the Trent and Don on the E., and is one of the most beautiful dists. of England. The chief rivers are the Trent, which crosses the county in the S., and its tribs. the Derwent and Dove, both of which flow S. through charming valleys, the Derwent through the middle of the county, and the Dove on the Staffordshire boundary. Among minor rivers are the Erewash, another trib. of the Trent, traversing an important mining valley, and in the NE. the Rother, the chief trib. of the Don. The minerals of D. are important; coal is mined at many places, the principal being Chesterfield, Alfreton, Denby, Eckington, Ilkeston (at all of which there are blast-furnaces), Glossop, Pinxton, Derby, Heanor, Dronfield, and Staveley. Among other minerals are gypsum at Aston; lead ore at Wirksworth, Harthill, Griffe Grange, Long Rake, Youlgreave, Darley, Great Hucklow, Brassington, and Crich; barytes at Bonsall, Brassington, Wirksworth, Griffe Grange, Castleton, Bradwell, &c.; fire-clay at Woodville, Derby, Chesterfield, and Brassington; and fluor spar at Castleton, Ashover, Maiden Rake, Bradwell, and Crich. The manufactures are cotton, silk, worsted, hosiery, porcelain, lace, marble and spar ornaments, and copperas; there is also a considerable trade in malting and brewing, and some large iron-foundries. The chief railway system the Midland, with numerous branches; but the M. S. & L. R. and the L. & NW. R. have lines in the NW., the G. N. R. and the N. Staffordshire Rly. in the SW. An important line across the N. of the county to the S. of The Peak, through the vale of Edale, between Chapel-en-le-Frith and Dore and Totley, was opened June 1, 1894. The Trent is navigable throughout its course in the county. Parallel to it runs the Trent and Mersey Canal; and in the SE. of the county are the Derby Canal, the Erewash Canal, continued by the Cromford Canal, and the Nutbrook Canal. The only parl. bor. in the county is Derby. The antiquities are Castleton (Peveril's Peak) and Codnor Castles, with remains of Haddon Hall, Dale Abbey, and Gresley Priory, and traces of British and Roman roads, Roman baths, and a Roman altar at Haddon Hall. See **England,** table.

Dere, Turkish, 'valley.'

Derecske, comm., Hungary, co. Bihar, 13 m. S. Debreczen, with fine pearl mussels in the brook Kék Kallo; soda-springs near. P. 8300.

Deregez, dist., on NE. frontier of Persia, crossed by 59° E., inhabited by a Kurd colony planted by Shah Abbas about 1600 for defence against the Turkomans.
